# Non Technical Summary

## Introduction

This document is the Initial Sustainability Appraisal Report for the Sustainability Appraisal (SA), incorporating Strategic Environmental Assessment (SEA), of the Blaenau Gwent Local Development Plan (LDP). Under the regulations implementing the provisions of the Planning and Compulsory Purchase Act 2004, a SA is required for all LDPs in Wales. The purpose of SA is to promote sustainable development through better integration of sustainability considerations in the preparation and adoption of plans. The Regulations stipulate that SAs of LDPs should also meet the requirements of the SEA Directive.

The Initial SA Report is a key output of the appraisal process presenting information on the effects of the planning document for public consultation. It incorporates and subsumes the Environmental Report that is required under the SEA Directive. Table 2.1 demonstrates how the requirements of the SEA Directive have been met.

## Methodology

The methodology adopted involved the completion of the SA stages A, B and C and associated tasks as outlined in Figure 1.2 and briefly comprises the following steps:

### **Stage A: Setting the Context and Objectives, Establishing the Baseline and Deciding on Scope**

- A1: Other Relevant Plans and Programmes
- A2: Baseline Data
- A3: Sustainability Issues
- A4: Sustainability Appraisal Framework
- A5: Consulting on the Scope of the Sustainability Appraisal

### **Stage B: Developing and Refining Options**

- B1: Testing the LDP Objectives against the Sustainability Appraisal Framework
- B2: Developing the LDP Options
- B3: Predicting the Effects of the Preferred Strategy
- B4: Evaluating the Effects of the Preferred Strategy
- B5: Considering Ways of Mitigating Adverse Effects and Maximising Beneficial Effects
- B6: Proposing Measures to Monitor the Significant Effects of Implementing the LDP

### **Stage C: Preparing the Sustainability Appraisal Report**

## The SA Framework

The SA Framework is a key component in completing the SA by synthesising the baseline information and sustainability issues into a systematic and easily understood tool that allows the prediction and assessment of effects arising from the implementation of the LDP. This was consulted on as part of the SA Scoping Report consultation. The results of this were integrated into the report, and are outlined in Appendix A.

The final SA Framework is set out in Table 3.4. This includes the final set of SA objectives which are:

1. To promote economic growth and strengthen and diversify the local economy
2. To increase levels of local employment and ensure distribution of opportunities

3. To support the development of a strong tourism economy in Blaenau Gwent, complementary to the regional offer
4. To enhance the viability and vitality of town centres
5. To meet identified housing needs
6. To improve the quality of Blaenau Gwent's housing stock
7. To secure the delivery and maintenance of quality affordable housing
8. To improve educational attainment and increase skills levels
9. To improve accessibility to education, leisure, employment, health, homes and community services for all sectors of the community
10. To promote community health, social care and well-being
11. To reduce crime, social disorder and fear of crime
12. To protect and enhance the Welsh culture
13. To encourage modal shift from private transport to sustainable transport
14. To protect and enhance biodiversity across Blaenau Gwent
15. To conserve and enhance the heritage assets of Blaenau Gwent and their settings
16. To make the best use of previously developed land and existing buildings to minimise pressure for greenfield development, where this will not result in damage or loss to biodiversity
17. To conserve soil resources and their quality
18. To reduce emissions of greenhouse gases, in particular carbon dioxide
19. To reduce waste generation and maximise reuse and recycling
20. To maintain current air quality
21. To maintain current low levels of vulnerability of all development to flooding
22. To promote the use of sustainably sourced products and resources
23. To increase energy efficiency and generation and use of renewable energy across the County Borough
24. To conserve and enhance surface and ground water quality
25. To protect the quality and character of the landscape and enhance where necessary

## SA Baseline Data and Trends

In order to determine the significance of predicted effects, the baseline data and trends analysis in Table 3.5 was used alongside the SA Framework during the appraisal stage. In addition, an Assessment Rationale was developed which ensures objectivity and consistency in making judgements during the appraisal stage (Table 3.6).

## Testing the LDP Objectives

Initially, the LDP objectives were tested for compatibility with the SA objectives (see Figure 4.1). This helped to consider to what degree they are in accordance with sustainability principles, with a view to developing and refining the LDP objectives through an iterative process. The LDP objectives were broadly compatible with the SA objectives, although many of the objectives could be compatible subject to the nature of their delivery.

Recommendations were made to improve the objectives in terms of sustainability, and the final set of objectives to guide the LDP Preferred Strategy is as follows:

1. Develop Ebbw Vale as the main service and retail hub for the County Borough.
2. Create a network of vibrant district/local centres (secondary hubs), well linked to the main hub of Ebbw Vale, that provide a range of local services and facilities for their local communities.
3. Support and deliver the regeneration of the former Ebbw Vale Steelworks ensuring that the benefits are spread across the borough.
4. Increase economic activity through facilitating diversification of the economic base and support for the manufacturing sector by encouraging specialisation.
5. Provide a range of employment sites and premises to meet the needs of businesses of all sizes in manufacturing, the technological and service sectors.
6. Stem out-migration and attract people to the area to create a more balanced population.
7. Provide a range of types and tenures of new homes to meet local housing needs and attract people to the area.
8. Improve accessibility to services through the promotion of sustainable modes of transport, particularly, public transport, walking and cycling.
9. Improve education levels and skills through supporting infrastructure development of the Learning Campus, new schools and integrated education services, including life-long learning.
10. Create an accessible network of green open spaces and high quality leisure infrastructure to promote participation in sport and active recreation to improve health and well-being.
11. Capitalise on the unique landscape and natural heritage, foster sustainable tourism and promote community pride.
12. Protect, enhance and manage the diversity of the biodiversity resource of Blaenau Gwent through the identification of ecological corridors.
13. Raise the standard of design to improve the quality of the physical and natural environment; and protect and enhance Blaenau Gwent's historic and cultural environment.
14. To minimise further climate change contributions and mitigate its predicted effects on the County Borough.

## Strategic Options and Identification of the Preferred Option

The process of the development of strategic options by the Council's Planning Policy Team is outlined in section 5. Broadly, the options were:

- Option 1: Regeneration (continuation of the Unitary Development Plan Strategy)
- Option 2: Growth and Regeneration
- Option 3: Balanced and Interconnected Communities

Table 5.1 provides a summary of the comparison of options under the three sustainability dimensions: social, environmental and economic. Details of the assessments are provided in Appendix E.

The appraisal of the strategic options found Option 2 to be the most sustainable. The option is envisaged to potentially create a diverse economic base, improving employment opportunities as well as access to a range of services and facilities.

## Assessment of Preferred Strategic Policies

Following confirmation of the strategy direction a draft set of Strategic Policies were developed by the Council in order to deliver the objectives of the LDP.

Table 6.1 presents the 17 Strategic Policies which have been assessed. The purpose of the assessment was to derive the sustainability implications in terms of implementing the policies and to identify areas for improvement which will mitigate predicted negative significant effects.

Overall, the Preferred Strategy appeared to generate more benefits from an economic perspective, with the least benefits being generated for the environment. It was suggested that the strategy sought to create a greater focus on environmental improvements alongside economic and social regeneration initiatives. Most notably, three of the sustainability objectives conflicted with the strategic policies. These were: to reduce the emission of greenhouse gases, in particular carbon dioxide; to reduce waste generation and maximise reuse and recycling; and to maintain current air quality.

Recommendations and Mitigation measures were suggested in order to enable the plan to potentially achieve more sustainable development. These are outlined in sections 6 and 7.

Following discussions between the SA team and Blaenau Gwent County Borough Council, the findings of the SA have now been incorporated into the LDP Preferred Strategy for consultation. Various changes have been made to the strategy document, including modifications to the layout to provide policy justification where necessary. Changes to the policies have been made to include:

- Modifications to the wording of policies: SP3, SP8, SP9, SP10, SP11, SP12 and SP19
- Three new policies relating to:
  - Sustainable Development (SP4)
  - Leisure and Recreation (SP13)
  - Health and Education (SP14)
- Separation of the built and natural environment policies into two separate policies (SP16 and SP17).

A monitoring strategy based on the predicted effects of the LDP preferred strategy is proposed in section 8.

The final revised set of Preferred Policies is as follows:

**Table 0.1 – Final Preferred Strategic Policies**

| No.                        | Final Strategic Policy  |
|----------------------------|---|
| <b>Locational Strategy</b> |   |
| SP1                        | <p><b>Heads of the Valleys Area – Growth and Regeneration</b></p> <p>The Heads of the Valleys area will be the focus for the County Borough's spatial development. Ebbw Vale will accommodate the majority of new homes, jobs and services and will be promoted as the main hub for Blaenau Gwent. Tredegar, Brynmawr and Blaina will be the focus for new development serving the growing needs of their respective communities. New development will be located within these centres or in locations highly accessible to them.</p> |
| SP2                        | <p><b>South of the Borough - Regeneration</b></p> <p>The South of the Borough will see a focus on regeneration with appropriate forms of growth to serve local needs. Abertillery will be the focus of new development serving the needs of its respective communities.</p>   |

|                                   |  |                |     |           |       |                 |     |
|-----------------------------------|--|----------------|-----|-----------|-------|-----------------|-----|
| SP3                               | <p><b>Creating a network of sustainable linked communities to spread regeneration benefits</b></p> <p>The development and use of land throughout the County Borough will be determined by the need to ensure that all communities will have good access to Ebbw Vale. This will be achieved by creating a network of hubs which have safe, frequent and reliable public transport links with Ebbw Vale.</p>  |                |     |           |       |                 |     |
| <b>Sustainable Development</b>    |  |                |     |           |       |                 |     |
| SP4                               | <p>All new development should:</p> <ul style="list-style-type: none"> <li>• Make efficient use of land;</li> <li>• Offer sustainable transport choices that reduce the need to travel by car ;</li> <li>• Deliver development of an appropriate type, form, scale, mix and density in relation to its location;</li> <li>• Reduce the use of natural resources through energy efficiency, waste reduction, reduced water use, renewable energy production and the use of sustainable products and resources in construction;</li> <li>• Protect and enhance the quality of the natural and built environment; and</li> <li>• Reduce its impact on and adapt to the effects of climate change.</li> </ul> |                |     |           |       |                 |     |
| <b>Retailing and Town Centres</b> |  |                |     |           |       |                 |     |
| SP5                               | <p><b>Retail Hierarchy</b></p> <p>Major retail, administrative and cultural developments will take place in the principal retail centre of Ebbw Vale. The district/local centres of Tredegar, Brynmawr, Blaina and Abertillery will be protected and enhanced to improve vitality and viability and ensure they meet the needs of their districts. They will also develop new complementary roles based around historical, recreational and tourism potential. Local shopping centres will be protected and enhanced to provide facilities for local communities.</p>  |                |     |           |       |                 |     |
| <b>Employment</b>                 |  |                |     |           |       |                 |     |
| SP6                               | <p><b>Employment and Diversification of the Economy</b></p> <p>The employment and economic development needs of Blaenau Gwent will be met by the identification of 50 to 80 ha of land for employment and business purposes during the plan period. The employment roles of major industrial areas will be identified to assist in the diversification of employment and support the specialisation of manufacturing. Mixed-use sites will be identified close to town centres to enhance town centre based employment in the service sector.</p>  |                |     |           |       |                 |     |
| SP7                               | <p><b>Development of the Tourism and Leisure sectors</b></p> <p>Foster sustainable tourism and leisure sectors which re-engage local communities with the natural and historic environment and boost the local economy.</p>  |                |     |           |       |                 |     |
| <b>Housing</b>                    |  |                |     |           |       |                 |     |
| SP8                               | <p><b>Housing Provision</b></p> <p>Provision will be made for the development of between 2,250 and 3,000 dwellings during the plan period; broken into the following Housing Market Areas</p> <table style="width: 100%; border-collapse: collapse;"> <tr> <td style="width: 80%;">Sirhowy Valley</td> <td style="text-align: right;">800</td> </tr> <tr> <td>Ebbw Fawr</td> <td style="text-align: right;">1,500</td> </tr> <tr> <td>Ebbw Fach Upper</td> <td style="text-align: right;">400</td> </tr> </table>  | Sirhowy Valley | 800 | Ebbw Fawr | 1,500 | Ebbw Fach Upper | 400 |
| Sirhowy Valley                    | 800  |                |     |           |       |                 |     |
| Ebbw Fawr                         | 1,500  |                |     |           |       |                 |     |
| Ebbw Fach Upper                   | 400  |                |     |           |       |                 |     |

|                                 |   |
|---------------------------------|---|
|                                 | <p>Ebbw Fach Lower 300</p> <p>Housing sites will include a mix of dwelling types and sizes and tenure to meet the needs of Blaenau Gwent's current and future population.</p> <p>The Delivery of the houses will be back loaded recognising the step change required to reach the higher figures.</p> <p>2006-2011 500 -750<br/>2011-2016 750 -1,000<br/>2016-2021 1,000 -1,250</p>   |
| SP9                             | <p><b>Affordable Housing</b></p> <p>On sites of 10 or more dwellings at least 25% of the total number of dwellings should be affordable.</p>  |
| SP10                            | <p><b>Gypsy Accommodation</b></p> <p>6 pitches for unmet gypsy and traveller housing will be provided between 2006-2021 at Cwmcrachen.</p>  |
| <b>Transport</b>                |   |
| SP11                            | <p><b>Transport Infrastructure Improvements</b></p> <p>The Council will safeguard land for the following improvements to transport infrastructure:</p> <ul style="list-style-type: none"> <li>• phase 2 of the rail link from Parkway to Ebbw Vale Town (including land for a new station);</li> <li>• extension to the Parkway Park and Ride facility;</li> <li>• extension of rail link to Abertillery;</li> <li>• a network of walking and cycling routes;</li> <li>• dualling of the Heads of the Valleys Road (A465);</li> <li>• peripheral distributor road through the former Steelworks site;</li> <li>• online improvements between the PDR and the A465;</li> <li>• online improvements to the A4048 south of Tredegar;</li> <li>• online improvements to the A4046 south of Cwm through to Aberbeeg; and</li> <li>• online improvements to the A467 south of Abertillery.</li> </ul> |
| SP12                            | <p><b>Transport Requirements for new Development</b></p> <p>Development proposals will be assessed in relation to:</p> <ul style="list-style-type: none"> <li>• Reduce the need to travel;</li> <li>• Promotion of public transport, walking and cycling;</li> <li>• Protection of the safety of the highway network;</li> <li>• Accessibility to all users;</li> <li>• Pedestrian safety; and</li> <li>• Car parking standards set out in the Council's Car Parking Strategy.</li> </ul>   |
| <b>Community Infrastructure</b> |   |
| SP13                            | <p><b>Leisure and Recreation</b></p> <p>Sites will be safeguarded for a new leisure centre at Ebbw Vale, and to ensure that identified shortfalls in open space provision are met.</p>  |

|   |  |
|---|--|
| SP14  | <p><b>Health and Education</b></p> <p>To improve health provision and skills sites will be safeguarded for a new hospital, Primary Care Resource Centres, the Learning Campus, relocation of the training centre and new schools.</p>  |
| SP15  | <p><b>Planning Obligations</b></p> <p>The Council will negotiate planning obligations where appropriate to secure improvements in infrastructure, facilities and services appropriate to the scale, type and location of the proposed development. These obligations may include the provision or improvement of the following:</p> <ul style="list-style-type: none"> <li>• Affordable Housing;</li> <li>• Traffic, Transport and Highway Initiatives particularly the provision of sustainable transport infrastructure;</li> <li>• Education Facilities;</li> <li>• Community Development and Recreational Facilities;</li> <li>• Public Open Space;</li> <li>• Biodiversity and Geodiversity;</li> <li>• Skills and Labour Market;</li> <li>• Community Safety; and</li> <li>• Public Art</li> </ul> |
| <b>Environmental Protection and Enhancement</b> |  |
| SP16  | <p><b>Environmental Protection</b></p> <p>The County Borough's distinctive character, natural environment and designated landscape will be protected, preserved and enhanced. Of particular importance are:</p> <ul style="list-style-type: none"> <li>• Those attributes and features which make a significant contribution to the character, quality and amenity of the landscape;</li> <li>• Ecology, wildlife, habitats and the linkages between them;</li> <li>• Geological and heritage interests; and</li> <li>• The quality of natural resources, including water, air and soil.</li> </ul>  |
| SP17  | <p><b>Built Environment</b></p> <p>The distinctive built environment of the County Borough will be protected and enhanced. Development proposals should:</p> <ul style="list-style-type: none"> <li>• Respect local character and distinctiveness of the area; and</li> <li>• Enhance sites protected for their historic or archaeological value.</li> </ul>   |
| SP18  | <p><b>Minerals</b></p> <p>The Council will contribute to the regional demand for a continuous supply of minerals by:</p> <ul style="list-style-type: none"> <li>• Safeguarding known reserves of coal, sand and gravel, limestone and high quality hard rock taking into account relevant environmental, planning and transportation considerations; and</li> <li>• Maintaining a 10-year land-bank of permitted aggregate reserves in line with national guidance.</li> </ul>   |
| SP19  | <p><b>Waste</b></p> <p>The Council will implement a sustainable, integrated approach to waste</p>  |

|  |
|--|
| management which minimises the production of waste and its impact on the environment, and maximises the use of unavoidable waste as a resource. To assist this aim 1.4 to 4ha of allocated and protected B2 industrial sites and existing waste management sites will be identified for strategic waste management facilities through the use of regional search criteria. |
|--|

## Consultation on the Initial Sustainability Appraisal Report

The aim of the consultation on the Initial SA Report is to involve and engage with statutory consultees and other key stakeholders on the results of the appraisal. This ISAR will be placed on public consultation as part of wider pre deposit consultation on the LDP Preferred Strategy.

Following consultation on this document, then as part of the development of the Deposit LDP, the comments received will be taken into account in preparing the Sustainability Appraisal Report which is expected to be published alongside the Deposit LDP. This SAR will include the assessment of preferred development sites for the delivery of the Preferred Strategy.

To help assist the process of on this report, respondents are invited to consider the following questions:

- Do you have any comments on the assessment of the LDP Objectives against the Sustainability Objectives?
- Do you have any comments on the appraisal of the LDP Strategic Options and how the Preferred Strategy was arrived at?
- Do you have any comments on the appraisal of the preferred policies and the final set of preferred policies arrived at?
- Do you consider the identified mitigation measures for the LDP Preferred Strategy are acceptable?
- Do you consider the proposed monitoring framework adequate?

The ISAR will be issued for consultation alongside the LDP Preferred Strategy on **7<sup>th</sup> November 2008** for a period of **six weeks**. Therefore, please send any comments on the above questions or any other issues by **19<sup>th</sup> December 2008** to the following address:

# Abbreviations/Glossary

Table 0.2 – Abbreviations and Glossary

| Abbreviation/Term    | Definition  |
|----------------------|---|
| AA                   | Appropriate Assessment  |
| Adoption             | The final confirmation of the LDP   |
| Affordable housing   | Housing provided to those whose needs are not met by the open market. Affordable housing should meet the needs of eligible households, including availability at low enough cost for them to afford, determined with regard to local incomes and local house prices; and include provision for the home to remain affordable for future eligible households, or if a home ceases to be affordable or stair casing to full ownership takes place, any subsidy should generally be recycled to provide replacement affordable housing.<br><i>TAN 2 – Planning and Affordable Housing (2006)</i> |
| Allocation           | Land which will be proposed for development, which will be identified on a Proposals Map in the deposit and the adopted version of the LDP  |
| AMR                  | Annual Monitoring Report<br>This will assess the extent to which policies in the LDP are being successfully implemented   |
| AQMA                 | Air Quality Management Area   |
| BAP                  | Biodiversity Action Plan  |
| Baseline Data        | Baseline data is basic information gathered before a programme begins. It is used later to provide a comparison for assessing programme impact.   |
| Brownfield Site/Land | Previously developed (or brownfield) land is that which is or was occupied by a permanent structure (excluding agricultural or forestry buildings) and associated fixed surface infrastructure. The curtilage of the development is included, as are defence buildings, and land used for mineral extraction and waste disposal where provision for restoration has not been made through development control procedures. <i>Planning Policy Wales (2002)</i>   |
| BGCBC                | Blaenau Gwent County Borough Council  |
| CADW                 | Historic Environment Service of the Welsh Assembly Government   |
| CCW                  | Countryside Council for Wales   |
| CIS                  | Community Involvement Scheme<br>Sets out the project plan and policies of the Local Planning Authority for involving local communities, including businesses, in the preparation of LDPs. The CIS is submitted to the Welsh Assembly Government for agreement as part of the Delivery Agreement.  |
| Consultation         | A formal process in which comments are invited on a particular topic or set of topics, or a draft document.   |
| Delivery Agreement   | A document comprising the Local Planning Authority's timetable for the preparation of the LDP together with its CIS, submitted to the Assembly Government for agreement.  |

|                                      |   |
|--------------------------------------|---|
| Deposit Plan                         | A formal stage during which organisations and individuals can make representations on the detailed policies and proposals.  |
| Employment Land/<br>Site             | Land that typically forms part of an industrial estate or business park, which is occupied by one or more of the following: offices, manufacturing, research and development, storage and distribution.   |
| Environmental<br>Consultation Bodies | An authority, which has environmental responsibilities and is concerned by the effects of implementing plans and programmes and, must be consulted at specified stages of the SEA. The Consultation Bodies designated in the SEA Regulations in Wales are Cadw (Welsh Historic Monuments), Countryside Council for Wales and Environment Agency Wales.  |
| Greenfield Sites                     | These are sites which have never been previously developed or used for an urban use, or are on land that has been brought into active or beneficial use for agriculture or forestry i.e. fully restored derelict land   |
| Housing Need                         | Assessed by examining the suitability of present housing and the ability of households to afford market priced housing  |
| Implementation                       | Implementation is the carrying out, execution, or practice of a plan, a method, or any design for doing something. As such, implementation is the action that must follow any preliminary thinking in order for something to actually happen.   |
| Indicator                            | An indicator is something that helps you understand where you are, which way you are going and how far you are from where you want to be. A good indicator alerts you to a problem before it gets too bad and helps you recognise what needs to be done to fix the problem  |
| Infrastructure                       | Water supply and sewerage facilities, roads and transportation, local community, shopping and other facilities required as framework for development  |
| LDP                                  | Local Development Plan<br><br>The required statutory development plan for each Local Planning Authority area in Wales under Part 6 of the Planning and Compulsory Purchase Act 2004. The Local Planning Authorities (LPAs) have to set out their objectives in relation to development and use of land in their area and set out the general policies for the implementation of those objectives within their LDPs. As well as having regard to national planning policy, the LPA have to take into account regional planning policy and the Authority's Community Strategy and the social, economic and environmental factors relating to the local area and global environment, by undertaking a Sustainability Appraisal of the LDP. |
| LNR                                  | Local Nature Reserve<br><br>Declared by Local Authorities to protect sites of local importance for nature conservation, education and amenity. The Local Authority must either own or have a legal interest in the land before a LNR can be declared. Although LNRs have no direct statutory protection, management rules or bye-laws can be used to control damaging activities.   |
| NNR                                  | National Nature Reserve<br><br>A site of special scientific interest or national importance for nature conservation, which is managed by or on behalf of Countryside Council for Wales, in the interests of wildlife, research and public participation (where appropriate).  |
| Mitigation                           | Measures that avoid, reduce, remediate or compensate for the negative impacts of a strategic action.  |
| Monitoring                           | Monitoring means gathering evidence to show what progress has been made towards strategic priorities and targets and the implementation of policies.  |

|  |   |
|--|---|
| ODPM   | Office of the Deputy Prime Minister   |
| Objectives   | Objectives state what is to be achieved and cover the range of desired outcomes to achieve a goal.  |
| Objective 1 Funding                                | A regional policy of the European Union (EU) that aims to improve the economic well being of regions in the EU. The Structural Funds assign regional aid according to three Objectives. Objective 1 Funding helps regions whose development is lagging behind, where the Gross Domestic Product per head is less than 75% of the EU average. Attention is focused on providing basic infrastructures, developing human resources, investing in research and innovation, and promoting the information society.  |
| PPP  | Plans, Programmes and Policies  |
| RIGS   | Regionally Important Geological Site  |
| SA   | <p>Sustainability Appraisal</p> <p>A form of assessment used in the UK, particularly for regional and local planning, since the 1990s. It considers social and economic effects as well as environmental ones, and appraises them in relation to the aims of sustainable development. Sustainability Appraisal, which fully incorporates the requirements of the SEA Directive, is required for Local Development Documents/ Regional Spatial Strategies in England and Local Development Plans in Wales under the Planning and Compulsory Purchase Act 2004. It is a systematic and iterative process undertaken during the preparation (and review) of a plan which identifies and reports on the extent to which implementation of the plan will achieve the environmental, social and economic objectives by which sustainable development can be defined and identifies opportunities for improving plan performance in relation to these.</p> |
| SAC  | Special Area of Conservation  |
| SAR  | <p>Sustainability Appraisal Report</p> <p>A document required to be produced as part of the Sustainability Appraisal process to describe and appraise the likely significant effects on sustainability of implementing the LDP, which also meets the requirements for the Environmental Report under the SEA Regulations. S62 (6) of the 2004 Act requires each Local Planning Authority to prepare a report of the findings of the Sustainability Appraisal of the LDP.</p>  |
| Scoping  | The process of deciding the scope and level of detail of an SEA, including the environmental effects and alternatives which need to be considered, the assessment methods to be used, and the structure and contents of the Environmental Report under the SEA Directive.   |
| SEA  | <p>Strategic Environmental Assessment</p> <p>Generic term used internationally to describe environmental assessment as applied to policies, plans and programmes. The SEA Regulations require a formal "environmental assessment of certain plans and programmes, including those in the field of planning and land use".</p>   |
| Strategic Environmental Assessment (SEA) Directive | The SEA directive is officially called the Directive on the Assessment of Certain Plans and Programmes on the Environment (and is known as Directive 2001/42/EC). The main objective of the SEA directive is to 'provide for a high level of environmental protection and to contribute to the integration of environmental protection and to contribute to the integration of environmental considerations into the  |

|                         |   |
|-------------------------|---|
|                         | preparation and adoption of plans and programmes...'(Article 1 of the SEA Directive)  |
| SINC                    | Sites of Importance for Nature Conservation<br>Areas of land and wetland of local importance for the conservation of semi-natural habitats including mosaics of heathland, unimproved grassland, scrubland and plantation and/or habitats which support rare local wildlife species. They are not of sufficient extent or quality to qualify for national recognition as a SSSI.  |
| SMP                     | Shoreline Management Plan   |
| SPG                     | Supplementary Planning Guidance<br>Supplementary information in respect of the policies in an LDP. SPG does not form part of the development plan and is not subject to independent examination but must be consistent with the plan and with national policy.  |
| SSSI                    | Site of Special Scientific Interest<br>A conservation designation denoting a protected area in the United Kingdom. SSSIs are the basic 'building block' of nature conservation designations, including National Nature Reserves, Ramsar Sites, Special Protection Areas, and Special Areas of Conservation.   |
| Soundness               | Concept against which an LDP is examined under section 64(5)(b) of the 2004 Act.  |
| Stakeholders            | Interests directly affected by the LDP (and/or SEA) –involvement generally through representative bodies.   |
| Strategy                | A strategy is a long term plan or method designed to achieve a particular goal or objective.  |
| SUDS                    | Sustainable Urban Drainage Systems  |
| Sustainable Development | Sustainable Development is defined as "Development which meets the needs of the present without compromising the ability of future generations to meet their own needs" in the Brundtland Report to the World Commission on Environment and Development held in 1987. The UK government has set out four aims for sustainable development in its strategy <i>A Better Quality of Life, a Strategy for Sustainable Development in the UK</i> . The four aims, to be achieved simultaneously, are: -social progress which recognizes the needs of everyone; effective protection of the environment; prudent use of natural resources; and the maintenance of high and stable levels of economic growth and employment. |
| TPO                     | Tree Protection Orders  |
| UDP                     | Unitary Development Plan<br>The required statutory development plan for each Local Planning Authority area in Wales under the Town and County Planning Act 1990   |
| WAG                     | Welsh Assembly Government   |

# 1. Introduction

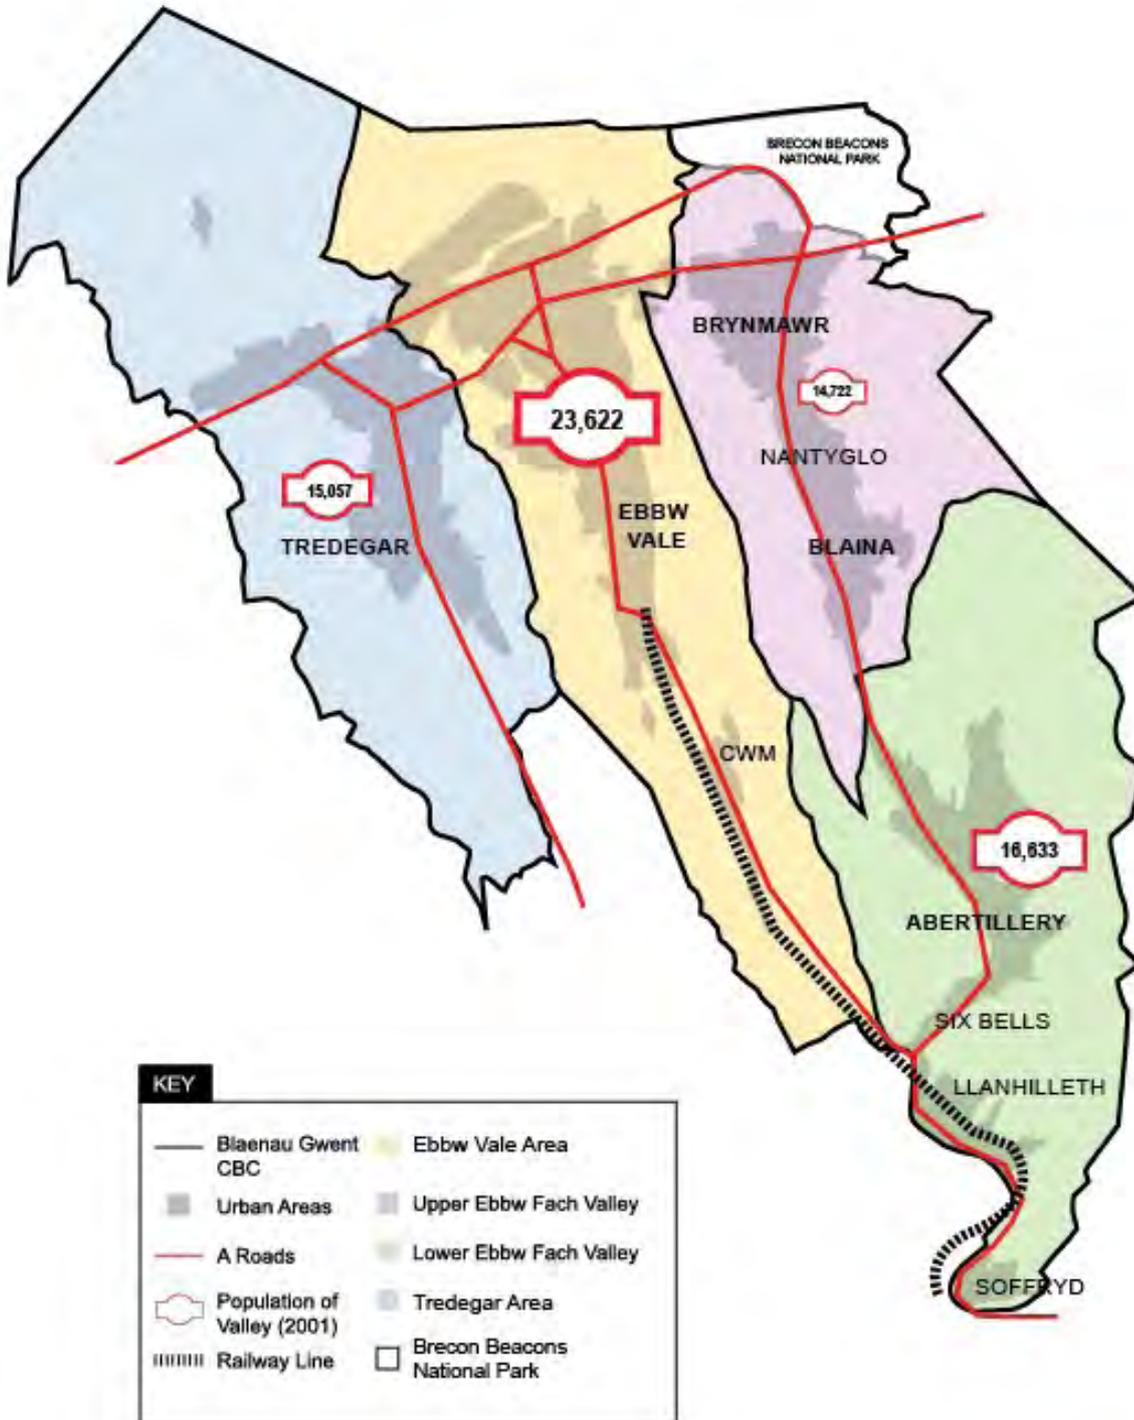

## Background

- 1.1 This document is the Initial Sustainability Appraisal Report for the Sustainability Appraisal (SA), incorporating Strategic Environmental Assessment (SEA), of the Blaenau Gwent Local Development Plan (LDP). Under the provisions of the Planning and Compulsory Purchase Act 2004, Sustainability Appraisal (SA) is mandatory for all Local Development Plans (LDPs). An environmental assessment is also required under European Directive 2001/42/EC 'on the assessment of certain plans and programmes on the environment' (the 'SEA Directive'). The SA and SEA processes are combined to inform the preparation of the LDP.
- 1.2 The Blaenau Gwent Unitary Development Plan (UDP) was adopted on 6th July 2006. The Council has now started the preparation of the Local Development Plan (LDP), which will replace the UDP upon adoption. The LDP will set out the Council's objectives and priorities for the development and use of land within the County Borough for the period 2006-2021.
- 1.3 The purpose of this Initial Sustainability Appraisal Report is to outline how the statutory requirements for SA/SEA have informed the development of the Preferred Strategy. It records all the sustainability appraisal work undertaken predicting and evaluating the effects of strategic options and preferred policies.
- 1.4 Atkins was commissioned in April 2007 by Blaenau Gwent County Borough Council to undertake SA incorporating SEA of the Blaenau Gwent LDP.

## Study Area

- 1.5 Blaenau Gwent is situated in the north east of Industrial South Wales and includes some land that falls within the boundary of the Brecon Beacons National Park (Figure 1.1), for which the Brecon Beacons National Park Authority is responsible for development control activities as the planning authority. At the latest census the authority had a population of approximately 71,000, with the key centres of population being focused on the main settlements of Tredegar, Ebbw Vale, Brynmawr, Nantyglo, Blaina and Abertillery. The local authority area comprises one of the ten local authorities that together form the South East Wales Region as it is described in the ongoing Wales Spatial Plan Review. This latter document is currently being developed and the planning framework for Blaenau Gwent will be required to have regard to the broad policies and principles set out at the regional and national level.

Figure 1.1 - Study Area in Context

## Sustainable Development

- 1.6 There are many definitions of sustainable development however the most common and widely accepted is that adopted by the World Commission on Environment and Development in 1987: “Development that meets the needs of the present without compromising the ability of future generations to meet their own needs”
- 1.7 Sustainable development seeks to integrate environmental, social and economic considerations.
- 1.8 The UK Strategy ‘Securing the Future: The UK Government Sustainable Development Strategy’ (DEFRA, 2005) sets out five key principles for sustainable development:
- Living within environmental limits
  - Ensuring a strong, healthy and just society
  - Achieving a sustainable economy
  - Promoting good governance
  - Using sound science responsibly
- 1.9 There is now an international commitment to achieving sustainable development. One of the means by which it can be achieved is through the land use planning process and particularly through the production of the Local Development Plans (LDPs).

## Strategic Environmental Assessment and Sustainability Appraisal

- 1.10 The EU Directive 2001/42/EC on assessment of effects of certain plans and programmes on the environment (the ‘SEA Directive’) came into force in the UK on 20 July 2004 through the Environmental Assessment of Plans and Programmes Regulations 2004. The Directive applies to a variety of plans and programmes including those for town and country planning and land use and applies to LDPs as they a) set the framework for future development consent and b) are likely to have a significant effect on the environment.
- 1.11 The overarching objective of the SEA Directive is:
- “To provide for a high level of protection of the environment and to contribute to the integration of environmental considerations into the preparation and adoption of plans... with a view to promoting sustainable development, by ensuring that, in accordance with this Directive, an environmental assessment is carried out of certain plans... which are likely to have significant effects on the environment.” (Article 1)*
- 1.12 SEA is an iterative assessment process which plans and programmes are now required to undergo as they are being developed to ensure that potential significant environmental effects arising from the plan/programme are identified, assessed, mitigated and communicated to plan-makers. SEA also requires the monitoring of significant effects once the plan/programme is implemented.
- 1.13 The SEA Directive and associated UK Regulations state that the SEA must consider the following topic areas:
- Biodiversity
  - Population
  - Human Health
  - Flora and Fauna
  - Soil

- Water
- Air
- Climatic factors
- Material assets
- Cultural heritage, including archaeological and architectural heritage
- Landscape
- and the interrelationship between these factors

1.14 Under the regulations implementing the provisions of the Planning and Compulsory Purchase Act 2004, a SA is required for all LDPs in Wales. The purpose of SA is to promote sustainable development through better integration of sustainability considerations in the preparation and adoption of plans. The Regulations<sup>1</sup> stipulate that SAs of LDPs should meet the requirements of the SEA Directive.

## The SA Process

- 1.15 The requirements to carry out SA and SEA are thus distinct, but the Welsh Assembly Government (WAG) guidance for LDPs concurs with ODPM (now CLG) SA guidance<sup>2</sup> in stating that it is possible to satisfy both through a single appraisal process (commonly designated as SA/SEA<sup>3</sup>) and provides methodologies and guidance for doing so. This methodology goes further than the SEA methodology (which is primarily focused on environmental effects) requiring the examination of all the sustainability-related effects, whether they are social, economic or environmental. However, those undertaking the SA should ensure that in doing so they meet the requirements of the SEA Directive. This report will therefore integrate both the SA and SEA requirements, and subsequent reference to SA in this document will be taken to mean SA incorporating SEA.
- 1.16 The purpose of SA is to promote sustainable development through better integration of sustainability considerations in the preparation of plans.
- 1.17 SA ensures that social, environmental and economic concerns are addressed and fully integrated into the production of a planning document and that integration of these issues is achieved as far as possible.
- 1.18 SA is an iterative process that takes place alongside the preparation of a planning document. This is to ensure that the principles of sustainable development are integrated into the plan-making process, thus ensuring that the resulting policies and proposals produce sustainable development when implemented. Through consultation and the involvement of stakeholders and specialist experts in the process the resulting appraisal should be both robust and fully integrated.
- 1.19 By undertaking a SA it is possible to look at a range of plans/policies contained within various documents and examine how they contribute towards sustainable development by looking at their social, environmental and economic effects. By identifying potential issues at an early stage it is then possible to amend the policies/plans to ensure that they are as sustainable as possible.
- 1.20 Figure 1.2 sets out the various stages, tasks and relationships with the plan preparation contained in the WAG/ODPM guidance, which are being applied to the SA of the LDP.

<sup>1</sup> Environmental Assessment of Plans and Programmes (Wales) Regulations 2004 (S.I. 2004/1656 (W/170)) ("the Wales Regulations").

<sup>2</sup> Sustainability Appraisal of Regional Spatial Strategies and Local Development Documents, Guidance for Regional Bodies and Local Planning Authorities, ODPM, November 2005.

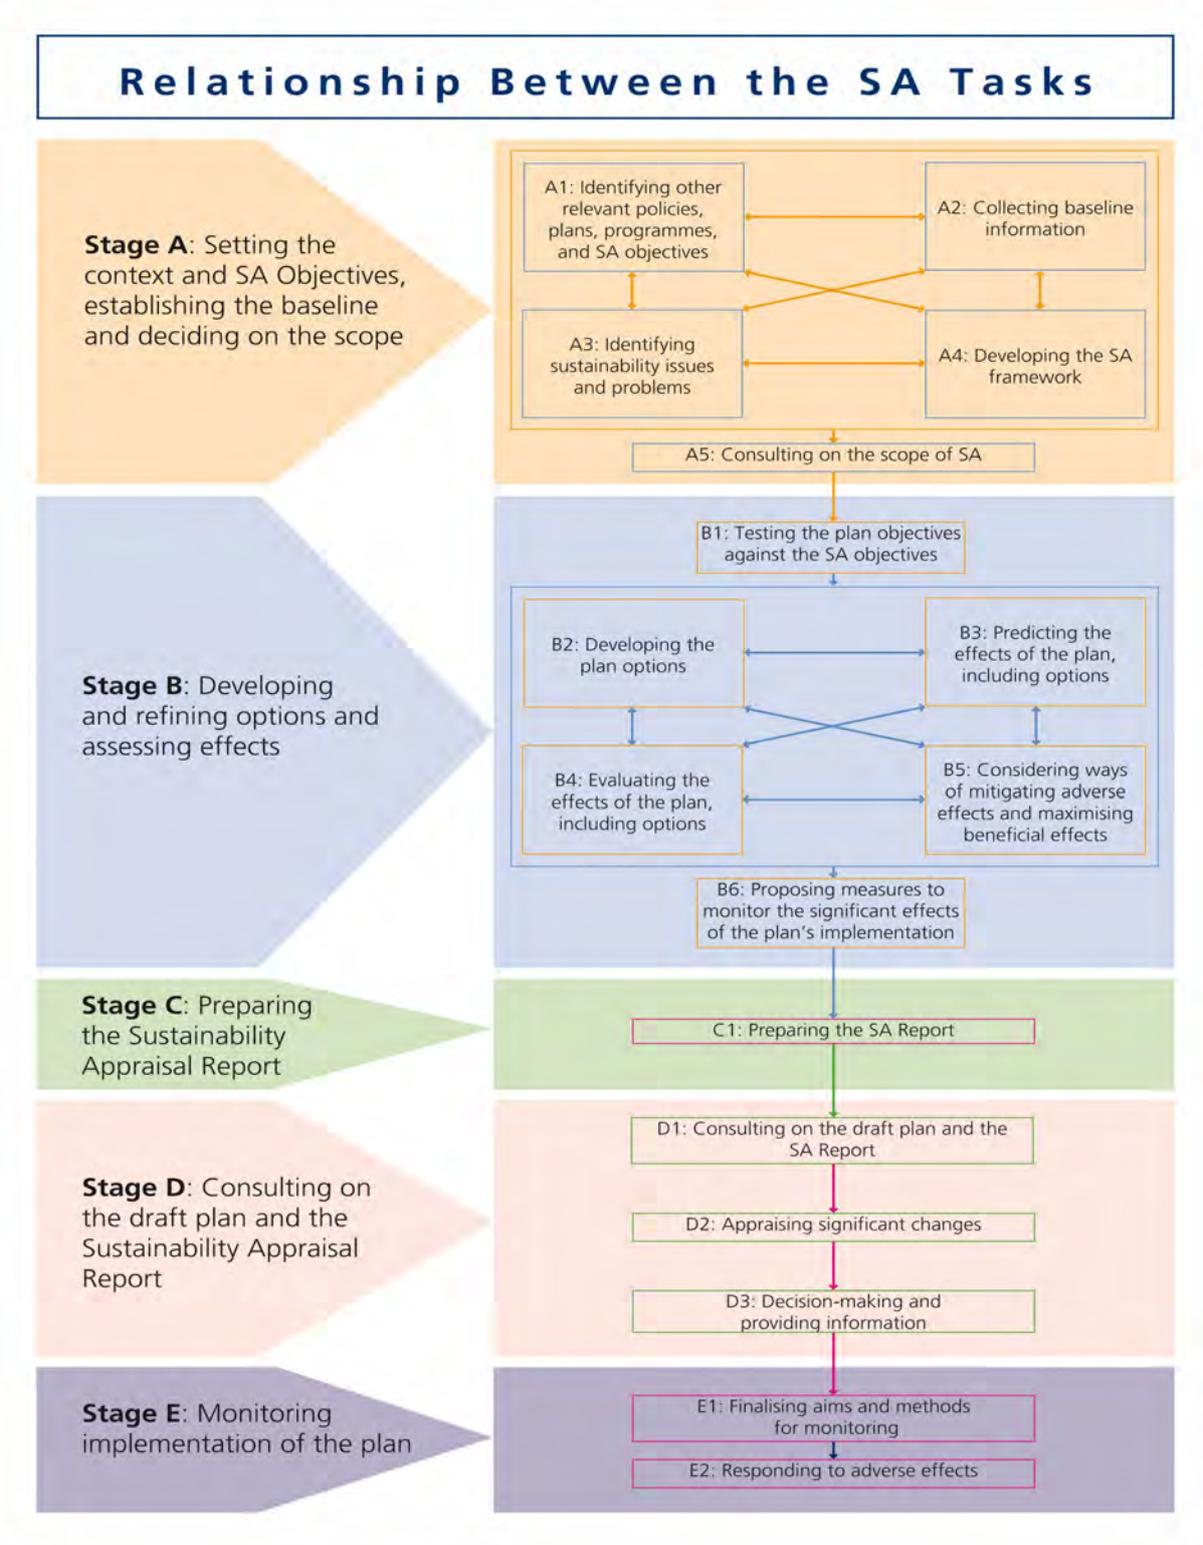

<sup>3</sup> The term SA is used to denote the combined SA/SEA process in this Scoping Report.

Figure 1.2 - Incorporating SA/SEA within the LDP Process – Stages and Tasks

| Planning Stage   | SA/SEA Stage  | Components  |
|--|---|---|
| Pre-Deposit Participation                                      | Setting the context and objectives, establishing the baseline and deciding on the scope | Identify related plans/programmes   |
|  |   | Identify environmental protection objectives  |
|  |   | Baseline data and likely future trends  |
|  |   | Identify sustainability issues  |
|  |   | Develop sustainability objectives, indicators and targets (i.e. create the SEA Framework) |
|  |   | Prepare Scoping Report  |
|  |   | Consult on the scope of the SA/SEA (the Scoping Report Consultation)                      |
| Pre-Deposit Participation                                      | Developing and refining options   | Consider Scoping Report Consultation comments   |
|  |   | Assess LDP objectives against the SA/SEA Framework  |
|  |   | Develop strategic options   |
|  |   | Evaluate/select preferred options   |
|  |   | Prepare Initial Sustainability Appraisal Report   |
| Pre-Deposit Consultation                                       | Consultation on Initial Sustainability Appraisal Report                                 |   |
| Preparation for Deposit of the LDP                             | Appraising the effects of the LDP Preferred Option(s)                                   | Consider Pre-Deposit consultation comments  |
|  |   | Predict and assess sustainability effects of options taken forward                        |
|  |   | Propose mitigation measures   |
|  |   | Propose monitoring programme  |
|  |   | Prepare Sustainability Appraisal Report   |
| Deposit Consultation   | Consultation on Sustainability Appraisal Report   |   |
| Revise LDP following representations made at the Deposit Stage | Revise Sustainability Appraisal Report as appropriate                                   |   |
| Submission of LDP to Welsh Assembly Government                 | Sustainability Appraisal Report accompanies LDP on submission                           |   |
| Independent examination of LDP                                 | Preparation or giving evidence  |   |
| Adoption of LDP  | Prepare statement summarising how SA/SEA results were taken into account                |   |

|                    |   |                                     |
|--------------------|---|-------------------------------------|
| LDP Implementation | Monitor the sustainability effects of the LDP | Prepare an annual monitoring report |
|--------------------|---|-------------------------------------|

Figure 1.3 - Relationship between the SA Tasks

- 1.21 The current guidance also sets out a requirement for the preparation of the following reports:
- Scoping Report (summarising Stage A work) which should be used for consultation on the scope of the SA;
  - Initial Sustainability Appraisal Report (documenting Stages A , B and C) work which should be used in the public consultation on the pre-deposit LDP;
  - Sustainability Appraisal Report (documenting Stages A, B and to C work) which should accompany the Deposit LDP.
- 1.22 To date, Stage A and B of the SA/SEA process has been undertaken and this is fully documented under the Methodology section 2. This is the Initial Sustainability Appraisal Report, constituting the first part of Stage C.

## Purpose of the Initial Sustainability Appraisal Report

- 1.23 The Initial SA Report is a key output of the appraisal process presenting information on the effects of the planning document for public consultation. It incorporates and subsumes the Environmental Report that is required under the European Directive.
- 1.24 The overarching purpose of the SA Report is to document the outcome of the appraisal process, and demonstrate the influence it has had on the development of the LDP policies. It maps the development of options and the supporting policies by reference to their significant effects or their mitigation of any adverse effects.
- 1.25 This Initial SA Report reports on the work undertaken during the initial stages of the SA process and takes the process further by reporting on option selection and the significant social, environmental and economic effects of the preferred policies, proposed mitigation measures and proposals for monitoring significant sustainability effects.

## SA and Consultation

- 1.26 The aim of the consultation on the SA Report is to involve and engage with statutory consultees and other key stakeholders on the results of the appraisal.
- 1.27 The requirements for consultation during a Sustainability Appraisal are as follows:
- Authorities which, because of their environmental responsibilities, are likely to be concerned by the effects of implementing the plan or programme, must be consulted on the scope and level of detail of the information to be included in the Sustainability Appraisal Report. These are termed the statutory Consultation Bodies, and in Wales comprise the Countryside Council for Wales (CCW), Environment Agency (Wales) and Cadw (Historic Environment Service of the Welsh Assembly Government). It is considered good practice to consult with other appropriate social and economic consultees who would have a significant influence upon, or would be influenced by the LDP; and
  - The public and Consultation Bodies must be consulted on LDP and the Sustainability Appraisal Report.
- 1.28 The following report (covering SA Stage A) has been consulted upon as part of this sustainability appraisal process:
- Sustainability Appraisal Scoping Report, November 2007
- 1.29 The statutory and non-statutory bodies and organisations that have responded to consultation to date are presented in Appendix A.
- 1.30 For the consultation on the draft LDP Preferred Strategy and Initial Sustainability Appraisal Report, the following social, environmental and economic consultees are being consulted: Countryside Council for Wales (CCW), Environment Agency (Wales) and Cadw (Historic

Environment Service of the Welsh Assembly Government) and other stakeholders with an interest in the development of Blaenau Gwent.

- 1.31 The period of consultation on the LDP Preferred Strategy and Initial Sustainability Appraisal Report, is for 6 weeks, from the 7<sup>th</sup> November 2008.

## Habitats Regulations Assessment

- 1.32 Alongside the SA/SEA process it is also necessary, to assess whether the Blaenau Gwent LDP is likely to have a significant effect upon European Sites comprising Special Areas of Conservation (SACs) and Special Protection Areas (SPAs) under the Habitats Regulations.
- 1.33 The Draft WAG guidance<sup>4</sup> states that:  
*‘Sustainability Appraisal (SA) and Strategic Environmental Assessment (SEA) of plans are also iterative processes in the production of a development plan... The HRA should be programmed to fit in with existing plan-making procedures, including the SEA, wherever possible... However, HRA should not be incorporated into the SA or SEA. It should be run in parallel with these processes and records, and even if integrated with SA or SEA Environment reports, kept clearly distinguishable.’*
- 1.34 The WAG LDP Manual<sup>5</sup> intends that *‘appropriate assessment will be integrated with development plan Sustainability Appraisal, incorporating SEA.’*
- 1.35 A screening exercise to establish the need for Appropriate Assessment has been undertaken by the County Borough. The HRA considered 8 European sites within a 15km search area around the plan/proposal boundaries. The Screening Report identified the potential for the Strategy to have a negative impact on 2 European sites identified within close proximity to Blaenau Gwent namely, Cwm Clydach Woodlands, Usk Bat Site. Therefore, an Appropriate Assessment (as required by Article 6(3) of the Habitats Directive and regulation 85B of the draft Regulations) will be undertaken which will examine the impacts of the LDP against the conservation objectives of the European Sites.
- 1.36 The Appropriate Assessment must determine whether the LDP would adversely affect the integrity of the site in terms of its nature conservation objectives, and where possible quantify, the potential impacts identified and determine the most effective mechanism for avoiding or mitigating those effects. This work will be undertaken by the County Borough in consultation with the Statutory Body, CCW and other key stakeholders to inform the Deposit LDP.

The SA/SEA will need to take the results of this exercise into consideration when they are available.

## 2. Sustainability Appraisal Methodology

### Meeting the Requirements of the SEA Directive

- 2.1 As mentioned in Section 1 there is a fundamental difference between the SA and SEA methodologies. SEA is primarily focused on environmental effects and the methodology addresses a number of topic areas namely Biodiversity, Population, Human Health, Flora and Flora, Soil, Water, Air, Climatic Factors, Material Assets, Cultural Heritage and Landscape and the interrelationship between these topics. SA, however, widens the scope of the appraisal to include social and economic topics as well as environmental as it is intended to assess the impact of a plan from an environmental, social and economic perspective.
- 2.2 This Sustainability Appraisal has been undertaken so as to meet the requirements of the SEA Directive for environmental assessment of plans. Table 2.1 sets out the way the specific SEA requirements have been met in this report.

**Table 2.1 - Schedule of SEA Requirements**

| Requirements of the Directive   | Where Covered in Report |
|---|-------------------------|
| <b>Preparation of an environmental report in which the likely significant effects on the environment of implementing the plan or programme, and reasonable alternatives taking into account the objectives and geographical scope of the plan or programme, are identified, described and evaluated. The information to be given is:</b>  |                         |
| a) An outline of the contents, main objectives of the plan or programme and relationship with other relevant plans and programmes   | Section 3               |
| b) The relevant aspects of the current state of the environment and the likely evolution without implementation of the plan or programme  | Section 3               |
| c) The environmental characteristics of areas likely to be significantly affected   | Section 3               |
| d) Any existing environmental problems which are relevant to the plan or programme including, in particular, those relating to any areas of a particular environmental importance, such as areas designated pursuant to Directive 79/409/EEC and 92/43/EEC  | Section 3               |
| e) The environmental protection objectives established at international, community or national level which are relevant to the programme and the way those objectives and any environmental considerations have been taken into account during its preparation  | Section 3               |
| f) The likely significant effects on the environment, including: short, medium and long term; permanent and temporary; positive and negative; secondary, cumulative and synergistic effects on issues such as: biodiversity, population, human health, fauna, flora, soil, water, air, climatic factors, material assets, cultural heritage including architectural and archaeological heritage, landscape and the interrelationship between the above factors. | Sections 4,5,6          |
| g) The measures envisaged to prevent, reduce and, as fully as possible, offset any significant adverse effects on the environment of implementing the plan or programme.  | Section 7               |

|   |                  |
|---|------------------|
| h) An outline of the reasons for selecting the alternatives dealt with and a description of how the assessment was undertaken including any difficulties (such as technical deficiencies or lack of know-how) encountered in compiling the required information | Sections 4,5,6   |
| i) A description of measures envisaged concerning monitoring (in accordance with regulation 17)   | Section 8        |
| j) A non-technical summary of the information provided under the above headings   | Before section 1 |

## Appraisal Process and Methodology

- 2.3 WAG guidance emphasises that SA is an iterative process that identifies and reports on the likely significant effects of the plan and the extent to which the implementation of the plan will achieve the social, environmental and economic objectives by which sustainable development can be defined. The intention is that SA is fully integrated into the plan-making process from the earliest stages, both informing and being informed by it.
- 2.4 The methodology adopted involved the completion of the SA stages A, B and C and associated tasks as outlined in Figure 1.2.

### Stage A: Setting the Context and Objectives, Establishing the Baseline and Deciding on Scope

#### A1: Other Relevant Plans and Programmes

- 2.5 A wide range of plans programmes and policies (PPPs) relevant to the Blaenau Gwent County Borough Council area have been identified. These documents have been categorised by the geographical scale to which they relate and listed in Table 3.1.
- 2.6 The constraints or challenges the plans pose for the LDP were considered and summarised by setting out how the plan might take account of them. Broad SA objectives generated from the review have been grouped under the three main topic headings namely, Environmental, Social and Economic, encompassing the three dimensions of sustainable development. Each objective has been assigned to the dimension of sustainable development to which it is most strongly associated.

#### A2: Baseline Data

- 2.7 To predict accurately how potential plan policies will affect the environment, it is first important to understand the current state of the environment and then examine the likely evolution of the environment without the implementation of the plan.
- 2.8 Baseline information provides the basis for predicting and monitoring environmental effects and helps to identify environmental problems and alternative ways of dealing with them. Baseline data tables have been prepared where data have been split by the four overarching objectives of sustainable development. These tables record:
- General indicators of relevance to the plan;
  - Quantified latest data;
  - Comparators (regional or national level data against which Blaenau Gwent status can be compared);
  - Targets for the indicators where they exist;
  - Trends for the indicators; and

- Problems and constraints which arise.

- 2.9 Data was collated from a wide range of existing sources. For each indicator, quantified baseline data was collected which was readily accessible and in a format applicable to the issues to be assessed by the SEA/SA and at a relevant geographical level. The main sources used were official websites on the internet, Blaenau Gwent County Borough Council reports and data, and the Census 2001.
- 2.10 No new data collection was undertaken. Where significant gaps exist, these are identified and recommendations for filling the gaps will be included in the proposals for monitoring the implementation of the plan. Data availability is a key problem. It varies between indicators and at different tiers of government; for example, statistics at national level do not always have a comparator, or are not necessarily relevant at the local level.
- 2.11 Not all detail is readily presentable or sufficiently detailed in table format.

### **A3: Sustainability Issues**

- 2.12 Key sustainability issues within Blaenau Gwent were identified through existing issues already known to the Authority, and problems identified through the collection of baseline data. These were set out in a table under the three sustainable development dimensions (economic, social and environmental) and covered the most relevant topics.

### **A4: Sustainability Appraisal Framework**

- 2.13 A set of draft objectives and indicators, against which the policies and proposals in the LDP can be assessed, was drawn up under the three sustainable development dimensions: social, economic and environmental.
- 2.14 They were identified by reviewing relevant policy documents at the European, national, regional, county and district level, those put forward in the SEA Guidance, the review of the baseline data and key sustainability issues. The draft objectives have been refined through subsequent consultation on the original Scoping Report.
- 2.15 For each objective, one or more indicators have been set that provide for the status of the objective to be tested against targets, now or in the future, and that are appropriate to the County Borough. They have been adapted from those in the SEA Guidance and consultation on the Scoping Report.
- 2.16 Table 3.4 has been prepared setting out the SA Framework and identifying how relevant SEA Directive topic(s) have been covered.

### **A5: Consulting on the Scope of the Sustainability Appraisal**

- 2.17 Tasks A1 to A4 were undertaken between June and October 2007 to help ensure that the SA covered the key sustainability issues which are relevant to Blaenau Gwent County Borough. The Scoping report documenting the results of the above tasks was the subject of a five week consultation in November 2007. In accordance with Government guidance the local planning authority consulted three statutory environmental consultation bodies:
- Countryside Council for Wales (CCW),
  - Environment Agency (Wales) and
  - Cadw (Historic Environment Service of the Welsh Assembly Government)
- 2.18 A number of other key organisations were also specifically targeted. The responses to this consultation and subsequent actions are summarised in Appendix A of this report.

## Stage B: Developing and Refining Options

### B1: Testing the LDP Objectives against the Sustainability Appraisal Framework

- 2.19 The LDP objectives were tested for compatibility with the SA objectives. This helped to consider to what degree they are in accordance with sustainability principles, with a view to developing and refining the LDP objectives through an iterative process. When testing compatibility the following scale was used:

Table 2.2 - Compatibility of Objectives key

|   |                                     |
|---|-------------------------------------|
|  | Potentially Compatible              |
|  | Not Compatible                      |
|  | Not relevant                        |
|  | Dependent on the nature of delivery |

- 2.20 Further details of the assessment can be found in section 4.

### B2: Developing the LDP Options

- 2.21 In order to predict the sustainability implications of the options for the LDP, each option was assessed against a framework of SA objectives. For further details see section 4 of this report. A judgement was made against the SA Objectives to predict the likely sustainability implications which might arise should the option be implemented. In order to arrive at a conclusion about how the LDP would affect the achievement of the SA Objectives, each assessment combines qualitative and quantitative techniques, taking account of:

- What the SA objective is trying to achieve;
- The status of the relevant baseline, and how it has changed over time; and
- Current knowledge of the various relationships between the content of the LDP and sustainability objectives.

- 2.22 At this early stage of assessment a broad approach to appraisal was taken to provide an initial indication of the relative sustainability of each of the options. Prediction involved using a scale from '+++' (strong positive effect) to '---' (strong negative effects) (Table 2.3), with the associated commentary indicating any further details to note.

Table 2.3 - Options Assessment Key

| Assessment Scale | Assessment Category          |
|------------------|------------------------------|
| +++              | Strongly positive            |
| ++               | Moderately positive          |
| +                | Slightly positive            |
| 0                | Neutral or no obvious effect |
| -                | Slightly negative            |

|     |                     |
|-----|---------------------|
| --  | Moderately negative |
| --- | Strongly negative   |
| ?   | Effect uncertain    |

2.23 Objectivity and consistency in making judgements is assisted by reference to the assessment rationale (Table 3.6). This provides a focus for the appraiser in terms of understanding what the SA objective is trying to achieve and what impact the proposed action may have. Matrices were used to record likely sustainability effects of each option against each objective in the SA framework.

2.24 Full details of the assessments can be found in Appendix E and summaries of the assessments can be found in section 5.

2.25 The appraisal findings together with responses to the Options consultation were taken into account in the development and choice of the Preferred Strategy.

### **B3: Predicting the Effects of the Preferred Strategy**

2.26 The methodology that has been adopted for this assessment is generally broad-brush and qualitative which is generally accepted as good practice by the SA guidance.

2.27 The assessment of the Preferred Strategy has been broken down into 'evaluation' of effects and 'mitigation' of effects.

2.28 The prediction of effects was undertaken for each proposal being implemented through the LDP against the SA Framework.

### **B4: Evaluating the Effects of the Preferred Strategy**

2.29 The next stage of the assessment involved the evaluation of the significant effects. The evaluation involved forming a judgement on whether or not the predicted effects will be environmentally significant. The technique that has primarily been used to assess the significance of effects in this assessment is a qualitative assessment based on expert judgement. Other techniques included consultation with stakeholders involved in the SA process, geographical information systems and reference to key legislation, primarily the Strategic Environmental Assessment of Plans and Programmes Regulations 2004 and Environmental Impact Assessment Regulations 1999.

2.30 As with the prediction of the effects, the criteria of assessing the significance of a specific effect used in this assessment, as outlined in Annex II of the SEA Directive, has been based on the following parameters to determine the significance:

- Scale;
- Permanence;
- Nature and sensitivity; and
- Cumulative effects.

2.31 In the current practice of sustainability appraisals, the broad-brush qualitative prediction and evaluation of effects is based on a qualitative seven point scale in easily understood terms. In general, this assessment has adopted the scale set in Table 2.4 to assess the significance of effects of the LDP proposals.

Table 2.4 - Criteria for Assessing Significance of Effects

| Assessment Scale | Assessment Category          | Significance of Effect |
|------------------|------------------------------|------------------------|
| +++              | Strongly positive            | Significant            |
| ++               | Moderately positive          |                        |
| +                | Slightly positive            | Not Significant        |
| 0                | Neutral or no obvious effect |                        |
| -                | Slightly negative            |                        |
| --               | Moderately negative          | Significant            |
| ---              | Strongly negative            |                        |
| ?                | Effect uncertain             |                        |

2.32 Moderately and strongly positive and negative effects have been considered of significance whereas neutral and slightly positive and negative effects have been considered non-significant.

#### Secondary and Cumulative Effects Assessments

2.33 Annex I of the SEA Directive requires that the assessment of effects include secondary, cumulative and synergistic effects.

2.34 Secondary or indirect effects are effects that are not a direct result of the plan, but occur away from the original effect or as a result of the complex pathway e.g. a development that changes a water table and thus affects the ecology of a nearby wetland. These effects are not cumulative and have been identified and assessed primarily through the examination of the relationship between various objectives during the assessment of environmental effects.

2.35 Cumulative effects arise where several proposals individually may or may not have a significant effect, but in-combination have a significant effect due to spatial crowding or temporal overlap between plans, proposals and actions and repeated removal or addition of resources due to proposals and actions. Cumulative effects can be:

- Additive- the simple sum of all the effects;
- Neutralising- where effects counteract each other to reduce the overall effect; and
- Synergistic- is the effect of two or more effects acting together which is greater than the simple sum of the effects when acting alone. For instance, a wildlife habitat can become progressively fragmented with limited effects on a particular species until the last fragmentation makes the areas too small to support the species at all.

2.36 Many environmental problems result from cumulative effects. These effects are very hard to deal with on a project by project basis through Environmental Impact Assessment. It is at the SA level that they are most effectively identified and addressed.

2.37 Cumulative effects assessment is a systematic procedure for identifying and evaluating the significance of effects from multiple activities. The analysis of the causes, pathways and consequences of these effects is an essential part of the process.

2.38 Cumulative (including additive, neutralising and synergistic) effects have been considered throughout the entire SA process, as described below:

- As part of the review of relevant strategies, plans and programmes and the derivation of draft SA objectives, key receptors have been identified which may be subject to cumulative effects;
- In the process of collecting baseline information cumulative effects have been considered by identifying key receptors (e.g. specific wildlife habitats) and information on how these have changed with time, and how they are likely to change without the implementation of the LDP. Targets have been identified (where possible), that identify how close to capacity the key receptor is, which is a key determining factor in assessing the likelihood of cumulative and synergistic effects occurring, and their degree of significance;
- Through the analysis of environmental issues and problems, receptors have been identified that are particularly sensitive, in decline or near to their threshold (where such information is available);
- The development of SA objectives, indicators and targets has been influenced by cumulative effects identified through the process above and SA objectives that consider cumulative effects have been identified; and
- The likely cumulative effects of the strategic alternatives have been identified which highlighted potential cumulative effects that should be considered later in the SA process.

#### **B5: Considering Ways of Mitigating Adverse Effects and Maximising Beneficial Effects**

- 2.39 Mitigation measures have been identified during the evaluation process to reduce the scale/importance of significant negative effects.

#### **B6: Proposing Measures to Monitor the Significant Effects of Implementing the LDP**

- 2.40 SA monitoring involves measuring indicators which will enable the establishment of a causal link between the implementation of the plan and the likely significant effect (positive or negative) being monitored. It thus helps to ensure that any adverse effects which arise during implementation, whether or not they were foreseen, can be identified and that action can be taken by BGCB to deal with them.

#### **Stage C: Preparing the Sustainability Appraisal Report**

- 2.41 This Initial Sustainability Appraisal Report is the outcome of Stage C in the SA Process and will be used to inform the LDP Pre-Deposit consultation.

## 3. Stage A: Developing the SA Framework

- 3.1 The development of a Sustainability Appraisal framework is a key component in completing the SA by synthesising objectives relevant to the SA, the baseline information and sustainability issues into a systematic and easily understood tool that allows the prediction and assessment of effects arising from the LDP.

### A1: Review of Relevant Plans and Programmes

- 3.2 The first task of a SA is the identification of other relevant plans, programmes and sustainability objectives. An LDP may be influenced in many ways by other plans and programmes and by external sustainability objectives, such as those laid down in policies and legislation. The SEA Directive states that the Environmental Report should provide information on:

*‘the plan’s ‘relationship with other relevant plans and programmes’ and ‘the environmental protection objectives, established at international, [European] Community or national level, which are relevant to the plan...and the way those objectives and any environmental considerations have been taken into account during its preparation’.* (Annex 1 (a), (e)).

- 3.3 Relevant international, national, regional and local plans and programmes that might influence the plan were identified. Broad SA objectives generated from the review have been grouped under the three main topic headings namely, Environmental, Social and Economic, encompassing the three dimensions of sustainable development. Each objective has been assigned to the dimension of sustainable development to which it is most strongly associated. The table also sets out the source documents (specified plans and programmes) from which the broad SA objectives have been derived, together with their relationship to SEA topic areas, which must be considered to fulfil the requirements of the SEA directive. The results of this exercise are given in Appendix B.
- 3.4 As set out previously, this table draws together sustainability themes that have emerged as being common to the various policies and plans reviewed as part of the SA development process. In essence, in order to conform to international, national, regional and local policies, plans and programmes, the SA Objectives developed in Section 5 must reflect each of the broad sustainability themes drawn out and tabulated.

Table 3.1 - Broad Sustainability Themes

|  | Source                           |  |  |   |
|--|----------------------------------|--|--|---|
| Sustainability Theme   | International                    | National/Regional  | Local  | SEA Topics                                    |
| <b><i>ECONOMIC</i></b>   |                                  |  |  |   |
| <i>Ensure high and stable levels of local employment</i>   | The European Employment Strategy | A Winning Wales, The National Economic Strategy of WAG, Five Counties Regeneration Framework; Turning Heads: A Strategy for the Heads of the Valleys 2020; Heads We Win – A Strategic Framework for the Heads of the Valleys; South East Wales Development Strategy – Enter the Dragon   | Blaenau Gwent Development Plan for the Strategy for Older People In Wales, Blaenau Gwent Community Plan 'proud past, bright future' 2005-2009, Ebbw Vale Urban Function Analysis, Blaenau Gwent Economic Development Strategy 2004, Blaenau Gwent Heritage Strategy  | Population                                    |
| <i>Promote economic growth and business competitiveness</i>  | The European Employment Strategy | A Winning Wales, The National Economic Strategy of WAG, South East Wales Economic Development strategy, Wales Spatial Plan; South East Wales Development Strategy, PPW, Turning Heads: A Strategy for the Heads of the Valleys 2020; Heads We Win – A Strategic Framework for the Heads of the Valleys; Five Counties Regeneration Framework | Blaenau Gwent Unitary Development Plan; Blaenau Gwent Economic Development Strategy 2004, Blaenau Gwent Regeneration Strategy  | Population, Material Assets                   |
| <i>Ensure a supply of local employment sites and premises which meet the needs of a diverse changing economy</i> |                                  | South East Wales Economic Development Strategy, South East Wales Development Strategy – Enter the Dragon, Five counties Regeneration Framework   | Blaenau Gwent Unitary Development Plan; Blaenau Gwent Economic Development Strategy 2004, Blaenau Gwent Regeneration Strategy  | Population, Material Assets                   |
| <i>To promote/develop a knowledge based economy</i>  |                                  | TAN 19 Telecommunications 2002, A Winning Wales, South East Wales Economic Development strategy; Five counties Regeneration Framework; Wales a Better Country  | Blaenau Gwent Unitary Development Plan, Blaenau Gwent CBC Corporate Improvement Plan 06/07   | Population, Material Assets                   |
| <i>Establish a strong tourist economy, sensitively capitalising on environmental, heritage, and</i>              |                                  | PPW, TAN13 – Tourism, Sports Tourism in Wales: A framework for Action, Cultural Tourism Strategy for Wales; Wales Spatial Plan; A Revised Tourism Strategy for South East Wales; Review of the Historic Environment in Wales;  | Blaenau Gwent Community Plan 'proud past, bright future' 2005-2009, Ebbw Vale Urban Function Analysis, Brynmawr Urban Function Analysis, Tredegar Urban Function Analysis, Abertillery Urban Function Analysis, Blaenau Gwent County Borough Council Tourism Strategy, Blaenau Gwent County Borough Council UDP, Blaenau Gwent | Population<br>Cultural Heritage,<br>Landscape |

|   |                                   |   |   |   |

## A2: Baseline Information data analysis

- 3.5 The next task in the SA covers the collection of baseline information. The review of other plans and programmes undertaken previously has also provided a considerable amount of baseline information and this information has been complemented by collection of data on key indicators relating to the SEA topic areas, as well as additional social and economic indicators for the Area.
- 3.6 The SEA Directive says that the Environmental Report should provide information on:  
*“relevant aspects of the current state of the environment and the likely evolution thereof without implementation of the plan” and the “environmental characteristics of the areas likely to be significantly affected” (Annex I (b) (c)) and*  
*“any existing environmental problems which are relevant to the plan or programme including, in particular, those relating to any areas of a particular environmental importance, such as areas designated pursuant to Directives 79/409/EEC (Birds Directive) and 92/43/EEC (Habitats Directive)” (Annex I (c))*
- 3.7 The baseline data provides an overview of the environmental, social and economic characteristics of the LDP area and how these compare to the region, the rest of the Principality and the UK are presented in Appendices C and D. The most efficient way to collect relevant baseline data is through the use of indicators. This ensures that the data collection carried out is both focused and effective. The identification of relevant indicators has taken place alongside the assessment of other relevant plans policies and programmes (Task A1), the identification of sustainability issues (Task A3) and developing the sustainability appraisal framework (Task A4).
- 3.8 Data have been collated and analysed for the following indicators:

### Economic Data

- Incomes and Economic Activity
- Entrepreneurial Dynamism
- Retail
- Car Ownership

### Social Characteristics

- Housing
- Population
- Health and Wellbeing
- Crime and Fear of Crime
- Education, Skills and Qualifications
- Recreation

### Environmental Characteristics

- Special Areas of Conservation
- Sites of Special Scientific Interest
- National Nature Reserves
- Local Nature Reserves
- National Parks
- Protected Species

- Listed Buildings
- Conservation Areas
- Registered Historic Parks and Gardens
- Scheduled Ancient Monuments
- Air Quality
- Greenhouse Gas Emissions
- Chemical and Biological Water Quality
- Flood Risk
- Ground and Surface Water Availability
- Waste
- Energy
- Landscape
- Soil
- Geodiversity
- Public Rights of Way
- Travel to Work

3.9 The information provided aims to demonstrate the key issues and problems to be tackled by the LDP, in addition to wider sustainability issues that may arise as a result of implementing the LDP. These are summarised in Table 3.3.

3.10 Due to the fact that SA is an iterative process subsequent stages in its preparation and assessment might identify other issues and priorities that require data collection and monitoring. This makes the SA process flexible, adaptable and responsive to changes in the baseline conditions and enables trends to be analysed over time

3.11 Information describing the baseline provides the basis for the prediction and monitoring of the effects of the implementation of the LDP and its constituent documents. It can be used as a way of identifying problems as they occur so that relevant policy changes can be made to address such matters.

## Cumulative Effects

3.12 Cumulative effects can occur from the following situations:

- Combined effects of a plan with effects of another plan, affecting the same receptor, for example, proposals from land use and transport plans could affect a nature reserve;
- Interaction of policies within a plan in the same receptor: for example, a policy to encourage development which promote jobs and a housing policy to provide more housing to meet the borough's target could result in a cumulative loss of open space;
- Interaction of effects from proposals within a plan affecting the same receptor: for example, proposals to build roads, commercial premises and housing in a particular area within a short period of time could result in cumulative noise, dust and visual effects on the residents nearby.

3.13 A preliminary analysis has identified an initial set of likely cumulative effects, their receptors and likely causes, as shown in Table 3.2. This initial assessment of likely cumulative effects will be further examined in section 6.

Table 3.2 - Potential Cumulative Effects and their causes

| Cumulative Effect                           | Affected Receptor   | Causes   |
|---|---|--|
| 1. Habitat loss and fragmentation           | <ul style="list-style-type: none"> <li>- SSSI, SPA, SAC</li> <li>- BAP - Areas of local conservation significance</li> <li>- Reptiles, amphibians, invertebrates, breeding birds, bats, and potentially badgers</li> <li>- Sites of non-designated significance for nature conservation including wildlife corridors</li> </ul> | Use of land for new infrastructure, dwellings and employment uses.   |
| 2. Climate change                           | <ul style="list-style-type: none"> <li>- Worldwide</li> </ul>   | Increase in CO <sub>2</sub> emissions through increased motorised transport usage and increased emissions from residential and commercial developments           |
| 3. Increase in ambient noise levels         | <ul style="list-style-type: none"> <li>- People living adjacent to major roads</li> <li>- Species</li> </ul>  | Increase in traffic flows, increased congestion, new transport infrastructure  |
| 4. Increase in air pollution                | <ul style="list-style-type: none"> <li>- People living and working in identified and possibly extended Air Quality Management Areas</li> <li>- Wildlife habitats and species described in 1 above.</li> </ul>   | Increase in traffic flows, increased congestion, new transport infrastructure  |
| 5. Fragmentation/ loss of public open space | <ul style="list-style-type: none"> <li>- Residents</li> <li>- Existing public open space</li> <li>- Wildlife habitats and habitats and species described in 1 above.</li> </ul>   | Use of land for new infrastructure, dwellings and employment uses.   |
| 6. Degradation of water quality             | <ul style="list-style-type: none"> <li>- Residents</li> <li>- Wildlife habitats and species described in 1 above.</li> </ul>  | Use of land for new infrastructure and increased runoff from impermeable surfaces contaminating waterways.   |
| 7. Loss of local townscape character        | <ul style="list-style-type: none"> <li>- Listed Buildings</li> <li>- Areas of Special Character</li> </ul>  | Unsympathetic design of new development negatively affecting the setting of listed buildings. Disturbance to character of areas through increased traffic flows. |
| 8. Increase in flood risk                   | <ul style="list-style-type: none"> <li>- Residents</li> <li>- Wildlife habitats and species described in 1 above.</li> </ul>  | Use of land for new infrastructure, dwellings and employment uses and associated increase in impermeable   |

|   |  |   |
|---|--|---|
|   | - Coastal habitats.  | increase in impermeable surfaces.   |
| 9. Improvement in overall levels of health                          | - Residents  | Increase in walking and cycling from infrastructure improvements. Improvements in levels of air quality.  |
| 10. Increase in accessibility to essential services                 | - Residents  | Improved provision of public transport, walking and cycling, and car linkages to essential services. Direct provision of new community facilities.          |
| 11. Reducing road traffic and congestion                            | - Residents<br>- Wildlife habitats and species described in 1 above. | Various measures and proposals aimed at reducing road traffic and congestion and encouraging alternatives to the car.                                       |
| 12. Attracting inwards investment and increasing economic diversity | - Residents  | Various proposals aimed at improving the image of the area to residents and businesses, which may attract additional private sector investment in the area. |

### A3: Key Sustainability Issues

- 3.14 The next task in the SA, carried out at the scoping stage, is the identification of sustainability issues. The identification of sustainability issues of particular significance in Blaenau Gwent County Borough provides an opportunity to define key issues for the LDP, to enable improvement of the plan objectives and options. The analysis of sustainability issues at scoping stage influenced the baseline and the SA framework, in particular in identifying and selecting indicators and targets. This section describes the current situation and highlights the key issues faced within Blaenau Gwent. It does not attempt to cover all the issues but identifies those that are considered to be a priority in terms of the sustainability of the plan area.
- 3.15 The requirement to identify sustainability problems and issues arises from the SEA Directive, where the Environmental Report required under the Directive should include:
- “any existing environmental problems which are relevant to the plan or programme including, in particular, those relating to any areas of a particular environmental importance, such as areas designated pursuant to Directives 79/409/EEC(Birds) and 92/43/EEC(Habitats)”(Annex I (d))*
- 3.16 The key sustainability issues for Blaenau Gwent County Borough have been derived by analysing the baseline data and contextual information from other plans and assessing what the likely significant issues will be over the longer term i.e. 10 years +. The key sustainability issues relevant to the LDP were identified in the following ways:
- Review of plans, policies and programmes
  - Review of baseline data
  - Initial discussions with key stakeholders

- Advice and participation with other departments within the Council
- Consultation responses to the Scoping Report

3.17 The analysis of sustainability issues has been iterative and is ongoing. As the SA develops with further stakeholder involvement the analysis of key issues is likely to evolve.

3.18 The key sustainability issues are set out below in Table 3.3.

Table 3.3 - Key Sustainability Issues/Opportunities

| Key Issues  | Implications for Plan   | SEA Topics                 | Relationship to SA objective (Table 5.1) |
|---|---|----------------------------|--|
| <b>Economic</b>   |   |                            |  |
| <p><b>High levels of economic inactivity and high benefit dependence</b></p> <p>30.4% of the working age population are economically inactive in the County Borough, which is over 5% more than the Wales average. Of that percentage, 10.4% of people consider themselves as 'wanting a job', which may indicate that there is a shortage of opportunities in the area. However, 20% are recorded as 'not wanting a job' – this statistic is also higher than the Wales average of 18.7% and could be interpreted as an indication of low aspirations or ambitions amongst the resident population. Reducing the numbers of economically inactive in the borough should be a key aim.</p> <p>In 2000 the unemployment rate was 9.6% which decreased to 7.5% by 2003/04. This is high compared to the rest of SE Wales and Wales averages and could be interpreted as a further indication of a lack of job opportunities in the area, or a lack of jobs matching the skills of the resident population. It is also important to note that a substantial proportion of the population of working age suffers from limiting long term illness and/or disability – 28.26% at the last census compared to 23.4% in the South East region and 23.3% across Wales as a whole. Whilst this does not necessarily preclude economic activity, it is likely that some sufferers appear in the statistics relating to economic inactivity.</p> <p>The wards of Ebbw Vale North and South, Brynmawr and Nantyglo have particularly high rates of unemployment in the context of the County Borough as a whole.</p> | <p>The plan needs to encourage the development of new job opportunities, and ensure that the distribution of new opportunities supports regeneration across the County Borough, particularly in the most deprived wards. Environmental enhancements could also be supported through the LDP, which would offer a greater incentive for new businesses to invest in the County Borough.</p> <p>The statistics suggest that there is some reluctance among certain sectors of the population to actively seek employment and thus the LDP should seek to raise aspirations – this could be achieved through a combination of regeneration activities including environmental and accessibility improvements and increased availability of training and education.</p> | Population<br>Human Health | Objective 1                              |

|  |   |  |                    |
|--|---|--|--------------------|
| <p>The proportion of the population of working age claiming job seekers allowance (JSA) is considerably above the regional and national averages – 4.1% in Blaenau Gwent compared to 2.4% nationally. In addition to this, the latest available statistics indicate that the 2005 rate (4.1%) has increased in recent years – it was 4.3% in December 2006 and 4.9% in April 2007. This means that the working and earning population of the County Borough is being forced to support an increasing amount of unemployed adults.</p> <p>The statistics also indicate that in many of the County Borough's wards, over one third of all households receive Council Tax Benefit – the highest is Nantyglo, where 39.1% of all households receive this benefit. In addition, in many of the Blaenau Gwent wards almost one quarter of all households are in receipt of housing benefit of some type. This is also reflected in statistics relating to housing by tenure – in general terms owner occupation levels are low (62.2%, which is 10% lower than the regional average) and around one quarter of the population rely upon local authority owned housing or rent from registered social landlords.</p> <p>There is a proven link between employment and better health, not only for financial and physical benefits, but also from more subtle mental benefits conferred by being economically active.</p> <p>Recent research has found the health effects of worklessness to be comparable in severity to those from heavy smoking.</p> <p>Lack of appropriate qualifications is now generally agreed to be a bigger factor in worklessness than poor health throughout the 'heads of the valleys' region, but nevertheless many people who are economically inactive (and quite a lot who are in or seeking work) do have significant health problems.</p> <p>70% of the county borough is classified as rural, discussions with stakeholders have highlighted the need for diversification of the rural economy in order to improve sustainable rural development.</p> |   |  |                    |
| <p><b>Limited employment opportunities and low household income</b></p> <p>Manufacturing accounts for 31.6% of all employment in Blaenau Gwent, which is almost twice the Wales average. Professional occupations in</p>   | <p>There is a need for the LDP to seek to encourage increased economic activity rates. This will require the provision of versatile and varied employment premises across the plan area. Particular emphasis will need to be placed on supporting both small and medium sized</p> | <p>Population<br/>Human<br/>Health</p> | <p>Objective 2</p> |

|   |  |  |                                     |
|---|--|--|-------------------------------------|
| <p>the County Borough account for 5.8% of all employment, whereas in the South East they account for 11.87%.</p> <p>An examination of employment by sector reveals that the local economy is predominantly based around manufacturing and service sectors. These sectors are traditionally lower skilled and lower paid than professional employment. The dominance of these sectors has therefore also influenced income and productivity levels – the gross value added (GVA) per head in Blaenau Gwent places the area in the bottom 5 authorities in its statistical area (NUTS 3); and the average incomes are significantly lower than the average for South East Wales and the Principality as a whole.</p> <p>From 2002 to 2005, average weekly household income in Blaenau Gwent has been less than that of the rest of the South East region and for the whole of Wales. Of particular note are the wards of Llanhilleth, Nantyglo, Cwmtillery and Tredegar where there are a very significant proportion of households with incomes of less than £5,000 per annum. All the wards in the County Borough show high proportions of households on earnings of less than £12.25k per annum. These low income figures are a reflection of the predominance of low skilled, low wage employment opportunities and the general low level of economic participation.</p> <p>Blaenau Gwent has a significantly lower amount of VAT registrations in all of the size band categories than the average for the South East authorities and Wales as a whole. In particular, it has very few larger registrations (employing over 10 staff). A comparison at the regional level reveals that Blaenau Gwent has consistently experienced the second least number of new registrations over the past 5 years after Merthyr Tydfil and in most recent years, registrations in Blaenau Gwent have been over 150 less than any other authority in the region (with the exception of Merthyr Tydfil). This appears to suggest that there is a lack of entrepreneurial culture in the County Borough.</p> | <p>be placed on supporting both small and medium sized start up enterprises to foster a sense of entrepreneurial spirit, as well as providing high quality accommodation to support higher skilled professions and services.</p> <p>There is also a need to encourage people of working age to settle in the area, thus it will be increasingly important to ensure that job opportunities are matched by access to housing that is suitable and affordable.</p> |  |                                     |
| <p><b>Tourism potential</b></p> <p>The landscape and heritage of Blaenau Gwent constitute a small mosaic of the many features of Wales with an intrinsic tourism value. However, due to the size and diversity of the County Borough, there is no dominant brand that defines the area as a tourist destination. Of particular note is the fact that only 3% of the land utilisation is for</p>   | <p>As part of the wider effort to seek to diversify the local economy, the LDP should seek to support developments aimed at encouraging an increase in the recreational function of suitably accessible parts of open countryside. This will include specific consideration of the way in which tourism development is addressed and promoted through the LDP. When increases in</p>   | <p>Population<br/>Landscape<br/>Cultural Heritage<br/>Biodiversity</p> | <p>Objective 3<br/>Objective 10</p> |

|  |   |  |                    |
|--|---|--|--------------------|
| <p>recreational purposes, which is a very small proportion compared to the 45% of the County Borough's area that is open countryside. Furthermore, many of the attractions are mainly for local people and there would be a need to review the current offer in order to create sites, attractions and/or products that appeal to an increased number and broader cross-section of visitors.</p> <p>In addition to the quality, range and type of attractions in the area, the development of the tourism economy would require considerable investment in upgrading all accommodation and food sectors.</p> <p><b>Angling</b></p> <p>There is a shortage of angling facilities in the County Borough. Developing angling facilities can have a positive impact on encouraging tourism and contributing to community health and wellbeing.</p> <p>The promotion of angling can bring in tourists from outside the area, which will provide extra customers for hotels, shops, restaurants and other local businesses.</p> <p>It should be recognised that the participation in angling has been shown to reduce local crime (especially amongst youths) and truancy. The levels of education amongst the new, young anglers have been found to improve, as the anglers are keen to learn about their environment and what they can do to conserve local public amenities. Furthermore, these facilities are less likely to be vandalised and damaged, as the local anglers take pride and ownership of these facilities, and wish to maintain them in good order. Fishing has also been shown to improve people's health, as it encourages gentle exercise, getting out into the fresh air, and reduces stress levels.</p> | <p>promoted through the LDP. When increases in recreational function are considered, the impact upon the countryside, particularly visual, must be taken into account. This also applies to land designated for its ecological value.</p> <p>There are huge opportunities in how the LDP may assist in delivering the aim to 'establish a strong tourist economy, sensitively capitalising on environmental, heritage and leisure assets', through developing eco tourism through the management of open spaces and heritage sites and improvement of facilities that will bring considerable investment into the area.</p> <p>The LDP should seek to develop and promote angling in Blaenau Gwent.</p> | <p>Human Health<br/>Water<br/>Material Assets<br/>Biodiversity</p> |                    |
| <p><b>High Vacancy Rates in Town centres</b></p> <p>According to the Adopted UDP July 2006, high town centre vacancy rates exist throughout Blaenau Gwent and there is a risk that town centres could decline in the face of competition from nearby retail centres outside the County Borough.</p>  | <p>The LDP should enhance the vitality and viability of town centres, through regeneration policies, and improve the retail offer within the County Borough.</p>  | <p>Population</p>  | <p>Objective 4</p> |
| <p><b>Social</b></p>   |   |  |                    |
| <p><b>Changing demographics and housing needs</b></p> <p>Since its heyday in 1921 when the population was 127,611, Blaenau Gwent has experienced continued population decline. Between 1982 and 2002 it experienced a 7.2% drop. The population in 1991 was</p>  | <p>Demographics are a key influencing factor for a wide range of different development types – housing, education provision, open space and recreational opportunities, healthcare and community service. The</p>   | <p>Population<br/>Human Health</p>                                 | <p>Objective 5</p> |

|  |   |                   |                    |
|--|---|-------------------|--------------------|
| <p>73,250 and the population in 2003 was 68,900, which is over 100 less than two years previous. The projections for 2011 anticipate a reversal of this decline, but only estimate the population to be 500 more than the 1991 levels. However, the South East region and Wales as a whole have experienced population increases over the same period, and are projected to continue to increase substantially to 2011. These figures suggest Blaenau Gwent is a less desirable place to live and people are being drawn to places perceived to offer more opportunities. Allied to this, population decrease or stagnation can also act as a deterrent to prospective business investors, who tend to prefer to locate in areas that are perceived to be growing.</p> <p>An examination of the County Borough's 2001 demographics indicates that the 16 – 19 year old age bracket comprises the smallest proportion of the population, below regional averages. Conversely, the 45 – 64 and 65+ age groups comprise a larger population than the South East average, suggesting that there is an ageing population. In addition, the percentage of 0 – 4 year olds is also lower than the South East average by almost 1% and thus there is likely to be a developing trend of death rates outstripping birth rates over the coming years.</p> <p>Furthermore, strategy documentation relating to the County Borough suggests that there is a relatively high level of youth out-migration. This affects a variety of areas – a reduced population of childbearing age is unlikely to support an increase in population through increased birth rates; the loss of the younger population will affect social structure; and it is likely to be the more skilled persons that leave the area in search of better paid and more varied work opportunities, which has negative implications for the development of certain aspects of the local economy.</p> <p><b>Gypsy Accommodation</b></p> <p>The Blaenau Gwent Gypsy-Traveller Study has identified the need for further land for new gypsy travellers at Cwmcraehen.</p> | <p>LDP will need to take changing local demographics into consideration and offer an opportunity to seek the delivery of a more balanced and self-sufficient community. Housing choice will need to reflect the needs of and seek to attract people of households of different ages, sizes and life stages, including the provision of sheltered accommodation; community provision (healthcare/ community centres/nursing homes/social services support etc.) will need to accommodate the requirements of all ages; and open space provision will need to include both formal provision for play space, as well as more informal provision better suited to older age groups.</p> |                   |                    |
| <p><b>Poor housing quality and mismatch of housing size/tenure with needs and demand</b></p> <p>55% of the current housing stock in Blaenau Gwent comprises terraces constructed before 1919. Overall in Blaenau Gwent 8% of the housing stock is considered unfit for habitation, and a further 12% is classified as being in need of substantial repair. In addition to this, 5.7% of houses are recorded as being vacant – in some parts of the country this would</p>  | <p>The quality and range of housing in Blaenau Gwent will be a critical element of the development of the County Borough – there is a need to ensure that poorer quality stock is improved and that new stock is designed to suit a range of needs and budgets.</p> <p>There is also a need to upgrade housing stock,</p>   | <p>Population</p> | <p>Objective 6</p> |

|   |   |                   |                    |
|---|---|-------------------|--------------------|
| <p>be due to second home purchases; however, in Blaenau Gwent this is a combination of uninhabitable properties and inevitable vacancies associated with the activity of the property market.</p> <p>The 2001 census indicated that there were still a number of houses without central heating and/or the sole use of bath/shower and toilet. From the census classifications, 'without central heating but with the sole use of a bath/shower and toilet' is the predominant statistic with a count of 712 houses for the County Borough as a whole – this is a reflection that there may be issues of poverty and deprivation in certain locations.</p> <p>Discussions with the council also indicate a demand for 4-bed detached dwellings, of which there is a shortage in the authority. This may mean that those who can afford this type of property will move elsewhere, which may have implications for the social mix in the community.</p>  | <p>including the provision of high quality larger homes more suited to attracting professionally qualified people to the area to take up residence and jobs.</p> <p>The improvement of existing stock will also benefit from improvement in accordance with holistic plans for regeneration to ensure that changes are an improvement to the area. Allied to this, the provision of housing may need to respond to the planned improvements to the rail infrastructure, particularly in terms of accommodating a potential increase in demand linked to rail commuting.</p> |                   |                    |
| <p><b>Housing affordability problems</b></p> <p>Although prices have increased over the period 2000 – 2006, the average house price for Blaenau Gwent in 2006 was nearly £50,000 less than that of the Welsh average (82,486 compared to £136,419). This can be interpreted as an indication that Blaenau Gwent is perceived as a less desirable location in which to live than other neighbouring settlements, which could be a consequence of a number of factors including accessibility, perceived employment opportunities, quality of housing stock, environmental quality and lack of suitable accommodation. However, the opening of the new railway station in Ebbw Vale may catalyse a trend of workers from Cardiff, who will be attracted by the relatively low house prices in Blaenau Gwent, moving to the area. This will result in increased demand from buyers outside the area pushing the prices up. This may have implications for the affordability of housing for local people.</p> | <p>In order to enable those wishing to buy as opposed to rent to access market housing, there will be a need to ensure that the choice of units is affordable and appealing in the context of local market conditions.</p>  | <p>Population</p> | <p>Objective 7</p> |
| <p><b>Low educational attainment</b></p> <p>The percentage of people with at least NVQ level 2 qualifications is below the regional average by over 2% (41.1% compared to 43.25%). Furthermore, both the County Borough and regional averages are considerably below the Welsh average, which is 60.3%. Of the County Borough's total population, only 9.5% hold qualifications to NQV level 4</p>  | <p>There is a high proportion of the population with few or no qualifications; provision should be made for encouraging an increase in the percentage of people continuing into higher education – this must start at the primary level and follow through schooling at all levels.</p>   | <p>Population</p> | <p>Objective 8</p> |

|  |   |  |                    |
|--|---|--|--------------------|
| <p>or above, compared to the South East regional average, which is 17.38% and the national average, which is 22.5%.</p> <p>Considerably less than half of the County Borough's population (43%) are achieving 5 or more GCSEs grade A*-C – the national statistic is 51%. Llanhilleth and Sirhowy have particular issues with low attainment. In 2003 30.4% of the population had no qualifications. In the same year, that figure was 17.8% for Wales.</p> <p>Tredegar and Ebbw Vale North have particularly high percentages of non attendance in primary and secondary schools, likely to lead to low educational attainment.</p> <p>Only 6.3% of the total population of the County Borough was enrolled in higher education in 2003, which is a relatively low proportion.</p>  |   |  |                    |
| <p><b>Transport access constraints to the area</b></p> <p>By air, the nearest airports are Cardiff International, Bristol and Birmingham. There are a number of low cost options to access these airports, from the City Centres themselves, but there are limited public transport links from Blaenau Gwent to these cities, which make it difficult to promote the area as a short-break destination.</p> <p>Rail links are available, although these tend to follow the valley topography, focusing on longitudinal routes towards Cardiff. The new Ebbw Valley railway provides a connection to Cardiff. The northern area of the County Borough, however, still lacks an easily accessible rail service. This should be improved by the proposed extension to the proposed rail halt in Ebbw Vale. Two nearby stations fall just outside the County Borough boundary and comprise the Valleys line station at Rhymney, with access to the West coast mainline being more distant at Abergavenny.</p> <p>The principal road system provides A-road access to the motorway network (the M4, M5 and M50) combined with the A470 and A465. Dualling work is being done to improve the access; however, there is a danger that this may increase the traffic flow passing through the area rather than bringing more visitors to it.</p> | <p>The LDP should support provision of more public transport connections from the main centres such as Cardiff.</p> <p>Improvements to public transport provision in and around Blaenau Gwent will be important in enabling weekend trips with return on Sunday, and access to employment for people living in the County Borough outside of the urban areas. The LTP should be taken into regard throughout the LDP.</p> <p>It is important to also ensure that by attracting people to Blaenau Gwent the environment and infrastructure is able to cope with increased car usage.</p> <p>The LDP should encourage, as a priority, improvements to the Rights of Way network, which will have benefits for tourism, health, heritage assets, air quality, and access to facilities for the population.</p> | <p>Population, human health, air, cultural heritage, climatic factors, material assets</p> | <p>Objective 9</p> |

|   |  |  |  |
|---|--|--|--|
| <p>The local bus service provides a reasonable level of service during weekday working hours and a range of services on Saturday; however, evening and Sunday service coverage is poor, as are some lateral connections between valleys resulting in heavy reliance on taxi services. This is a key issue, particularly given that the levels of car ownership (35.1% of households do not have access to a car or van, compared to 28.5% regionally and 26% nationally) and household income are relatively low in the County Borough, with particular areas of social and economic disadvantage. There is also a perceived lack of safe parking facilities for HGVs in the area and safe access for HGVs to industrial estates is also an issue in some cases.</p> <p>The Public Rights of Way network currently suffers from fragmentation and poor maintenance, restricting its use by walkers, horse riders and cyclists as an alternative mode of transport. 30% of this network consists of bridleways or carriageways mainly used as bridleways, where there is right of way on foot, riding or leading a horse, and cycling. Not all of these routes may be in a useable condition. Also, the distribution of the network is not even across the County Borough, and there are several factors arising from a lack of maintenance that have lead to restricted usability of this facility. Three factors identified that need improving are: more circular routes- signed and advertised as such; the need to link paths together- defragmentation; and more long distance routes.</p> <p>In terms of travel distances to work, in Blaenau Gwent the majority of the population travels less than 5km commuting distance. 31% of the County Borough's population relies on the private car for their work journey, with only 6.6% of the population walking or cycling to work. In terms of car ownership, 45.1% of the resident population owns one car only, with 35.1% of Blaenau Gwent's residents neither owning nor having access to a car or van. In comparison to regional and national statistics, in general terms car ownership levels are considerably below average in Blaenau Gwent and a considerably greater proportion of the population is without access to a car.</p> <p>Discussions with BGCBC have highlighted the need to create a settlement hierarchy within the County Borough, acknowledging Ebbw Vale as a main centre, with Tredegar, Abertillery, Blaina and Brynmawr as secondary centres to be linked by public transport to Ebbw Vale</p> |  |  |  |
|---|--|--|--|

|  |  |  |                     |
|--|--|--|---------------------|
| <p><b>Health</b></p> <p>Life expectancies for both males and females across the County Borough are below national averages. The proportion of people with limiting long term illness is above the South East and national averages: 28.26% compared to 23.4% in the South East and 23.3% in Wales. In addition, people who self-assessed their general health as 'good' (2001 Census) represented a lower proportion of the population than the South East and national averages: 59.38% in Blaenau Gwent compared to 64.48% in the South East and 60.06% in Wales.</p> <p>The 2004/05 Welsh Health Survey indicates that 12% of adults in Blaenau Gwent report being treated for a mental illness, which is well above the Welsh average of 9%. Mental health and illness have been linked to deprivation, with both MCS scores and rates of anxiety and depression decreasing and increasing respectively with increases in deprivation. Environmental factors such as poorly equipped town centres and limited transport links in some areas can also contribute to poor mental health.</p> | <p>The LDP can indirectly assist through the provision of better access to healthcare and recreation opportunities and through economic development opportunities.</p> <p>The LDP should ensure that environmental factors that may contribute to poor mental health are minimised.</p>  | <p>Population<br/>Health</p>                                   | <p>Objective 10</p> |
| <p><b>Welsh language and culture</b></p> <p>Despite the rich industrial heritage of the locality, there are very few members of the population that actively make use of the Welsh language – over 90% of the population are either unable to speak Welsh or have no Welsh speaking communications.</p> <p>However, there is a distinctive 'valleys' culture apparent in the Blaenau Gwent area – this has developed from a strong sense of community and social networks that are not linked to the Welsh language.</p>   | <p>In seeking to develop the distinctive identify of the County Borough, it will be important to determine what role the Welsh Language and Culture should have. The LDP can influence this through factors such as the provision of sites for Welsh medium schools and interpretation of heritage and social assets. In addition, the design of housing and community facilities and services should seek to actively support and further strengthen existing social networks, preserving the distinctive character of the Valleys communities.</p> | <p>Population<br/>Cultural<br/>Heritage</p>                    | <p>Objective 11</p> |
| <p><b>Crime and social deprivation</b></p> <p>In general terms, crime rates in Blaenau Gwent are broadly comparable and, if anything, slightly lower than the prevailing rate per 1000 for the whole of the South East region. Notwithstanding this, however, the overall rate is relatively high.</p> <p>Violence against the person seems to be significantly higher than the other crime rates. Potentially, this could be linked in part to poor urban design and a lack of planning for safe communities resulting in a number of areas in the County Borough where criminal activity is more likely to</p>   | <p>There will be a need for the Local Development Plan to minimise opportunities for criminal activity. This will primarily relate to design measures such as the mixing of house types and sizes, the location of public and private open space and the network of routeways, particularly for non-motorised users. In addition, careful consideration will need to be given to the siting of any commercial activities and security of vulnerable land-uses.</p>   | <p>Population<br/>Human<br/>Health<br/>Material<br/>Assets</p> | <p>Objective 12</p> |

|   |  |  |  |
|---|--|--|--|
| <p>go undetected because, for example, visibility is hindered or there are no surveillance techniques in design. Consultation with the SA Stakeholder group has highlighted the link between alcohol consumption and violence against the person.</p> <p>In terms of social deprivation, there are a variety of health related statistics that are commonly used as indications of social deprivation and/or disadvantage. In Blaenau Gwent, the analysis of the baseline has revealed the following:</p> <p>The rate of teenage conceptions is considerably above the regional average – 60.4 per 1000 compared to 45.7 per 1000;</p> <p>The proportion of pregnancies resulting in low birth weight babies is above regional and national averages. In particular Sirhowy, Ebbw Vale, South Abertillery and Nantyglo have high rates, particularly Sirhowy, which is 13.3%;</p> <p>The proportion of the population stating their health as ‘good’ is only 59.38%. The regional average is 64.48% and the national average is 65.06%;</p> <p>28.26% of the working age population suffer from limiting long term illness, which is above the regional (23.4%) and national (23.3%) averages;</p> <p>The proportion of the population that smokes is above the national average – 34% compared to 31%;</p> <p>Life expectancy at birth is considerably below the national average – 73.80 for males and 78.4 for females in Blaenau Gwent compared to 75.8 for males and 80.3 for females across Wales;</p> <p>The death rate was higher than the South East regional average by over 2% in 2001. Deaths from circulatory disease were 40.9 per 1,000 and deaths from cancer were 26.1 per 1,000; and</p> <p>The proportion of adults (aged 16+) who are obese is 59%, which is 5% higher than the South East average.</p> <p>There is a significant number of Christian residents (44,973) in the borough and only very small minorities of other religions, Muslim being the 2<sup>nd</sup> highest religion with 152. There are also a large number of people who stated having no religion or did not state any religion; the sheer difference in numbers of religious groups could mean that problems relating to social exclusion and integration may occur in the</p> | <p>The siting of public houses and late night takeaway facilities should be considered in relation to their potential affect on the generation of anti social behaviour.</p> <p>Providing a range of leisure facilities for residents to participate in may reduce crime rates by providing other activities for people to participate in and provide opportunities for social integration. Accompanied with encouraging and facilitating higher education achievement and raising aspirations, particularly amongst the younger members of the community, this may also help to reduce teenage pregnancies</p> <p>It will also be necessary to ensure that housing standards are improved throughout the borough, either through grants or providing more job opportunities to increase household income.</p> <p>To a certain extent, some of the health statistics may be linked to the fact that Blaenau Gwent tends towards a more elderly population. However, the LDP may also offer an opportunity to help contribute to improved health through providing space and facilities for increased recreational and sporting pursuits; adopting an approach to design that seeks to safeguard air and water quality; and encouraging increased levels of walking and cycling.</p> <p>There are issues with car accessibility in the area; by seeking provision for increased access to health care, the health conditions of the people in the county borough may also improve.</p> <p>Land use, and planning of housing, town centres, transport routes etc can play an important role in promoting social cohesion and interaction, and ultimately better community mental health.</p> |  |  |
|---|--|--|--|

|   |  |  |                             |
|---|--|--|-----------------------------|
| borough.  |  |  |                             |
| <b>Environment</b>  |  |  |                             |
| <p><b>High car usage and CO2 emissions</b></p> <p>There are significantly less people using public transport in Blaenau Gwent than the average statistics for the rest of the South East region and Wales as a whole – 5.4% of all commuting trips compared to 7.8% nationally. Use of car for commuting trips by the County Borough's residents is slightly higher than the national average – 79.7% compared to 77.8%. However, a greater proportion of Blaenau Gwent's residents commute to work on foot than nationally (12.5% compared to 10.4%).</p> <p>The share of road transport related CO<sub>2</sub> emissions in Blaenau Gwent is lower than the Wales average – 16% and 23% respectively. This may be a reflection of the socio-economic statistics, which indicate low car ownership rates in the County Borough. Fewer car trips for leisure, social, shopping and healthcare purposes may also be a factor.</p> <p>The County Borough contains a high percentage of houses that are not energy efficient, and therefore use a high level of gas.</p> | <p>The LDP should seek improved public transport and walking and cycling provision with new development to provide alternative transport modes in light of the potential future increase in car users in the area.</p> <p>The LDP should actively discourage car use; for example, by limiting car parking space in shopping centres that are well served by public transport, also by promoting park and ride sites where appropriate.</p> <p>The LDP should seek to improve the energy efficiency of housing to reduce costs, use of natural resources and greenhouse gas emissions.</p> | <p>Air<br/>Climatic Factors<br/>Population<br/>Human Health<br/>Material Assets<br/>Landscape<br/>Biodiversity</p> | <p>Objectives 13 and 18</p> |
| <p><b>Potential Effects on European Sites</b></p> <p>Under the Habitats Regulations, the County Borough has undertaken a Screening Exercise. The following Special Areas of Conservation (SAC) are within a search area of 15km around Plan/Proposal Area:</p> <ul style="list-style-type: none"> <li>• Cwm Clydach Woodlands (adjacent)</li> <li>• Usk Bat Site (2.8km from county borough)</li> <li>• River Usk (3.94km from county borough)</li> <li>• Aberbargoed Grassland (4.37km from county borough)</li> <li>• Sugar Loaf Woodlands (7.88 km from county borough)</li> <li>• Brecon Beacons (10.13km from county borough)</li> <li>• Llangorse Lake/ Llyn Syfaddan (10.13km from county borough)</li> <li>• Coed Y Cerrig (11.61km from county borough)</li> <li>• Cwm Cadlan (12.87km from county borough)</li> </ul> <p>Based on the information gathered for the screening process and</p>  | <p>The LDP will need to take the results of this exercise, when they are available, into consideration to ensure that the LDP implements appropriate mitigation and protection measures.</p>   | <p>Biodiversity</p>  | <p>Objective 14</p>         |

|   |   |  |                     |
|---|---|--|---------------------|
| <p>considering the Habitats Regulations requirements for a precautionary approach, it is determined that further Appropriate Assessment work is required for:</p> <ul style="list-style-type: none"> <li>• Cwm Clydach Woodlands</li> <li>• Usk Bat Site</li> </ul>   |   |  |                     |
| <p><b>Under appreciation and protection of natural resources and biodiversity</b></p> <p>Blaenau Gwent has a limited number of sites designated on the basis of their ecological importance. Despite this, the Local Biodiversity Action Plan identifies a very broad range of species and habitats considered worthy of protection from damage, coupled with detailed listings of the range of pressures that face these habitats (e.g. overgrazing; lack of traditional countryside management practices; presence of invasive species; under valuing of moorland habitats; chemicals; domestic pets, etc.). Consequently, the current lack of designations could be considered as a failure to fully recognise the presence of valuable resources in the area, which have an important potential role in the wider economic regeneration and tourism agendas. This is a particular issue given that the County Borough boundary encompasses part of the Brecon Beacons National Park.</p> <p>The total number of SINCs (Sites of Importance for Nature Conservation) is unknown. The first tranche of designations will include 60 SINCs. Subsequent tranches are planned.</p> <p>10 new LNRs (Local Nature Reserves) are planned. These are aimed at increasing the awareness of and regulatory powers to protect the area's valuable natural assets.</p> <p>The County Borough includes the Cwm Merddog and Coed Ty'n y Gelli SSSIs near Cwm, which are both fine examples of ancient semi-natural woodlands.</p> <p>The use of 'off-road' vehicles is causing damage to valuable ecological resources.</p> <p>Wales has a relatively high rainfall compared to the rest of the UK, with an average of 1400mm per year compared to 700mm in the south east</p> | <p>The LDP will need to reflect both the principles and the results of the process of ecological site assessment – latest research suggests that at least 20 SINCs and at least 5 new LNRs should be designated without further delay. A further 40 SINCs and 5 more LNRs should ideally be implemented in the near future. This will reduce the risk of their removal by development.</p> <p>The protection and management of designated sites is imperative in terms of protecting the biodiversity resource of Blaenau Gwent. This resource is vulnerable to new developments and land management practices which could result in habitat loss and fragmentation. Up to date information on the condition of all sites is not currently available. It is important that these areas are carefully mapped, monitored and protected from development</p> <p>Biodiversity cannot just be protected through the protection of statutory and non-statutory designated wildlife sites alone. The LDP process should deliver the protection, enhancement and expansion of the Local Biodiversity Action Plan important habitats and species in the wider countryside alongside protection of designated sites.</p> <p>Creation of habitat within new developments where it has previously been lost should be promoted. This could include landscaped areas to benefit wildlife and the use of SUDS incorporating habitat creation (e.g. green/brown roofs, wetlands)</p> <p>Development and biodiversity do not have to be mutually exclusive in all cases. Dependent on the</p> | <p>Biodiversity<br/>Flora and Fauna<br/>Soil<br/>Landscape<br/>Water</p> | <p>Objective 14</p> |

|   |   |   |                     |
|---|---|---|---------------------|
| <p>of England. Companies in Wales are predicting increases in household demand for water over coming years, not just because of rising numbers of households but also because of greater individual consumption. Only 5% of households in Blaenau Gwent have a metered water supply. Infrastructure provision for both sewerage and water supply needs to be considered.</p>  | <p>existing ecological conditions of an area, the level of possible development intensity should also be considered on a site by site basis. Correct determination of development intensity (and ultimately design) will enable the retention and potentially increased robust ecosystem and provide for high quality developments for the local community.</p> <p>In addition to the need to protect existing landscape of good quality, there is an opportunity to create a valued landscape area for Blaenau Gwent which will help enhance its attraction as a place to live, work and visit. There are also opportunities to strengthen links between Blaenau Gwent and the Brecon Beacons National Park.</p> <p>Protection should also be afforded to the ancient woodlands within the area, supported by increased woodland cover if appropriate.</p> |   |                     |
| <p><b>Under appreciation and protection of heritage resources</b></p> <p>The South East Wales region has approximately 56 registered historic parks and Gardens. Out of the 10 regional authorities, Blaenau Gwent only has one registration – Bedwellty House and Park – which is a very low proportion. It was also suggested in the consultation on the Scoping Report that this historic park and garden was in need of improvement. The Heritage Strategy recognises that the range and significance of archaeological monuments and sites within the County Borough is not well known and nor is it sufficiently recognised and appreciated.</p> <p>In addition to the above, despite the fact that the area has a considerable heritage resource (e.g. the Garden City, Sy Illtyd’s Church, Castle Street and the Circle) and, as set out in the Heritage Strategy, the majority of the County Borough’s buildings are over 100 years old, there is only one designated conservation area within the County Borough and 58 listed buildings, none of which are Grade 1. This means that heritage assets may face considerable development pressure, potentially to the detriment of their quality and potential integration into the establishment of tourism and visitor products and attractions.</p> <p>The above points are reinforced by the fact that nearly 20% of all of the</p> | <p>It will be important for the heritage assets of the County Borough to be thoroughly reviewed, restored and protected from detrimental development as appropriate. Enhancement of assets that are known to be at risk should also be supported through the LDP.</p> <p>The Heritage Strategy sets out aspirations to improve the educational value of existing heritage interpretation facilities/museums, together with a desire to develop the Nantyglo roundhouse complex as a high quality heritage centre and educational resources for both locals and visitors. The Plan will need to consider how these aims and objectives may best be achieved through planning policy.</p>   | <p>Cultural Heritage<br/>Landscape<br/>Material Assets<br/>Soil<br/>Flora and Fauna</p> | <p>Objective 15</p> |

|  |  |  |                     |
|--|--|--|---------------------|
| <p>listed buildings in the area are at risk. Degradation of the historic character of certain parts of the County Borough may also reduce the desire live and work in the area.</p>  |  |  |                     |
| <p><b>Limited supply of developable land</b></p> <p>The area is predominantly open countryside (45%), with only 23% of the total land area falling within the defined urban area and a further 9% designated as urban fringe. However, not all of the open countryside is developable, due to the limiting topography of the area. This is likely to present constraints to development on the basis of landscape and biodiversity value, which will either increase demand for the limited supply of brownfield land in the County Borough; or alternatively act as a deterrent to developers who may seek to identify less constrained sites in neighbouring authority areas.</p>          | <p>In order to integrate sustainability issues associated with all three dimensions (social, economic and environmental), it will be of critical importance that the identification of development sites in the LDP is effective in enabling the commercial reuse of brownfield land, including contaminated sites; and that the loss of valuable greenfield land to development is avoided wherever possible. Such land allocations will need to be informed by a robust understanding of the financial pressures of commercial development in order to ensure that all allocations have a realistic prospect of development in the LDP period.</p> | <p>Soil<br/>Biodiversity<br/>Fauna<br/>Flora<br/>Landscape</p>           | <p>Objective 16</p> |
| <p><b>Contaminated sites</b></p> <p>Given the industrial legacy of the County Borough, there is a considerable number of contaminated sites (1607 sites in 2003), which may present future development issues as the cost of remediation will need to be factored into site development costs and, in some cases, may prove to be prohibitive. Historic trends lend support to this issue - there are only two major contaminated sites in Blaenau Gwent that have been remediated in preparation for development.</p>   | <p>The LDP will need to ensure that remediation of contaminated land takes place before its development to should seek to protect human health, biodiversity, and all controlled water, which includes groundwater, as well as watercourses.</p>   | <p>Soil<br/>Landscape<br/>Human Health<br/>Material Assets<br/>Water</p> | <p>Objective 17</p> |
| <p><b>Geodiversity</b></p> <p>Blaenau Gwent includes the Brynmawr Sections (geological site) SSSI. The landscape/geomorphology of the Blaenau Gwent area is controlled by Upper Palaeozoic, Upper Carboniferous rocks of the Productive Coal Formation (Lower-Middle Coal Measures) and overlying South Wales Pennant and Grovesend formations (Pennant Measures/Upper Coal Measures). Coal mining was an important industry, and evidence of previous mining activity remains in the landscape in the form of spoil heaps, tips, mine shafts and areas of made ground. On valley slopes with ancient landslips, renewed instability has resulted from extraction of coal and ironstone.</p> | <p>The LDP should include a policy to ensure protection of soils and geodiversity.</p>   |  |                     |

|  |  |                        |                     |
|--|--|------------------------|---------------------|
| <p>The geological landscape is relatively robust; in upland plateau areas where the Condition is generally Good. The Trend, where subject mainly to natural weathering and degradation – as across wide areas of the upland plateau - is considered relatively Constant. In coal mining areas, extraction has largely ceased, and reclaimed or made ground in the valleys has been developed. The condition in such areas is more generally Fair, but the trend remains Constant. Management priorities are long-term, as is appropriate to a Level 3 study.</p>   |  |                        |                     |
| <p><b>Waste management</b></p> <p>Household waste arisings per household since 1998 have been increasing more rapidly in Blaenau Gwent than the South East local authority average. In 1998 Blaenau Gwent recorded 1,321 tonnes per household compared to 1,113 for the South East; by 2005 Blaenau Gwent's household arisings were 1,507 tonnes compared to a regional average of 1,284.</p> <p>In addition to household rates, waste arisings per person have also increased more rapidly in Blaenau Gwent than the regional average: in 1998 Blaenau Gwent residents produced an average of 511 tonnes of waste per person compared to 455 tonnes for the South East region as a whole; by 2005, the Blaenau Gwent average was 648 compared to 519 tonnes across the region.</p> <p>Higher than average and increasing household waste coupled with low participation in recycling schemes in the County Borough have important implications for housing renewal initiatives and the wider regeneration agenda.</p> <p>Waste Management and Recycling- participants at group thought that the recycling rate was high not low- 22.5% (comparators?) Target- 40% by 2010</p> | <p>The LDP will need to promote a holistic approach to waste management. This includes the development of new waste management facilities, which should include waste treatment and recycling, as well as the management of waste water. The plan should ensure that where capacity does not exist, development should be considered as premature until the necessary improvement works have been undertaken.</p> <p>In addition, there will be a need to address waste production at source through improved sustainable design of buildings and the provision of domestic sorting and composting facilities.</p> | <p>Material Assets</p> | <p>Objective 19</p> |

## A4: Developing the Sustainability Appraisal Framework

- 3.19 The next task in the sustainability appraisal is the development of the Sustainability Appraisal framework. The SA Framework is a key component in completing the SA by synthesising the baseline information and sustainability issues into a systematic and easily understood tool that allows the prediction and assessment of effects arising from the implementation of the LDP. Though the SEA Directive does not specifically require the use of objectives or indicators in the SEA process, they are a recognised and useful way in which environmental effects can be described, analysed and compared at key stages of the LDP development.
- 3.20 The SA framework of objectives, indicators and targets is shown in Table 3.4. The 25 SA objectives have been worded so that they reflect one single desired direction of change for the theme concerned and do not overlap with other objectives. They include both externally imposed social, environmental and economic objectives and others devised specifically in relation to the context of the LDP being prepared and they are distinct from the LDP objectives. SA objectives 1-19 have been derived taking specifically account of local circumstances and concerns feeding from the analysis of sustainability issues (see Table 3.3 for relationship of sustainability issues to SA objectives). SA objectives 20-25 are objectives mainly influenced by national environmental policy. Although there might not be a local issue associated with these objectives at present they must be pursued from a sustainability perspective in the Blaenau Gwent LDP.
- 3.21 A set of indicators has been derived to capture the change likely to arise from the LDP implementation and will play a role in the assessment itself. Where appropriate, locally relevant indicators have been proposed based on the review of local plans and programmes, the evolving baseline, and from developing the analysis of the key sustainability issues.
- 3.22 Where appropriate, existing data sources and indicators which are already monitored in the County Borough have been used. In some cases, specific new indicators will require monitoring by relevant bodies should significant effects relating to the SA objectives concerned be identified as part of the assessment of effects during SA Stage B. It is therefore likely that there will be a shortened list of indicators in the sustainability monitoring programme for the LDP. Developing a good balance of appropriate and reliable indicators across the set of SA objectives will be crucial in the development of an effective but also practical monitoring programme.

## A5: Results from Consultation on the SA Scoping Report

- 3.23 The results from the consultation on the Scoping Report are integrated into this report where appropriate, as outlined in the Appendix A.

|    |   | <u>Amount or proportion of landscape subject to enhancement associated with development</u>                         | Increase                    |           |
|    |   | <u>Proportion of landscape characterised and managed</u>  | Increase                    |           |

## SA Baseline Data and Trends

- 3.24 The SA Framework is the key tool used in the assessment of effects. The prediction of effects, in terms of their magnitude, frequency, duration, and spatial extent, is conducted via detailed analysis of the baseline data. It is thus important to ensure that critical aspects of the baseline can be directly related to the objectives and indicators of the SA Framework. Determining the significance of predicted effects is perhaps the most critical task in the SA. The picture that the baseline presents in terms of the SA Framework is the starting point for this.
- 3.25 Table 3.5 presents a preliminary analysis of the fundamental characteristics of the baseline (current conditions, current and future trends, and sensitivity to change) against the draft SA objectives using a simple three-point normative scale against a series of variables as follows:
- current conditions - good/moderate/poor;
  - current trends – improving/stable/declining;
  - future trends (without plan implementation) - improving/stable/declining;
  - sensitivity to change – high/medium/low.
- 3.26 Sensitivity to change in the context of SA represents the extent to which, for instance, ecological thresholds may be close to being breached or carrying capacity exceeded, such that relatively small changes might be likely to induce disproportionately large effects, which in some instances might have wide-ranging and/or unexpected consequences. An example might be the decline of a particular wildlife population below the level at which it is viable in a particular habitat. CPRW has difficulty in understanding what is meant by ‘sensitivity to change’ and does not find ‘thresholds’ in this context an easy concept to grasp. This may be because examples are given from a single topic area.

### Existing Baseline Conditions and Current Trends

- 3.27 The existing social, economic and environmental baseline for Blaenau Gwent is summarised in Section 3 and contained in the baseline data sets in Appendix A.
- 3.28 The quality of the baseline data gives an indication of the certainty with which the other four parameters are known, and this is presented in Table 3.5 using a similar colour-coded three-point scale (high/medium/low).

### Predicted Future Trends

- 3.29 The SEA Directive requires the consideration of the likely evolution of the state of the environment without the implementation of the LDP. During the lifetime of the LDP it is predicted that there will be a number of external influences and variables which could affect Blaenau Gwent.
- 3.30 From Table 3.5 it is clear that without the implementation of the LDP, the future trends show decline with regards to a number of SA objectives, primarily relating to landscape quality, waste and heritage assets.
- 3.31 Although the predicted evolution of the baseline without the implementation of the LDP is projected to result in a number of stable conditions in respect of the SA objectives, there are seven objectives that are predicted to be improving. These are objectives 4, 8, 11, 14, 17, 18 and 24. These objectives are all subject to external influences in addition to the influence of the LDP.

### The Works

- 3.32 The redevelopment of the former steelworks site provides the opportunity to establish Ebbw Vale as a benchmark for sustainable development. It will produce long term benefits for Ebbw Vale and the broader community of Blaenau Gwent, creating an exciting place to live, learn, work and play.

- 3.33 A Masterplan has been prepared as part of the planning and approvals process for the site. The Masterplan proposes a mix of uses including the Learning Campus, Local General Hospital, Leisure Centre and sports pitches, a Theatre, high quality offices and around 500 homes.
- 3.34 Site earthworks have commenced including clean up of old industrial uses. Redevelopment of the site will be phased over a number of years.
- 3.35 This is likely to have implications for the land use development of the area, and may provide multiplier effects for the rest of the plan area.

## Data Limitations

- 3.36 There are notable data gaps relating to the SA objectives concerned with:
- the tourism economy
  - Welsh culture
  - renewable energy generation and use
  - the use of sustainable resources
  - carbon dioxide emissions
  - landscape quality
- 3.37 However, objectives relating to these areas can be found in the related plans and programmes, and thus are considered to be relevant for inclusion in the Sustainability Appraisal Framework.

Table 3.5 - SA Baseline Data and Trends Summary

|                           |   | <i>Local<br/>Baseline</i> |                                  | <i>Trends</i>  |   | <i>Existing<br/>data<br/>quality</i> | <i>Comments/Explanation</i>   |
|---------------------------|---|---------------------------|----------------------------------|----------------|---|--------------------------------------|---|
| <b>Draft SA Objective</b> |   | <i>Condition</i>          | <i>Sensitivity<br/>to Change</i> | <i>Current</i> | <i>Future<br/>(without<br/>the LDP)</i> |                                      |   |
| <b>Economic</b>           |   |                           |                                  |                |   |                                      |   |
| 1                         | To promote economic growth and strengthen and diversify the local economy                                   | Poor                      | Medium                           | Stable         | Stable                                  | Medium                               | Low levels of VAT registrations suggest current poor conditions for diversification of the local economy.   |
| 2                         | To increase levels of local employment and ensure distribution of opportunities                             | Poor                      | Medium                           | Improving      | Stable                                  | Medium                               | High levels of economic inactivity and unemployment rates characterise the County Borough, although unemployment rates have improved recently.  |
| 3                         | To enable the development of a strong tourism economy in Blaenau Gwent, complementary to the regional offer | Moderate                  | Medium                           | Stable         | Stable                                  | Low                                  | Blaenau Gwent presents a range of tourism opportunities including the Brecon Beacons. The sustainable tourism economy is likely to remain unchanged without implementation of the LDP.                                  |
| 4                         | To enhance the viability and vitality of town centres   | Poor                      | Medium                           | Improving      | Improving                               | Low                                  | Many town centres within Blaenau Gwent have high rates of vacancy. However, improvements through mechanisms such as Commercial Improvement Grants and Town Centre Strategies are likely to continue into the future.    |
| <b>Social</b>             |   |                           |                                  |                |   |                                      |   |
| 5                         | To meet identified housing needs  | Poor                      | Medium                           | Stable         | Stable                                  | Medium                               | Poor housing quality and mismatch of housing size/tenure with needs and demand are current issues facing the variety and quality of Blaenau Gwent's housing stock.  |
| 6                         | To improve the quality of Blaenau Gwent's housing stock   | Poor                      | Medium                           | Stable         | Stable                                  | Medium                               |   |
| 7                         | To secure the delivery and maintenance of quality affordable housing  | Moderate                  | Medium                           | Stable         | Stable                                  | Medium                               | The average house price for Blaenau Gwent in 2006 was nearly £50,000 less than that of the Welsh Average. However, average prices are predicted to increase substantially as better rail links are provided to Cardiff. |
| 8                         | To improve educational attainment   | Poor                      | Medium                           | Improving      | Improving                               | High                                 | Although current levels of education achievement are poor, improvements have been observed and  |

|                           |   | <i>Local<br/>Baseline</i> |                                  | <i>Trends</i>  |   | <i>Existing<br/>data<br/>quality</i> | <i>Comments/Explanation</i>  |
|---------------------------|---|---------------------------|----------------------------------|----------------|---|--------------------------------------|--|
| <b>Draft SA Objective</b> |   | <i>Condition</i>          | <i>Sensitivity<br/>to Change</i> | <i>Current</i> | <i>Future<br/>(without<br/>the LDP)</i> |                                      |  |
|                           | and increase skills levels  |                           |                                  |                |   |                                      | these are likely to continue into the future without the implementation of the LDP and continuation with current UDP policies.   |
| 9                         | To improve accessibility to education, leisure, employment, health, homes and community services for all sectors of the community | Moderate                  | Medium                           | Stable         | Stable                                  | Medium                               | Levels of accessibility are likely to remain consistent without implementation of the LDP and continuation with current UDP policies.  |
| 10                        | To promote community health, social care and well-being   | Poor                      | Medium                           | Stable         | Stable                                  | Medium                               | The majority of health statistics illustrate that poor health is an ongoing issue in the County Borough. High levels of poor health are likely to be a feature of the area for at least the next generation; and are unlikely to improve without serious changes in lifestyles and opportunities for healthier lifestyles, particularly for children and young people. |
| 11                        | To reduce crime, social disorder and fear of crime  | Moderate                  | Low                              | Improving      | Improving                               | Medium                               | In general terms, crime rates are broadly comparable and, if anything, slightly lower than rates for the South East region.  |
| 12                        | To protect and enhance the Welsh culture  | Moderate                  | Low                              | Stable         | Stable                                  | Low                                  | Over 90% of the population are unable to speak Welsh or have no Welsh speaking communications.   |
| <b>Environmental</b>      |   |                           |                                  |                |   |                                      |  |
| 13                        | To encourage modal shift from private transport to sustainable transport  | Moderate                  | Medium                           | Stable         | Stable                                  | Medium                               | The extension of rail services to Ebbw Vale is likely to improve the patronage of sustainable modes of transport, which may counterbalance the effects of an increase in car ownership.  |
| 14                        | To protect and enhance biodiversity across Blaenau Gwent  | Moderate                  | High                             | Stable         | Improving                               | Medium                               | At the present time many important habitats are not protected and face a range of pressures. There are plans for 82 new ecological designations, comprising 72 new Sites of Importance for Nature Conservation and 10 Local Nature Reserves.   |
| 15                        | To conserve and enhance the heritage assets of Blaenau Gwent and their  | Poor                      | High                             | Declining      | Declining                               | High                                 | Heritage assets may face considerable development pressure in the future due to the lack of heritage designations; despite the fact the area   |

|                           |   | <i>Local<br/>Baseline</i> |                                  | <i>Trends</i>  |   | <i>Existing<br/>data<br/>quality</i> | <i>Comments/Explanation</i>   |
|---------------------------|---|---------------------------|----------------------------------|----------------|---|--------------------------------------|---|
| <b>Draft SA Objective</b> |   | <i>Condition</i>          | <i>Sensitivity<br/>to Change</i> | <i>Current</i> | <i>Future<br/>(without<br/>the LDP)</i> |                                      |   |
|                           | settings  |                           |                                  |                |   |                                      | has a considerable heritage resource.   |
| 16                        | To make the best use of previously developed land and existing buildings to minimise pressure for greenfield development, where this will not result in damage or loss to biodiversity. | Moderate                  | Medium                           | Stable         | Stable                                  | Medium                               | Settlements in Blaenau Gwent have very high density figures and low amounts of urban land are designated as Greenfield.   |
| 17                        | To conserve soil resources and their quality  | Poor                      | Medium                           | Stable         | Improving                               | Medium                               | Blaenau Gwent has a large number of contaminated sites that will require remediation prior to development. Remediation of sites will be required without the implementation of the LDP. |
| 18                        | To reduce emissions of greenhouse gases, in particular carbon dioxide   | Moderate                  | High                             | Stable         | Improving                               | Medium                               | Government led initiatives are likely to lead to improvements in greenhouse gas emissions in the future without the implementation of the LDP.  |
| 19                        | To reduce waste generation and maximise reuse and recycling   | Poor                      | Medium                           | Declining      | Declining                               | High                                 | Household waste raisings are increasing faster than the south east average and this trend is likely to continue.  |
| 20                        | To maintain current air quality   | Good                      | Low                              | Stable         | Stable                                  | High                                 | There are no Air Quality Management Area's currently designated in the County Borough.  |
| 21                        | To maintain current low levels of vulnerability of all development to flooding  | Good                      | High                             | Stable         | Stable                                  | High                                 | The principal areas of flood risk are located along the river corridors which follow the north-south topography of the valleys through Blaenau Gwent.                                   |
| 22                        | To promote the use of sustainably sourced products and resources  | ?                         | ?                                | ?              | ?                                       | Low                                  | State and trends currently unknown.   |
| 23                        | To increase energy efficiency and generation and use of renewable energy across the County Borough  | ?                         | ?                                | ?              | ?                                       | Low                                  | State and trends currently unknown.   |
| 24                        | To conserve and enhance surface and ground water quality  | Moderate                  | Medium                           | Improving      | Improving                               | Medium                               | Water quality improvements are likely to continue without implementation of the LDP.  |
| 25                        | To protect the quality and character of the landscape and enhance where   | Moderate                  | Medium                           | Stable         | Decline                                 | Low                                  | Developable landscape within the area is limited and these areas may therefore suffer from disproportionate pressure. The character of the  |

## Assessment Assumptions and Rationale

- 3.38 As already discussed in Section 2 on methodology, the assessment undertaken relies heavily on professional judgement, which necessarily has an element of subjectivity. It also relies on certain assumptions about changes to people's behaviour as a result of the policies being assessed, the way development will be implemented and the way it will be influenced by other DPDs to be prepared subsequently. The following assumption has been made in the appraisal of the LDP policies:
- It is assumed that short term is 0-5 years; medium term is 6-15 years and long term is 16+ years.
- 3.39 In addition to the assumptions above the assessment was undertaken taking into account the following considerations outlined in Table 3.6.
- 3.40 The assessment did not appraise the effects of policies in isolation and did address the interaction between policies in the Core Strategy, where relevant, in terms of secondary, cumulative and/or synergistic effects.

Table 3.6 - Assessment Rationale

| No.             | Objective   | Rationale  |
|-----------------|---|--|
| <b>Economic</b> |   |  |
| 1               | To promote economic growth and strengthen and diversify the local economy                                   | The LDP may contribute to economic growth in a variety of different ways- availability of different employment types; enhanced access to employment sites for all modes; enhancement of infrastructure to support the development of new areas; secondary, multiplier or 'seeding' effects of particular types of development' measures to attract and retain a more diverse workforce; and enhancement of the landscape, townscape and/or other aspects of local 'image' to support investment. Assessment of LDP policies will consider the characteristics of the employment provided including aspects such as employment sector, increases in business numbers and changes in growth in different sectors, including tourism. |
| 2               | To increase levels of local employment and ensure distribution of opportunities                             | In order to contribute to local employment levels, the LDP should seek to provide land and buildings for employment use, in locations that are accessible by sustainable modes. Assessment of LDP policies will consider the creation of new employment opportunities including aspects such as wage levels, economic activity, benefit claimants, incomes, adult education, and the contribution this will make to the long term sustainability of employment opportunities in the area.  |
| 3               | To enable the development of a strong tourism economy in Blaenau Gwent, complementary to the regional offer | In order to contribute to the achievement of this objective the LDP should include policies that seek to encourage other sustainability objectives within this framework. Improvements in accessibility to, as well as within the plan area, will also increase its appeal as a visitor attraction. Decreasing air pollution through a shift to more sustainable modes of transport, improving the recreational and leisure offer (including angling); enhancing the landscape and historic assets; and enhancing green spaces and biodiversity will also enhance environmental, heritage and leisure assets and their settings. Additionally, policies should seek to improve visitor specific facilities such as accommodation.  |
| 4               | To enhance the viability and vitality of town centres   | In order to contribute to this objective, the LDP should include policies to support the regeneration of the town centres, through the allocation of sites for retail use as part of a mix that includes residential, leisure and employment uses, to encourage an increase in footfall throughout the day and evening.  |
| <b>Social</b>   |   |  |
| 5               | To meet identified housing needs  | The LDP should seek to provide policies that ensure a supply of housing that is appropriate to local needs, especially in relation to population growth and changing local demographics. The affordability, high quality and mix of housing to create more sustainable communities should be prioritised. Policies should consider whether residential development is in accessible locations and supported by adequate infrastructure capacity, including transport, waste and water considerations. Additionally, the LDP should provide a policy to cater for the needs of gypsies and travellers within the plan area.   |
| 6               | To improve the quality of Blaenau Gwent's housing stock   | The LDP should seek to upgrade the quality of existing and new housing stock, in order to aid regeneration policies and attract and retain a more diverse population mix.  |
| 7               | To secure the delivery and maintenance of quality affordable housing  | The LDP should ensure that those wishing to buy, as opposed to rent, to access market housing are able to through a choice of affordable and high quality housing.   |

| No. | Objective   | Rationale   |
|-----|---|---|
| 8   | To improve educational attainment and increase skills levels  | <p>In order increase skills levels, LDP policies should contribute towards improvement in existing educational facilities or the creation of additional educational facilities, specifically tertiary and higher education centres. Non-academic education should also be encouraged as a complement to LDP policies. Secondary considerations within policies to augment passive education such as interpretation of the natural and historic environment and community involvement in development initiatives will also be included in assessments.</p>   |
| 9   | To improve accessibility to education, leisure, employment, health, homes and community services for all sectors of the community | <p>LDP policies could include new or enhanced provision of facilities as well as improved access either directly through increased provision in areas of deficiency, or indirectly through improved transport links. The following services may be included as priorities:</p> <ul style="list-style-type: none"> <li>• nursery/first school;</li> <li>• primary/middle school;</li> <li>• secondary school;</li> <li>• health centre;</li> <li>• local shop;</li> <li>• pub;</li> <li>• post office;</li> <li>• community centre;</li> <li>• local centre;</li> <li>• place of worship;</li> <li>• outdoor open access public area;</li> <li>• children's play area;</li> <li>• pharmacy;</li> <li>• libraries;</li> <li>• residential homes for elderly people;</li> <li>• cemeteries;</li> </ul> |

| No.                  | Objective  | Rationale   |
|----------------------|--|---|
|                      |  | <ul style="list-style-type: none"> <li>• open space;</li> <li>• sports facilities;</li> <li>• supported accommodation;</li> <li>• theatres and cinemas.</li> </ul>  |
| 10                   | To promote community health, social care and well-being                  | In order to improve the health, social care and wellbeing of the population through its policies, the LDP could seek to improve access to health facilities. Indirectly, health levels could be improved through secondary effects of policies to reduce air pollution; ensuring homes are of a decent standard and by decreasing noise pollution as well as traffic congestion. Improving walking and cycling facilities, including through PROWs, for both purposeful and recreational trips will both improve physical activity levels as well as decrease air pollution and traffic. Improving access to and provision of greenspace and improving both informal and formal physical activity levels, as well as create a general sense of wellbeing. This also links to the quality of housing in objective 6. |
| 11                   | To reduce crime, social disorder and fear of crime                       | The LDP should include policies that engender a sense of safety and reduce crime and fear of crime through indirect measures such as incorporating design features in new development (such as additional lighting, CCTV, active street frontages, development reaching 'secured by design' standards). Policies could seek to discourage incidences of anti-social behaviour and opportunistic crime, often attributed to 'boredom' or a 'lack of things to do', through increasing the range and availability of community facilities, especially open and green space and leisure facilities.  |
| 12                   | To protect and enhance the Welsh culture                                 | The LDP should seek to enable a policy direction that protects and enhances welsh cultural identity. Policies may include encouragement of an increase in welsh speakers, community groups, cultural events and activities, and welsh medium education.   |
| <b>Environmental</b> |  |   |
| 13                   | To encourage modal shift from private transport to sustainable transport | This objective should seek to prioritise the reduction in the need to travel, as the most sustainable solution. Subsequently, the residual travel requirements should be prioritised through the 'transport hierarchy' as identified in the Manual for Streets. Policies should prioritise the encouragement of walking and cycling as the first option to reduce current reliance on the private car, to decrease overall reliance on motorised transport. Policies should subsequently seek to encourage a modal shift to bus and train transport, by improving frequency, reliability and convenience of services, especially with regard to journeys to work and school. This will have positive effects on greenhouse gas emissions, as well as human health and local air quality.                            |
| 14                   | To protect and enhance biodiversity across Blaenau Gwent                 | The LDP policies should seek to have a positive effect on designated and non-designated habitats and species. This may be achieved through increasing connectivity and/or reducing disturbance. The policies should also seek to result in the conservation, enhancement or creation of habitats, including those in both land and marine environments. This is especially important in relation to the connectivity of habitats in order to enable migration of species and enhance biodiversity. Migration is especially important in relation to the predicted effects of climate change.  |
| 15                   | To conserve and enhance  | The LDP should seek to have a positive effect on the county borough's heritage assets including listed buildings, historic parks and gardens, and archaeologically important sites. The LDP should encourage recognition of such sites and subsequent   |

| No. | Objective   | Rationale  |
|-----|---|--|
|     | the heritage assets of Blaenau Gwent and their settings   | <p>conservation and enhancement. Negative physical change or increased disturbance should be avoided. Policies should seek to encourage sympathetic integration of development with local character.</p> <p>Alongside designated features, non-designated features of local historical and architectural interest and value should also be considered, since these can make an important contribution to creating a sense of place, local identity and distinctiveness in both rural and urban areas. Beyond site specific areas, consideration should be given to landscapes and townscapes, as well as the potential for unrecorded archaeological interest.</p> <p>Policies that reduce traffic levels will provide secondary benefits, as will other non-intrusive traffic management and exclusion measures. Policies to reduce the effects and contribution to climate change could help to reduce the impact on heritage sites from weather events.</p> <p>The impact of encroachment on greenfield sites, air pollutants, noise and vibration as well as consideration of the cumulative impact of incremental changes to the physical environment, particularly in the setting of sensitive sites/ buildings, will also be reflected in the assessment.</p> |
| 16  | To make the best use of previously developed land and existing buildings to minimise pressure for greenfield development, where this will not result in damage or loss to biodiversity. | <p>To enable the achievement of this sustainability objective, the LDP policies should seek to make the best use of land and buildings.</p> <p>This may be achieved through the encouragement of higher density development and the use of previously developed land as a priority. The siting of development in areas served by sustainable transport modes is also considered an efficient use of land. Through using previously developed land, consideration should be given to land with a low biodiversity value in the first instance. In relation to areas of land that are contaminated, policies should seek to reduce land contamination and safeguard soil quality and quantity.</p>   |
| 17  | To conserve soil resources and their quality  | <p>Policies should seek to encourage the local sourcing of materials, in order to protect geodiversity and mineral resources, alongside soil resources. The use of reclaimed materials should also be prioritised. This will be in combination with the rationale for objective 16.</p>  |
| 18  | To reduce emissions of greenhouse gases, in particular carbon dioxide   | <p>The LDP should seek to achieve this objective through reducing emissions that arise from buildings, land use change, transport, agriculture, consumer goods, amongst others. Policies could encourage more sustainable layouts within development, as well as adherence to guidance such as the Code for Sustainable Homes and BREEAM.</p> <p>A major consideration will be the extent to which policies encourage an improvement in sustainable transport for access to decrease traffic congestion and volume.</p>  |
| 19  | To reduce waste generation and maximise reuse and recycling   | <p>In order for the LDP to achieve more sustainable waste management, it could include policies that directly reduce the generation of waste and increase the recycling of waste against standard levels expected for development, e.g. by providing recycling and composting facilities within and near to homes as well as public buildings and areas. Policies should also specifically refer to the need to reduce, re-use and recycle construction waste.</p> <p>The LDP should also include the allocation of sufficient land to enable as much self sufficiency in waste management and processing as possible.</p>   |
| 20  | To maintain current air quality   | <p>This sustainability objective should be sought to be achieved through the LDP policies, primarily through the reduction in the volume of motorised traffic through a modal shift to more sustainable modes and improved traffic flow and reduced congestion as population and development increases in the plan area. Significant construction activities may reduce air quality during the period of works and the policies should promote mitigation of these effects.</p>  |

| No. | Objective  | Rationale  |
|-----|--|--|
|     |  | There should be a positive correlation between air quality, health improvements and the use of more sustainable modes of transport.  |
| 21  | To maintain current low levels of vulnerability of all development to flooding                     | <p>Minimising the risk from flooding to people and property, as well minimising the frequency of flooding events should be a key policy consideration in the LDP as growth in population and development occurs. This is especially important with the increasing effects of climate change. Assessments will include the consideration of effects on flood risk from all sources either directly or indirectly through proximity/ location within areas of flood risk (for example through locating development in flood plains), or indirectly through exacerbation of effects downstream or increasing the proportion of impermeable surfaces. Policies should result in a decrease in flood risk, which may include policies to encourage Sustainable Urban Drainage Systems.</p> <p>An increased risk from flooding to people and property may be reduced through policies to prevent increased density of development in flood risk areas. Other possible risk reduction measures that could be included within policy may include the following:</p> <ul style="list-style-type: none"> <li>• a change in land use to reduce the vulnerability of the proposed development;</li> <li>• a reduction in the building platform area;</li> <li>• the raising of internal floor levels and flood proofing (within existing buildings) to reduce potential flood damage;</li> <li>• the rearrangement of buildings within the site to remove obstructions to overland flow paths; and</li> <li>• the placement of buildings to higher areas within the site to limit the risk of flood damage and/or enable the provision of escape routes</li> </ul> |
| 22  | To promote the use of sustainably sourced products and resources                                   | The LDP should seek that all development ensures that materials used are sourced sustainably, that is they are locally sourced and contain low embodied energy. This will contribute to objectives 2,10,13,17,18,20 and 23.  |
| 23  | To increase energy efficiency and generation and use of renewable energy across the County Borough | <p>The LDP should include policies that will directly reduce energy demand by encouraging energy efficiency. Policies may include the encouragement of improving the energy efficiency of dwellings through measures such as improved insulation; efficient heating and hot water systems; eco labelled white goods installed; and the use of low energy lighting. Assessment of the achievement of this sustainability objective will also consider indirect effects such as development located to reduce transport distances and design factors such as building orientation (linked to passive solar gain) and building form. The extent to which policies promote the use of low embodied energy materials from sustainable sources and material from local sources and suppliers in the construction of new developments will be assessed.</p> <p>Policies may also encourage the use of the Code for Sustainable Homes or BREEAM assessment methods to ensure high standards of development in energy efficiency.</p> <p>In order to promote renewable energy production and use through the LDP, policies could specify the need for all developments to assess the potential for microgeneration within their sites, implementing wherever possible as a condition of permission. Policies could also specify that a certain percentage of energy used on the site must come from renewable sources, generated either on site, or elsewhere where on site generation is not feasible.</p>   |
| 24  | To conserve and enhance surface and ground water   | LDP policies should seek to have a positive effect on maintaining and enhancing the quality of surface and ground waters. This will include policies to control the following, amongst others: surface water run-off from impermeable surfaces; proximity of   |

| No. | Objective   | Rationale  |
|-----|---|--|
|     | quality   | <p>development and agriculture to watercourses; and intensity of development.</p> <p>Sewage discharges into watercourses should be prevented. The opening up of culverts into watercourses and increasing the length of watercourse restored/impacted on should be considered.</p> <p>In order to reduce water consumption through the LDP, its policies should seek to deliver measures to encourage a responsible approach to water use, re-use and conservation. Conservation methods may include grey water recycling, incorporation of dual water supplies, low water use appliances and water metering, to reduce pressure on potable water resources.</p>   |
| 25  | To protect the quality and character of the landscape and enhance where necessary | <p>Policies should seek to limit the effect of development on the landscape, including open land lost to built development, as well as the efficient use and appearance of development. Secondary beneficial effects will be associated with policies that will reduce traffic levels in the Council area, as well as other non-intrusive management and exclusion measures. The cumulative impact of encroachment on greenfield sites, air pollutants, noise and vibration as well as consideration of incremental changes to the physical environment will be considered in relation to their effect on the landscape as well as it's users from a physical as well as visual amenity perspective.</p> |

## 4. Stage B: Development of the Issues, Vision and Options

### B1: Testing the LDP Objectives against the Sustainability Appraisal Objectives

#### 4.1 The LDP vision is:

*'Through collaborative working, by 2021, Blaenau Gwent will become a network of sustainable, vibrant valley communities, where people have the skills, knowledge and opportunities to achieve a better quality of life and residents will live in safe, healthy and thriving communities, with access to a range of good quality affordable homes and thriving town centres. Its unique environment, cultural and historic identity will be protected and enhanced to create a place where people want to live, work and visit.'*

#### 4.2 In order to achieve this vision, a series of objectives have been identified. The generation of these objectives was informed by workshops held with stakeholders and elected members.

#### 4.3 The LDP objectives which were tested against the SA Objectives are:

1. Develop Ebbw Vale as the main service and retail hub for the County Borough
2. Create a network of vibrant district centres (secondary hubs), well linked to the main hub of Ebbw Vale, that provide a range of local services and facilities for their local communities.
3. Support and deliver the regeneration of the former Ebbw Vale Steelworks ensuring that the benefits are spread across the borough.
4. Increase economic activity through facilitating diversification of the economic base and support for the manufacturing sector by encouraging specialisation.
5. Provide a range of employment sites and premises to meet the needs of businesses of all sizes in manufacturing, the technological and service sectors.
6. Stem out-migration and attract people to the area to create a more balanced population.
7. Provide a range of types and tenures of new homes to meet local housing needs and attract people to the area.
8. Improve accessibility to services through the promotion of sustainable modes of transport, particularly, public transport, walking and cycling.
9. Improve education levels and skills through supporting infrastructure development of the Learning Campus, new schools and integrated education services, including life-long learning.
10. Create an accessible network of open spaces and high quality leisure infrastructure to promote participation in sport and active recreation to improve health and well-being.
11. Capitalise on the unique landscape and natural heritage, foster sustainable tourism and promote community pride.
12. Protect, enhance and manage the diversity and ecological network of Blaenau Gwent.
13. Raise the standard of design to improve the quality of the physical environment; and protect and enhance Blaenau Gwent's historic and cultural environment.
14. To mitigate against and adapt to climate change.

- 4.4 The LDP objectives were tested for compatibility with the SA objectives (see Figure 4.1). This helped to consider to what degree they are in accordance with sustainability principles, with a view to developing and refining the LDP objectives through an iterative process.
- 4.5 The LDP objectives were broadly compatible with the SA objectives, although many of the objectives could be compatible subject to the nature of their delivery. For example, objective 5 could be compatible with a number of the SA objectives. This would be dependent, however, on the location of the employment sites in relation to centres of population, how easily accessible the sites are and by what modes, as well as the land type on the sites themselves in terms of the potential impacts on landscape and soil quality. Similarly, objective 10 could be further improved to specify not only the need for open spaces, but to ensure that these areas include green spaces. This will help to ensure that a number of the environmental objectives are contributed to, including maintaining air quality and improving biodiversity. This objective could be linked to objective 12, through a single objective to provide a green infrastructure network, which would not only provide amenity and biodiversity value, but also contribute to sustainable urban drainage, which will help to achieve objective 14 through minimising the potential threat from flooding.
- 4.6 Objectives 1-7 and 9 are likely to be largely incompatible with objectives 18-21, as they seek to generate an increase in built development. These developments are likely to lead to an increase in traffic, which will lead to an increase in carbon dioxide amongst other gases, which will conflict with objectives 18 and 20. Additionally, further population will lead to an increase in the generation of waste. Further built development will also likely increase the risk of flooding, from an increase in hard surfacing throughout the plan area. In order to minimise these conflicts, objectives should seek to ensure that any new built development minimises its impact on the natural environment. This will include measures such as ensuring sites are easily accessible by their target populations, reducing the need to travel. The impacts of new buildings can be minimised through using guidance such as BREEAM or the Code for Sustainable Homes.
- 4.7 It is suggested that objective 14 be reworded as the word mitigate is not correctly used. It is suggested that the objective read 'to minimise further climate change contributions and mitigate its predicted effects on the county borough.'
- 4.8 Following discussions with the Council, the final LDP objectives are outlined below:
1. Develop Ebbw Vale as the main service and retail hub for the County Borough.
  2. Create a network of vibrant district/local centres (secondary hubs), well linked to the main hub of Ebbw Vale, that provide a range of local services and facilities for their local communities.
  3. Support and deliver the regeneration of the former Ebbw Vale Steelworks ensuring that the benefits are spread across the borough.
  4. Increase economic activity through facilitating diversification of the economic base and support for the manufacturing sector by encouraging specialisation.
  5. Provide a range of employment sites and premises to meet the needs of businesses of all sizes in manufacturing, the technological and service sectors.
  6. Stem out-migration and attract people to the area to create a more balanced population.
  7. Provide a range of types and tenures of new homes to meet local housing needs and attract people to the area.
  8. Improve accessibility to services through the promotion of sustainable modes of transport, particularly, public transport, walking and cycling.
  9. Improve education levels and skills through supporting infrastructure development of the Learning Campus, new schools and integrated education services, including life-long learning.
  10. Create an accessible network of green open spaces and high quality leisure infrastructure to promote participation in sport and active recreation to improve health and well-being.

11. Capitalise on the unique landscape and natural heritage, foster sustainable tourism and promote community pride.
12. Protect, enhance and manage the diversity of the biodiversity resource of Blaenau Gwent through the identification of ecological corridors
13. Raise the standard of design to improve the quality of the physical and natural environment; and protect and enhance Blaenau Gwent's historic and cultural environment.
14. To minimise further climate change contributions and mitigate its predicted effects on the County Borough.

**Consultation Question 1:**  
**Do you have any comments on the assessment of the LDP Objectives against the Sustainability Objectives?**

## 5. B2: Strategic Options

### Introduction

- 5.1 As outlined in section 3 of this report, stage B2 of the SA/SEA process involved the generation of plan options. This exercise was undertaken in part to fulfil the requirements of the SEA Directive which requires that the Environmental Report should consider:

*'reasonable alternatives taking into account the objectives and the geographical scope of the plan or programme' and give 'an outline of the reasons for selecting the alternatives dealt with' (Article 5.1 and Annex 1h).*

- 5.2 This was informed by informal consultation undertaken by the local planning authority as follows:

### Local Development Plan Issues Paper

- 5.3 In July 2007 Blaenau Gwent County Borough Council consulted on an Issues Paper, as 'the first step in preparing the 'Preferred Strategy' for the Local Development Plan.' It was intended as 'a discussion document intended to promote debate focused on the issues of strategic significance'. The document was placed on the Council's website and sent to Members, key officers, statutory consultees and interested parties. In total, 176 individuals/organisations were consulted. Although the formal consultation period took place over a 4-week period between 6th July and 8th August 2007, late responses were accepted.
- 5.4 Where appropriate, these responses were then taken into consideration in the preparation of options which were discussed at Vision and Options workshops in November 2007.

### Issues and Visions Workshop

- 5.5 The 'stakeholder 'Issues and Vision' workshop, was held to build consensus on where BGCBC were (issues) and where they wanted to be (vision). The workshop was held on Friday 27th July 2007, at the VITCC, in Tredegar and involved 27 attendees representing the LDP Steering Group Sub-group members and LDP Forum members.
- 5.6 The first workshop task involved attendees discussing different topic areas, to agree and then priorities issues. The two most significant issues for each of the topic areas are as follows:

#### Housing

- Create a more balanced population stemming out migration
- Provide a range of housing opportunities to meet aspirations including the need for affordable housing.

#### Town Centres

- To find a role/ function for town centres
- Encourage multiple retailers and a mix of uses within the town centres specialist shops, coffee shops and offices – creating a niche market.

#### Recreation, Leisure and Tourism

- To foster sustainable tourism and leisure in order to boost the local economy
- To foster sustainable tourism, re-engaging local communities with the national and built historic environment

### Transport

- To improve access to services facilities and employment, particularly by public transport, walking and cycling

5.7 Joint second were

- To provide a transport system that encourages healthy and active lifestyles, is safer and supports local communities
- To improve the transport system to assist in the regeneration of the area

### Employment

- The implications of the decline in the manufacturing sector and the shift in favour of the service sector and technological industries
- Changing dependence on particular industries and diversifying the economy

### Environment

- To protect and enhance local landscape in the face of competing development uses
- Maximise the natural environment for health and well being

5.8 This was followed by a further task where attendees were required to prioritise the most significant issues for Blaenau Gwent. The two most significant issues were:

- The implications of the decline in the manufacturing sector and the shift in favour of the service sector and technological industries; and
- The need to find a role/ function for town centres.

5.9 With the following two housing issues were close behind:

- The need to create a more balanced population stemming out migration; and
- The need to provide a range of housing opportunities to meet aspirations including the need for affordable housing.

5.10 The 'Vision' workshop involved building consensus on where Blaenau Gwent wanted to be by 2021.

5.11 The workshop was useful for discussing and prioritising the issues and assisted in setting a vision for the Local Development Plan. These findings were taken into account when the Council prepared draft Strategy Options for discussion at workshops in November 2007.

## Development of Options

5.12 Building on the opinions and views expressed at the Issues and Vision workshop, the findings of the consultation exercise on the Issues Paper, the evidence base and National and Local Policy, a set of 3 options were identified by the Planning Policy Team. These were entitled:

### Option 1: Regeneration (continuation of the Unitary Development Plan Strategy)

5.13 The first option maintains the current strategy contained in the Blaenau Gwent Adopted Unitary Development Plan. This was a regeneration strategy that attempted to retain a substantial valley community in Blaenau Gwent to support an adequate range of community services and facilities.

### Option 2: Growth and Regeneration

5.14 This option is based around attempting to address the issues identified at the earlier workshop and is informed by National Guidance, particularly the Wales Spatial Plan and the Blaenau Gwent Regeneration Strategy.

### Option 3: Balanced and Interconnected Communities

- 5.15 This strategy attempts to address the issues identified and is based on ideology set out in the regional guidance document Turning Heads.
- 5.16 Further detail of the above options is provided in the Preferred Strategy document of the LDP.

### Working Towards a Preferred Option

- 5.17 It is not the role of the SA to determine which of the options should be chosen as the basis for the preferred options. This is the role of those who have to decide which option is appropriate. The SA should, however, help identify the most sustainable option overall, or different options that promote the different dimensions of sustainability (social, environment, and economic).
- 5.18 Table 5.1 provides a summary of the comparison of options under the three sustainability dimensions: social, environmental (including protection of the environment and prudent use of natural resources) and economic. Details of the assessments are provided in Appendix E.
- 5.19 A simplified approach has been taken in order to give an indication of the most sustainable options. This approach assumes that all SA objectives are equally important and thus option(s) with the most positive effect overall are noted as being most sustainable and option(s) whilst those with less positive effects are noted as being less sustainable. As emphasised in the methodology outlined in Section 2, this assessment has been undertaken using expert and professional judgement.

Table 5.1 - Identification of Most Sustainable Options

| Scale of Effect (SE):<br>0 no effect; +++ strongly positive; ++ moderately positive; + slightly positive; -- strongly negative; -- moderately negative; - slightly negative; ? effect unknown | Option 1 | Option 2 | Option 3 |
|---|----------|----------|----------|
| SA Objective  | SE       | SE       | SE       |
| 1. To promote economic growth and strengthen and diversify the local economy  | --       | ++       | +        |
| 2. To increase levels of local employment and ensure distribution of opportunities  | --       | +        | +        |
| 3. To enable the development of a strong tourism economy in Blaenau Gwent, complementary to the regional offer  | --       | ++       | ++       |
| 4. To enhance the viability and vitality of town centres  | --       | +        | +        |
| 5. To meet identified housing needs   | --       | +        | --       |
| 6. To improve the quality of Blaenau Gwent's housing stock  | ?        | ?        | ?        |
| 7. To secure the delivery and maintenance of quality affordable housing   | --       | ++       | --       |
| 8. To improve educational attainment and increase skills levels   | -        | ++       | +        |
| 9. To improve accessibility to education, leisure, employment, health, homes and community services for all sectors of the community  | --       | +        | -/+      |
| 10. To promote community health, social care and well-being   | --       | +        | -/+      |
| 11. To reduce crime, social disorder and fear of crime  | --       | ++       | +        |
| 12. Protect and enhance the Welsh culture   | -        | ++       | +        |
| 13. To encourage modal shift from private transport to sustainable transport  | ?        | -/+      | +        |

|   |     |     |     |
|---|-----|-----|-----|
| 14. To protect and enhance biodiversity across Blaenau Gwent  | -/+ | --  | -   |
| 15. To conserve and enhance the heritage assets of Blaenau Gwent and their settings   | -/+ | -/+ | -/+ |
| 16. To make the best use of previously developed land and existing buildings to minimise pressure for greenfield development, where this will not result in damage or loss to biodiversity. | -/+ | -   | -   |
| 17. To conserve soil resources and their quality  | -/+ | -/+ | -/+ |
| 18. To reduce emissions of greenhouse gases, in particular carbon dioxide   | -   | --  | -   |
| 19. To reduce waste generation and maximise reuse and recycling   | -/+ | --  | -   |
| 20. To maintain current air quality   | ?   | --  | -   |
| 21. To maintain current low levels of vulnerability of all development to flooding  | --  | --  | -   |
| 22. To promote the use of sustainably sourced products and resources  | ?   | ?   | ?   |
| 23. To increase energy efficiency and generation and use of renewable energy across the County Borough  | -   | +   | +   |
| 24. To conserve and enhance surface and ground water quality  | --  | --  | -   |
| 25. Protect the quality and character of the landscape and enhance where necessary  | -   | --  | -   |

## Identification of the Preferred Option

- 5.20 The appraisal of the strategic options found that Option 2 was predicted to be the most sustainable. The option is envisaged to potentially create a diverse economic base, improving employment opportunities as well as access to a range of services and facilities.
- 5.21 In terms of environmental effects, however, the options performed similarly and were predicted to have unsustainable effects. In order for option 2 to improve its sustainability credentials it is put that the spatial strategy should be developed to include the following:
- A green infrastructure network throughout the entire plan area to benefit: biodiversity, health, air quality, greenhouse gas emissions, amenity, SUDs and energy efficiency.
  - Reduce the need to travel through locating residential, employment and service functions within accessible distances for all areas of the county borough.
  - Prioritise the use of brownfield land over the use of greenfield wherever possible.

**Consultation Question 2: • Do you have any comments on the appraisal of the LDP Strategic Options and how the Preferred Strategy was arrived at?**

## 6. B3&4: Assessment of Significant Effects of the Preferred Strategic Policies

### Introduction

- 6.1 The SEA Directive states that in the Environmental Report, ‘the likely significant effects on the environment of implementing the plan or programme....and reasonable alternatives....are [to be] identified, described and evaluated’ (Article 5.1). The Environmental Report should include information that may ‘reasonably be required taking into account current knowledge and methods of assessment, the contents and level of detail in the plan or programme [and] its stage in the decision-making process’ (Article 5.2).
- 6.2 In addition, the SEA Directive requires the Environmental Report to outline measures to prevent, reduce and, as fully as possible, offset any significant adverse effects on the environment of implementing the plan or programme (Annex I (g)).
- 6.3 Existing SA guidance recognises that the most familiar form of SA prediction and evaluation is generally broad-brush and qualitative. It is recognised that quantitative predictions are not always practicable and qualitative predictions can be equally valid and appropriate. Examples of the prediction and evaluation techniques for assessing significance of effects are expert judgement, dialogue with stakeholders and public participation, geographical information systems, reference to legislation and regulations and environmental capacity.
- 6.4 This section outlines the LDP Preferred Policies that have been assessed and the methodology that has been used for the assessment of significant effects as part of Stage B of the SA process, and provides a qualitative assessment of each policy.

### Preferred Policies Assessed

- 6.5 Following confirmation of the strategy direction a draft set of Strategic policies were developed in order to deliver the objectives of the LDP.
- 6.6 Table 6.1 presents the 17 Strategic Policies which have been assessed. The purpose of the assessment was to derive the sustainability implications in terms of implementing the policies and to identify areas for improvement which will mitigate predicted negative significant effects.

Table 6.1 - Preferred Strategic Policies

| No.                        | Strategic Policy  |
|----------------------------|---|
| <b>Locational Strategy</b> |   |
| SP1                        | <p><b>Heads of the Valleys Area – Growth and Regeneration</b></p> <p>The Heads of the Valleys area will be the focus for the County Borough’s spatial development. Ebbw Vale will accommodate the majority of new homes, jobs and services and will be promoted as the main hub for Blaenau Gwent. Tredegar, Brynmawr and Blaina will be the focus for new development serving the growing needs of their respective communities. New development will be located within these centres or in locations highly accessible to them.</p> |
| SP2                        | <p><b>South of the Borough - Regeneration</b></p> <p>The South of the Borough will see a focus on regeneration with appropriate forms of growth to serve local needs. Abertillery will be the focus of new development serving the needs of its respective communities.</p>   |

| No.                               | Strategic Policy  |                |     |           |       |                 |     |                 |     |           |     |           |       |           |       |
|-----------------------------------|---|----------------|-----|-----------|-------|-----------------|-----|-----------------|-----|-----------|-----|-----------|-------|-----------|-------|
| <b>Sustainable Development</b>    |   |                |     |           |       |                 |     |                 |     |           |     |           |       |           |       |
| SP3                               | <p><b>Creating a network of sustainable linked communities to spread regeneration benefits</b></p> <p>The development and use of land throughout the County Borough will be determined by the need to ensure that all communities will have good access to Ebbw Vale. This will be achieved by ensuring that there is a network of hubs which have good public transport links with Ebbw Vale.</p>  |                |     |           |       |                 |     |                 |     |           |     |           |       |           |       |
| <b>Retailing and Town Centres</b> |   |                |     |           |       |                 |     |                 |     |           |     |           |       |           |       |
| SP4                               | <p><b>Retail Hierarchy</b></p> <p>Major retail, administrative and cultural developments will take place in the principal retail centre of Ebbw Vale. The District/Local centres of Tredegar, Brynmawr, Blaina and Abertillery will be protected and enhanced to improve vitality and viability and ensure they meet the needs of their districts. They will also develop new complementary roles based around historical, recreational and tourism potential. Local shopping centres will be protected and enhanced to provide facilities for local communities.</p>   |                |     |           |       |                 |     |                 |     |           |     |           |       |           |       |
| <b>Employment</b>                 |   |                |     |           |       |                 |     |                 |     |           |     |           |       |           |       |
| SP5                               | <p><b>Employment and Diversification of the Economy</b></p> <p>The employment and economic development needs of Blaenau Gwent will be met by the identification of 50 to 80 ha of land for employment and business purposes during the plan period. The employment roles of major industrial areas will be identified to assist in the diversification of employment and support the specialisation of manufacturing. Mixed-use sites will be identified close to town centres to enhance town centre based employment in the service sector.</p>   |                |     |           |       |                 |     |                 |     |           |     |           |       |           |       |
| SP6                               | <p><b>Development of the Tourism and Leisure sectors</b></p> <p>Foster sustainable tourism and leisure sectors which re-engage local communities with the natural and historic environment and boost the local economy.</p>   |                |     |           |       |                 |     |                 |     |           |     |           |       |           |       |
| <b>Housing</b>                    |   |                |     |           |       |                 |     |                 |     |           |     |           |       |           |       |
| SP7                               | <p><b>Housing Provision</b></p> <p>Provision will be made for the development of 3,000 dwellings during the plan period; broken into the following Housing Market Areas</p> <table border="0" data-bbox="587 1624 944 1742"> <tr> <td>Sirhowy Valley</td> <td>800</td> </tr> <tr> <td>Ebbw Fawr</td> <td>1,300</td> </tr> <tr> <td>Ebbw Fach Upper</td> <td>600</td> </tr> <tr> <td>Ebbw Fach Lower</td> <td>300</td> </tr> </table> <p>The Delivery of the houses will be back loaded recognising the step change required to reach the higher figures.</p> <table border="0" data-bbox="587 1832 944 1921"> <tr> <td>2006-2011</td> <td>750</td> </tr> <tr> <td>2011-2016</td> <td>1,000</td> </tr> <tr> <td>2016-2021</td> <td>1,250</td> </tr> </table> | Sirhowy Valley | 800 | Ebbw Fawr | 1,300 | Ebbw Fach Upper | 600 | Ebbw Fach Lower | 300 | 2006-2011 | 750 | 2011-2016 | 1,000 | 2016-2021 | 1,250 |

|                                 | 2021.   |
| SP9                             | <p><b>Gypsy Accommodation</b></p> <p>6 pitches for unmet gypsy and traveller housing will be provided between 2006 and 2021.</p>  |
| <b>Transport</b>                |   |
| SP10                            | <p><b>Transport Infrastructure Improvements</b></p> <p>The Council will safeguard land for the following improvements to transport infrastructure:</p> <ul style="list-style-type: none"> <li>• phase 2 of the rail link from Parkway to Ebbw Vale Town (including land for a new station);</li> <li>• extension to the Parkway Park and Ride facility;</li> <li>• extension of rail link to Abertillery;</li> <li>• a network of walking and cycling routes;</li> <li>• dualling of the Heads of the Valleys Road (A465);</li> <li>• peripheral distributor road (PDR) through the former Steelworks site;</li> <li>• online improvements between the PDR and the A465;</li> <li>• online improvements to the A4048 south of Tredegar;</li> <li>• online improvements to the A4046 south of Cwm through to Aberbeeg; and</li> <li>• online improvements to the A467 south of Abertillery.</li> </ul> |
| SP11                            | <p><b>Transport Requirements for new Development</b></p> <p>Development proposals will be assessed in relation to:</p> <ul style="list-style-type: none"> <li>• Car parking standards set out in the Council's Car Parking Strategy;</li> <li>• Promotion of public transport, walking and cycling;</li> <li>• Protection of the safety of the highway network;</li> <li>• Accessibility to all users; and</li> <li>• Pedestrian safety</li> </ul>  |
| <b>Community Infrastructure</b> |   |
| SP12                            | <p><b>Planning Obligations</b></p> <p>The Council will negotiate planning obligations where appropriate to secure improvements in infrastructure, facilities and services appropriate to the scale, type and location of the proposed development. These obligations may include the provision or improvement of the following:</p> <ul style="list-style-type: none"> <li>• Affordable Housing;</li> <li>• Traffic, Transport and Highway Initiatives;</li> <li>• Education Facilities;</li> </ul>   |

| No.   | Strategic Policy  |
|---|---|
|   | <ul style="list-style-type: none"> <li>• Community Development and Recreational Facilities;</li> <li>• Public Open Space;</li> <li>• Biodiversity and Geodiversity;</li> <li>• Skills and Labour Market;</li> <li>• Community Safety; and</li> <li>• Public Art.</li> </ul>   |
| <b>Environmental Protection and Enhancement</b> |   |
| SP13  | <p><b>Built and Natural Environment</b></p> <p>The distinctive natural environment of the County Borough will be protected and enhanced. Appropriate development proposals should promote:</p> <ul style="list-style-type: none"> <li>• High quality design that reinforces local character, enhances landscape settings, and respects the cultural and historic qualities of individual buildings, landscapes or Conservation Areas;</li> <li>• Opportunities for the creation, conservation or restoration of designated sites of national and local nature conservation interests.</li> </ul>  |
| SP14  | <p><b>Minerals</b></p> <p>The Council will contribute to the regional demand for a continuous supply of minerals by:</p> <ul style="list-style-type: none"> <li>• Safeguarding known reserves of coal, sand and gravel, limestone, high quality hard rock taking into account relevant environmental, planning and transportation considerations; and</li> <li>• Maintaining a 10-year land-bank of permitted aggregate reserves in line with national guidance.</li> </ul>   |
| SP15  | <p><b>Waste</b></p> <p>The Council will implement a sustainable, integrated approach to waste management, which minimises the production of waste and its impact on the environment, and maximises the use of unavoidable waste as a resource. To assist this aim the following land-use commitments are made:</p> <ul style="list-style-type: none"> <li>• All allocated and protected class B2 industrial sites and existing waste management sites are designated as potentially suitable locations for new waste management facilities, which provides substantial choice in meeting the estimated land requirement of between 1.4 and 4 ha.</li> </ul> |

## Summary of Assessment Findings

- 6.7 Table 6.2 and Appendix F demonstrate the findings of the preferred strategic options assessment. Overall, the Preferred Strategy appears to generate more benefits from an economic perspective, with the least benefits being generated for the environment. It is suggested that the strategy seeks to create a greater focus on environmental improvements alongside economic and social regeneration initiatives. Most notably, three of the sustainability objectives conflicted with the strategic policies. These were: to reduce the emission of greenhouse gases, in particular carbon dioxide; to reduce waste generation and maximise reuse and recycling; and to maintain current air quality.

## Recommendations for the Strategy Overall

- 6.8 The following recommendations, along with those in Table 6.3, are suggested in order to enable the plan to potentially achieve more sustainable development:
- It is recommended that the policies refer to the Welsh Assembly Government objectives relating to sustainable design, flood risk and climate change, to ensure that their principles are interwoven. This is likely to have an effect on the focus of the strategy, enabling a more sustainable approach.
  - We consider important that the conditions required for new development are set in policy and suggest that a new policy on sustainable developed is added to read:
 

***All new development should:***

    1. Make efficient use of land in delivering land requirements
    2. Minimise the need to travel, whilst increasing opportunities to walk, cycle or use public transport;
    3. Ensure accessibility to employment and essential community facilities<sup>6</sup> by all sections of the community ;
    4. Maximise efficient use of local infrastructure and services;
    5. Minimise impact on the environment e.g. through energy efficiency, waste reduction, reduced water use, renewable energy production, use of sustainable construction products and resources;
    6. Provide healthy, safe and attractive environments for the local community;
    7. Protecting and enhancing the quality of the natural and built environment; and
    8. Mitigate further climate change and adapt to the consequences of climate change, such as increased flooding
  - The document could usefully be restructured to begin with policies that will cover all development, followed by locationally specific policies. The specific policies should be accompanied by their justifications, rather than the supporting text being in a separate chapter. This may read: policy, reasoning, justification, for each policy.
  - It is noted that the objectives in the strategy support the development of 'education levels and skills through supporting infrastructure development of the Learning Campus, new schools and integrated education services, including life-long learning' as well as to 'create an accessible network of open spaces and high quality leisure infrastructure to promote participation in sport and active recreation to improve health and well-being.' It is

---

<sup>6</sup> what is meant by essential community facilities should be specified in the glossary along with acceptable thresholds

recommended that a policy within the document to improve education and skills or community facilities is included.

- It is recommended that the document includes a glossary to determine the definitions of key terms used such as 'local character'.
- Policies SP1, SP2, SP4 and SP7 include a locationally specific focus. It should be highlighted in the strategy that these sites have been selected on the basis of sustainability criteria.

## Policy Specific Recommendations

Table 6.3 - Policy Specific Recommendations

| Original LDP Strategic Policy  | Recommendation   |
|--|--|
| SP1 - Heads of the Valleys Area – Growth and Regeneration                                  | There will be a need to ensure that urban development is undertaken in accordance with the Heritage Strategy.  |
| SP2 - South of the Borough - Regeneration  | The policy should make specific reference to the improvement of transportation as part of the regeneration activities linked to Abertillery.   |
|  | The policy should seek to be more specific about the types of regeneration activity that are supported to enable delivery of successful schemes.   |
| SP3 - Creating a network of sustainable linked communities to spread regeneration benefits | The policy should specify the types of public transport infrastructure required, especially where this may involve new construction works. Transport by rail should be considered.                           |
|  | We suggest that the word 'good' in terms of public transport be replaced with 'safe, frequent and reliable' as the word 'good' in this context may be open to interpretation.                                |
| SP4 - Retail Hierarchy   | No specific recommendations  |
| SP5 - Employment and Diversification of the Economy  | Key locations should be identified for employment to ensure appropriate distribution.  |
|  | The policy should include the need for the use of sustainable products and resources.  |
|  | The policy should seek to enable the improvement of skills levels  |
| SP6 - Development of the Tourism and Leisure sectors                                       | The policy should include more detail as to where and what sort of tourism the strategy is focusing on.  |
|  | What is meant by 'sustainable' tourism and leisure should be more explicit.  |
| SP7 - Housing Provision  | There is a need to provide greater clarity regarding the range and variety of units to be delivered, including a range of types and tenures of housing.  |
|  | The location of housing to be provided should be specified, prioritising brownfield sites and the potential for transport links and access to facilities.  |
| SP8 - Affordable Housing   | The policy should ensure that a mix of housing, to include a proportion of affordable housing, is provided in the town centres as a wider mix of uses, to improve the vitality and viability of these areas. |

|   |   |
|---|---|
|   | <p>The policy should be rephrased in order that 100% affordable housing sites are not specified, to enable interspersed affordable housing within market housing to create mixed communities.</p> <p>Suggest that the improvements to council housing stock are included within the policy wording. The strategy should seek to ensure that refurbishments are undertaken using low carbon technologies. The policy should be widened to include requirements to improve existing non-council stock, especially rental properties and for those on low incomes.</p> <p>The policy should seek to specify locations in order to ensure that affordable housing is located close to community facilities.</p> |
| SP9 - Gypsy Accommodation                         | No specific recommendations   |
| SP10 - Transport Infrastructure Improvements      | <p>The policy should outline specific schemes and proposals that are already in progression.</p> <p>The policy should be reworded/ ordered to make a distinction between encouraging the use of public transport over private transport, as a means of improving accessibility, following a concerted effort to reduce the need to travel as the first priority.</p> <p>It is recommended that the policy be strengthened to require more than one of the criteria as suggested.</p>  |
| SP11 - Transport Requirements for new Development | <p>'reduce the need to travel' should be added and the points covered should be the following:</p> <ul style="list-style-type: none"> <li>• reduce the need to travel</li> <li>• promotion of walking and cycling</li> <li>• promotion of public transport</li> <li>• pedestrian safety</li> <li>• car parking standards set out in the Council's Car Parking Strategy</li> </ul>   |
| SP12 - Planning Obligations                       | <p>The policy wording could be strengthened by putting a stronger emphasis on the provision of sustainable transport infrastructure and services.</p> <p>Reference should be made specifically to the SPG on Planning Obligations</p>   |

|   |   |
|---|---|
| <p>SP13 - Built and Natural Environment</p> | <p>We recommend that this policy is split into two. One dealing with the natural environment and the other with the built environment. This may read as follows:</p> <p><b>SP ?? Protection and enhancement of the natural environment</b><br/>                 All development proposals must conserve and enhance the natural environment of the Borough, including biodiversity, landscape character and sites of ecological and geological value, in order to maintain and improve environmental quality. Development proposals should provide opportunities for habitat creation and enhancement throughout the life of a development.</p> <p><b>SP ?? Environmental impact of new development</b><br/>                 New development proposals will be required to incorporate sustainability principles, minimising their impact on the environment by:</p> <ul style="list-style-type: none"> <li>• avoiding development in the floodplain and close to river corridors;</li> <li>• minimising reducing water consumption through measures such as water saving devices;</li> <li>• incorporating the use of Sustainable Urban Drainage Systems (SUDS);</li> <li>• ensuring that pollutants are minimised (including emissions to air, water, soil, light and noise);</li> <li>• utilising good quality sustainable design in accordance with national guidance; and</li> <li>• being designed sensitively to a high quality and not cause harm to sites or locations protected for their historic or archaeological value</li> </ul> |
|   | <p>The policy should specify what it considers to be 'appropriate' development proposals, including new development as well as changes to existing buildings, especially housing. This will come under the recommendation for a new policy on sustainable development (see above).</p>  |
|   | <p>The policy should include the need to incorporate methods to design out crime, for example using Secured by Design principles.</p>   |
|   | <p>The policy should also seek to protect sites of nature conservation interest that aren't protected by legislation.</p>   |
|   | <p>The re-use of existing buildings to enhance local character should be specified as a priority.</p>   |
|   | <p>The use of locally sourced materials in new and existing development should be specified.</p>  |
|   | <p>The policy should include the need for high quality design to incorporate measure to minimise its effects on the natural environment, including SUDs.</p>  |
|   | <p>The policy should include a requirement for development to adhere to sustainable design principles, such as the Code for Sustainable Homes or BREEAM, in order to maximise energy efficiency in the built environment.</p>   |
|   | <p>SP14- Minerals</p>   |

|             |   |
|-------------|---|
|             | The LDP should stipulate for the provision of more detailed policies to protect sites of ecological value and to explore opportunities for biodiversity enhancement during restoration and aftercare.   |
|             | The LDP should stipulate for the provision of a more detailed policy, protecting heritage assets and their settings.  |
|             | The policy should ensure that soil resources are preserved wherever possible.   |
|             | The LDP should stipulate for the provision of a more detailed policy to control impacts on water quality.   |
|             | The LDP should stipulate for the provision of a more detailed policy to control landscape effects.  |
| SP15- Waste | It is suggested that the policy be reworded to consist of two separate policies that will include:<br><br>1. Land allocations;<br><br>2. That all development should implement facilities and measures to ensure sustainable waste management   |
|             | The policy should ensure that waste management facilities, such as those for recycling, are accessible to members of the public, to enable the increased recycling of waste.  |
|             | The policy should specify the types and locations of waste management facilities to be provided. The policy should also specify that all new development should implement measures to ensure that the waste management hierarchy is implemented.  |
|             | The policy should ensure that facilities that may generate harmful emissions are located at an appropriate distance from residential properties and their potential effects are carefully assessed and mitigated, whilst being located within accessible distances to enable their increased use. |
|             | The policy should ensure that potential effects of facilities that may generate harmful emissions are carefully assessed and mitigated.   |
|             | The policy should ensure that potential effects of facilities on ground water quality are carefully assessed and mitigated and that there is a provision for monitoring of soil and groundwater quality at waste management sites.  |
|             | The policy should ensure that potential effects of landscape quality are carefully assessed and mitigated.  |

## Cumulative, Synergistic and Indirect Effects

6.9 The detailed assessment, the results of which are presented in Appendix F, was focused primarily on direct effects. As required by the SEA Regulations, cumulative, synergistic and indirect effects have also been recorded and analysed during the appraisal. Table 6.4 lists the results of this analysis.

Table 6.4 - Summary of Cumulative, Synergistic and Indirect Effects

| Strategic Policy       | Effect   | SA Objectives | Causes  | Significance  |
|------------------------|--|---------------|---|---|
| <b>Beneficial</b>      |  |               |   |   |
| 1-6, 8, 10, 12, 13, 14 | Cumulative effect on economic prosperity.  | 1-4           | <p>Establishment of a strong settlement hierarchy that reinforces the concept of directing mixed use development, including retail, to the most accessible locations should convey considerable benefits in terms of economic growth and the attraction and retention of the workers needed to drive growth.</p> <p>Improved connections via public transport across the County Borough should help to underpin improved vitality in the towns, delivering increased benefits against the objective over time.</p> <p>The development of the tourism market may offer some localised opportunities for employment, which are likely to be distributed across the County Borough.</p>      | Significant beneficial effects in the longer term. Effects likely to be long lasting and distributed across the County Borough. |
| 1, 3, 4, 5, 13, 15     | Cumulative effect on efficient use of land.  | 16, 17        | <p>Locational focus on key settlements, for development and transport systems, should encourage maximisation of the development potential within the existing urban envelope and safeguard against expansion into greenfield development. This should also generate benefits to soil quality, through the reuse of previously contaminated land and subsequent remediation.</p>   | Locational focus is likely to bring benefits in the short to medium term and possibly into the longer term.                     |
| 1, 3-5, 8, 11, 12, 15  | Synergistic and cumulative effect on accessibility to community facilities and improvement in community health and well being. | 9, 10, 11     | <p>The policy seeks to direct development to the most accessible locations, including the reinforcement and growth of key settlements through directing investment, which includes the co-locating of employment, homes and all associated facilities and services. This will help to improve accessibility to community facilities and improve wellbeing and health through an increased sense of community cohesion. This also may lead to a reduction in crime which will further improve a sense of wellbeing.</p> <p>Although not included in the policy wording, the supporting text indicates that an increase in social housing quality is intended which would likely have a</p> | Multiple beneficial effects once the policies are enacted, with full benefits that can be enjoyed by residents.                 |

|                |   |               |  |   |
|----------------|---|---------------|--|---|
|                |   |               | synergistic positive effect on health.   |   |
| 1, 3, 11       | Cumulative effect to enact a shift to more sustainable modes of transport and an indirect effect to improve local air quality and health. | 9, 10, 13, 20 | The promotion of a shift to more sustainable modes of transport will likely have cumulative effects on health through an improvement in air quality, alongside an increase in walking and cycling as a mode of transport. Additionally, an increase in the use of public transport will increase community cohesion through increased interaction. A reduction in accidents will also likely ensue from a reduction in car usage.                    | Benefits of the implementation of this policy will be more prominent in the longer term.  |
| 9, 12, 13      | Cumulative effect to protect the quality of the landscape.  | 25            | Positive effects on the quality of the local landscape and townscape are likely due to the requirements of biodiversity improvement schemes and the provision for public open space as well as public art and high quality design to be part of new developments.  | Benefits are likely to be significant over the longer term.   |
| <b>Adverse</b> |   |               |  |   |
| 1, 4, 5        | Cumulative effect of reducing local air quality.  | 20            | In order to achieve redevelopment, prolonged construction works will be required throughout the plan area. This is likely to create dust from construction, and may result in increased traffic congestion with an adverse effect on air quality. Additionally, in the shorter term, an increase in economic development and population may lead to increased traffic congestion if the proposed shift to more sustainable modes is not yet enacted. | Significant adverse effects in the short to medium term, many of which can be mitigated if appropriately managed.                           |
| All            | Cumulative effect of increasing development has the potential to increase flood risk.   | 21            | The policy may result in an increase in impermeable surfacing that may have the potential to increase risk of localised flooding.  | Potential long-term adverse effects unless mitigated.   |
| All            | Cumulative effect of increasing overall GHG emissions.  | All           | Without stringent measures to ensure zero carbon new build and energy efficiency, increasing development is expected to increase net GHG emissions. An increase in traffic may also ensue from an increase in development, dependent on the effectiveness of the sustainable transport policy.   | Potentially significant long term effects that could be minimised through energy efficiencies in transport and building/development design. |
| 19             | Cumulative  | 19            | There is likely to be an overall increase in   | Potentially   |

|   |   |       |  |  |
|---|---|-------|--|--|
|   | effect of increasing waste generation.  |       | waste generated as a result of a growing resident population, and increased business and leisure activities. Without proactive measures to implement sustainable waste management infrastructure and encourage behavioural change, opportunities to reduce waste sent to landfill arising from redevelopment and creation of a higher density mixed use development are likely to be lost. | significant adverse in the short to medium term. Net increase in waste to landfill should decrease over time with increasing pressure from legislation and national initiatives. |
| 7 | Synergistic effect on an increase in antisocial behaviour through lack of mixed communities | 11, 7 | The policy to implement 100% affordable housing sites may result in unbalanced communities and thus may result in a lack of community cohesion which can lead to antisocial behaviour.   | Potentially negative effects could result in the longer term, unless mitigation is established.  |

6.10 As Table 6.4 illustrates the Preferred Strategy performs well in terms of cumulative, synergistic and indirect effects relating to:

- economic prosperity in Blaenau Gwent;
- the efficient use of land;
- accessibility to community facilities;
- community health and well being;
- a shift to more sustainable modes of transport;
- local air quality;
- landscape

6.11 There are also a number of negative effects highlighted by the assessment. These include:

- local air quality;
- flood risk;
- GHG emissions;
- waste generation;
- antisocial behaviour

6.12 The assessment therefore serves to highlight the need for those elements that are expected to result in negative effects to be addressed more overtly as part of the LDP process, supported by mitigation as appropriate, as well as enhancement of positive effects where possible.

**Consultation Question 3:**  
**Do you have any comments on the appraisal of the preferred policies and the final set of preferred policies arrived at?**

## 7. B5: Mitigation

- 7.1 The term 'mitigation' encompasses any approach, which is aimed at preventing, reducing or offsetting significant adverse sustainability effects that have been identified. In practice, a range of measures applying one or more of these approaches is likely to be considered in mitigating any significant adverse effects predicted as a result of implementing the LDP. In addition, it is also important to consider measures aimed at enhancing positive effects. All such measures are generally referred to as mitigation measures.
- 7.2 However, the emphasis should, in the first instance, be on proactive *avoidance* of adverse effects. Only once all alternative options or approaches to avoiding an effect have been examined should mitigation then examine ways of reducing the scale/importance of the effect.
- 7.3 Mitigation can take a wide range of forms, including:
- Changes to the preferred policies, including bringing forward new options to address specific elements that cause adverse effects, or adding or deleting options;
  - Refining options in order to improve the likelihood of positive effects and to minimise adverse effects;
  - Technical measures (such as setting guidelines) to be applied during the implementation stage;
  - Identifying issues to be addressed in project environmental impact assessments for certain projects or classes of projects;
  - Proposals for changing other plans and programmes; and
  - Contingency arrangements for dealing with possible adverse effects.
- 7.4 Mitigation measures for each Core Policy have been identified in the individual assessments in Appendix F and are highlighted in the policy specific recommendations in section 6. The following general measures are proposed in order to mitigate the adverse sustainability effects identified in the sustainability assessment:
- Construction waste will need to be subject to sustainable management. There is a need to ensure that new development is associated with the establishment of sustainable waste management opportunities.
  - There will be a need to ensure that development is designed to be both flood resilient and reduce the risk of flooding, particularly arising from increased run off.
  - The development of public transport infrastructure should include a specification to use sustainably sourced products and resources.
  - Drainage systems should incorporate appropriate filtration to minimise the risk of groundwater pollution.
  - All new development should be subject to feasibility testing for SUDs and systems incorporated if appropriate; and designed to be flood resilient.
  - There is a need to ensure that all new development is sited taking biodiversity considerations into account and include safeguards against adversely affecting the biodiversity resource, including on brownfield developments.
  - Policies should include safeguards against adversely affecting the heritage resource.

- Reference should be made to the need to integrate energy efficiency and renewable energy sourcing into proposals.

**Consultation Question 4:**  
**Do you consider the identified mitigation measures for the LDP Preferred Strategy are acceptable?**

## 8. B6: Monitoring

- 8.1 The SEA Directive states that 'member states shall monitor the significant environmental effects of the implementation of plans and programmes.....in order, inter alia, to identify at an early stage unforeseen adverse effects, and to be able to undertake appropriate remedial action' (Article 10.1). In addition, the Environmental Report should provide information on a 'description of the measures envisaged concerning monitoring' (Annex I (i)) (Stage E).
- 8.2 SA monitoring will cover significant social and economic effects as well as significant environmental effects and it involves measuring indicators which will enable the establishment of a causal link between the implementation of the plan and the likely significant effects (both positive and negative) being monitored. In line with the SEA Directive, these significant positive and negative effects should be monitored with the implementation of the LDP.
- 8.3 The sustainability appraisal of LDP Preferred Policies has identified significant effects with regards to most SA objectives (see Table 6.4 on cumulative effects) which will require monitoring.
- 8.4 The SA guidance recommends SA monitoring to be incorporated into Local Authority's existing monitoring arrangements. In accordance with Planning and Compulsory Purchase Act 2004, the Local Authority is required to prepare an Annual Monitoring Report (AMR) to assess the implementation of the Local Development Plan and the extent to which policies and proposals are being achieved and to identify any changes if a policy is not working or if the targets are not met. It is thus important that the Council seeks to integrate the monitoring of the LDP's significant sustainability effects in these wider monitoring arrangements.
- 8.5 The LDP already identifies a range of indicators for regular monitoring of social, environmental and economic significant issues in the Borough. At this stage it is anticipated that SA monitoring will take place annually alongside the monitoring of the LDP. The sustainability appraisal framework in Table 3.4 contains two types of indicators which have been identified taking the requirement for post-implementation monitoring in consideration: i) indicators taken from existing sources of indicators (at Borough, regional or national level); and ii) proposed indicators suggested by the Local Authority, SA team and by consultees on their responses to the Scoping Report consultations. These indicators should be used as the basis for preparing the monitoring programme bearing in mind that it will not always be necessary to collect data for all the indicators and that there are already some similarities between the indicators proposed in the Local Development Plan and the indicators identified by the SA. The indicators and targets set out in Table 8.1 below will thus form the basis of assessing the effectiveness of the Strategic Policies.
- 8.6 The Council will need to consider SA indicators to identify those that can be effectively used to monitor the sustainability effects of the Core Strategy. This will need to be undertaken in dialogue with statutory environmental consultees and other bodies as in many cases, the monitoring information will be provided by outside bodies.
- 8.7 It is likely that it will be necessary to review which effects require monitoring following consultation on this Initial SA Report as other effects may be deemed significant by consultees. This means that the Council can only prepare a realistic monitoring programme at a later stage.
- 8.8 The SA/SEA monitoring arrangements will therefore be confirmed at the LDP Deposit consultation.

Table 8.1 - Monitoring Framework

| SA Objective   | Predicted Long Term Effect of the Preferred Strategy | Potential indicators to monitor change                    | Target  |
|--|--|---|---|
| 1. To promote economic growth and strengthen and diversify the local economy                                   | Positive effect                                      | Employment by sector                                      | Reduce reliance on manufacturing sector                         |
|  |  | Accessibility between hubs                                | Improve   |
|  |  | % of new employment floorspace generated                  | Increase  |
| 2. To increase levels of local employment and ensure distribution of opportunities                             | Positive effect                                      | % of working age population that are economically active  | Improve   |
|  |  | % increase in average earnings                            | Improve   |
|  |  | Average household income by neighbourhood                 | Increase  |
|  |  | Proportion of population enrolled in adult education      | Increase  |
|  |  | Number of jobs provided                                   | Increase  |
| 3. To enable the development of a strong tourism economy in Blaenau Gwent, complementary to the regional offer | Positive effect                                      | Total number of visitors                                  | Increase  |
|  |  | Visitor Attractions                                       | Increase  |
|  |  | Visitor Accommodation                                     | Increase  |
|  |  | The number of Rod Licences sold annually in Blaenau Gwent | Increase  |
| 4. To enhance the viability and vitality of town centres   | Positive effect                                      | % change in vacancies in town centres                     | Decrease  |
|  |  | National retailer representation                          | Increase  |
| 5. To meet identified housing needs  | Positive effect                                      | Number of new homes delivered by type and tenure          | Meet requirements; achieve more equitable balance between types |
|  |  | Number of pitches for gypsy accommodation                 | Meet requirements   |
| 6. To improve the  | Positive effect                                      | Number of houses meeting Welsh Housing Quality Standard   | 100%  |

|  |                         |   |   |
|--|-------------------------|---|---|
| quality of Blaenau Gwent's housing stock   | on social housing stock | (WHQS)  |   |
| 7. To secure the delivery and maintenance of quality affordable housing  | Overall positive effect | % Affordable Housing in a mixed type scheme   | 25%   |
|  |                         | % of eligible residential planning permissions where affordable housing has been negotiated | 100%  |
|  |                         | Average house price to income ratio   | No target identified  |
| 8. To improve educational attainment and increase skills levels  | Overall positive effect | Percentage of the adult population with no qualifications                                   | Decrease  |
|  |                         | Proportion of adults with level 2 qualifications (5 GCSE A* - C or NVQ equivalent)          | Increase  |
|  |                         | Proportion of adults with level 4 qualifications (degree and above)                         | Increase  |
|  |                         | Proportion of the population enrolled in adult education                                    | Increase  |
| 9. To improve accessibility to education, leisure, employment, health, homes and community services for all sectors of the community | Positive effect         | Accessibility /availability of community facilities   | Distances from residents properties to community facilities as listed in assessment rationale to comply with the Welsh Index of Multiple Deprivation. |
|  |                         | Length, connectivity and accessibility to public rights of way                              | Increase  |
| 10. To promote community health, social care and well-being  | Positive effect         | Life expectancy   | To maintain/increase life expectancy<br>Source: <a href="http://www.statistics.gov.uk">www.statistics.gov.uk</a>                                      |
|  |                         | Death rate per 100,000 by road traffic accidents  | To reduce road traffic accidents by at least 20% by 2010<br>Source: UK Sustainable Development Quality of Life Indicators                             |
|  |                         | Community Satisfaction / perceptions surveys – Housing Estate Surveys                       | To decrease % of people who describe their health as poor   |

|  |                         |  |   |
|--|-------------------------|--|---|
|  |                         | Indices of deprivation   | To decrease % of population living in most deprived areas       |
|  |                         | Proportion of households not living within 400m of their nearest natural greenspace.               | 0%<br>Source: CCW Accessible Greenspace Standards               |
|  |                         | Proportion of households within 800m walking distance of key health services                       | 100%  |
|  |                         | Building design that contributes to a 'healthier' environment                                      | Increase  |
|  |                         | Percentage of population with 1kn of National Cycle Network (NCN)                                  | Increase  |
|  |                         | Increase Number of U11 children participating in sport.  | Above national average of 58% for junior participation in sport |
| 11. To reduce crime, social disorder and fear of crime                       | Overall positive effect | Average crime rate per 1000 population   | No target identified  |
|  |                         | Number of anti-social behaviour notices served   | 0   |
|  |                         | Fear of crime in Blaenau Gwent during the day and night  | Reduce  |
|  |                         | Percentage of new housing that meets the 'secured by design' certification criteria                | Increase  |
| 12. Protect and enhance the Welsh culture                                    | No significant effects  | Proportion of Welsh speakers   | Increase  |
|  |                         | Welsh medium schools as a proportion of all schools  | Increase  |
|  |                         | Bi-lingual published material  | Increase  |
| 13. To encourage modal shift from private transport to sustainable transport | Overall positive effect | Frequency of buses between hubs  | Increase  |
|  |                         | Frequency of public transport to Cardiff or Newport  | Increase  |
|  |                         | % of people using public transport   | Increase  |
|  |                         | No. and value of S106 agreements secured for improvements in public transport, walking and cycling | Increase  |

|   |                         |   |  |
|---|-------------------------|---|--|
|   |                         | Modal split - % of population travelling to work by sustainable modes   | Increase   |
|   |                         | Length of additional cycle and walking network as a % of total length   | Increase   |
| 14. To protect and enhance biodiversity across Blaenau Gwent                        | No significant effects  | Loss and condition of international, European, national, regional and locally designated sites of biodiversity interest                     | To achieve favourable condition for all international, national and local designated sites by 2026 |
|   |                         | Number of new developments delivering habitat creation  | Increase   |
|   |                         | % of LBAP species that are stable or increasing   | Increase   |
|   |                         | % of greenspace important for wildlife corridors identified and safeguarded from or enhanced as part of development                         | Increase   |
|   |                         | % of planning permissions incorporating a condition which is to establish a buffer zone (relating to development adjacent to a watercourse) | Increase   |
|   |                         | Sites important for biodiversity enhanced, or recovered   | Increase   |
|   |                         | Unavoidable loss of biodiversity compensated for  | Increase   |
| 15. To conserve and enhance the heritage assets of Blaenau Gwent and their settings | Overall positive effect | Areas covered by Conservation Area designation  | Increase   |
|   |                         | Number of Listed Buildings at risk  | Reduce   |
|   |                         | Number of conservation area appraisals and conservation area management plans undertaken/ implemented                                       | Increase   |
|   |                         | Condition of registered parks and gardens of historic interest  | Improve  |
| 16. To make the best use of previously developed land                               | Positive effect         | % new development on previously developed land  | 60% of all new dwellings p.a.  |

|   |                 |  |  |
|---|-----------------|--|--|
| use of previously developed land and existing buildings to minimise pressure for greenfield development, where this will not result in damage or loss to biodiversity |                 | Area of contaminated land remediated for development   | Increase   |
| 17. To conserve soil resources and their quality  | Positive effect | No. and area of contaminated land sites  | Decrease through remediation   |
|   |                 | Area of agricultural land by grade   | Maintain quality and productivity  |
|   |                 | Area of redevelopment of brownfield sites  | Increase   |
|   |                 | Area of greenfield land lost to development  | Target should be nil   |
|   |                 | Number of development projects implementing soil creation and conservation techniques            | Target should be 100%  |
|   |                 | Number of small greenfield developments on the periphery of urban areas                          | Minimise   |
|   |                 | Maintenance of 10 year landbank (minerals)   | Maintain   |
|   |                 | Percentage use of secondary resources  | Increase   |
| 18. To reduce emissions of greenhouse gases, in particular carbon   | Negative effect | Greenhouse gas emissions (CO <sub>2</sub> equivalent) by sector and per capita (tonnes per year) | To reduce CO <sub>2</sub> emissions by 20% by 2010 from a 1990 baseline figure (national target)<br><i>Source: UK Air Quality Strategy, 2000</i> |

|   |                         |   |  |
|---|-------------------------|---|--|
| in particular carbon dioxide                                    |                         |   | A 3% year on year reduction in average overall carbon emissions across all sectors<br><i>Source: WAG/WLGA "Welsh Declaration on Climate Change and Energy Efficiency"</i><br>Reduce carbon dioxide emissions by 3% each year until 2011<br><br>Source: One Wales |
|   |                         | Use of zero carbon technologies in developments                               | Increase   |
|   |                         | Modal shift to more sustainable modes of transport                            | Increase   |
|   |                         | Planting schemes to provide carbon sequestration                              | Increase   |
| 19. To reduce waste generation and maximise reuse and recycling | Negative effect         | Number of fly-tipping incidents per year                                      | Zero   |
|   |                         | % of municipal waste recycled and composted                                   | To recycle or compost at least 40 % of municipal waste by 2009/2010 and 58% of municipal waste by 2015/16 (TBC in new Welsh Strategy, Oct 2007)<br><br>Source: Wise About Waste 2000 (Welsh Strategy)  |
|   |                         | % of commercial waste recycled  | Increase   |
|   |                         | No. of sustainable waste management facilities close to centres of population | Increase   |
|   |                         | Tonnage of waste to landfill  | Decrease   |
| 20. To maintain current air quality                             | Overall negative effect | Estimated background air pollution data                                       | To be below national targets for pollutants  |
|   |                         | No. of exceedences of the 100ug/m3 8 hour mean objective                      | No more than 10 exceedences of the 100ug/m3 8 hour mean  |
| 21. To maintain current low levels of vulnerability of all      | No significant effects  | % relevant permissions with SUDS schemes                                      | Increase   |
|   |                         | Number of properties at risk from flooding                                    | Decrease   |

|  |                                    |  |   |
|--|------------------------------------|--|---|
| development to flooding  |                                    | New development generating surface water flows greater than 10 litres/second/hectare being discharged to any watercourse | Decrease  |
| 22. To promote the use of sustainably sourced products and resources                                   | Overall Positive Effect            | Use of reclaimed and sustainability sourced materials for construction   | 100%  |
|  |                                    | Greywater recycling systems and water savings devices installed in new developments                                      | 100%  |
|  |                                    | Water consumption per household  | Decrease  |
| 23. To increase energy efficiency and generation and use of renewable energy across the County Borough | Both positive and negative effects | % of new build and retrofit meeting EcoHomes Very Good standard or above   | Increase  |
|  |                                    | % of commercial buildings meeting BREEAM Very Good standard or above   | Increase  |
|  |                                    | Energy consumption per capita  | Decrease  |
|  |                                    | Electricity generated from renewable sources   | 10% renewable energy target by 2010<br>4TWh of electricity from renewable sources by 2010 (WAG) |
| 24. To conserve and enhance surface and ground water quality   | Both positive and negative effects | % of total classified river length complying with water quality  | Improve   |
|  |                                    | % of total classified river length complying with RQO / RE (River Quality Objective/ River Ecosystem) target             | Improve   |
|  |                                    | % of planning applications granted in sewered areas where there is no capacity and no planned upgrades                   | Zero  |
|  |                                    | Groundwater quality  | Improve   |
| 25. Protect the quality and character of the landscape and enhance where necessary                     | Overall positive effect            | Proportion of valued landscape lost to development   | Decrease  |
|  |                                    | Amount or proportion of landscape subject to enhancement associated with development                                     | Increase  |
|  |                                    | Proportion of landscape characterised and managed  | Increase  |

**Consultation Question 5:**  
**Do you consider the proposed monitoring framework adequate?**

## 9. Conclusions and Next Steps

- 9.1 Following discussions between the SA team and Blaenau Gwent County Borough Council, the findings of the SA have now been incorporated into the LDP Preferred Strategy for consultation. Various changes have been made to the strategy document, including modifications to the layout to provide policy justification where necessary.
- 9.2 Table 9.1 demonstrates how the final set of policies reflects the recommendations that arose from the SA. Changes have been made to include:
- Modifications to the wording of policies: SP3, SP8, SP9, SP10, SP11, SP12 and SP19
  - Three new policies relating to:
    - Sustainable Development (SP4)
    - Leisure and Recreation (SP13)
    - Health and Education (SP14)
  - Separation of the built and natural environment policies into two separate policies (SP16 and SP17).
  - The original policies SP4 and SP5 were deleted as a result of repetition with Welsh Assembly Government Guidance.

Table 9.1 – Final Set of Policies for the Preferred Strategy

Original (and remaining) text

| No.                        | Final Strategic Policy  |
|----------------------------|---|
| <b>Locational Strategy</b> |   |
| SP1                        | <p><b>Heads of the Valleys Area – Growth and Regeneration</b></p> <p>The Heads of the Valleys area will be the focus for the County Borough's spatial development. Ebbw Vale will accommodate the majority of new homes, jobs and services and will be promoted as the main hub for Blaenau Gwent. Tredegar, Brynmawr and Blaina will be the focus for new development serving the growing needs of their respective communities. New development will be located within these centres or in locations highly accessible to them.</p> |
| SP2                        | <p><b>South of the Borough - Regeneration</b></p> <p>The South of the Borough will see a focus on regeneration with appropriate forms of growth to serve local needs. Abertillery will be the focus of new development serving the needs of its respective communities.</p>   |
| SP3                        | <p><b>Creating a network of sustainable linked communities to spread regeneration benefits</b></p> <p>The development and use of land throughout the County Borough will be determined by the need to ensure that all communities will have good access to</p>  |

| No.                               | Final Strategic Policy  |
|-----------------------------------|---|
|                                   | Ebbw Vale. This will be achieved by creating a network of hubs which have <del>good</del> <i>safe, frequent and reliable</i> public transport links with Ebbw Vale.   |
| SP4                               | <p><b>Climate Change</b></p> <p>All new development shall be designed to reduce its impact on and adapt to the effects of climate change. This will be addressed through the following hierarchy:</p> <ul style="list-style-type: none"> <li>• Reducing overall energy use</li> <li>• Incorporation of renewable energy generation</li> </ul>   |
| SP5                               | <p><b>Good Design</b></p> <p>The design of new development will assist in creating and sustaining safe places, strengthening local identity and projecting a positive local image</p>   |
| <b>Sustainable Development</b>    |   |
| SP4                               | <p>All new development should:</p> <ul style="list-style-type: none"> <li>• Make efficient use of land;</li> <li>• Offer sustainable transport choices that reduce the need to travel by car;</li> <li>• Deliver development of an appropriate type, form, scale, mix and density in relation to its location;</li> <li>• Reduce the use of natural resources through energy efficiency, waste reduction, reduced water use, renewable energy production and the use of sustainable products and resources in construction;</li> <li>• Protect and enhance the quality of the natural and built environment; and</li> <li>• Reduce its impact on and adapt to the effects of climate change.</li> </ul> |
| <b>Retailing and Town Centres</b> |   |
| SP6<br>SP5                        | <p><b>Retail Hierarchy</b></p> <p>Major retail, administrative and cultural developments will take place in the principal retail centre of Ebbw Vale. The District/Local centres of Tredegar, Brynmawr, Blaina and Abertillery will be protected and enhanced to improve vitality and viability and ensure they meet the needs of their districts. They will also develop new complementary roles based around historical, recreational and tourism potential. Local shopping centres will be protected and enhanced to provide facilities for local communities.</p>   |
| <b>Employment</b>                 |   |
| SP7<br>SP6                        | <p><b>Employment and Diversification of the Economy</b></p> <p>The employment and economic development needs of Blaenau Gwent will be met by the identification of 50 to 80 ha of land for employment and business purposes during the plan period. The employment roles of major industrial areas will be identified to assist in the diversification of employment and support the specialisation of manufacturing. Mixed-use sites will be identified close to town centres to enhance town centre based employment in the service sector.</p>   |
| SP8<br>SP7                        | <p><b>Development of the Tourism and Leisure sectors</b></p> <p>Foster sustainable tourism and leisure sectors which re-engage local communities with the natural and historic environment and boost the local economy.</p>   |
| <b>Housing</b>                    |   |

| No.                                   | Final Strategic Policy  |                |     |           |       |                 |     |                 |     |           |          |           |            |           |              |

| <p>SP13</p>                                     | <p><b>Leisure and Recreation</b></p> <p>Sites will be safeguarded for a new leisure centre at Ebbw Vale, and to ensure that identified shortfalls in open space provision are met.</p>  |
| <p>SP14</p>                                     | <p><b>Health and Education</b></p> <p>To improve health provision and skills sites will be safeguarded for a new hospital, Primary Care Resource Centres, the Learning Campus, relocation of the training centre and new schools.</p>   |
| <p>SP14</p> <p>SP15</p>                         | <p><b>Planning Obligations</b></p> <p>The Council will negotiate planning obligations where appropriate to secure improvements in infrastructure, facilities and services appropriate to the scale, type and location of the proposed development. These obligations may include the provision or improvement of the following:</p> <ul style="list-style-type: none"> <li>• Affordable Housing;</li> <li>• Traffic, Transport and Highway Initiatives particularly the provision of sustainable transport infrastructure;</li> <li>• Education Facilities;</li> <li>• Community Development and Recreational Facilities;</li> <li>• Public Open Space;</li> <li>• Biodiversity and Geodiversity;</li> <li>• Skills and Labour Market;</li> <li>• Community Safety; and</li> <li>• Public Art.</li> </ul> |
| <b>Environmental Protection and Enhancement</b> |   |
| <p>SP15</p>                                     | <p><b>Built and Natural Environment</b></p> <p>The distinctive natural environment of the County Borough will be protected and</p>  |

| No.          | Final Strategic Policy  |
|--------------|---|
|              | <p><del>enhanced. Appropriate development proposals should promote:</del></p> <ul style="list-style-type: none"> <li><del>• High quality design that reinforces local character, enhances landscape settings, and respects the cultural and historic qualities of individual buildings, landscapes or Conservation Areas;</del></li> <li><del>• Opportunities for the creation, conservation or restoration of designated sites of national and local nature conservation interests.</del></li> </ul>   |
| SP16         | <p><b><i>Environmental Protection</i></b></p> <p><i>The County Borough's distinctive character, natural environment and designated landscape will be protected, preserved and enhanced. Of particular importance are:</i></p> <ul style="list-style-type: none"> <li><i>• Those attributes and features which make a significant contribution to the character, quality and amenity of the landscape;</i></li> <li><i>• Ecology, wildlife, habitats and the linkages between them;</i></li> <li><i>• Geological and heritage interests; and</i></li> <li><i>• The quality of natural resources, including water, air and soil.</i></li> </ul>   |
| SP17         | <p><b><i>Built Environment</i></b></p> <p><i>The distinctive built environment of the County Borough will be protected and enhanced. Development proposals should:</i></p> <ul style="list-style-type: none"> <li><i>• respect local character and distinctiveness of the area; and</i></li> <li><i>• enhance sites protected for their historic or archaeological value.</i></li> </ul>  |
| SP16<br>SP18 | <p><b>Minerals</b></p> <p>The Council will contribute to the regional demand for a continuous supply of minerals by:</p> <ul style="list-style-type: none"> <li>• Safeguarding known reserves of coal, sand and gravel, limestone and high quality hard rock taking into account relevant environmental, planning and transportation considerations; and</li> <li>• Maintaining a 10-year land-bank of permitted aggregate reserves in line with national guidance.</li> </ul>  |
| SP17<br>SP19 | <p><b>Waste</b></p> <p>The Council will implement a sustainable, integrated approach to waste management which minimises the production of waste and its impact on the environment, and maximises the use of unavoidable waste as a resource. To assist this aim <del>the following land-use commitments are made:</del></p> <p><del>All allocated and protected class B2 industrial sites and existing waste management sites are designated as potentially suitable locations for new waste management facilities, which provides substantial choice in meeting the estimated land requirement of between 1.4 and 4 ha</del> <i>1.4 to 4ha of allocated and protected B2 industrial sites and existing waste management sites will be identified for strategic waste management facilities through the use of regional search criteria.</i></p> |

## Stages to be completed

- 9.3 This ISAR will be placed on public consultation as part of wider pre deposit consultation on the LDP Preferred Strategy.
- 9.4 Following consultation on this document, then as part of the development of the Deposit LDP, work will begin on the Sustainability Appraisal Report which will replace the ISAR when

completed. The comments received during public consultation will be taken into consideration in preparing the Sustainability Appraisal Report which will be published alongside the Deposit LDP.

- 9.5 The Sustainability Appraisal Report will also consider the assessment of preferred development sites for the delivery of the Preferred Strategy.

# Appendix A Consultation Responses to Scoping Report

## A.1 Respondents to the Consultation

A.1.1 Respondents with detailed comments that needed to be addressed in the SA are outlined in the table below. Consultees not included within this table, but from whom responses were received, were:

- Councillor Keith Barnes, Blaenau Gwent County Borough Council
- Yvonne Lewis, Nantglo and Blaina Town Council

**Table A.1 – Consultation Responses, Comments and Actions**

| Name and Organisation/ Department  | Comment   | Response   | Action            |
|--|---|--|-------------------|
| Janice Tse<br>Merthyr Tydfil<br>County Borough<br>Council  | 1. Would your organisation like more active involvement than has been suggested within the report?  |  |                   |
|  | No  | No further action  | No further action |
|  | 2. Have all relevant plans and programmes been consulted? If not, which ones should be included?  |  |                   |
|  | No<br>Priority Habitats of Wales: A Technical Guide (2003)<br>Guidelines for the Selection of Wildlife in South Wales: A Technical Guide (2004)<br>PAS 2010: Planning to Halt the Loss of Biodiversity – Biodiversity Conservation Standards for Planning in the UK – Code of Practice (Aug 2006) | 1) Not considered to be a P&P as it is a Technical Guide<br>2) As above<br>3) As above | No further action |
|  | 3. Are any significant environmental, social or economic data missing or misrepresented?  |  |                   |
|  | No  | No further action  | No further action |
|  | 4. Are judgements made concerning future baseline correct?  |  |                   |
|  | Yes   | No further action  | No further action |
| 5. Are there any additional sustainability problems or opportunities in the Blaenau Gwent area that need to be considered in the development of the LDP? |   |  |                   |
| No   | No further action   | No further action  |                   |
| 6. Do you agree with the proposed SA framework? Are objectives, targets and indicators suggested appropriate?  |   |  |                   |

|   |  |   |  |
|---|--|---|--|
|   | No. It is uncertain if the draft 25 SA objectives are manageable and deliverable along the LDP process.  | The SA Objectives are used to assess the LDP policies and thus the policies themselves will enable the delivery of the SA objectives. | No further action.   |
| Rhidian Clement<br>Dwr<br>Cymru/Welsh<br>Water  | 1. Would your organisation like more active involvement than has been suggested within the report?   |   |  |
|   | No   | No further action   | No further action  |
|   | 2. Have all relevant plans and programmes been consulted? If not, which ones should be included?   |   |  |
|   | Yes  | No further action   | No further action  |
|   | 3. Are any significant environmental, social or economic data missing or misrepresented?   |   |  |
|   | Yes. Infrastructure provision for both sewerage and water supply needs to be considered. Also, the need to promote sustainable development.              | Agreed  | Added to key sustainability issues/ opportunities table. Added as indicator to SA objective 21 |
|   | 4. Are judgements made concerning future baseline correct?   |   |  |
|   | Yes.   | No further action   | No further action  |

|  | 2. Have all relevant plans and programmes been consulted? If not, which ones should be included?   |   |   |
|  | Yes  | No further action   | No further action   |
|  | 3. Are any significant environmental, social or economic data missing or misrepresented?   |   |   |
|  | No. In my opinion, the Festival Park serves a different type of customer to the town centres, and attracts shoppers into the Borough from neighbouring areas. I do not think this is a good example of an out-of-town retail area damaging a town centre. In this respect I think point 3.15 is misleading and might be beneficial to the Borough. Unlike many out-of-town developments the shops here are specialist, and don't really compete with those in town centres. The clientele is a little different and that is what attracts particular retailers. I'm not entirely sure that future attempts to discourage this sort of development based on the evidence in the document are a good idea. I live just outside the Borough, but do most of my shopping here, a lot of it in Festival Park or Tesco, whereas I wouldn't normally go into Ebbw Vale or Brynmawr. | Comment noted.  | Specific reference to Festival Park has been removed.                                     |
|  | 4. Are judgements made concerning future baseline correct?   |   |   |

|                  |  |   |   |
|------------------|--|---|---|
| Deborah Beeson   | Overall, the document is very comprehensive but perhaps could have been simplified and better structured in places.  | Comment noted   |   |
| Ecologist, BGCBC | Introduction   |   |   |
|                  | <p>a) It would be helpful to explain what biodiversity means and that it is a key component of the environment and indicator of sustainable development.</p> <p>b) In particular, SEA should follow the 'positive planning' sequential approach:</p> <ul style="list-style-type: none"> <li>• Avoiding biodiversity loss or damage</li> <li>• Enhancing biodiversity where possible or securing opportunities for recovery</li> <li>• Compensating for unavoidable loss of biodiversity</li> <li>• Consolidating information on biodiversity.</li> </ul> <p>c) It is strongly recommended that the Blaenau Gwent Biodiversity Partnership and Gwent Wildlife Trust is invited onto the LDP Forum to ensure that there is balanced representation of biodiversity interests.</p>  | <p>a) Agreed</p> <p>b) Protecting and enhancing biodiversity in the SA Framework is thought to be reflective of this approach.</p> <p>c) This is an issue to be addressed by the LDP and not the SA</p> | <p>a) Text added to baseline description</p> <p>b) Indicators in SA Framework modified to reflect this approach</p> <p>c) No further action</p> |
|                  | Table 2:1 Relevant Local Plans and Programmes.   |   |   |
|                  | <p>a) It would be useful to date all the plans and programmes. Eg Convention on Biological diversity, Rio de Janeiro, 1992 and UK Biodiversity Action Plan 2005.</p> <p>b) It would be useful to group national plans into UK and Wales for easier reference.</p> <p>c) Please add the following to National Plans/Programmes UK:<br/>Conservation (Natural Habitats, &amp; c) Regulations 1994<br/>Wildlife and Countryside Act 1981 (as amended by Schedule 9 of the Countryside and Rights of Way Act 2000).<br/>Wales: Countryside Council for Wales Action for Wildlife, 1997</p> <p>d) It is recommended that Tables 2.2 and 4.1 be combined into a simple table which is easier to understand covering SEA Topic, Key Policy Documents Listed, and it would be particularly helpful to clearly list the policy aims and how the LDP might assist in delivering these policy aims.</p> | <p>a) Agreed</p> <p>b) Agreed</p> <p>c) Agreed</p> <p>d) Comment noted but difficult to address as SA guidance recommends staged approach</p>   | <p>a) Dates added to PP table.</p> <p>B )Plans re-ordered.</p> <p>c) Documents added to review.</p> <p>d) No further action.</p>                |
|                  | Table 2.2 Broad Sustainability Themes  |   |   |

|  |  |  |   |
|--|--|--|---|
| <p>5053880/FinalSARAppendicesOctober08.doc</p> | <p><b>Economic</b></p> <p>a) There is no link to sustainability under any of the economic themes. There needs to be reference to ensuring that economic growth and development is in line with sustainability principles and respects the environment in its location, scale and design.</p> <p>b) It should also be noted, that economic growth is not just about promoting industrial development, with 70% of Blaenau Gwent, classified as rural, it is also about promoting farm diversification and supporting sustainable rural development which has consistently been ignored.</p> <p>c) I concur with the theme 'Establish a strong tourist economy, sensitively capitalising on environmental, heritage and leisure assets'. One of our biggest marketable assets is our natural environment and open spaces. It should be recognised in the report that there are huge opportunities in how the LDP may assist in delivering this aim through developing Eco tourism through the management of open spaces and heritage sites and improvement of facilities that will bring considerable investment into the area.</p> <p><b>Environmental - Biodiversity</b></p> <p>d) I would prefer to see one main theme which is to protect and enhance biodiversity, natural habitats and wild fauna and flora, including international, national and locally designated sites, protected species and species and habitat types identified as priorities for biological conservation.</p> <p>e) I would like to see more information provided on how the LDP might assist in delivering this through: detailed policies for the conservation, and where appropriate, enhancement of international, national and local designated sites, reflecting their relative significance; identifying the areas to which the policies apply; and providing for the conservation, and where appropriate, enhancement of biodiversity outside statutorily designated sites, in particular identifying opportunities to conserve important local habitats and species, and to safeguard and manage landscape features of major importance for nature conservation.</p> | <p>a) The economic themes, alongside will be used in conjunction with the other sustainability themes. All resulting individual SA objectives for assessment will be used in the assessment of the plan, which will ensure that all aspects of sustainability are considered.</p> <p>b) Promote the regeneration of disadvantaged wards and support the revitalisation of such areas goes some way to addressing this.</p> <p>c) Agreed</p> <p>d) Agreed</p> <p>e) These opportunities should be identified as part of the LDP documents</p> | <p>a) No further action</p> <p>b) (link to comment below from MH CPRW- rural development plan) data added to baseline characteristics; SA Framework objective 2 has been amended to refer to rural development.</p> <p>c) Added to 'key sustainability issues' table. SA Objectives 1 and 15 address this point.</p> <p>d) Themes merged in table and wording modified. Addressed in objective 14 of SA Framework.</p> <p>e) No further action required</p> |
|--|--|--|---|

|                               |  |   |   |
|-------------------------------|--|---|---|
|                               | <p><b>Landscape</b><br/>f) It is recommended that the theme is changed to ‘...protect and enhance the quality and character of the landscape, including the countryside, the river valleys, upland areas and other green spaces...’</p> <p><b>Brownfield Land</b><br/>g) It should be recognised that some brownfield sites are rich in biodiversity. Therefore, it is recommended that the theme be changed to ‘Encourage the redevelopment of previously developed land where this will not result in damage or loss to biodiversity before considering development of Greenfield sites’.</p> <p><b>Climate change</b><br/>h) It is preferable to state that the Authority will need to meet international targets for reducing greenhouse gases that cause climate change and plan for and adapt to the effects of climate change.</p> <p><b>Social</b><br/>i) ‘Protect and provide social, recreational and leisure facilities’ – add ‘...to increase participation in sport and physical activity to maximise their contribution to health and well-being...’</p> | <p>f) Agreed</p> <p>g) Agreed</p> <p>h) Targets are addressed in the indicators and targets section of the SA Framework.</p> <p>i) Agreed</p> | <p>f) Theme wording changed. Added to SA Framework</p> <p>g) Theme wording changed. SA Framework objective 16 modified</p> <p>h) targets included under SA objective 18.</p> <p>i) Theme re-worded to include reference to sport and physical activity.</p> |
| Environmental Characteristics |  |   |   |

|  |  |   |   |
|--|--|---|---|
|  | <p><b>Biodiversity, flora and fauna</b> - This section is weak and needs a more thorough approach:</p> <p>a) Please provide a more specific geographic reference for each site listed, eg Cwm Merddog Woodlands, Cwm.</p> <p>b) Some reference should be made to what the wildlife site designations mean (there is a useful summary in the Draft TAN 5 which could be included in the appendices) and it should be made clear that the protection and management of these sites is imperative in terms of protecting the biodiversity resource of Blaenau Gwent. This resource is vulnerable to new developments and land management practices which could result in habitat loss and fragmentation. Up to date information on the condition of all sites is not currently available.</p> <p>c) 3.31 Reference should be made to the fact that the Usk Bat sites SAC is also referred to as Mynydd Llangattock SSSI. There could be confusion otherwise. Both the Usk Bat sites and Cwm Clydach Woodlands fall within the Brecon Beacons National Park boundary.</p> <p>d) 3.32 Reference should be made to Brynmawr Sections and Mynydd Llangattock that fall within the Brecon Beacons National Park part of the Authority.</p> <p>e) 3.34 Reference should be made to Cwm Clydach NNR which also falls within the Brecon Beacons National Park part of the Authority.</p> <p>f) 3.34 Delete '...which is at Parc Bryn Bach...' as this doesn't make sense.</p> | <p>a)Agreed</p> <p>b) Agreed</p> <p>c)Agreed</p> <p>d)Agreed</p> <p>e) The country park is named on the list of candidate LNRs which shows its wildlife importance.</p> <p>f)Agreed</p> | <p>a)No further action</p> <p>b) Text in key sustainability issues/ opportunities table elaborated.</p> <p>c)Added to baseline characteristics description</p> <p>d)Added to baseline characteristics description</p> <p>e)Added to baseline characteristics description</p> <p>f) Deleted from text.</p> |
|--|--|---|---|

|            |   |  |   |
|------------|---|--|---|
|            | <p>g)It would be useful to mention the Country Park Parc Bryn Bach as a valuable wildlife resource as it is not just a recreational resource, and say something about the types of habitats/species found there.</p> <p>h)It should be noted that the designation of LNRs is in accordance with targets in the community plan and that the Authority aims to designate 2 per year pending resources.</p> <p>i)Reference should also be made to the SINC designation process. The first tranche includes 62 not 60 sites – two have since been added Bryn Serth and Peacehaven Pond – information available from SEWBREC. 3.1 will therefore require updating. All sites identified qualify against scientific guidelines ‘Guidelines for the selection of wildlife sites in South Wales’ (August 2004) and it is anticipated will be taken through to Committee in early 2008. As stated, further tranches of SINC are expected as survey information becomes available and sites are assessed.</p> <p>j)Reference needs to be made to the fact that biodiversity cannot just be protected through the protection of statutory and non-statutory designated wildlife sites alone, hence, the Local Biodiversity Action Plan, and need to protect important habitats and species in the wider countryside.</p> <p>k)Reference must be made to LBAP and key habitat and species as well as protected species and need to ensure that ecological connectivity is maintained and enhanced between sites and habitats.</p> <p>l)Figure 3.1 - Sites of Ecological importance in Blaenau Gwent- poor quality of map. It would be preferable to produce a series of separate A3 colour maps - one for international and national site designations - SAC, NNR and SSSIs, one for local wildlife site designations - this should include Silent Valley LNR and all candidate SINC and LNRs and then a separate map for other types of important openspace such as Ancient Woodland, green corridors and LBAP priority habitats. I'm not sure why conifer areas have been included on the map as this isn't important habitat? Also, the names of sites should be contained within a simple key with numbers annotating the locations of the sites. Also, none of the information from Exergesis re openspace has been integrated into this report?</p> | <p>g)Agreed</p> <p>h)This is encompassed within the indicators of objective 14 of the SA Framework</p> <p>i)Agreed</p> <p>j)Agree</p> <p>k)Agree</p> <p>l) Agree</p> | <p>g)No further action</p> <p>h)Baseline description updated.</p> <p>i)Baseline description updated.</p> <p>j)This is addressed under SA objective 14. Text added to key sustainability issues/ opportunities table.</p> <p>k)LBAP habitats and species with action plans have been added to baseline description</p> <p>l)Figure 3.1 revised</p> |
|            | 6. Do you agree with the proposed SA framework? Are objectives, targets and indicators suggested appropriate?   |  |   |
|            | Yes   | No further action  | No further action   |
| Dai Davies | 1. Would your organisation like more active involvement than has been suggested within the report?  |  |   |

|  |   |   |                   |
|--|---|---|-------------------|
|  | No. Consult on each area of inclusion with the general public who live there. | The SA includes relevant plans and programmes that have been consulted upon with the community, such as the Blaenau Gwent Community Plan. The SA is open to public consultation therefore any member of the general public is free to comment on and contribute to its content. | No further action |
| 2. Have all relevant plans and programmes been consulted? If not, which ones should be included? |   |   |                   |
|  | No. Ensure that those directly affected by change are consulted fully.        | The SA includes relevant plans and programmes that have been consulted upon with the community, such as the Blaenau Gwent Community Plan. The SA is open to public consultation therefore any member of the general public is free to comment on and contribute to its content. | No further action |
| 3. Are any significant environmental, social or economic data missing or misrepresented?         |   |   |                   |

|  |   |   |                   |
|--|---|---|-------------------|
|  | Yes. More general public opinion needed such as consultation around the development of land at Peacehaven in Tredgar  | The SA includes relevant plans and programmes that have been consulted upon with the community, such as the Blaenau Gwent Community Plan. The SA is open to public consultation therefore any member of the general public is free to comment on and contribute to its content. | No further action |
|  | 4. Are judgements made concerning future baseline correct?  |   |                   |
|  | No. They do not take into account fully the views of the general public including young people. Also what happens when European Funding is removed?   | Comment noted but issue not strategic enough for Sustainability Appraisal   | No further action |
|  | 5. Are there any additional sustainability problems or opportunities in the Blaenau Gwent area that need to be considered in the development of the LDP?  |   |                   |
|  | Yes. Lack of social enterprise projects. More consultation with business on how economy should be developed.  | This is an issue for the LDP.   |                   |
|  | 6. Do you agree with the proposed SA framework? Are objectives, targets and indicators suggested appropriate?   |   |                   |
|  | No. More input required by SMEs and town centre business. Consider real minimum wage at a level of risk per year.   | This is an issue for the LDP.   |                   |
| Helen Madden<br>Communities<br>First, BlainA | 1. Would your organisation like more active involvement than has been suggested within the report?  |   |                   |
|  | Yes. Communities First BGCBC –This does not include all Communities First areas in Blaenau Gwent- the programme is not run by BGCBC.<br><br>Environmental organisations could include Friends of Parc Nantywaun, Cwmcelym TRA, Westside and Forgeside TRA to name but a few . | Comment noted. Issue for BGCBC  | No further action |
|  | 2. Have all relevant plans and programmes been consulted? If not, which ones should be included?  |   |                   |

|   |  |   |  |
|---|--|---|--|
|   | No. What about Communities First? There should be Action Plans for each Partnership. These need to be considered as they have been done in full consultation with the communities they represent.  | As a strategic document, it is not necessary to go into this level of detail in the Sustainability Appraisal. | The LDP should take these documents into consideration to ensure that the views of the community are considered fully. |
|   | 3. Are any significant environmental, social or economic data missing or misrepresented?   |   |  |
|   | No   | No further action   | No further action  |
|   | 4. Are judgements made concerning future baseline correct?   |   |  |
|   | Yes  | No further action   | No further action  |
|   | 5. Are there any additional sustainability problems or opportunities in the Blaenau Gwent area that need to be considered in the development of the LDP?   |   |  |
|   | Yes. Opportunities exist within the Communities First Programme and indeed with Communities Next which will commence in 2009.  | Comment noted.  | No further action  |
|   | 6. Do you agree with the proposed SA framework? Are objectives, targets and indicators suggested appropriate?  |   |  |
|   | Yes.   | No further action   | No further action  |
| Neil Maylan<br>Glamorgan-<br>Gwent<br>Archaeological<br>Trust | 1. Would your organisation like more active involvement than has been suggested within the report?   |   |  |
|   | No   | No further action   | No further action  |
|   | 2. Have all relevant plans and programmes been consulted? If not, which ones should be included?   |   |  |
|   | No. The Blaenau Gwent Landmap survey has been carried out, although we are not certain whether or not this work has been Quality assured at the current time. The information in this work will be important in determining the impact of the LDP on numerous landscape and environmental issues and it therefore should be included on lists 2.1 and 2.2. | Comment noted.  | No further action  |
|   | 3. Are any significant environmental, social or economic data missing or misrepresented?   |   |  |
|   | Yes. The information held in the adopted Blaenau Gwent Historic Environment Record (previously Sites and Monuments Record) curated by this Trust, which includes all known archaeological sites in the County Borough is missing.  | Agree.  | Information added where appropriate.   |
|   | 4. Are judgements made concerning future baseline correct?   |   |  |
|   | Yes.   | No further action   | No further action  |
|   | 5. Are there any additional sustainability problems or opportunities in the Blaenau Gwent area that need to be considered in the development of the LDP?   |   |  |
|   | No   |   |  |

|  |  |   |                   |
|--|--|---|-------------------|
|  | 6. Do you agree with the proposed SA framework? Are objectives, targets and indicators suggested appropriate?  |   |                   |
|  | Yes  | No further action   | No further action |
| Dr Jane Layzell<br>Blaenau Gwent<br>Local Public<br>Health Team  | 1. Would your organisation like more active involvement than has been suggested within the report?   |   |                   |
|  | Yes.<br>Local Public Health Teams are a primary source of professional public health advice and support for both Local Health Boards and Local Authorities in Wales. As the Local Development Plan will have a significant impact on the wider determinants of health such as employment and behaviour, we would be keen to participate in the working group for the SEA, and any other groups as appropriate.   | Comment noted. Issue for BGCBC  | No further action |
|  | 2. Have all relevant plans and programmes been consulted? If not, which ones should be included?   |   |                   |
| No.<br>a)'Design for Life' is the Welsh Assembly Government's overall plan for the future of health services in Wales. In Blaenau Gwent, this is reflected in the Gwent Healthcare NHS Trust 'Clinical Futures' plan, and also in the Local Health Board 'Primary Care Estate Strategy' and 'Blaenau Gwent 2010' plans for out of hospital care. The Local Authority plan for social area 'Living independently in the 21 <sup>st</sup> Century' is also not mentioned. All of these plans reflect a direction of travel in the delivery of health and social care services whereby considerably more services will be delivered within people's homes, and in local primary care or health and social care resource centres. They include estate requirements for both services and housing.<br><br>b) Blaenau Gwent's Mental Health Promotion Strategy is currently out for comment in draft format, and attempts to address issues of poor mental health (as opposed to mental illness) which have a fundamental impact on economic development within the County Borough. Land use, and planning of housing, town centres, transport routes etc can play an important role in promoting social cohesion and interaction, and ultimately better community mental health.<br><br>c) A food policy, aimed at children and young people, has also been developed for the County Borough; planning policy in terms of the number and siting of food retail outlets could have a significant influence on the success of this policy in terms of improving population health.<br><br>d) The 'Healthier Futures' Health, Social Care and Wellbeing Strategy included in Table 2.1 mentions most of the above strategies, but gives no details on them. It is also coming to the end of its lifespan, and will be replaced next year by Healthier Future 2, although many of the work strands will be ongoing.<br><br>e)A single Children and Young People's Plan is currently under construction. This will be the overarching strategy for all services for children and young people from 2008 onwards. | a) Agree that the strategic level plan for Wales be added to the review. Taking a more strategic approach, the lower level plans will have similar objectives for development and thus it is not necessary to include them all.<br>b) Agreed<br><br>c) Needs to be incorporated in to LDP policy.<br><br>d) SA is an iterative process, and subsequent versions of plans will be included through updating and monitoring processes.<br>e)The plan should be considered in the LDP when published. | a) Designed for Life and Living Independently in the 21 <sup>st</sup> Century added to review.<br><br>b) Data added to table 3.1; key issues table. The SA Framework already includes objectives to improve environmental factors that may affect mental health.<br>c)No further action<br><br>d)PPPs will be updated throughout the SA process.<br><br>e)No further action |                   |

|  |  |   |  |
|--|--|---|--|
| 3. Are any significant environmental, social or economic data missing or misrepresented?   |  |   |  |
| Yes.   |  |   |  |
| a)The key health statistics presented demonstrate the scale of ill health in the area, but give no information as to its causes.   | a)Comment noted.   | a)No further action required              |  |
| b)The majority of the burden of poor health in the areas is from common, largely preventable conditions such as coronary heart disease, chronic obstructive airways disease and type 2 diabetes. This is directly related to high levels of smoking, obesity, poor diet, sedentary lifestyles, and excess alcohol consumption. Poor mental health is also linked with these issues as both cause and effect. The combination of these issues and poor health status is a major contributor to the economic deficits of the area. | b)Objectives in SA Framework already address this              | b)No further action required              |  |
| c)All of these underlying health determinants can be influenced by planning policy, particularly for town centres and other areas where people do or could congregate.   | c)Comment noted  | c)Text in Issues table amended to reflect |  |
| d)Comments on the transport network do not reflect the lack of public services to some residential and industrial estates, the current reliance on taxi services, and the perceived lack of safe parking facilities for HGVs in the area. Safe access for HGVs to industrial estates is also an issue in some cases.   | d)Comment noted  | d)No further action                       |  |
| e)Current issues with the local landfill site and diffusion of landfill gas odours over surrounding residential areas are not mentioned. This could potentially result in conflict between encouragement of waste recycling to extend the active life of the site, and the desire of the local community to see it closed to prevent nuisance odours affecting their wellbeing. Early identification of a replacement site may be required.  | e) Comment noted but this is not a problem of strategic nature | e)No further action                       |  |
| 4. Are judgements made concerning future baseline correct?   |  |   |  |

|   |   |  |  |
|---|---|--|--|
|   | <p>a)It is extremely difficult to predict population growth at this point in time. If current trends continue, then the population is likely to continue to diminish; with an increasing proportion of very elderly individuals. This may be partially reduced by economic migration into the area, particularly into the health and social care sector.</p> <p>b)However, the new railway, relatively low house prices and economic growth generated through the Heads of the Valleys Strategic Programme could promote inwards migration from other areas in Wales/UK, as well as reduce the amount of outward migration, resulting in a larger and more balanced population. Planned improvements to post 16 educational opportunities through the Learning Campus on The Works site may also affect this. Both scenarios probably need to be taken into account until the effect of the railway in particular becomes apparent.</p> <p>c)High levels of poor health are going to be a feature of the area for at least the next generation; and are unlikely to improve without serious changes in lifestyles and opportunities for healthier lifestyles, particularly for children and young people.</p> <p>d)There are many areas that the LDP can directly contribute to this. Many of the contributions are subtle but important: e.g. town centre design to promote good mental health and reduce obesogenic environments; transport planning to encourage active travel and use of public transport; as well as the more obvious provision of recreation and leisure opportunities. Many of these issues are contained within the assessment, but are not overtly recognised as being population health issues.</p> <p>e)Access to safe, modern health and social services is a relatively minor, although also important, point. Much of the health service estate will be being replaced or relocated over the next ten years in line with changing service needs. Links with the Local Health Board to ensure planning are aware of developments will be essential to complement agendas- primary care services can increase footfall in town centres, for example, and health and social care is a major local employment sector.</p> <p>f)Consideration of health needs in design of new housing developments will also be important- the 'homes for life' concept enables a wide variety of people to maintain their independence in the community; and siting of development has a major role in social inclusion for residents.</p> | <p>a)Comment noted</p> <p>b)Comment noted</p> <p>c)Agreed</p> <p>d)Agreed</p> <p>e)Access to health care and employment is included within SA objective 9.</p> <p>f)Agreed</p> | <p>a)No further action</p> <p>b)Text added to baseline section</p> <p>c)Text added to baseline summary table</p> <p>d)The SA objectives will help to ensure that the LDP policies achieve these aims.</p> <p>e)No further action</p> <p>f)This has been included under SA objective 10</p> |
| <p>5. Are there any additional sustainability problems or opportunities in the Blaenau Gwent area that need to be considered in the development of the LDP?</p> |   |  |  |

|  |   |   |   |
|--|---|---|---|
|  | <p>a)The team may be familiar with the concept of an ‘obesogenic environment’ where access to food, particularly less healthy food, is heavily promoted and physical activity including walking is effectively discouraged. This promotes obesity and therefore poor health in the population; and has been an unforeseen and unintended outcome of planning policy in some areas. It is something which should be consciously and actively avoided in the Blaenau Gwent LDP. Although exposure to tobacco smoke has been drastically reduced by recent legislation; the development of outdoor ‘café quarter’ environments could reverse this while smoking is currently permitted outside premises and in the street. Apart from cardiac and respiratory disease, smoking also plays a major role in babies being born with low birthweights. A low birthweight puts infants at risk of infection and failure to thrive as infants, and also increases their risk of obesity and chronic disease as adults. Consideration needs to be given to reducing exposure to tobacco smoke outdoors.</p> <p>b)Excess use of alcohol is also a major factor in the County Borough, and also contributes to both unplanned pregnancy and low birth weight babies. Again, consideration of retail policy and urban design may improve this, at least in public places.</p> <p>c)The environment can similarly affect mental health, as is alluded to in the scoping report, by encouraging or discouraging social interaction, antisocial behaviour and fear of crime.</p> <p>d)Because of the topography of the area, significant increase in motor traffic within the County Borough is likely to result in a significant increase in air pollution. There is the potential for this to be reduced by planning to maximise active and public transport, and reduce traffic bottlenecks.</p> <p>e)There are a number of industrial estates/ business parks within the County Borough which area not easily accessible by public transport. This needs to be addressed, in addition to improving public transport for some of the residential estates.</p> <p>f)In the view of the extent of the health problems within the area, and their contribution to the economic situation, a formal Health Impact Assessment should be carried out a suitable stage on the draft LDP. The Local Public Health Team would be willing to assist with this.</p> | <p>a)This is not an issue that should be addressed within the scope of this strategic level SA.</p> <p>b)This is not an issue that should be addressed within the scope of this strategic level SA.</p> <p>c)Comment noted. Already considered through SA objectives 13 and 20</p> <p>d)SA objectives 13, 18 and 20 address this point.</p> <p>e)SA objective 13 seeks to improve more sustainable modes of transport. SA objective 9 seeks to improve access to employment.</p> <p>f)This is an issue to be addressed by the LDP and not the SA.</p> | <p>a)No further action required.</p> <p>b)No further action required.</p> <p>c)No further action required.</p> <p>d)No further action required.</p> <p>e)No further action required.</p> <p>f)No further action required.</p> |
| <p>6. Do you agree with the proposed SA framework? Are objectives, targets and indicators suggested appropriate?</p> |   |   |   |

|   |  |  |   |
|---|--|--|---|
|   | <p>No.</p> <p>a)Both life expectancy and CHD death rates reflect advance in medical treatment as much as health status, and mainly apply to older adult. However, they are good long term outcome measures, albeit with a long lag time between cause and effect.</p> <p>b)Welsh Health Survey data on health related lifestyle behaviour and physical/mental component summary scores may be a more immediate reflection of population health and wellbeing status. These figures are available every 3-4 years.</p> <p>c)Another potential measure would be prevalence of long term conditions such as diabetes and hypertension in the population, taken from yearly Primary Care Quality and Outcome Framework measurements.</p> <p>d)Indicators selected will depend on space and length of document; but use of health behaviour data may be a way of encouraging some of the more subtle planning links with health and wellbeing.</p>  | <p>a)Agreed</p> <p>b)It is not necessary for the SA to go into specific detail relating to social behaviour.</p> <p>c)It is not necessary for the SA to go into specific detail about individual health conditions.</p> <p>d)The SA addresses health issues and how they can be influenced by land use planning through the SA objectives.</p> | <p>a)No further action</p> <p>b)No further action</p> <p>c)No further action</p> <p>d)No further action</p>   |
| <p>Kayna Tregay</p> <p>Planning Liaison Officer</p> <p>Environment Agency Wales</p> | <p>1. Would your organisation like more active involvement than has been suggested within the report?</p>  |  |   |
|   | <p>We welcome the opportunity to comment on consultation documents produced by your Authority as part of the LDP process. We welcome the opportunity to attend any relevant meetings or workshops.</p>   | <p>Noted.</p>  | <p>As a statutory consultee the EA will be consulted at every relevant stage of the SA</p>  |
|   | <p>2. Have all relevant plans and programmes been consulted? If not, which ones should be included?</p>  |  |   |
|   | <p>a)The Environment Agency has prepared a standard package of national data and information for SEA/SA purposes. The LPA has already been provided with access to our current data sets and these should be. For clarity, this data is as follows:<br/>SEA website- datasets currently available:<br/>Bathing Water Quality Sample Points; General Quality Assessment (GQA) Biology at 1:10,000; General Quality Assessment (GQA) Chemistry at 1:10,000; Groundwater Vulnerability at 1:100,000; Groundwater Vulnerability (drift) at 1:100,000; Groundwater- Source Location Points at 1:50,000; Groundwater- Source Protection Zones at 1:50,000- WA; Industry Sites with RAS Authorisations (Radioactive Substances); Industry- Sites Under Integrated Pollution Control (IPC); Industry- IPPC Sites; LEAP boundaries; Licensed Water Abstractions- Point Data; Licensed Water Abstraction- Line Data; Licensed Water Abstractions- Area Data/; Nitrate Vulnerable Zones at 1:25,000; Waste- Landfill Sites (Active) at 1:10,000; Waste- Landfill Sites (other known sites) at 1:50,000; Waste Management Licenses; Water Discharge Licenses (Active); and Water Discharge Licenses (Revoked); River Quality Objectives (RQO) at 1:10,000.</p> | <p>a)Most information already in Scoping Report (see next column). Atkins unable to obtain highlighted information from EA website as it is in GIS format.</p>   | <p>a)Biological and chemical water quality already included; IPPC added; already have sufficient waste data Meeting (24<sup>th</sup> April 2008) of stakeholders concluded that it was unnecessary to collect data for environmental parameters where there are not issues. CCW referred to EA packs to be sent to local authorities containing pertinent data relating to specific issues in the County Borough.</p> |

|   |  |  |  |
|---|--|--|--|
|   | <p>b)We would also stress the importance of utilising the most relevant and up-to-date information. Notably, it is the responsibility of the plan maker to collect data for the environmental baseline.</p> <p>c)It is also appreciated however, that some strategic environmental information has not yet been collected but could be recorded to encourage instigation of monitoring to address existing deficiencies and to improve the availability of such information for subsequent SEA and plan making. We welcome the inclusion of statements in the report that identifies this shortfall/ difficulty. As data is collected, we will make it available to your Authority to aid the plan making process.</p> <p>d)Consideration should also be given to the following information to measure sustainability objectives and targets:<br/>                 Catchment Abstraction Management Strategy (CAMS) Please note the Environment Agency is only responsible for direct abstractions, not household water usage. We wish to draw to the attention of the Local Planning Authority (LPA) the results of the recent Catchment Abstraction Management Strategy for this area, which indicated the likely restriction that would be placed on any new abstraction licences granted in this area. The Ebbw and Lwyd Catchment Abstraction Management Strategy covers the majority of Blaenau Gwent. The northeast corner of the Borough falls under the Rhymney CAMS. We would expect the LPA to consider any limitations this may place on the development planned in the borough. CAMS are available to download from our website.<br/>                 Asset Management Plan<br/>                 AMP, produced by the sewerage undertaker (Welsh Water/ Dwr Cymru and Severn Trent Water). These plans will identify where there are sewerage infrastructure constraints and planned improvements. Consultation with the sewerage Undertaker and/or their agents is advised.<br/>                 High Level Target Report<br/>                 The High Level Target Report provided to the Welsh Assembly Government may be a useful source of information with regard to flood risk measures.<br/>                 A Living and Working Environment for Wales: the state of the Welsh Environment 2003.</p> <p>e)The Sustainability Appraisal should consider issues identified at all levels and this document refers to sustainability issues facing Wales, including climate change, energy supply, wildlife, pollution, land use and use of resources. This document may be a useful source for comparable data at a Wales level.<br/>                 Draft TAN5</p> <p>f)The emerging TAN5 on Nature Conservation and Planning will provide advice about the preparation and review of development plans with relation to biodiversity, including the relevant statutory requirements. While this is still in draft form, we recommend that it is considered as part of the LDP process.</p> | <p>b)Agreed</p> <p>c)This is an issue for the LDP</p> <p>d)This is an issue for the LDP</p> <p>e)Comment noted</p> <p>f)Agreed</p> | <p>b)CAMS added to pp review, and sustainability themes table.<br/>                 c)No further action to be taken</p> <p>d)No further action to be taken</p> <p>e)No further action</p> <p>f)Draft TAN5 added to PP review and sustainability themes</p> |
| <p>3. Are any significant environmental, social or economic data missing or misrepresented?</p> |  |  |  |

|  |  |   |   |
|--|--|---|---|
|  | <p>a)Para 3.31 page 3-6 Environmental Characteristics: Biodiversity, Flora and Fauna<br/>Biodiversity Action Plan (BAP) habitats and species should also be considered as part of the baseline data discussion, although we note the inclusion of the Blaenau Gwent BAP in Table 2.2 (page 2-10). The LDP process should deliver the protection, enhancement and expansion of these BAP habitats too.</p> <p>b)In addition to statutory nature conservation designation, we would stress that rivers and other watercourses are important for biodiversity for the habitat they provide and for their wildlife corridor function. Please note that watercourses are now included in the recently updated national BAP. There are likely to be a number of other existing wildlife networks (in addition to watercourse corridors) in the area which have not been considered. The importance of the protection and expansion of these links is highlighted within the EU Habitats Directive and reflected in the Draft TAN 5. These habitats and networks should therefore also be considered as baseline data.</p> <p>c)Para 3.44 Water and Flood Risk<br/>We note that there are some errors in paragraph 3.44. We request that TAN15 be referred to as it is the appropriate national policy guidance with respect to flood risk. We suggest the following replacement for paragraph 3.44:<br/>'TAN15 Development and Flood Risk (July 2004) is the appropriate framework for guiding planning decisions with respect to flood risk. The policy refers to the Welsh Assembly Government's (WAG) Development Advice Maps (dam), which are based on Environment Agency Wales' flood outlines. In Blaenau Gwent there are zones of both defended and undefended floodplain (C1 and C2 respectively). The DAM maps should be used as a trigger for guiding development away from areas of flood risk.'</p> <p>d)As TAN 15 is the mechanism used for guiding the location of development in flood plains, we recommend that figure 3.3 be replaced by a figure showing the DAM zones in Blaenau Gwent. The DAM maps are available from the Welsh Assembly Government on request.</p> <p>e)With regard to surface water runoff, we would seek to ensure that no development takes place that generates surface water flows greater than 10 litres/second/hectare being discharged to any watercourse in these catchments.</p> | <p>a)Agreed</p> <p>b)Agreed</p> <p>c)Agreed</p> <p>d)Agreed</p> <p>e)Agreed</p> | <p>a)BAP species and habitats for which action plans have been prepared have been added to the baseline discussion.</p> <p>b)Non designated sites are already included within the SA Framework</p> <p>c)Text modified according to recommendation</p> <p>d)Flooding maps provided in Appendix B</p> <p>e)Indicator added to SA objective 21</p> |
| 4. Are judgements made concerning future baseline correct?   |  |   |   |
|  | With regards to Objective 14- To protect and enhance biodiversity across Blaenau Gwent (see table 5.2), we note that the trend is 'stable' and would appreciate clarification on how this conclusion has been reached.   |   |   |
| 5. Are there any additional sustainability problems or opportunities in the Blaenau Gwent area that need to be considered in the development of the LDP? |  |   |   |

|  |  |   |   |
|--|--|---|---|
|  | <p>We have a number of comments on the key issues suggested (relating to table 4.1), and also recommend below examples of opportunities for increasing sustainability in Blaenau Gwent:</p> <p><b>Key Issue: Protection of ecological resources and biodiversity (page 4-13 and 4-14)</b></p> <p>a) Ecological resources and biodiversity should be protected, enhanced and expanded. This applies to statutory sites, SINCs, LNRs, national and local BAP habitats, habitats for BAP and protected species and habitat networks, such as river corridors.</p> <p>b) <i>Implications for Plan:</i> The LDP should deliver the protection, enhancement and expansion of these BAP habitats. In addition, sites meeting the criteria of SINC designation must be identified as soon as possible, in order for them to be included within the LDP. This will reduce the risk of their removal by development.</p> <p>c) Creation of habitat within new developments where it has previously been lost should be promoted. This could include landscaped areas to benefit wildlife and the use of SUDS incorporating habitat creation (eg green/brown roofs, wetlands)</p> <p>d) It is important to note that development and biodiversity do not have to be mutually exclusive in all cases. Dependent on the existing ecological conditions of an area, the level of possible development intensity should also be considered on a site by site basis. Correct determination of development intensity (and ultimately design) will enable the retention and potentially increased robust ecosystem and provide for high quality developments for the local community.</p> <p><b>Key Issue: Limited Supply of Brownfield Land (page 4-14)</b></p> <p>e) We support proposals to remediate contaminated land, prior to development.<br/>Implications for plan: we would stress that remediation should seek to protect (rather than merely 'reduce the threat to') all controlled water, which includes groundwater, as well as watercourses.</p> <p><b>Key issue: Waste Management (page 4-15)</b></p> <p>f) We welcome the approach to waste management proposed, although request that the plans also consider the disposal of waste water.</p> <p>g) Implications for plan: the plans should consider the limitations on existing sewerage systems and locate development in areas where capacity already exists or where upgrades are planned. We recommend consultation with the Sewerage Undertaker. The plan should ensure that where capacity does not exist, development should be considered as premature until the necessary improvement works have been undertaken.</p> | <p>a) Agreed</p> <p>b) Agreed. The text currently states words to the same affect.</p> <p>c) Agreed</p> <p>d) Agreed</p> <p>e) Agreed</p> <p>f) Agreed</p> <p>g) This is mainly an issue for the LDP.</p> | <p>a) Key issues/ opportunities table wording modified as a result of earlier comment of the same nature.</p> <p>b) Wording modified slightly in key issues/ opportunities table.</p> <p>c) Creation of habitat added to key issues/opportunities table</p> <p>d) Text added to key issues/opportunities table</p> <p>e) Text modified in key issues/opportunities table accordingly.</p> <p>f) Text modified in key issues/opportunities table accordingly.</p> <p>g) Text modified in key issues/opportunities table accordingly.</p> |
| <p>6. Do you agree with the proposed SA framework? Are objectives, targets and indicators suggested appropriate?</p> |  |   |   |

|  |  |   |  |
|--|--|---|--|
|  | <p><b>Additional Issue: Angling</b><br/>                 h)We would bring your Authority’s attention to the positive impact that developing angling facilities can have on encouraging tourism and contributing to community health and wellbeing. The promotion of angling can bring in tourists from outside the area, which will provide extra customers for hotels, shops, restaurants and other local businesses. It should be recognised that the participation in angling has been shown to reduce local crime (especially amongst youths) and truancy. The levels of education amongst the new, young anglers have been found to improve, as the anglers are keen to learn about their environment and what they can do to conserve local public amenities. Furthermore, these facilities are less likely to be vandalised and damaged, as the local anglers take pride and ownership of these facilities, and wish to maintain them in good order. Fishing has also been shown to improve people’s health, as it encourages gentle exercise, getting out into the fresh air, and reduces stress levels. <i>Implications for the Plan:</i> The LDP should seek to develop and promote angling in Blaenau Gwent. We would welcome the opportunity to assist with any such projects.</p> <p>Generally, the objectives, indicators and targets appear to cover all relevant issues. The wording used however, may require refinement to provide clarity and understanding. Specific comments with relation to Table 5.1 are as follows:</p> <p><b>Objective 10: To promote community health and wellbeing</b><br/>                 a)In response to Question 5, we commented on the benefits of angling and recommended that LDP promote the development of angling facilities. In order to measure this, we recommend the following indicator:<br/>                 The number of Rod Licences sold annually in Blaenau Gwent (target: increase) (depending on data availability)</p> <p><b>Objective 14: To protect and enhance biodiversity across Blaenau Gwent</b><br/>                 b)The target: ‘to halt the loss of biodiversity by 2010- EU sustainable development strategy’ appears vague. We would recommend a clearer target and would be willing to work with you on the development of this.</p> <p>c)With reference to the indicator on ‘the amount of greenspace important for wildlife corridors’ we recommend that an additional indicator be added to focus on enhancements:<br/>                 Amount of greenspace important for wildlife corridors enhanced as part of development.</p> <p>d)This therefore covers corridors that may have been previously degraded and identifies strategic links to create a more robust ecosystem. However, it should be noted that the word ‘amount’ should be quantified, for example, into an area or percentage of planning applications approved.</p> <p>e)For rivers and other watercourses this will also allow the evolution of natural processes and systems as promoted within the Draft TAN 5. However, all rivers, watercourses and associated terrestrial corridor are easily identifiable as important wildlife corridors. We therefore recommend the following additional indicators:<br/>                 % of planning permissions incorporating a condition which is to establish a buffer zone (relating to development adjacent to a watercourse)</p> | <p>h)Agreed</p> <p>a)Agreed</p> <p>b)Agreed</p> <p>c)Agreed- SA Framework already contains an indicator to this effect.</p> <p>d)Agreed</p> <p>e)Agreed</p> | <p>h)Added to baseline description; key issues/opportunities table, and SA Framework</p> <p>a)Added to Framework</p> <p>b)Modified in line with information provided by CPRW below: to achieve favourable condition for all international, national and local designated sites by 2026<br/>                 c)Indicator modified slightly</p> <p>d)’amount’ changed to ‘%’.</p> <p>e)Indicator added to SA Framework</p> |
|--|--|---|--|

|  |   |   |   |
|--|---|---|---|
|  | <p><b>Objective 16: to make the best use of previously development land and existing buildings to minimise pressure for greenfield development.</b><br/>f)This objective sets a target of 60% of all new dwellings to be situated on brownfield land. We consider this as an appropriate target and it is in line with government targets.</p> <p><b>Objective 17: To conserve soil resources and their quality</b><br/>g)We agree that the number of Contaminated sites will decrease through remediation. We understand that Blaenau Gwent Environmental Health Department operate a particularly pro-active Contaminated Land inspection strategy (duty under Part IIa of the Environmental Protection Act 1990) and our Groundwater and Contaminated Land team has worked in cooperation with them in assessing the risks top both human health and controlled waters from prioritised sites. If required, this leads to remediation.</p> <p>h)We note the point in objective 17 that the target for Greenfield land lost to development should be nil. However, it is unclear how this is possible when the target for the redevelopment of brownfield sites is only 60%.</p> <p><b>Objective 19: Waste</b><br/>i)We recommend the following additional indicator: Number of fly-tipping incidents per year (target: zero)</p> <p><b>Objective 21: To minimise the vulnerability of all development to flooding</b><br/>j)With regards to the first indicator proposed, there may be situations in which a planning application in a DAM zone is accompanied by a Flood Consequences Assessment which demonstrates that the risks and consequences of flooding can be managed. We therefore recommend that the first indicator be amended to read: '% of planning permissions (<u>minor</u> development) approved contrary to Environment Agency sustained objectives on flood risk' and 2) '% of planning permissions (<u>major</u> development) approved contrary to Environment Agency sustained objections on flood risk.'The corresponding targets should be zero.</p> <p><b>Objective 23: to reduce water consumption</b><br/>k)We recommend that this objective be reworded to read: 'to promote a sustainable use of water resources'</p> <p>l)We recommend the following additional indicator: 'water consumption per household (target: decrease)</p> <p>m)We also recommend that our CAMS be consulted as a source for further indicators.</p> <p><b>Objective 25: To conserve and enhance surface and groundwater quality.</b><br/>n)We recommend the following amendments to the biological and chemical quality indicators:<br/>'% of total classified river length complying with water quality'<br/>'% of total classified river length complying with RQO / RE (River Quality Objective/ River Ecosystem) target'<br/>We collate this data at present and it is available on our SEA website</p> <p>o)We also recommend the following additional indicator:% of planning applications granted in sewered areas where there is no capacity and no planned upgrades (target zero)</p> | <p>f)Agreed</p> <p>g)No further action</p> <p>h)Remainder of land (greenfield) at 40% is acceptable by the Council</p> <p>j)Agreed</p> <p>j)Agreed</p> <p>k)Agreed in part</p> <p>l)Agreed</p> <p>m)Comment</p> <p>n)Agreed</p> <p>o)Agreed</p> | <p>f)No further action</p> <p>g)No further action</p> <p>h)No further action</p> <p>i)Added to SA Framework<br/>j)Text modified</p> <p>k)Objective modified to read 'To promote <u>the more</u> sustainable use of water resources'<br/>l)Indicator added CAMS consulted<br/>m)Indicators added to SA Framework<br/>n)24<sup>TH</sup> April meeting CCW indicated that under the WFD monitoring objectives have now changed<br/>o)Indicator added to SA Framework</p> |

|   | <p>l)The Rhymney Catchment Abstraction Management Strategy, published by the Environment Agency in March 2006. The Ebbw and Lwyd Catchment Abstraction Management Strategy, EA Sept 2006<br/>The two above documents have ecology management, tourism, agriculture and industry connotations.</p>   | <p>i)Included as a result of EA comments above</p>  | <p>i)No further action</p>  |
| <p>3. Are any significant environmental, social or economic data missing or misrepresented?</p> |   |   |   |
|   | <p>CPRW's direct comment is that coverage appears to be suitably comprehensive.<br/>a)Table 2.2 Broad Sustainability Objectives is not included in the index.<br/><br/>b)Page 2-9, 4<sup>th</sup> item under SEA topics- <u>Material Assets</u> would seem applicable to the Sustainability Theme<br/><br/>c)Page 2-11, 1<sup>st</sup> item under SEA topics- <u>Landscape</u> issues are of relevance to <u>protection of floodplains from inappropriate development</u>.<br/><br/>d)Page 2-11, 2<sup>nd</sup> item under National/Regional- <i>The Blaenau Gwent Draft Rights of Way Improvement Plan</i> 2007 should appear in the Local column, also on pages 2-12 and 2-14.<br/><br/>e)Page 2-11, 4<sup>th</sup> item under Sustainability Theme- CPRW would prefer to see '<i>valued landscape character</i>' only <u>enhanced</u> where this is necessary, <u>enhancement</u> not being regarded as a prescription to be generally applied.<br/><br/>f)Page 2-12, 2<sup>nd</sup> item under SEA topics- CPRW is not sure why 'Human Health' is regarded as being directly relevant to the <u>redevelopment of previously developed land</u> Sustainability Theme.<br/><br/>g)Page 2-12, 6<sup>th</sup> item under SEA topics- <u>Landscape</u> can be affected by waste management practices, the development of landfill sites in particular. They are often to be found in the countryside, and can be extremely disfiguring.<br/><br/>h)Page 2-13, 4<sup>th</sup> item under SEA topics-<u>Climatic Factors</u> ought to be added; the levels of soil sequestration of carbon dioxide can have an influence.<br/><br/>i)Page 2-15, 1<sup>st</sup> item under National/Regional- the <i>Environment Strategy for Wales</i> refers to housing quality (on pages 42 and 43) and should be included<br/><br/>j)Page 2-15, 1<sup>st</sup> item under SEA topics- <u>quality of housing</u> is directly associated with <u>Human Health</u></p> | <p>a)This issue will be resolved in the SAR<br/>b)Agreed<br/><br/>c)Agreed<br/><br/>d)Agreed<br/><br/>e)Agreed. Theme already modified as a result of previous comments.<br/><br/>f)Human Health was included as remediation of contaminated land will reduce levels of contaminants that may enter the food chain/ watercourses.<br/><br/>g)Agreed<br/><br/>h)Agreed<br/><br/>i)Agreed<br/><br/>j)Agreed</p> | <p>a)Check references in SAR<br/>b)Added to sustainability themes table (regeneration of disadvantaged wards)<br/>c)Added to table<br/><br/>d)Document ref. moved to the correct column<br/>e)Theme further modified to reflect CPRW stance, also reflected in SA Framework objective 26.<br/>f)No further action<br/><br/>g)Added to table<br/><br/>h)Added to table<br/><br/>i)Added to table<br/><br/>j)Added to table</p> |

|  |   |  |   |
|--|---|--|---|
|  | <p>k)Page 2-15, 2<sup>nd</sup> item under SEA topics- CPRW does not see 'Human Health' as being closely related to the <u>crime and fear of crime</u> Sustainability Theme, unless this is having a marked adverse upon the mental health of a substantial number of citizens, either in a given area or in Blaenau Gwent in general.</p> <p>l)Page 2-16, under Local- The <i>Blaenau Gwent Local Rights of Way Improvement Plan</i> is arguably of relevance to the Protect and provide local social, recreational and leisure facilities theme</p> <p>m)There is no reference to <u>formal sports facilities</u> in Chapter 3, Baseline Information</p> <p>n)Page 3-5, para 3.24, 2<sup>nd</sup> sentence- it is not quite clear as to why primary school places will be 'particularly' reduced as a result of the trend toward an ageing population in Blaenau Gwent; over time, one would have expected this to percolate through to secondary educational establishments.</p> <p>o)Para 3-6, paragraph 3.30, 3<sup>rd</sup> sentence- the '17.8' figure is clearly incorrect, and presumably should be <u>37.8%</u></p> <p>p)Page 3-11 to 3-12- CPRW thinks that <u>tourism connections with heritage</u> ought to have been touched upon.</p> <p>q)Page 3-15- Figure 3.3 cannot be properly interpreted in the absence of colour. Additionally, <u>rivers are not clearly depicted and named.</u></p> <p>r)Page 3-16, paragraph 3.52, 1<sup>st</sup> sentence- the '68%' of the Blaenau Gwent public rights of way network that consists of paths for walkers is not necessarily in a useable condition.</p> <p>s)Page 3-16, paragraph 3.56- the bus services information is much appreciated as a rare instance of attention being paid to local detail.</p> | <p>k)Disagree</p> <p>l)Agreed</p> <p>m)Agreed</p> <p>n)Agreed</p> <p>o)Agreed</p> <p>p)This is addressed in the key sustainability issues/opportunities table</p> <p>q)Agree</p> <p>r)Noted</p> <p>s)Noted</p> | <p>k)Topic ref removed meeting 24<sup>th</sup> April- Human Health is regarded by the Local Health Board as being related to crime levels.</p> <p>l)Added to table</p> <p>m)Data from the Sports and Active Living Strategy added to baseline description alongside information from the council website.</p> <p>n)Text modified</p> <p>o)Text modified</p> <p>p)No further action required</p> <p>q)Text modified to reflect comments.</p> <p>r)Figure Improved</p> <p>s)No further action</p> |
|  | 4. Are judgements made concerning future baseline correct?  |  |   |
|  | <p>CPRW agrees in general that the judgements made are correct, though adds a few incidental comments.</p> <p>a)Page 5-10, paragraphs 5-10 and 5-11 –CPRW has difficulty in understanding what is meant by 'sensitivity to change' and does not find 'thresholds' in this context and easy concept to grasp. This may be because examples are given from a single topic area.</p>   | <p>a)Noted.</p>  | <p>a)Further clarification provided in the text.</p>  |

|   |  |   |  |
|---|--|---|--|
|   | <p>b)Page 5-13, item 11- it is not clear as to why currently 'improving' trends in crime reduction will become 'stable' in future without the influence of the LDP.</p> <p>c)Page 5-13 and 5-14, item 16 –pressure for <u>greenfield development</u> just outside settlement boundaries must be strongly resisted.</p> <p>d)Pages 5-14, item 20- in view of <u>the anticipated increase in car ownership, and thus of emissions</u>, it might be difficult to maintain a <u>stable</u> state.</p>  | <p>b)The LDP is unlikely to have a substantial impact on crime levels; policing and other such measure are likely to be more influential.</p> <p>c)The objective is in support of this aim</p> <p>d)It is thought that the improvement to rail services (unrelated to LDP) may counter balance this effect. There is currently a low rate of car ownership in Blaenau Gwent, and with air pollution currently stable it is anticipated that this trend would continue in the absence of an LDP.</p> | <p>b)'stable' changed to 'improving'</p> <p>c)No further action</p> <p>d)No further action</p> |
| <p>5. Are there any additional sustainability problems or opportunities in the Blaenau Gwent area that need to be considered in the development of the LDP?</p> |  |   |  |
|   | <p>a)Page 4-3, 1<sup>st</sup> paragraph, 1<sup>st</sup> and 2<sup>nd</sup> sentences under key issues- it would be interesting to have the additional information as to the number of people on job seekers allowance who find temporary or permanent employment through this scheme.</p> <p>b)Page 4-4, paragraph under Implications for Plan- CPRW is not quite certain about the desirability of encouraging 'people of working age to settle in the area', unless it can be guaranteed that in-migrants do not take jobs from indigenous people who need them after training to improve skills. It is appreciated, however, that there is a need to change the population balance in favour of a smaller senior citizen percentage, especially in the light of the exodus of young people.</p> <p>c)Page 4-5, under Key Issues, Tourism Potential- it is noted that the topic missing from Chapter 3 is dealt with here.</p> | <p>a)It is not the task of the SA to comment on this.</p> <p>b)The text refers to the need to improve the population balance in the area. It would be difficult, however, for the LDP to dictate to whom job opportunities are awarded.</p> <p>c)Agreed</p>   | <p>a)No further action</p> <p>b)No further action</p> <p>c)No further action</p>               |

|  |   |  |   |
|--|---|--|---|
|  | <p>d)Page 4-5, under Implications for the Plan, Tourism Potential- when 'increases in recreational function' are considered, <u>the impact upon the countryside, particularly visual</u>, must be taken into account. The tenor of this comment also applies to <u>land designated for its ecological value</u>.</p> <p>e)Page 4-5, under Implications for the Plan, High Vacancy Rate in Town Centres- CPRW does not think it is realistic for the LDP to 'ensure' that town centres can effectively compete with those in adjoining areas' these might offer superior retail facilities or be upgraded to a higher standard, and therefore attract shoppers from Blaenau Gwent. Improved public transport might also make the adjoining-area centre more accessible than at present. It is clearly necessary, however, for the Plan to contain positive town centre regeneration policies.</p> <p>f)Page 4-7, under Implications for Plan, 3<sup>rd</sup> paragraph, 2<sup>nd</sup> sentence, poor housing quality and mismatch of housing size/tenure with needs and demand- while it is agreed that improved rail services could increase the demand for housing in Blaenau Gwent, it is likely to be the case that the majority of in-comers will be car owners, and that a sizeable proportion of these will therefore commute and take other trips by private transport.</p> <p>g)CPRW notes that under Implications for Plan, 3<sup>rd</sup> paragraph on page 4-9, 'increase car usage' is envisaged as a result of 'attracting people to Blaenau Gwent'.</p> <p>h)Pages 4.7 and 4.8, 1<sup>st</sup> paragraph, penultimate sentence under Housing affordability problems, Key Issues- the comment under page 4-7 above applies. Too much reliance should not be placed upon rail use by the anticipated influx of Cardiff workers (penultimate sentence).</p> <p>i)Page 4-8, under Low educational attainment, Key Issues, 2<sup>nd</sup> and 3<sup>rd</sup> paragraphs- in view of the fact that low educational attainment is attributed, at least in part, to truancy from school, it is interesting to learn that the two wards with the lowest performance (2<sup>nd</sup> paragraph) are not those with the highest percentage of non-attendance (3<sup>rd</sup> paragraph)</p> <p>j)Page 4-8, under the above heading, 4<sup>th</sup> paragraph. It would have been useful to include the Wales figure of 68% for 'total population...enrolled in higher education'</p> <p>k)Page 4-8, under Low Education Attainment, Implications for the Plan- it is more realistic to <u>encourage</u>, rather than to seek to <u>ensure</u> higher educational take-up.</p> | <p>d)Agreed</p> <p>e)Agreed</p> <p>f)The text is solely referring to the potential increase in demand for housing that may arise from the increased attractiveness of the area due to the improved rail services, not an increase in demand for housing in general.</p> <p>g)Noted</p> <p>h)Agreed. However, the comments are not intended to place reliance on rail services, just suggest that they may have an effect on demand.</p> <p>i)Noted</p> <p>j)It is considered that the addition of this data will not add particular value to the comments.</p> <p>k)Agreed</p> | <p>d)Added to table</p> <p>e)Text modified to reflect comments.</p> <p>f)No further action</p> <p>g)No further action</p> <p>h)Wording slightly modified.</p> <p>i)No further action</p> <p>j)No further action</p> <p>k)Text currently uses the word 'encourage' as opposed to 'ensure'.</p> |
|--|---|--|---|

|  |   |   |   |
|--|---|---|---|
|  | <p>l)Page 4-9, under Transport Access Constraints to the Area, Key Issues, 1<sup>st</sup> paragraph, 2<sup>nd</sup> sentence- the 'low cost options' for accessing the three airports listed should have been indicated.</p> <p>m)Page 4-9, under Transport Access Constraints to the Area, Implications for the Plan, 'ensure' is considered to be the correct expression to employ, it being of utmost importance to <u>protect the environment</u> from increased vehicular traffic.</p> <p>n)Page 4-9, under the above heading, 4<sup>th</sup> paragraph- use of the term 'encourage' is welcomed as being more attainable than an attempt to <u>ensure</u>. Nonetheless, rights of way improvement, being crucial in connection with <u>promoting sustainable transportation and health improvement</u> must be prioritised.</p> <p>o)Page 4-10, under Health, Key Issues, 3<sup>rd</sup> sentence- with reference to self-assessment of state of general health, CPRW sees the <u>benefits dependency culture</u>, with its associated lack of desire to work (20% of the economically inactive people in Blaenau Gwent), as being partially responsible for the way in which Blaenau Gwent residents estimate their health status.</p> <p>p)Page 4-10, under Welsh Language and Culture, Implications for Plan –the 1<sup>st</sup> sentence statement as to determination of the 'role of the Welsh Language and Culture' imparts an air of realism. In saying this, however, CPRW is keen to support these aspects of Welsh life where opportunity offers.</p> <p>q)Page 4-10, under Welsh Language and Culture, SEA Topics- 'landscape' is not regarded as having a very close connection with this themes, unless <u>promotion and/or development of cultural sites</u> is seen as having a visual influence.</p> <p>r)Page 4-10, 4.11 and 4.12, under Crime and Social Deprivation, Key Issues, 3<sup>rd</sup> paragraph, 5<sup>th</sup> indent- the smoking figure is a disturbing one, especially if people on low incomes tend to be among the heaviest smokers. They may spend too high a proportion of their income upon tobacco products, leaving insufficient cash for purchasing nutritious food for their families.</p> <p>s)Pages 4-10, 4.11 and 4.12, under Crime and Social Deprivation, Key Issues, 3<sup>rd</sup> paragraph, 8<sup>th</sup> indent- no figure for <u>under-16 obesity</u> is given.</p> <p>t)Page 4-12, under High car usage and CO2 emissions, Key Issues , 2<sup>nd</sup> sentence- it has to be assumed that although Blaenau Gwent residents are slightly more likely than the national average to commute to work, their overall transport-related carbon dioxide emissions result from <u>fewer car trips for leisure, social, shopping and healthcare purposes</u>.</p> <p>u)Page 4-13, under Protection of ecological resources and biodiversity, Implications for the Plan- the LDP should pursue this objective by seeking to actively discourage car use; for example, by <u>limiting car parking space in shopping centres that are well served by public transport</u>, also by <u>promoting park and ride sites</u>, as in Policy T2 in the adopted UDP.</p> | <p>l)Noted.</p> <p>m)Agreed</p> <p>n)Noted and agreed</p> <p>o)It is not the task of the SA to make judgements as to reasons behind peoples' judgements of their health status.</p> <p>p)Noted</p> <p>q)Agreed</p> <p>r)Noted</p> <p>s)Under 16 obesity is not data that has been collated. It is not the task of the SA to collate data in extensive detail, but to gain an overview of the area.</p> <p>t)Agreed</p> <p>u)Agreed, but it is felt that these comments are more appropriate under the 'high car usage' issue.</p> | <p>l)Further clarification provided in the text.</p> <p>m)No further action required</p> <p>n)Text modified slightly to include need for prioritisation</p> <p>o)No further action</p> <p>p)No further action</p> <p>q)Landscape removed from list of relevant SEA topics.</p> <p>r)No further action</p> <p>s)No further action</p> <p>t)Text added to in key issues table.</p> <p>u)Text added to high car usage issue.</p> |
|--|---|---|---|

|   |  |  |  |
|---|--|--|--|
|   | <p>v)Page 4-13, under the above headings, 2<sup>nd</sup> implications paragraph, 1<sup>st</sup> sentence- while creation of a 'valued landscape area' in Blaenau Gwent is clearly desirable, <u>existing landscape of good quality needs to be protected</u>, in conformity with the 'ancient woodlands' recommendation (following paragraph).</p> <p>w)Pages 4-14 and 4-15, under Limited Supply of Brownfield Land, Implications for the Plan, 1<sup>st</sup> sentence- CPRW has a strong preference for <u>integrating</u> sustainability issues into the 'three dimensions', not <u>balancing</u> the former against the latter.</p> <p>x)Pages 4-14 and 4-15, under Limited supply of brownfield land, 'landscape' should be included as a SEA topic.</p>   | <p>v)Agreed</p> <p>w)Agreed</p> <p>x)Agreed</p>  | <p>v)Text added to beginning of paragraph.</p> <p>w)Wording changed throughout the document.</p> <p>x)Topic added</p>  |
| 6. Do you agree with the proposed SA framework? Are objectives, targets and indicators suggested appropriate? |  |  |  |
|   | <p>a)It is to be hoped that definitive targets, to replace 'increase' and 'decrease', will emerge as the LDP stages are progressed and missing baseline data is established. A presented, the Table 5.1 report is too obviously an 'interim' statement.</p> <p>b)The '0%' targets or equivalent, are to be welcomed, though are arguably ambitious. The remark applies to:<br/> All targets under item 6<br/> 4<sup>th</sup>, 5<sup>th</sup>, 6<sup>th</sup>, 7<sup>th</sup> and 8<sup>th</sup> targets under item 9<br/> 8<sup>th</sup> and 9<sup>th</sup> targets under item 10<br/> 2<sup>nd</sup> target under item 11<br/> 2<sup>nd</sup> target under item 14<br/> 2<sup>nd</sup> target under item 15<br/> 2<sup>nd</sup> target under item 16<br/> 1<sup>st</sup> item under item 21<br/> Both targets under item 22<br/> Target under item 23</p> <p>c)Page 5-4, under item 4, Draft SA Objective, 2<sup>nd</sup> Potential Indicator- CPRW is not convinced that increased 'national retailer representation' in town centre will necessarily be beneficial in enhancing their vitality and viability. Chain outlets may well undercut prices charged by in local shopkeepers and, moreover, can add an unfortunate air of uniformity.</p> <p>d)Page 5-4, under item 7, 1<sup>st</sup> Potential Indicator- CPRW makes the assumption that the '20% Affordable Housing' figure is based upon assessed needs.</p> | <p>a)Agreed</p> <p>b)Noted</p> <p>c)National retailer representations are required to provide anchor stores, which will then encourage trips to the town centre from outlying areas. Independent stores can then be encouraged as they will enhance the retail offer and benefit from increased footfall.</p> <p>d)Noted</p> | <p>a)Targets will be changed as they are agreed during the development of the LDP</p> <p>b)No further action</p> <p>c)No further action</p> <p>d)No further action</p> |

|  |  |  |   |
|--|--|--|---|
|  | <p>e)Page 5-4, under item 9, 1<sup>st</sup> Potential Indicator- use of the expression ‘the elderly’ to describe senior citizens is looked upon with disfavour. The text should have stated: <u>residential homes for elderly people.</u></p> <p>f)Page 5-5 and 5-6, under item 10, 5<sup>th</sup> potential indicator- is it to be understood that ‘death rate’ is applicable to <u>all accidents, including those in the workplace?</u></p> <p>g)Page 5-5 and 5-6, under item 1-, 5<sup>th</sup> target- it is questionable as to whether the poor health estimate is an adequate match for the potential indicator.</p> <p>h)Page 5-7, under item 13, 2<sup>nd</sup> target- in the interests of sustainable living, and given that travel by private transport should be discouraged, it would certainly not be appropriate to more than <u>stabilise</u> car ownership. Ideally, it should be <u>reduced</u> during the lifetime of the LDP, though CPRW recognises that this would tend to be in conflict with the aim of improving conventional standards of living.</p> <p>i)Page 5-7, under item 13, 5<sup>th</sup> and 6<sup>th</sup> Targets- the commentary upon the bald ‘increased’ target is an interesting one (also page 5-8 under item 17, 4<sup>th</sup> and 5<sup>th</sup> targets).</p> <p>j)Page 5-7, under item 15, 4<sup>th</sup> potential indicator- the extent to which the only Blaenau Gwent Registered Historic Park and Garden (Bedwellty Park) needs to be improved is not mentioned in the report.</p> <p>k)Page 5-8, under item 17, 2<sup>nd</sup> target- <u>improvement of agricultural land</u>, where appropriate, ought to be a joint target.</p> <p>l)Page 5-, under item 17, 4<sup>th</sup> target- CPRW very strongly agrees that there should be <u>no greenfield land lost to development.</u></p> <p>m)Page 5-8, under item 17, SEA Topics- CPRW considers landscape to be relevant to conservation of soil resources.</p> <p>n)Page 5-8 and 5-9, under item 21, 1<sup>st</sup> potential indicator- the suggested <u>zero %</u> of ‘highly sensitive development approved in flood risk areas’ is applauded.</p> <p>o)Page 5-9, item 24, 4<sup>th</sup> SEA Topic- since ‘renewable energy schemes’ may involve the <u>development of wind turbines in scenic locations, possibly in large numbers, landscape</u> is clearly indicated additional SEA topic.</p> | <p>e)Agreed</p> <p>f)No. it refers to road traffic accidents only</p> <p>g)Comment noted</p> <p>h)Noted. The indicators seek to reduce car usage through providing alternative modes of transport. It is not appropriate to discourage car use in the absence of alternative modes or reducing the need to travel in the first instance.</p> <p>i)Noted</p> <p>j)Noted</p> <p>k)It is unclear as to what the target ought to be joined to</p> <p>l)Noted</p> <p>m)Agreed</p> <p>n)Noted</p> <p>o)Agreed Meeting 24<sup>th</sup> April 2008- BG is not a TAN 8 area and so will not be having large scale wind farms.</p> | <p>e)Text modified</p> <p>f)Indicator modified</p> <p>g)Target removed for SA Framework</p> <p>h)No further action</p> <p>i)No further action</p> <p>j)Indicator amended to cover designated registered parks and gardens of historic interest</p> <p>k)No further action</p> <p>l)Topic added</p> <p>m)No further action</p> <p>n)Topic added</p> <p>o)No further action</p> |

|  |         |  |   |  |
|--|---------|--|---|--|
| Dr Maggie Hill<br>Countryside<br>Council for<br>Wales  | General | <p>a)The link between the baseline data and policy review to the issues and through to the objectives is made clearer. Data gaps should be identified for those issues that may be felt to be significant, even in the absence of adequate data.</p> <p>b)There is no mention of the requirement for a Habitats Regulations Assessment in this document. Following the ruling from the European Court of Justice that stated that the UK has failed to adequately transpose the provision of Article 6(3) and (4) of the Habitat Directive into national legislation as regards the appropriate assessment requirement for land use plans (Case C-6/04- Commission v. United Kingdom, October 2005), LDPs are required to undergo a Habitats Regulation Assessment. The LDP Manual states that guidance will be provided in a revised TAN 5 and that the HRA should be integrated with the Sustainability Appraisal. We trust that your authority has considered this requirement and seek clarification on how your authority plans to take this forward, given that Natura 2000 sites partly within the Borough and in neighbouring authorities may be affected by the LDP.</p> <p>c)Water quantity and geodiversity should be included as themes within table 2.2</p> <p>d)While there is a good amount of data on Local Biodiversity Action Plan habitats and species in the appendices, this information has not been reflected within the summary paragraphs 3.31-3.35, nor within the issues table.</p> <p>e)There is reference to Local Development Frameworks on page 4-9. This is an error that should be corrected.</p> <p>f)Page 6-8. We welcome the discussion on the range of assessment techniques available and seek assurance that some of the modelling techniques will be used to help quantify some of the effects.</p> <p>g)Page A-47 The stated trends for biodiversity does not include mention of the Environment Strategy for Wales Action 32 which is to achieve favourable condition for all international, national and local designated sites by 2026. Resources are currently being allocated towards achieving this, for example through CCW's Special Sites project.</p> <p>h)Page A-47. The stated designated features for Usk Bat Sites SAC are incorrect. The ones listed are for Mynydd Llangatwg SAC. The correct features are European dry heaths, degraded raised bogs, blanket bog, calcareous rocky slopes, caves not open to the public, <i>Tilio-Acerion</i> forests and lesser horseshoe bats.</p> | <p>a)Noted</p> <p>b)Agreed.</p> <p>c)Noted</p> <p>d)Pertinent data has been added to baseline description as a result of comments from earlier consultees</p> <p>e)Agreed</p> <p>f)Noted. Unlikely that modelling techniques will be utilised given the nature of the LDP</p> <p>g)Agreed</p> <p>h)Agreed</p> | <p>a)Data gaps identified in report</p> <p>b)Documentation of the LDP and its potential Appropriate Assessment will be included in the SAR.</p> <p>c)Water quantity is covered in objective 23 in the SA Framework</p> <p>d)No further action</p> <p>e)Text modified</p> <p>f)No further action</p> <p>g)Added to baseline description and Text in appendix modified, SA Framework objective 14 target 1 changed accordingly.</p> <p>h)Text modified</p> |
| 1. Would your organisation like more active involvement than has been suggested within the report?   |         |  |   |  |
| CCW is a statutory consultee on the SEA of the LDP and as such we expect to be consulted on the environmental report when it is produced. However, it is unclear in the document on the level of involvement your authority would like from CCW during the preparation of the report. The Delivery Agreement published May 2007 states that CCW will also be part of the SA/SEA Working Group. We confirm that we are happy to be part of this group and attend future meeting as necessary. |         | Comment noted. Issue for BGCBC   | No further action   |  |
| 2. Have all relevant plans and programmes been consulted? If not, which ones should be included?   |         |  |   |  |

|   |   |                      |   |
|---|---|----------------------|---|
|   | <p>In addition to the list provided in table 2.1, we would recommend the following:</p> <ul style="list-style-type: none"> <li>▪ Environment Act 1995 (specifically section 62 about the role of public bodies and National Park duties)</li> <li>▪ Natural Environment and Rural Communities Act 2006 (section 40)</li> <li>▪ Interim Statement for the Couth East Wales Spatial Planning Group, Summer 2007.</li> <li>▪ UDPs and LDPs of neighbouring local authorities ie Torfaen, Caerphilly and Brecon Beacons National Park.</li> <li>▪ Scoping Report for Brecon Beacons National Park Management Plan, 2007</li> <li>▪ Catchment Abstraction Management Strategies</li> <li>▪ Catchment Flood Management Plan Scoping Report for the Eastern Valley 2007</li> <li>▪ Significant Water Management Issues for the Severn River Basing District, EA 2007</li> <li>▪ LANDMAP</li> <li>▪ Register of Landscape of Historic Interest in Wales (specifically area 16 and 52)</li> <li>▪ Natural Heritage- a pathway to health, CCW 2007</li> </ul> | <p>Comment noted</p> | <p>Documents will be considered as necessary in the Sustainability Appraisal Report</p> |
| <p>3. Are any significant environmental, social or economic data missing or misrepresented?</p> |   |                      |   |

|  |  |  |  |
|--|--|--|--|
|  | <p>We recommend that information is collected on the following relevant topics:</p> <p>a) Recreation within the county borough to link issues on levels of tourism, including access to green space (an potential links to health)</p> <p>b) Protected species (Section 74 CRoW Act and European Protected Species)</p> <p>c) Landscape has not been adequately covered within the baseline. There is no mention of LANDMAP nor Special Landscape Areas.</p> <p>d) The Brecon Beacons National Park</p> <p>e) Presence of agricultural land, forestry and woodland</p> <p>f) Geodiversity (RIGS and geological SSSI)</p> <p>g) Capacity of existing water infrastructure in terms of water supply and sewerage infrastructure and Housing need</p> <p>h) Wildlife crime eg illegal offroading or poaching of protected bird species.</p> <p>i) Paragraph 3.31. The two SACs are underpinned by SSSI in addition to those named in the following paragraph. Cwm Clydach SAC is underpinned by Cwm Clydach SSSI while Usk Bat Sites is underpinned by Mynydd Llangatwg SSSI, Siambre ddu SSSI, Buskland Coachhouse and Ice House SSSI and Fox Wood SSSI.</p> <p>j) Paragraph 3.34. The name of a SSSI is inaccurate. It should read Cwm Merdogg Woodlands SSSI and not Cwm Merdogg and Coed Ty'n Gelli SSSI.</p> <p>k) Figure 3.1 We recommend changing the colours representing SINCS and SACs as the current choices are very similar and make differentiation difficult.</p> <p>l) Paragraph 3.40. It would be useful to include the percentage of carbon dioxide emissions from transport in this</p> <p>m) Paragraph 3.49. There is no mention here of the Assembly Government's target to achieve 4TWh of electricity from renewable sources by 2010 nor of the One Wales commitment to reduce carbon dioxide emissions by 3% each year until 2011 in areas of developed competence.</p> | <p>a) Agreed</p> <p>b) BAP species already in report: sufficient</p> <p>c) Agreed</p> <p>d) Brecon Beacons not in plan area</p> <p>e) Agreed</p> <p>f) Geodiversity- Brynmawr Sections (geological site) SSSI is already included within the baseline.</p> <p>g) Agreed<br/>Water infrastructure not considered to be an issue at this time</p> <p>h) Noted<br/>Wildlife crime is not considered to be an issue in the county borough</p> <p>i) Noted</p> <p>j) Noted</p> <p>k) Issue for BGCBC</p> <p>l) Agreed</p> <p>m) Noted</p> | <p>a) Recreation assessment currently being developed- detail to be added as appropriate</p> <p>b) No further action required</p> <p>c) Data added to baseline and subsequent sections where necessary</p> <p>d) No further action necessary</p> <p>e) ALC data received and added to baseline.</p> <p>f) Further detail on geodiversity to be added to baseline. There are no RIGS in BG.</p> <p>g) Water Quantity data will be added where appropriate</p> <p>h) No further action required</p> <p>i) Text added</p> <p>j) Text reflects this adjustment.</p> <p>k) Map modified</p> <p>l) Transport energy consumption included within baseline description. CO2 emissions: data gap.</p> <p>m) Added to text</p> |
|--|--|--|--|

|   |   |   |
|---|---|---|
| <p>4. Are judgements made concerning future baseline correct?</p>   |   |   |
| <p>a)While we commend your authority on attempts to consider the data gaps and trends likely without a plan in this report, we have concerns about some of the judgements made in table 5.2 where there appears to be a lack of evidence to qualify statements. For example, draft objective 13 on increasing sustainable transport is suggested to be improving without the need for an LDP. However, within the baseline information, it is noted that car ownership and therefore use is likely to rise. Similarly we would question whether improvements are likely on such issues as soil conservation, greenhouse gas emissions and biodiversity.</p> | <p>a)Noted. With regards to sustainable transport, it was considered that, as stated, the increase in rail facilities may counter balance the effects of an increase in car ownership and use. Other judgements on improvements are qualified within the table.</p> | <p>a)Sustainable transport trend changed to 'stable' and improvement made to explanation.</p>   |
| <p>b)Paragraph 5.16 states that only one objective where the prediction is for some improvement. We believe that table 5.2 contradicts this statement.</p>  | <p>b)Agreed</p>   | <p>b)Text modified</p>  |
| <p>5. Are there any additional sustainability problems or opportunities in the Blaenau Gwent area that need to be considered in the development of the LDP?</p>   |   |   |
| <p>a)While we accept the issue of tourism within the county borough, there is no information in the baseline on this matter or on recreation per se. We recommend that data is gathered on this issue, as well as the potential for ecotourism, to provide for its significance.</p>  | <p>a)Agreed</p>   | <p>a)Tourism is now addressed in the SA scoping report</p>  |
| <p>b)Similarly, the lack of data on recreation has led to a gap in the issues covering levels of activity, access to green spaces and health. We recommend that this issue is covered.</p>  | <p>b)Agreed</p>   | <p>b)Heads of the Valleys Greenspace Provision Report September 2007 requested and received from BGCB. Data added to baseline. Text added to key issues/opportunities table. Indicator provided on access to green space.</p> |
| <p>c)The lack of energy efficient houses was mentioned as a key contributor to high domestic gas use in the baseline information but does not appear in the issues table. We recommend that it should be considered here, along with greenhouse gas emissions from commercial/ industrial properties.</p>   | <p>c)Agreed</p>   | <p>c)Added to key issues table</p>  |
| <p>d)Equally, there is no issue on the need to conserve landscape or water resources, which are two key environmental goods important to the area. We recommend that following baseline data review, inclusion of these issues is considered.</p>   | <p>d)Comment noted</p>  | <p>d)LANDMAP data to influence the key issues and baseline</p>  |
| <p>6. Do you agree with the proposed SA framework? Are objectives, targets and indicators suggested appropriate?</p>  |   |   |

|  |   |                                  |   |
|--|---|----------------------------------|---|
|  | <p>a)As previously expressed, we have some concerns about the linkages between the baseline data and the issues, leading to a lack of relevant objectives, such as on landscape.</p> <p>b)While we appreciate that work has gone into the derivation of indicators, the SEA Directive states that only significant effects need to be monitored. We therefore assume that there will be a shortened list of indicators within the environmental report once the assessment of alternatives has taken place. CCW will look to advise you on this list of indicators.</p> | <p>a)Agreed</p> <p>b)Agreed</p>  | <p>a)Integrity of document checked and modified where necessary</p> <p>b)Indicators rationalised to reflect potential significant effects</p> |
| Gwyn Smith<br>Sustrans   | 1. Would your organisation like more active involvement than has been suggested within the report?  |                                  |   |
|  | Yes. We would like to propose and promote the valleys cycle network (VCN) to ensure these proposals are part of the report. As well as the expertise SUSTRANS has in many other areas, such as Travel Smart (A scheme that can deliver up to 15% change in the way people travel)   | Noted                            | Sustrans to be consulted on further stages of the report  |
|  | 2. Have all relevant plans and programmes been consulted? If not, which ones should be included?  |                                  |   |
|  | No. Sustrans proposals for VCN  | Agreed                           | Added to PP review and sustainability themes table  |
|  | 3. Are any significant environmental, social or economic data missing or misrepresented?  |                                  |   |
|  | Yes. Length of cycle routes. This information should be in the draft ROWIP  | Agreed                           | Further detail added to baseline description  |
|  | 4. Are judgements made concerning future baseline correct?  |                                  |   |
|  | Yes   | No further action                | No further aciton   |
|  | 5. Are there any additional sustainability problems or opportunities in the Blaenau Gwent area that need to be considered in the development of the LDP?  |                                  |   |
|  | No  | No further action                | No further action   |
| 6. Do you agree with the proposed SA framework? Are objectives, targets and indicators suggested appropriate?  |   |                                  |   |
| No.<br>10. to promote health and well-being – add extra indicator percentage of population with 1kn of National Cycle Network (NCN)<br>13. Modal shift- add extra indicator as number of travel smart programmes | Agreed  | Indicators added to SA Framework |   |
| Mike Webb  | 1. Would your organisation like more active involvement than has been suggested within the report?  |                                  |   |

| <p>Blaenau Gwent is nationally important for breeding lapwings, a scarce and declining bird species in Wales. The RSPB is a strategic partner of Blaenau Gwent County Borough Council in respect of the authority's Lapwing Conservation Officer, who provides advice to landowners and developers as to how to incorporate habitat management for lapwings as part of the development process. We would therefore wish to be involved with plan formulation and SEA production in respect of any present or historic lapwing sites in the County Borough</p>  | <p>Noted.</p>  | <p>Data added to text</p>  |   |              |            |   |                                    |  |                        |              |   |  |  |   |  |  |  |  |  |
|--|--|--|---|--------------|------------|---|------------------------------------|--|------------------------|--------------|---|--|--|---|--|--|--|--|--|
| <p>2. Have all relevant plans and programmes been consulted? If not, which ones should be included?</p>  |  |  |   |              |            |   |                                    |  |                        |              |   |  |  |   |  |  |  |  |  |
| <p>Natural Environment and Rural Communities Act 2006, especially s40 and s42<br/>The RSPB suggests two new themes :-</p>  |  | <p>Agreed</p>  | <p>Data added to key sustainability themes and SA Framework, except Wales Spatial Plan addition as the SP is already included</p> |              |            |   |                                    |  |                        |              |   |  |  |   |  |  |  |  |  |

Would your organisation like more active involvement than has been suggested within the report?</p>  |  |  |   |                |                   |        |                                      |  |  |  |   |                |   |  |   |  |   |                |               |   |

|  |                                       |                             |
|--|---------------------------------------|-----------------------------|
| No- retain same level as existing.   | Agreed                                | No further action required. |
| 2. Have all relevant plans and programmes been consulted? If not, which ones should be included?   |                                       |                             |
| Yes  | Agreed                                | No further action required. |
| 3. Are any significant environmental, social or economic data missing or misrepresented?   |                                       |                             |
| Yes. Social enterprises- development of CF and community groups involvement.- consideration needed.  | Agreed. This is an issue for the LDP. | No further action required. |
| 4. Are judgements made concerning future baseline correct?   |                                       |                             |
| Yes  | Agreed                                | No further action required. |
| 5. Are there any additional sustainability problems or opportunities in the Blaenau Gwent area that need to be considered in the development of the LDP?   |                                       |                             |
| Yes. Partnership working with CF: opportunity to promote, engage etc within localised areas. Sustainability: CF development of communities and projects including social enterprises and ability to access additional funding to support overall developments. | Agreed. This is an issue for the LDP. | No further action required. |
| 6. Do you agree with the proposed SA framework? Are objectives, targets and indicators suggested appropriate?  |                                       |                             |
| Yes.   | Agreed                                | No further action required. |

# Appendix C Socio-Economic Baseline Data

## C.1 Economic Characteristics

### Incomes and Economic Activity

- C.1.1 77% of Blaenau Gwent is classified as rural.
- C.1.2 In terms of employment sectors, statistics indicate a tendency towards employment within the manufacturing sectors as representing a higher proportion of employment than the regional and national averages. The relative value of employment in this sector is reflected in wage levels, which are below regional averages: in 2006 the average gross weekly income for Blaenau Gwent was £346, compared to the regional average gross weekly income of £474.
- C.1.3 The number of people economically inactive in 2005/06 was 12,400 people. This equates to 30.4% of the workforce, which is significantly above the Welsh average of 24.9%.
- C.1.4 Between 2004 and 2007, the proportion of working age adults claiming Job Seekers Allowance has increased very slightly to 4.6%, but Incapacity Benefit claim and total Welfare Benefit claim percentages have continued to fall slowly to 17% and 29% respectively.

### Entrepreneurial Dynamism

- C.1.5 The key indicator used to assess economic enterprise is total VAT registrations – at the end of 2005 there were 940 businesses registered in Blaenau Gwent. During 2005 new registrations totalled 1.46 per 1000 population; however, in the previous year (2004), new registrations totalled 1.61 per 1000 population. Thus the percentage change between 2004 and 2005 was -9%. These statistics are broadly similar to the South East Wales region (-8%) and Wales (-9%) figures. In contrast, there were 80 deregistrations (1.2 per 1000 population) in Blaenau Gwent in 2005 (-9.6%) in comparison with -6.8% for Wales. A comparison at the regional level reveals that Blaenau Gwent has consistently experienced the second least number of new registrations over the past five years after Merthyr Tydfil and, in most recent years, registrations in Blaenau Gwent have been over 150 less than any other authority in the region (with the exception of Merthyr Tydfil, which is performing below Blaenau Gwent).

### Retail

- C.1.6 The central shopping areas in Blaenau Gwent are Abertillery, Blaina, Brynmawr, Ebbw Vale, and Tredegar. The towns are located within the deeply incised and roughly parallel valleys of the Sirhowy, Ebbw Fach and Ebbw Fawr rivers which flow in a north to south direction through the County Borough.
- C.1.7 Tredegar is located in the Sirhowy valley to the North of the County Borough; Ebbw Vale sits along the Ebbw Fach river in the next valley towards the East; and Brynmawr, Blaina and Abertillery are situated in the Ebbw Fawr valley, with Brynmawr in the extreme North of the Borough, Abertillery in the South, and Blaina between them.
- C.1.8 Out of centre retail parks have created negative impacts upon the vitality and viability of town centres in Blaenau Gwent. High vacancy rates currently exist within many of the town centres. However, the Council through mechanisms such as Commercial Improvement Grants and Town Centre Strategies are endeavouring to address this problem.

## Car Ownership Rates

- C.1.9 Blaenau Gwent experiences low car ownership rates, (35% of households with no car or van, compared to 26% in Wales) in conjunction with high levels of deprivation; meaning that accessibility to town centres may be difficult for some members of the community.

## C.2 Social Characteristics

### Housing

- C.2.1 In 2000, 83.4% of the housing in Blaenau Gwent was within council tax bands A and B, compared to the South East which had 22% in band A and 26% in band B. Furthermore, seven of the 16 electoral divisions in Blaenau Gwent had more than 90% of housing within these two bands and only 0.09% of housing in Blaenau Gwent was within council tax bands G and H compared to 4% for the South East. This suggests that the overall size and market value of housing stock in the County Borough is relatively modest, particularly in the regional context.
- C.2.2 The average house price in Blaenau Gwent in 2006 was £82,486 – this was nearly £50,000 less than the South East average, which was £131,462. Trend data indicates that the area has seen substantial increases in house prices in recent years, which is likely to be a reflection of the increase in house prices in Cardiff and Newport, encouraging people to buy further north. It is likely that this trend will continue with the new rail line and proportional increase in prices across Wales.
- C.2.3 In 2001, 55% of Blaenau Gwent's housing stock consisted of terraced properties built pre 1919. This may be a further reason for lower average house prices in the County Borough since a higher representation of smaller properties, i.e. terraces and flats, will skew the statistic downwards. In addition to this, 8% of private properties were considered unfit (1,740) and a further 12% were classified as being in need of substantial repair (2,610) in the latest survey.
- C.2.4 The total number of households in Blaenau Gwent was 29,586 in 2001. Average household sizes were above the national averages but below regional averages – 2.34 compared to 2.40 in the South East region and 1.87 in Wales.
- C.2.5 According to the 2001 census, a significant proportion of properties in Blaenau Gwent were owned outright (62.62%). However, this was significantly less than regional and national averages, which were 72.79% and 71.3% respectively. There was also a significant percentage of council housing rental (24.34%) compared to regional and national averages of 13.59% and 17.9% respectively.

### Population

- C.2.6 The population of Blaenau Gwent has been falling since its peak of 127,611 in 1921 - according to the 2005 mid year population estimate the total was 68,400. In the context of the County Borough, the population is projected to grow by 7% between 2003 and 2011, which would equate to a total population of approximately 73,725 by 2011. However, although the overall longer term trend suggests a likely net increase, in recent years (1999-2002) the population has experienced a decline of -4.63%, attributed to a combination of accelerated out-migration and falling birth rates. Over the same period in the South East region as a whole, population grew at a rate of 0.034% and the national population increased by 1.59% in the same period.

- C.2.7 An examination of population demographics indicates that Blaenau Gwent has a relatively ageing population in comparison to national averages, particularly notable for persons over 65 (16.89% compared to 16% for South East Wales, in 2001). In addition, the proportion of the population under the age of 16 is lower than the South East average.
- C.2.8 A continuation of these trends is likely to result in conditions which will be increasingly difficult to sustain, both socially and economically, with a smaller proportion of workers being required to support a higher proportion of elderly dependents. This trend also places additional pressure on services and decreases demand for school places, particularly in the primary sector.
- C.2.9 However, the new railway, relatively low house prices and economic growth generated through the Heads of the Valleys Strategic Programme could promote inwards migration from other areas in Wales/UK, as well as reduce the amount of outward migration, resulting in a larger and more balanced population. Planned improvements to post 16 educational opportunities through the Learning Campus on The Works site may also affect this.
- C.2.10 The population is still very homogenous, although numbers of Welsh speakers and demand for Welsh language education has increased, and there is a modest inward migration of workers from Eastern Europe and Iberia.

### Health and Well Being

- C.2.11 Life expectancies for both males and females across the County Borough are below national averages. Males have an average life expectancy of 73.8 years and females of 78.4 years – this compares to 75.8 for males and 80.3 for females nationally (2002 - 2004).
- C.2.12 The proportion of people with limiting long term illness is above the South East and national averages: 28.26% compared to 23.4% in the South East and 23.3% in Wales. In addition, people who self-assessed their general health as 'good' (2001 Census) represented a lower proportion of the population than the South East and national averages: 59.38% in Blaenau Gwent compared to 64.48% in the South East and 60.06% in Wales.

### Crime and Fear of Crime

- C.2.13 In general terms, Blaenau Gwent has relatively low levels of crime, totalling 2,978 crimes in 2004/05 (including violence against the person, burglary in a dwelling, theft of a motor vehicle and theft from a motor vehicle), falling to 2,731 crimes in 2005/06. Within this total, the majority of crime types appear to be falling in the area, including crimes related to violence, which represent the largest proportion of all recorded crimes in the County Borough. However, motor vehicle theft statistics appear to be higher and less stable than the regional average and theft from motor vehicles seems to be rising.

### Education, Skills and Qualifications

- C.2.14 Data relating to education, skills and qualifications in the area indicates a considerable disparity between Blaenau Gwent and the South East and Wales. In Blaenau Gwent the proportion of people holding NVQ level 2 in 2003 was 41.1% compared to 43.25% for the South East and 60% for Wales. Similarly, the proportion of people holding the higher level 4 qualification in 2003 was only 9.5% in Blaenau Gwent compared to 17.38% and 22.5% for the South East and Wales respectively.
- C.2.15 There is also a lower percentage of the population achieving a level 4/5 qualification (such as a degree, HNC, HND) with only 13.6% in Blaenau Gwent compared to the Welsh average of 17.4%. Blaenau Gwent had 4,360 adults engaged in adult education in 2003, which represented 6.3% of the total population; this was lower than the Welsh average of 6.8%. Latest statistics also show that there was a lower proportion of 19 year olds with 5 GCSE's

(A\*-C), with 43% achieving this compared to the Welsh average of 56%. These educational attainment statistics have implications for the manner in which the local economy will be able to expand and grow over the Plan period.

- C.2.16 In 2001, 45.02% of the Blaenau Gwent population held no qualifications, compared to 34.37% and 33% for the South East and Wales respectively. By 2003, this had considerably improved to approximately 13,000 persons, which represented 30.4% of the population at the time. Although this compares unfavourably to the Welsh average of 37.8% for the same year, the statistic does suggest that the trend is moving in a positive direction, with a substantial reduction in the proportion of the population with no qualifications.

## Recreation

- C.2.17 Research identified within the Healthy and Active Lifestyle in Wales document (2003) reports that only 28% of adults in Wales are active at the recommended levels for health. Furthermore, in excess of 50% of adults are considered overweight, with the prevalence of obesity approximately doubling over the last ten years.
- C.2.18 Blaenau Gwent Leisure Services offers a wealth of recreational facilities with excellent dual use Sports Centres at Abertillery, Ebbw Vale, Nantyglo and Tredegar, together with satellite facilities in Glyncoed and Brynmawr Athletics Track.
- C.2.19 Blaenau Gwent Sports Centres caters for all ages and abilities, with rugby, football and netball sessions as well as a wide range of classes from Aqua Aerobics, Parent and Toddler swimming sessions and Fit Ball Sessions.
- C.2.20 As well as the Blaenau Gwent Sports Centres, the borough also has the Abertillery Indoor Bowls Centre, Ebbw Vale Cricket School, Glyncoed Community Hall and the new Brynmawr Athletics track, which only opened in September 2006.
- C.2.21 Sports and Leisure activities include:
- Splash Programme over 100 youths participating holiday periods
  - Street League football currently being held at Glyncoed Sports Centre
  - Newly Established Disability Sport Forum
  - Volunteering opportunities through: Volunteering Counts, Dragon Sport, Millennium Volunteers. (Sport in Blaenau Gwent highly dependent upon volunteers.)

## C.3 Regeneration: 'The Works'

### Objectives of the Development

#### Economic

- C.3.1 The goal for the economic sustainability objectives is to maximise the economic benefit which can be delivered to local people and help achieve a sustainable economic future for Ebbw Vale and the wider Heads of the Valleys area. This will be achieved through the following objectives:
- To assist in creating a more dynamic and enterprising local economy through:

- economic diversity
- investment
- local procurement
- To maximise accessibility and employment for local people and wider Heads of the Valleys residents through:
  - providing appropriate employment
  - providing training and skills development

### **Social**

C.3.2 The aim of the social sustainability objectives is to improve the quality of life for local people through strengthening local communities, encouraging the participation of all residents and reaffirming the strong cultural identity of Ebbw Vale and the wider Heads of the Valleys area. This will be achieved through the following objectives:

- To strengthen the local community of Ebbw Vale and those of the wider Heads of the Valleys area through:
  - Strengthening community cohesion and relationships
  - Increasing the participation of the community
  - Strengthening local image and confidence
- To improve the quality of life for local people through:
  - Creating a healthy environment for all people to enjoy; to increase wellbeing
  - To increase access for all residents to open spaces/facilities and landscapes/greenscapes
- To increase social assets through investing in valuable social assets and key infrastructure such as housing.

### **Environmental**

C.3.3 The aim of the environmental sustainability objectives is to provide strong stewardship of the natural, built and historic environment for the benefit of this and future generations of residents and visitors to Ebbw Vale. This will be achieved through the following objectives:

- To create and implement a best practice Environmental Management System.
- To protect and enhance local biodiversity.
- To protect and enhance the local landscape.
- To enhance the local built environment through creating a high quality urban environment and through respecting the surrounding historic and archaeological environment and character.

## Resource Objectives

C.3.4 The aim of the resource objectives is to reduce the ecological footprint of Ebbw Vale through implementing ambitious initiatives aimed at encouraging more sustainable use of resources, lowering emissions levels and promoting recycling. This will be achieved through the following objectives:

- To promote more efficient energy use and reduce emissions through:
  - Establishing an ambitious target for development
  - Increasing access to public transport for residents and visitors
- To protect water resources through reducing potential risks to water quality, prevent flooding impacts and utilising SUDS.
- To restore local land resources through remediating and developing brownfield land.
- To reduce materials use and minimise waste production through:
  - Building in a green procurement code for the contractor/developer
  - Encouraging greater reduction, reuse and recycling of materials
  - Building in green travel plans for construction

# Appendix D Environmental Baseline Data

## D.1 Biodiversity, Flora and Fauna

D.1.1 Draft TAN5 defines biodiversity and geodiversity and their importance for sustainable development in the following way:

*“Biodiversity” is the term applied to the variety of life on earth and is short for biological diversity. It describes the richness and variety of all living things, from the smallest microscopic organism to the largest tree. “Geodiversity” is the variety of geological environments, phenomena and active processes that make landscapes, rocks, minerals, fossils, soils and other superficial deposits that provide the framework for life on earth... Wildlife and its habitats are of fundamental importance to our future well-being and prosperity because a rich and diverse environment supports a long-term sustainable economy and contributes to a healthier and happier society. Biodiversity is an important indicator of sustainable development. Biodiversity and geodiversity add to the quality of life and local distinctiveness.’*

D.1.2 There are two Special Areas of Conservation (SAC) that fall partly within the Blaenau Gwent area: Usk Bat Sites and Cwm Clydach Woodlands, each designated under the EC Habitats and Species Directives. Usk Bat Sites is one of the best areas in the United Kingdom for the lesser horseshoe bat. Usk Bat sites SAC is also referred to as Mynydd Llangattock SSSI. Some features of both SAC sites are found to be in favourable condition, whilst others are in an unfavourable condition.

D.1.3 Cwm Clydach SAC is underpinned by Cwm Clydach Sites of Special Scientific Interest (SSSI) while Usk Bat Sites is underpinned by Mynydd Llangatwg SSSI, Siambre ddu SSSI, Buskland Coachhouse and Ice House SSSI and Fox Wood SSSI.

D.1.4 There are also three SSSI in the area:

- Cwm Merddog Woodlands,
- Brynmawr Sections (geological site) and
- Mynydd Llangatwg (Mynydd Llangattock).

D.1.5 The Cwm Merddog Woodlands site is in an unfavourable but recovering condition, Brynmawr Sections’ condition is unfavourable maintained and the condition of Mynydd Llangatwg is partially favourable and partially unfavourable for different features.

D.1.6 Cwm Clydach is designated as a National Nature Reserve (NNR). It is the largest and most representative area of native beechwood in South East Wales. Blaenau Gwent has one Local Nature Reserve (LNR) - the Silent Valley LNR, which includes Cwm Merddog and Coed Ty’n y Gelli SSSIs and covers a total area of 51.62 ha. The parts of the LNR that include SSSIs have been designated as such as a result of the presence of Ancient Semi-Natural Woodland. The Silent Valley is designated as a Wildlife Trust Reserve (WTR).

D.1.7 The designation of LNRs is in accordance with targets in the community plan and that the Authority aims to designate 2 per year pending resources. Ten candidate LNRs have been currently defined for the County Borough area:

- Beaufort Hills;
- Parc Nant-y-Waun;
- Sirhowy Hill Woodland and Cardiff Pond;

- Six Bells Colliery Site;
- Garden City;
- Roseheyworth Community Woodlands;
- Trevor Rowson Heritage Park;
- Cwmcelyn Pond;
- Cwmtillery Lakes;
- and Parc Bryn Bach.

D.1.8 Part of the Brecon Beacons National Park falls within the northern part of the Blaenau Gwent administrative area, and includes Brynmawr Sections and Mynydd Llangattock (Usk Bat) SSSIs and Cwm Clydach NNR.

D.1.9 There are 14 Ancient Semi-Natural Woodland (ASNW) sites and three Plantations on Ancient Woodland Sites (PAWS). The total number of SINCs is unknown. The first tranche of designations will include 62 SINCs. All sites identified qualify against scientific guidelines 'Guidelines for the selection of wildlife sites in South Wales' (August 2004) and it is anticipated will be taken through to Committee in late 2008. Subsequent tranches are planned, but it is unclear how many SINCs these will contain. Figure 3.1 maps all the sites of ecological importance in the Blaenau Gwent area and Figure 3.2 shows the Forestry Commission land management area and its 'Semi-naturalness score'.

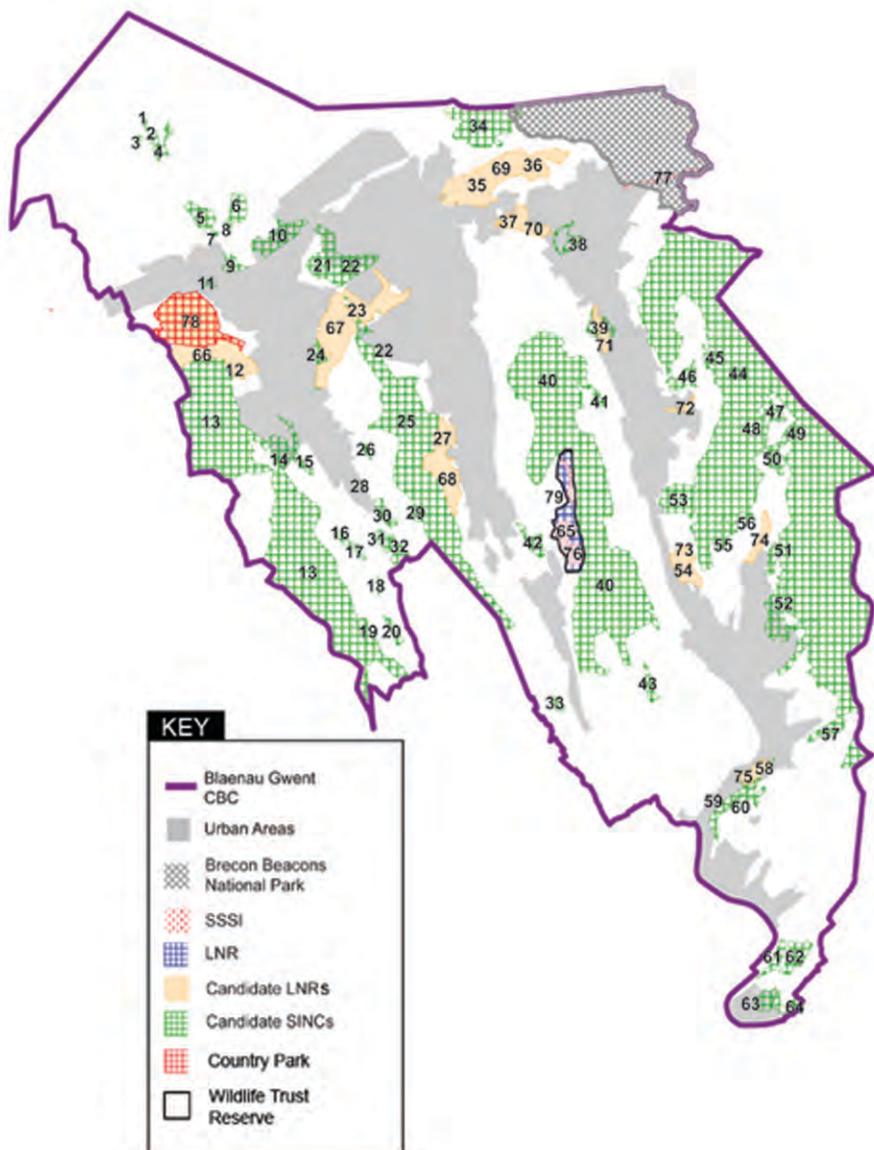

D.1.10 Blaenau Gwent is nationally important for breeding lapwings, a scarce and declining bird species in Wales.

D.1.11 The Blaenau Gwent Local Biodiversity Action Plan contains key habitat and species as well as protected species. Species and habitats for which action plans have been prepared include:

**Table D.1 - Blaenau Gwent BAP Species and Habitats Action Plans**

| Group                       | Species  |
|-----------------------------|--|
| <a href="#">Amphibians</a>  | <a href="#">Great Crested Newt (<i>Triturus cristatus</i>)</a>   |
| <a href="#">Birds</a>       | <a href="#">Skylark (<i>Alauda arvensis</i>)</a> ; Grey Partridge ( <i>Perdix perdix</i> ); Lapwing ( <i>Vanellus vanellus</i> ) |
| <a href="#">Birds</a>       | <a href="#">Grey Partridge (<i>Perdix perdix</i>)</a>  |
| <a href="#">Butterflies</a> | <a href="#">Pearl-bordered Fritillary (<i>Boloria euphrosyne</i>)</a>  |
| <a href="#">Mammals</a>     | <a href="#">Brown Hare (<i>Lepus europaeus</i>)</a>  |
| <a href="#">Mammals</a>     | <a href="#">Otter (<i>Lutra lutra</i>)</a>   |
| <a href="#">Mammals</a>     | <a href="#">Pipistrelle Bat (<i>Pipistrellus pipistrellus</i>)</a>   |

| Group                             | Species  |
|-----------------------------------|--|
| <a href="#">Mammals</a>           | <a href="#">Lesser Horseshoe Bat (<i>Rhinolophus hipposideros</i>)</a> |
| <a href="#">Broad Habitats</a>    | <a href="#">Calcareous grassland</a>                                   |
| <a href="#">Broad Habitats</a>    | <a href="#">Dwarf shrub heath</a>                                      |
| <a href="#">Priority Habitats</a> | <a href="#">Blanket bog</a>  |
| <a href="#">Priority Habitats</a> | <a href="#">Mesotrophic lakes</a>                                      |
| <a href="#">Priority Habitats</a> | <a href="#">Purple moor grass and rush pastures</a>                    |
| <a href="#">Priority Habitats</a> | <a href="#">Upland mixed ashwoods</a>                                  |
| <a href="#">Priority Habitats</a> | <a href="#">Upland oakwood</a>   |
| <a href="#">Priority Habitats</a> | <a href="#">Wet woodland</a>   |

#### Candidate SINC

1. North Pen-y-Lan Grassland
2. South Pen-y-Lan Grassland
3. Pine Tree House Grassland
4. Trefil Village Grassland
5. Shon Sheffrey's Reservoir Banks
6. Milgatu Farm Grassland
7. Fairview Field
8. Garnddu Meadow
9. Nine Arches Grassland
10. Horgan Fields Grassland
11. Bryn Bach School
12. Tredegar Patch Grassland
13. Mynydd Bedwellte
14. Sheepfold Grasslands
15. Tredegar Leisure Centre Grasslands
16. Highlands Grasslands
17. Bedwellty Pits Field
18. Lower Farm Field
19. Darren Odu
20. Chapel House Field
21. Bryn Serth
22. Maun -y-Pound
23. Sirhowy Hill Woodlands & Cardiff Pond
24. Industrial Sites Grassland
25. Mynydd Manmoel
26. St James' Reservoir
27. Garden City
28. The Ducky and Small Ducky
29. Upper Troedrhiwgwair Grasslands
30. Lower Troedrhiwgwair Grassland
31. The Fountain Inn Meadows
32. South of Troedrhiwgwair
33. East of Penrhiwgungi
34. Garnlydan
35. Beaufort Hill Ponds and Woodlands
36. Bryn Farm
37. Parc Nant y Maun
38. Semtex Pond
39. Coalbrookvale
40. Mynydd Carn y Cefn
41. Coed Trostre
42. Carn Carn Isaf
43. Cwm Big North
44. Mulfran, Mynydd Coity, Mynydd James & Gwasted
45. Cwmcelyn West
46. Cwmcelyn East
47. Blaentillery Farm North
48. West of Blaentillery Farm
49. Blaentillery Farm South
50. North of Hendre

51. East of Gwastod Farm
52. Greenmeadow Farm
53. Bourneville Slip
54. Roseheyworth Community Woodlands
55. Llanerch Padarn West
56. Llanerch Padarn East
57. Coed y Gilfach
58. Six Bells
59. Coed Argoed
60. Coedcae Coch
61. Craig Suffryd
62. Suffryd Fach
63. Cefn Bach
64. Suffryd Wood

#### Local Nature Reserve

65. Silent Valley

#### Candidate Local Nature Reserves

66. Parc Bryn Bach
67. Sirhowy Woodlands
68. Garden City
69. Beaufort Hills
70. Parc Nant-y-Maun
71. Trevor Rowson Heritage Site
72. Cwmcelyn Pond
73. Roseheyworth Community Woodlands
74. Cwmtilery Lakes
75. Six Bells Colliery Site

#### SSSI

76. Cwm Merddog Woodlands
77. Brynmaur Sections

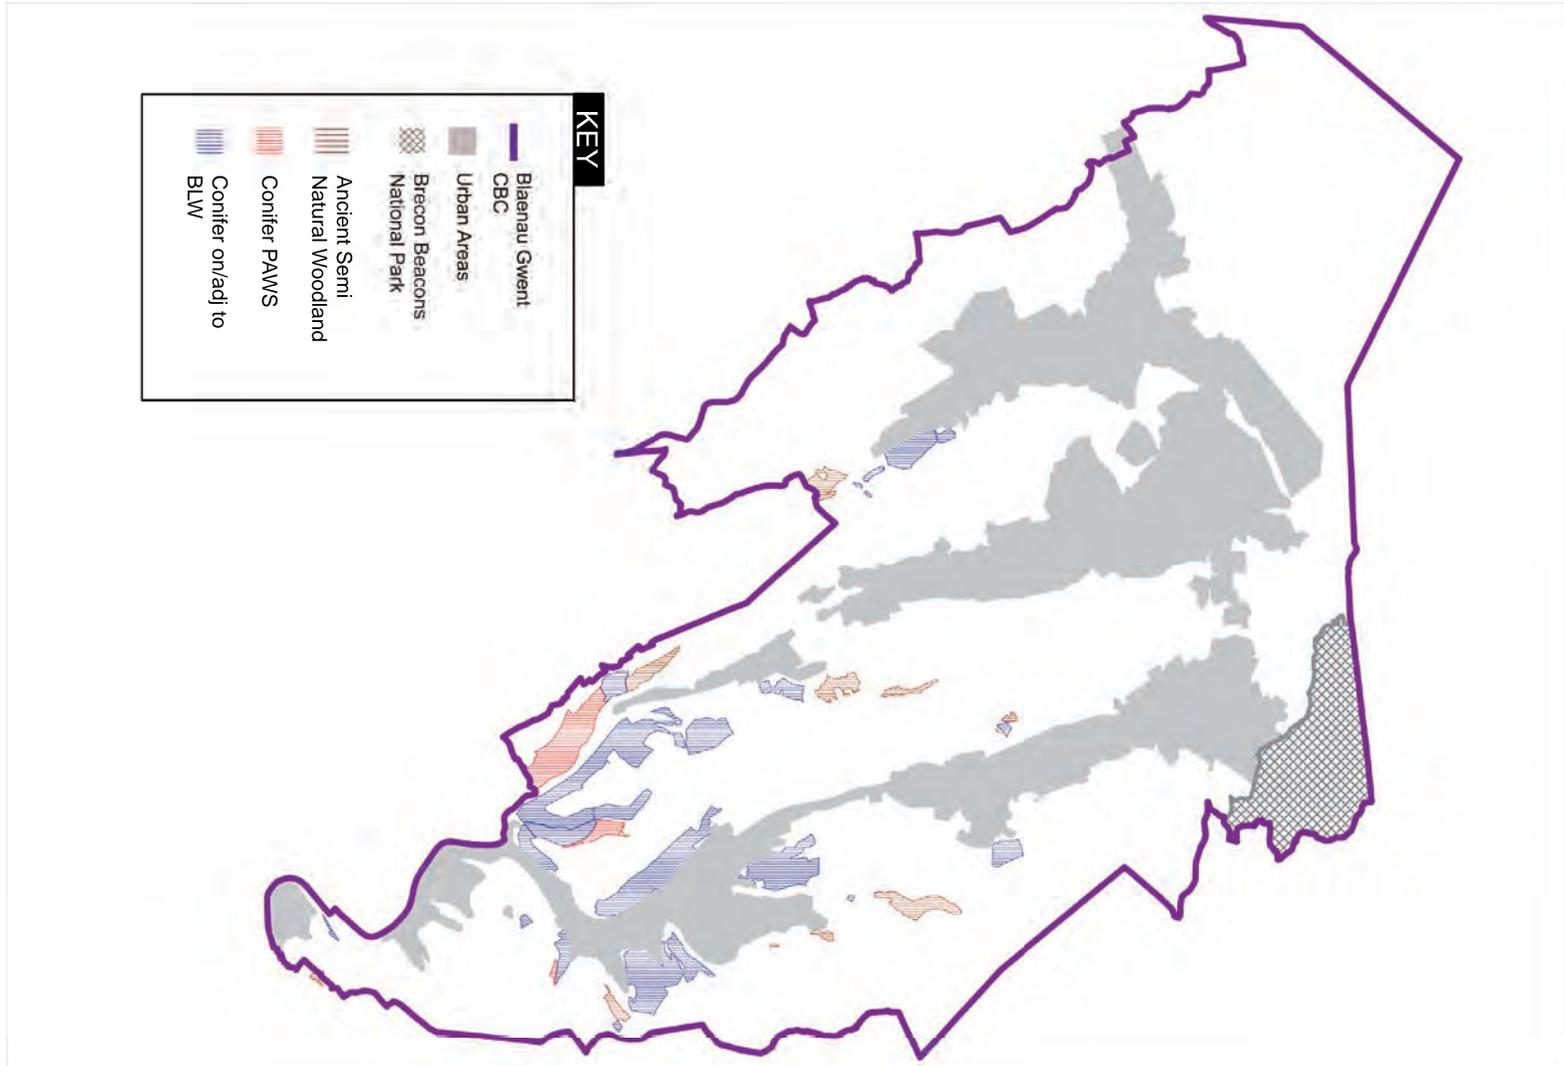

#### Country Park

78. Parc Bryn Bach

#### Wildlife Trust Reserve

79. Silent Valley

Figure D.1.2 – Woodland

## D.2 Cultural Heritage

- D.2.1 Blaenau Gwent has 53 listed buildings, recognised for their special historical and architectural importance. The majority are Grade II listed, although of the total, ten fall into the higher category of Grade II\*. However, there are also a number of listed buildings in the County Borough that appear on Cadw's register of listed buildings 'at risk', namely:
- British Steel Tinsplate Works General Office
  - Former Boiler House at Dunlop Semtex Factory
  - Ebbw Vale Adult Education Centre
  - Stables and Barn at the Fountain Inn
  - The Fountain Inn
  - Milgatw - Agricultural Range at Milgatw
  - Mount Pleasant Stores
  - Roundhouse at Roundhouse Farm (1863 AA SW)
  - Roundhouse at Roundhouse Farm (17086 AB NE)
  - Agricultural Range at Roundhouse Farm
  - Former Tredegar Company Shop
- D.2.2 Currently there is one conservation area in Blaenau Gwent, Bedwellty House and Park. Additional conservation area designations under review include:
- Garden City;
  - Ebbw Vale;
  - St. Michael's Church area in Abertillery;
  - St. Illtyds Church area in Brynithel;
  - Castle Street and the Circle, Tredegar.
- D.2.3 The South East Wales region, which comprises 10 Local Authority Areas, contains approximately 56 Registered Historic Parks and Gardens. Of these, only one falls within the boundary of Blaenau Gwent – the Bedwellty Park (also designated as a conservation area). This site is included in Cadw's 'Register of Parks and Gardens of Special Historic Interest in Wales'. Blaenau Gwent also has 9 Scheduled Ancient Monuments (SAMs), which are: -

- St Illtyd Castle Mound;
- Incline Haulage Winding Engine,
- Mynydd Bedwellty;
- Sirhowy Ironworks;
- Marine Colliery Pumping Engine;
- Clydach Railroad Bridge, Brynmawr;
- Clydach Coal Levels;
- Tredegar Ironworks
- Cholera Cemetery;
- Y Domen Fawr Round Cairn; and
- Trefil Quarries North

### **Air Quality and Greenhouse Gas Emissions**

- D.2.4 There are currently no designated Air Quality Management Areas (AQMAs) within the Blaenau Gwent area. However, at the regional level there are AQMAs in place in Cardiff and Newport as a result of significant traffic flows and peak hour congestion.
- D.2.5 Data relating to estimated carbon dioxide emissions in 2004 indicate that the County Borough had slightly higher Industrial/Commercial and Domestic emissions in terms of proportions of total emissions than the average proportional breakdowns for the South East Wales authorities. However, as a percentage of the overall regional emissions total, Blaenau Gwent was contributing very little - only 3.5% of Industrial/Commercial and 4% of Domestic emissions in the South East region actually originate from Blaenau Gwent. When emissions are cross-referenced per capita, Blaenau Gwent compares favourably against the South East Wales average, producing 6.5 tonnes per capita as opposed to 9.8 tonnes per capita.

### **Water and Flood Risk**

- D.2.6 The main water courses in Blaenau Gwent are the rivers Ebbw Fach, Ebbw Fawr and Sirhowy.
- D.2.7 From 1999 to 2005 the following trends for chemical and biological quality were observed at the sites monitored by the Environment Agency:
- Ebbw Fach (Afon Tyleri - Trib.Henwaun Coll.) - remained 'B' (Good) chemical classification in the period 1999-2005. Biological water quality deteriorated from 'B' (Good) in 2000 to 'C' (Fairly good) in 2003-2004.
  - Ebbw Fach (Conf.Trib.Henwaun Coll-Conf.Nant Ystruth) - remained 'B' (Good) chemical classification in the period 1999-2005. Biological water quality deteriorated from 'B' (Good) in 2000 to 'C' (Fairly good) in 2004.

- Ebbw Fach (Ebbw Fawr Conf. - Afon Tyleri) – had a chemical classification of ‘B’ (Good) in 1999-2003, which improved to ‘A’ (Very good) in 2003-2005. Biological water quality was classified as ‘D’ (Fair) in 2000. Biological water quality of the site was not assessed in other years.
  - Ebbw Fawr (Conf.Ebbw Fach - Conf.Nant Big) – chemical water quality improved from ‘B’ (Good) in 1999-2003 to ‘A’ (Very good) in 2003-2005. Biological water quality was classified as ‘B’ (Good) in 2000 deteriorating to ‘C’ (Fairly good) in 2004.
  - Ebbw Fawr (Conf.Nant Big - Conf.Nant Merddog) – chemical water quality remained at ‘B’ (Good) level in 1999-2003 and then improved to ‘A’ (Very good) in 2003-2005. Biological water quality was assessed as B (Good) in 2000 deteriorating to ‘C’ (Fairly good) in 2004.
  - Ebbw Fawr (Conf.Nant Kendon - Glandwr Bk.) – chemical water quality was classified as ‘B’ (Good) throughout the years 1999-2003 improving to ‘A’ (Very Good) in 2003-2005. Biological water quality remained C (Fairly good) classification in 2000-2003.
  - Ebbw Fawr (Conf.Nant Merddog - Culvert Inlet) – chemical water quality was classified as ‘C’ (Fairly good) in 1999-2001 deteriorating to ‘E’ (Poor) in 2001-2003 and slightly improving to ‘D’ (Fair) in 2003-2005. Biological water quality remained stable at ‘C’ (Fairly good) level in 2000-2004.
  - Ebbw Fawr (Culvert Inlet - Rassau Bk.) – chemical water quality was ‘B’ (Good) in 1999-2001 deteriorating to C (Fairly good) in 2001-03 and improving to ‘B’ (Good) in 2003-2005. Biological water quality was at D (Fair) level in 2000 and improved to C (Fairly good) in 2002-2003.
  - Ebbw Fawr ( Glandwr Bk. - Conf.Ebbw Fach) – chemical water quality was ‘A’ (Very good) in 2005. Biological water quality on this site remained fairly good in 2000-2005.
  - Sirhowy (Nant Melyn - Outlet Shon-Shefris Res. – chemical water quality remained at B (Good) level throughout 1999-2003 improving to ‘A’ (Very good) in 2003/2005. Biological water quality was ‘C’ (Fairly good) in 2000 improving to B (Good) in 2002 and subsequently declining back to ‘C’ (Fairly good) in 2005.
  - Sirhowy ( Nant Yr Helyg - Scotch Peter Trib. – chemical water quality remained at B (Good) level throughout 1999-2003 improving to ‘A’ (Very good) in 2003-2005. Biological water quality was C (Fairly good) in 2000 improving to ‘B’ (Good) in 2002 and then deteriorating back to ‘C’ (Fairly good) in 2005.
  - Sirhowy (Scotch Peter Trib.-Nant Melyn) – chemical water quality was ‘E’ (Poor) in 2003-2005 – a decline from ‘C’ (Fairly good) in 2001-2003 and D (Fair) in 1999-2001. Biological water quality was assessed as ‘E’ (Poor) in 2000 improving to ‘C’ (Fairly good) in 2002 but then deteriorating to ‘D’ (Fair) in 2005.
- D.2.8 Aggregate data for England and Wales for the same period indicate that there was a slight improvement in water quality: an increase from 91.9% (1999) of Good/Fair grades to 93.5% (2005) for chemical water quality and from 94.9% (2000) to 95.4% (2005) for biological water quality.
- D.2.9 Water service provision in Blaenau Gwent is the responsibility of Welsh Water/Dwr Cymru. Wales has a relatively high rainfall compared to the rest of the UK, with an average of 1400mm per year compared to 700mm in the south east of England. Companies in Wales are predicting increases in household demand for water over coming years, not just because of rising numbers of households but also because of greater individual consumption. Only 5% of households in Blaenau Gwent have a metered water supply.

- D.2.10 TAN15 Development and Flood Risk (July 2004) is the appropriate framework for guiding planning decisions with respect to flood risk. The policy refers to the Welsh Assembly Government's (WAG) Development Advice Maps (DAM), which are based on Environment Agency Wales' flood outlines. In Blaenau Gwent there are zones of both defended and undefended floodplain (C1 and C2 respectively). The DAM maps should be used as a trigger for guiding development away from areas of flood risk.
- D.2.11 Flood defences are only present in one location – to the north west of Cwm. These form part of a network of defences for the rivers Ebbw, Llwyd and Sirhowy. They are designed to be effective for a 1 in 100 year flood event and, to date, have performed acceptably.

**Figure D.2.1 - Flood Risk Map for Blaenau Gwent**

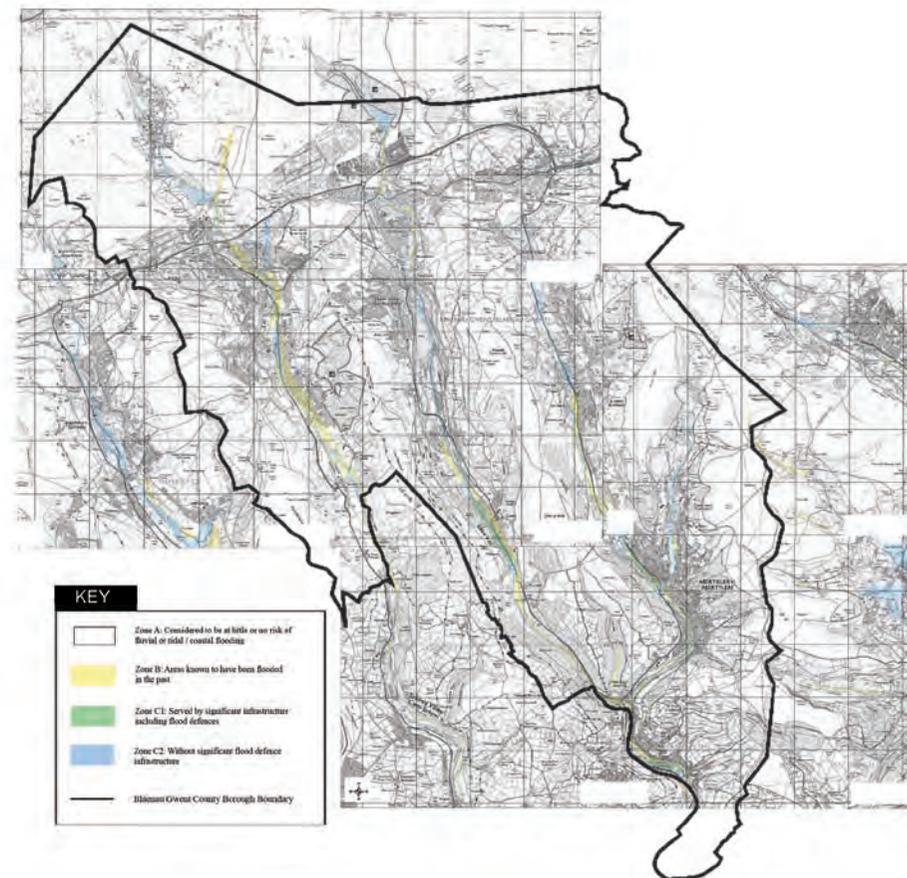

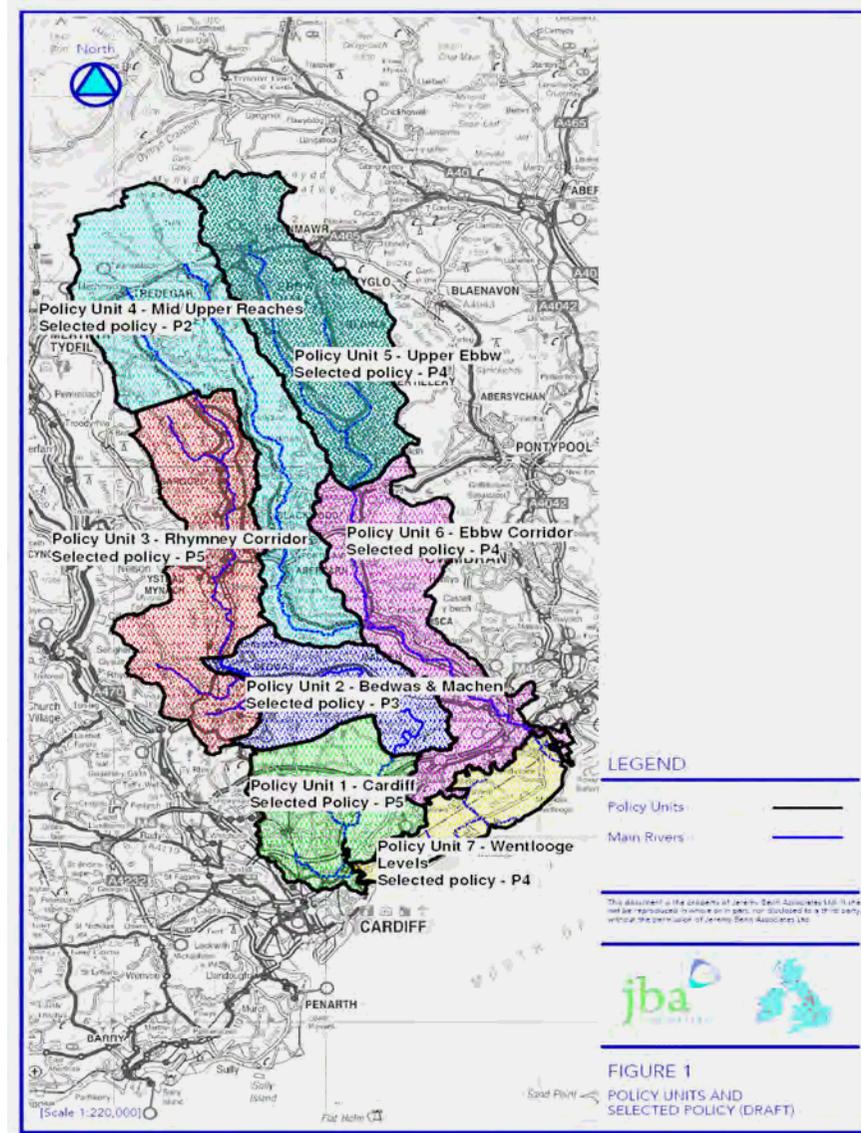

Figure D.2.2 Eastern Valleys Catchment Flood Management Plan April 2008

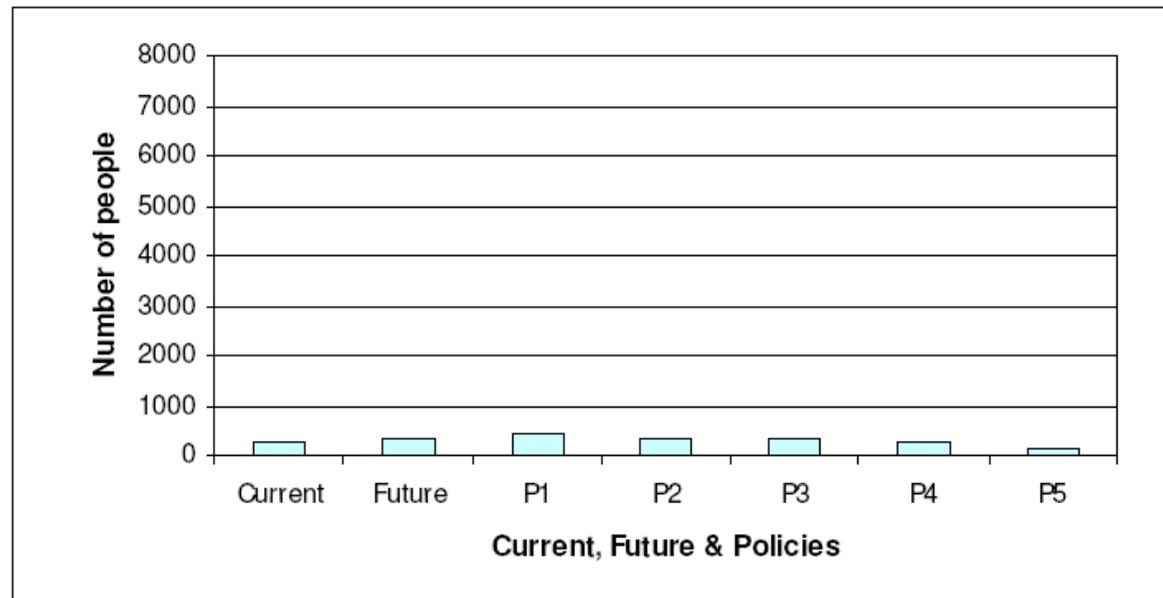

D.2.12 Draft policies for the plan area from the CFMP are:

- Upper and Mid Reaches: Reduce existing flood risk management actions (accepting that flood risk will increase with time).
- Upper Ebbw: Take further action to sustain the current scale of flood risk into the future (responding to the potential increases in flood risk from urban development, land use change and climate change).

D.2.13 The figures below demonstrate how flood risk in the area is low:

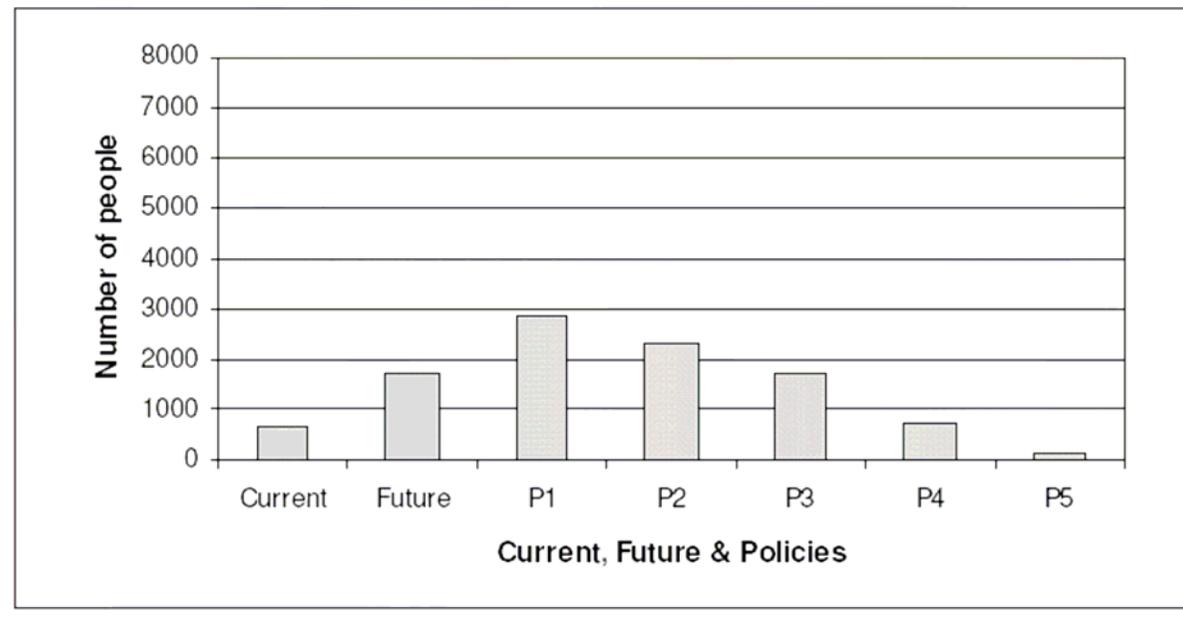

Figure D.2.3 - Total number of people at flood risk for all policy units and policies: Upper and Mid Reaches

- Policy selected for the Upper and Mid Reaches.
- Policy Unit 4: Main Flood Risk (Fluvial); No main areas).
- Reduce existing actions.
- The current level of flood risk is low in comparison to other areas of the Eastern Valleys.
- The future level of flood risk is low in comparison to other areas of the Eastern Valleys.

- Some areas within the policy unit may warrant a reduction in current flood risk management activities and maintenance, particularly in rural areas.
- There is little harm to life, community disruption and economic damages both now and into the future.
- Increasing the current flood risk management actions brings little reduction in flood risk in this policy unit.

Figure D.2.4 - Total number of people at flood risk for all policy units and policies: Upper Ebbw

#### Policy Unit 5: Upper Ebbw

- Main Flood Risk (Fluvial); Main Areas (Abertillery, Cwm and Ebbw Vale)

#### Policy 4 – Take further action to sustain current risk

- The future levels of fluvial flood risk are unacceptable and the risks present severe consequences for harm to life.
- Risks for extreme fluvial events (0.1% AEP) are unacceptable.
- There are a significant number of properties in the future that will be at flood risk, including numerous residential properties, and critical community assets.
- The existing flood defences should be raised in Cwm, Abertillery and Llanhilleth.

- The current level of maintenance should be continued or improved as to help improve conveyance, reducing the impacts of flooding and maintaining water levels.
- The current level of risk is acceptable in this policy unit, reducing damages to this level is economically justifiable.

Water Availability (source: water resources for the future: EA)

D.2.14 Figures 3.4 demonstrates that Blaenau Gwent has no additional water available for abstraction during the summer, but has an excess supply in the winter.

**Table D.2- Surface Water Availability**

1. Summer Surface Water

2. Winter Surface Water

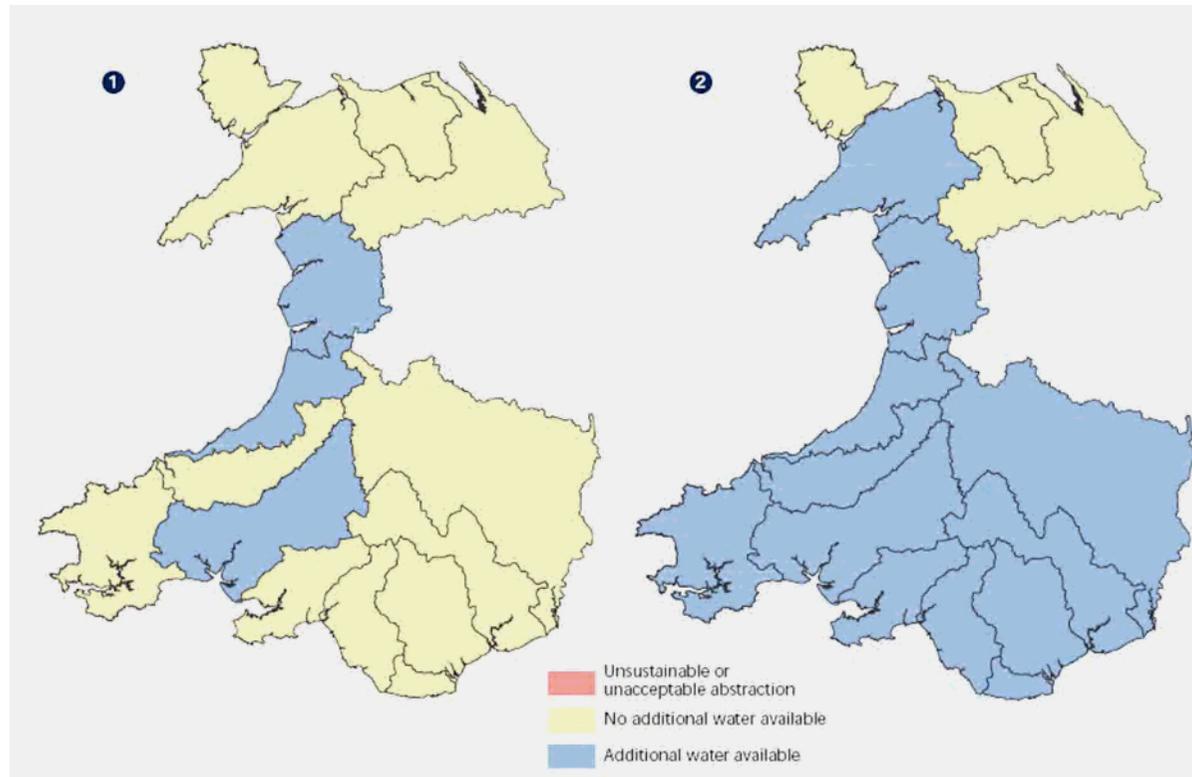

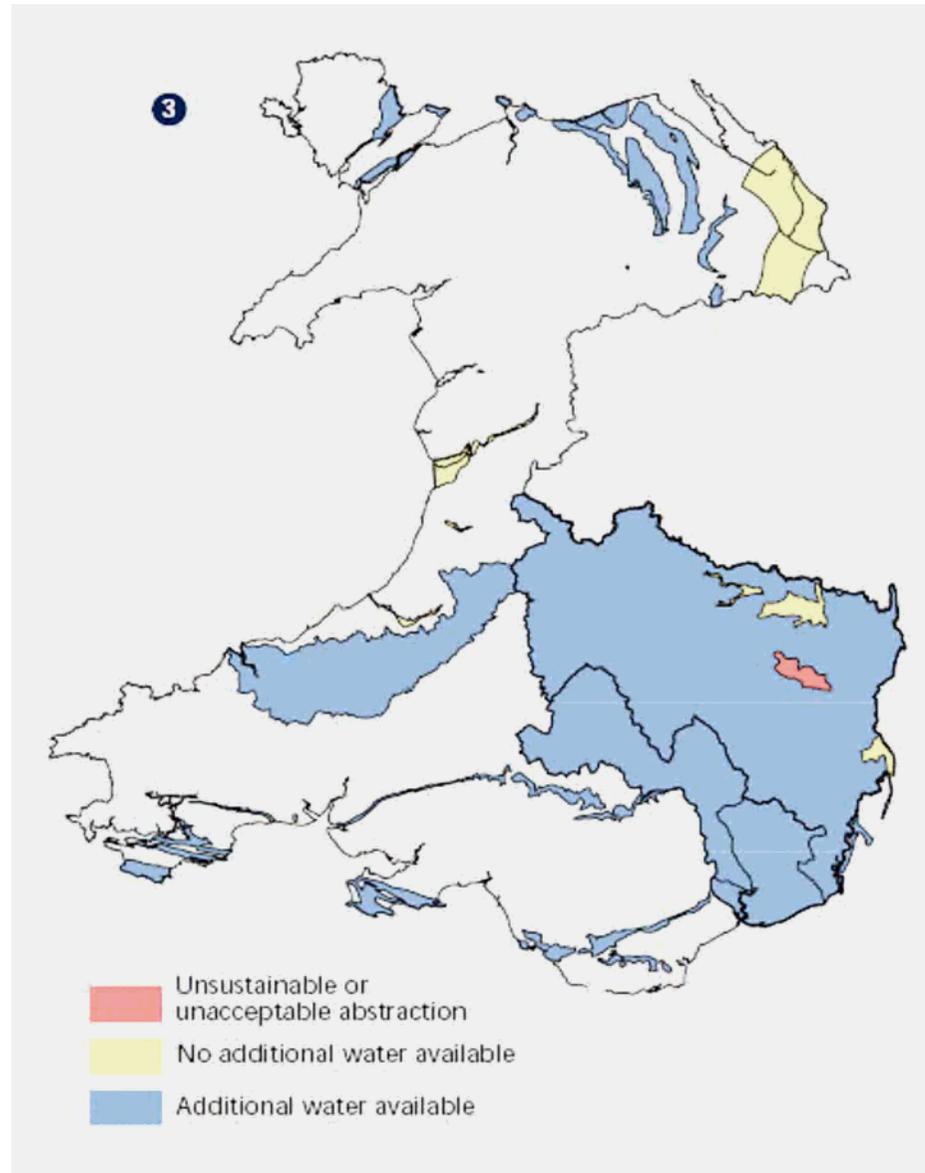

Figure D.2.5 – Groundwater Availability

## D.3 Waste

D.3.1 In 2004/05, the total municipal waste arisings in Blaenau Gwent were 54,853 tonnes, of which 22.5% was recycled or composted. The total household waste arisings were 44,578 tonnes. The majority of waste originates from industrial and commercial sources (not including special waste) – in 2003 waste from these sources totalled 56,971 tonnes, of which 17,422 tonnes went to landfill (31%). In order for Blaenau Gwent to meet the national maximum landfill 2009/10 target of 37,525 tonnes for the County Borough, based on predicted arisings of 53,883 tonnes for the County Borough, 16,358 tonnes will need to be diverted from landfill. This will require significant alterations to current waste production and management practices in the County Borough.

## D.4 Energy

- D.4.1 Expressed as a percentage of industrial and commercial energy consumption in the South East Wales region, Blaenau Gwent contributed 4.6% in 2003. The same percentage in respect of domestic energy consumption was 6.4%, with the statistic for transport based energy consumption being just 1%. It should be noted, however, that the relatively low proportional contribution may, in part at least, be explained by the fact that the South East Wales region includes the capital and second cities of Wales, together with the busiest section of the principal east-west road corridor (the M4 motorway from the Severn bridge to J32), which together make a significantly greater contribution to the regional totals.
- D.4.2 Figures on national, regional and local gas consumption (Kwh) indicate that Blaenau Gwent uses a higher share of gas domestically when compared to the regional averages, but less industrially than neighbouring authorities. This may potentially be a reflection of Blaenau Gwent's housing conditions - there is a considerable amount of older housing stock in the Local Authority Area that, due to its age, may be less energy efficient and this will be combined with the fact that the altitude results in a relatively cooler climate than neighbouring authorities.
- D.4.3 There is no specific data relating to electricity generated from renewable sources within the Blaenau Gwent area alone. However, in 2003 it was estimated that 2.6% of electricity in Wales was generated from renewables, representing a slight increase from 2.44% in 2002. The UK has set a target of producing 10% of electricity from renewable sources by 2010.

## D.5 Landscape, Land Use and Soil

- D.5.1 The main features of Blaenau Gwent are the deeply incised valleys of the Sirhowy, Ebbw Fach and Ebbw Fawr rivers, which flow in a southerly direction from the relatively high moorland plateau running across the northern extremity in an east to west direction. Much of the natural vegetation has been removed because of the industrialisation of the area.
- D.5.2 The largest land use designation in the County Borough is open countryside (45%) and the defined urban area is only 23%. The remainder comprises a combination of other designations including rural settlements and forestry.
- D.5.3 Blaenau Gwent has a history of potentially contaminating land uses that may have introduced soil contamination to the area. The 2003 Contaminated Land Strategy Review identified 1607 potentially contaminated sites in Blaenau Gwent of which there were 51 High Risk sites (previous or current uses include gas works, landfill sites, petrol stations and military land); 880 Medium Risk sites; and 676 Low Risk Sites. Sites with a history of contaminative usage that have been remediated include the former British Coal Workshops at Tredegar and the Dunlop Semtex site at Brynmawr.

- D.5.4 In Blaenau Gwent there are currently 30 installations regulated under the Pollution Prevention and Control (England and Wales) Regulations. A list of the processes can be found on the link below. Of these 23 are part B, 2 are A2 and 5 are A1.

## Transport

- D.5.5 The public rights of way network in the County Borough is 299.4km in length. 69% of this network is footpaths available solely to walkers, or carriageways mainly used as footpaths. Also, the distribution of the network is not even across the County Borough, and there are several factors arising from a lack of maintenance that have led to restricted usability of this facility. Three factors identified that need improving are: more circular routes- signed and advertised as such; the need to link paths together- defragmentation; and more long distance routes.
- D.5.6 In terms of travel distances to work, in Blaenau Gwent the majority of the population travels less than 5km commuting distance. 31% of the County Borough's population relies on the private car for their work journey, with only 6.6% of the population walking or cycling to work. In terms of car ownership, 45.1% of the resident population owns one car only, with 35.1% of Blaenau Gwent's residents neither owning nor having access to a car or van. In comparison to regional and national statistics, in general terms car ownership levels are considerably below average in Blaenau Gwent and a considerably greater proportion of the population is without access to a car.
- D.5.7 Currently the nearest rail links are at the Valleys line station at Rhymney and West coast mainline at Abergavenny. Valleys lines provide access to and from Cardiff, which is linked with the Great Western line giving links eastward to London and westward to Swansea, Fishguard and the Republic of Ireland. Rhymney station has a good bus service (Route 20) to Tredegar including Parc Bryn Bach. Abergavenny Station links to the X3 service between Cardiff and Hereford via Pontypool and Cwmbran. The X4 service between Hereford and Cardiff via Brynmawr, Ebbw Vale, Tredegar, Merthyr and Pontypridd is available within a walking distance to the bus station.
- D.5.8 The Ebbw Valley Railway Line, providing an hourly service to Cardiff Central, with six stations, is set to be re-opened to passenger transport in autumn 2007 for the first time since 1962. The stations will be located at Ebbw Vale Parkway, Llanhilleth, Newbridge, Crosskeys, Risca & Pontymister and Rogerstone on brownfield sites, of which only Ebbw Vale and Llanhilleth will be in the Blaenau Gwent County Borough area. Although these stations offer good interchange opportunities with local bus services, new bus routes are needed to connect more settlements, e.g. Tredegar, Brynmawr, Nantyglo and Blaina, with this railway line. National Cycle Network Route 47 crosses the line and runs south, parallel to the railway, from near Crosskeys Station. Cwmcarn Forest Drive, which has an off-road cycle route, is also accessible. The rail service from Abertillery to Newport and Cardiff is due to commence in the near future according to the Abertillery Urban Function Analysis.
- D.5.9 The X15 and X16 bus links connect Brynmawr, Nantyglo, Blaina and Abertillery with Newport and Cardiff respectively. Other bus services include the X18 between Ebbw Vale and Newport, and the E3 and E4, both between Brynmawr, Ebbw Vale, Abertillery and Brynmawr, and the 22 service between Ebbw Vale and Newport via Pontypool. These bus links provide a good level of service during weekdays and on Saturday, connecting the Blaenau Gwent major towns with the area. Conversely, Sunday service is limited and some lateral connections between valleys are poor.
- D.5.10 The area's principal road system provides A-road access to the motorway network (the M4, M5 and M50) and combined with the A470 and A465 Heads of the Valley roads, connects the area with the South East, South West, Midlands and London. Dualling work is being carried out to improve the motorway access.

- D.5.11 The nearest airports to Blaenau Gwent are Cardiff International, Bristol and Birmingham. Locals are largely reliant on private transport or car hire to access the airports, as public transport links are limited to the proposed rail link to Cardiff, which will connect with the onward rail link from Cardiff to the airport.

Table D.3 – Baseline data table

| <b>Geodiversity</b> | <p>The main features of Blaenau Gwent are the deeply incised valleys of the Sirhowy, Ebbw Fach and Ebbw Fawr rivers, which flow in a southerly direction from the relatively high moorland plateau running across the northern extremity in an east to west direction. Much of the natural vegetation has been removed because of the industrialisation of the area.</p> <p>The landscape /geomorphology of the Blaenau Gwent area is controlled by Upper Palaeozoic, Upper Carboniferous rocks of the Productive Coal Formation (Lower-Middle Coal Measures) and overlying South Wales Pennant and Grovesend formations (Pennant Measures/Upper Coal Measures).</p> <p>23 Aspect Areas have</p> |   |         | <p>The geological landscape is relatively robust; in upland plateau areas where the condition is generally Good. The trend, where subject mainly to natural weathering and degradation – as across wide areas of the upland plateau - is considered relatively Constant. In coal mining areas, extraction has largely ceased, and reclaimed or made ground in the valleys has been developed. The condition in such areas is more generally Fair, but the</p> | <p>Coal mining was an important industry, and evidence of previous mining activity remains in the landscape in the form of spoil heaps, tips, mine shafts and areas of made ground. On valley slopes with ancient landslips, renewed instability has resulted from extraction of coal and ironstone.</p> |            | <p><a href="http://landmap.ccw.gov.uk/files/BLNGWGL170904%5B1%5D.pdf">http://landmap.ccw.gov.uk/files/BLNGWGL170904%5B1%5D.pdf</a></p> <p><a href="http://www.wefo.cymru.gov.uk/resource/Blaenau_Gwent_Local_Strategy_2003.pdf">http://www.wefo.cymru.gov.uk/resource/Blaenau_Gwent_Local_Strategy_2003.pdf</a></p> |

# Appendix E Strategic Options Assessment

Table E.1 - Assessment of Options to achieve the 'vision' of the County Borough

Scale of Effect (SE): 0 – no effect; +++ strongly positive; ++ moderately positive; + slightly positive; --- strongly negative; -- moderately negative; - slightly negative; ? effect unknown

| SA Objective   | SE | Comments/Explanation   | SE | Comments/Explanation   | SE | Comments/Explanation  |
|--|----|--|----|--|----|---|
|  |    | <p><b>Option 1: Regeneration (continuation of the Unitary Development Plan Strategy)</b></p> <ul style="list-style-type: none"> <li>population decline from the 2006 figure</li> <li>no new housing allocations (urban containment) and a house build rate of 117 per annum</li> <li>continuation of the existing employment allocations and strategy</li> <li>the main towns of Tredegar, Ebbw Vale, Brynmawr, Blaina and Abertillery would be the focus of shopping, commercial, cultural, social and leisure activity</li> <li>the main expansion of services in Ebbw Vale</li> </ul> |    | <p><b>Option 2: Growth and Regeneration</b></p> <ul style="list-style-type: none"> <li>stems out-migration leading to an increase in population to 71,000</li> <li>a house build rate of 200 per annum</li> <li>emphasis of growth and regeneration in the Heads of Valleys and a regeneration focus in the south of the County Borough</li> <li>a new hierarchy of towns with Ebbw Vale becoming the regional centre, with Tredegar, Brynmawr and Abertillery becoming district shopping centres. Blaina would become a local shopping centre</li> <li>specific roles would be provided for town centres, which are currently in decline, in an attempt to encourage their growth.</li> <li>new employment opportunities to broaden offer</li> </ul> <p>This option is based around attempting to address the issues identified at the July 2007 (prioritisation of issues) workshop and is informed by National Guidance, particularly the Wales Spatial Plan and the Blaenau Gwent Regeneration Strategy.</p> |    | <p><b>Option 3: Balanced and Interconnected Communities</b></p> <ul style="list-style-type: none"> <li>stems out-migration and stabilises population at 2006 levels</li> <li>the house build rate would be 157 per annum</li> <li>the emphasis is to spread growth according to the share of population which means it would be allocated in the Ebbw Fach Valley</li> <li>equalise employment through de-allocating some employment sites in the north and relocating them County Borough wide, close to towns</li> <li>no retail hierarchy but the number of town centres in the County Borough would be reduced from five to four (Abertillery, Brynmawr, Ebbw Vale and Tredegar) by excluding Blaina</li> <li>new complementary roles for the town centres.</li> </ul> <p>This strategy attempts to address the issues identified and is based on ideology set out in the regional guidance document Turning Heads.</p> |
| <b>Economic</b>  |    |  |    |  |    |   |
| 1. To promote economic growth and strengthen and diversify the local economy | -- | The option will not lead to the diversification of the economy, as the strategy focuses on large inward investment projects, which are no longer appropriate in the current economic climate.  | ++ | The option will promote economic growth and seeks to specifically diversify the economy through the development of the manufacturing, tourism, leisure and social care sectors.  | +  | The option seeks to de-allocate land identified for manufacturing and re-allocate sites closer to the main towns. It should be ensured that the sites are appropriate for the diversification of the economy. The   |

|  |    |  |    |   |   |   |
|--|----|--|----|---|---|---|
|  |    |  |    |   | towns are to be developed to provide tourism and leisure functions alongside retail and other services which will improve and enhance the diversification of the economy. |   |
| 2. To increase levels of local employment and ensure distribution of opportunities                             | -- | The economic development strategy is unsuitable for the current economic climate, and this is unlikely to provide local employment opportunities.  | +  | The diversification of the economy is likely to lead to an increase in employment opportunities for local people. The location of sites near to the main towns may improve the distribution of opportunities. However, the focus on Ebbw Vale may lead to appropriate opportunities not being well distributed.   | +   | The allocation of sites for employment closer to the main towns in the area will improve the level and distribution of employment opportunities.                              |
| 3. To enable the development of a strong tourism economy in Blaenau Gwent, complementary to the regional offer | -- | There is no mention of strengthening the tourism offer through this option and thus this objective is unlikely to be achieved.   | ++ | The option seeks to promote diversification of the economy, with one element being the tourism sector. This will help to further this objective.  | ++  | The option seeks to develop tourism in the main towns.  |
| 4. To enhance the viability and vitality of town centres   | -- | The option does not specify where the existing employment allocations are located, and thus the effect on the town centres in the plan area is difficult to determine. However, the current economic climate suggests that the option's strategy for economic growth is unlikely to be successful and this is unlikely to contribute to the town centre's vitality and viability | +  | Employment allocations under this option are sought to be located close to the main towns in the plan area, as well as a new focus for retail and facilities to be location in various hubs. This will improve the focus and vitality and viability of these centres. The option seeks to identify sites for housing in the Heads of the Valleys area, and it should be ensured that these allocations are close to town centres. | +   | Focusing development on the main towns will help to ensure their vitality and viability. It should be ensured and specified that housing is also provided in these locations. |
| <b>Social</b>  |    |  |    |   |   |   |

|   |    |  |    |  |         |   |
|---|----|--|----|--|---------|---|
| 5. To meet identified housing needs   | -- | An urban containment policy due to a continued loss of population under this option will reduce opportunities to meet housing needs in terms of different types and tenures of properties, as a sufficient supply of committed housing sites already have permission.  | +  | The option seeks to increase the population, and thus seeks to provide further housing to accommodate this desired growth. The option does not mention, however, the types and tenure of housing to be provided. It should be ensured that the provision of housing comprises a mix of types and tenures in accordance with predicted need, in order that people are attracted to the area as a place to live and sustainable, mixed, communities are created. | --      | It is unclear how the area will require further housing growth when the aim is to stabilise the population at 2006 levels. This may result in a surplus supply of housing which is not considered a sustainable option.   |
| 6. To improve the quality of Blaenau Gwent's housing stock  | ?  | The option contains no information as to whether the current housing stock will be improved.   | ?  | The option does not include mention of the need to improve the current housing stock.  | ?       | The option does not include mention of the need to improve the current housing stock.   |
| 7. To secure the delivery and maintenance of quality affordable housing   | -- | An urban containment policy due to a continued loss of population under this option will reduce opportunities to deliver affordable housing.   | ++ | The option provides an opportunity to deliver affordable housing, through the allocation of more sites for housing.  | --      | The small amount of housing provision is unlikely to give rise to significant potential for affordable housing provision.   |
| 8. To improve educational attainment and increase skills levels   | -  | As housing developments have already been granted permission, it is unlikely that planning agreements through such permissions will lead to the creation of new schools for these populations. Skills levels may improve through the use of existing facilities, although this is not specified in the option description. | ++ | The option does not specifically mention the need to improve educational attainment. However, the potential to increase the provision of educational facilities is increased through the release of sites for housing, through which educational sites may be provided through planning agreements. The diversification of employment may also lead to an increase in skills levels.   | +       | The option does not specifically mention the need to improve educational attainment. However, the potential to increase the provision of educational facilities is increased through the release of sites for housing, through which educational sites may be provided through planning agreements. This opportunity will be minimal however, due to the small number of allocated sites. |
| 9. To improve accessibility to education, leisure, employment, health, homes and community services for all sectors | -- | An urban containment policy due to a continued loss of population under this option will reduce opportunities to deliver play space and other community facilities as planning permission has already been   | +  | This option focuses service provision on the main centre of Ebbw Vale. District Centres seek to provide 'local services' although the types are not specified. The option will likely improve provision of services, especially in   | -<br>/+ | The option seeks that the main towns will be the main service centres and thus may improve facilities and subsequent accessibility to services. However,  |

|   |    |   |    |   |         |   |
|---|----|---|----|---|---------|---|
| of the community  |    | granted for housing development. It is unknown where these permissions are in relation to current facilities.   |    | Ebbw Vale. It should be specified, however, that improved access to this area by public transport is necessary. The required uses for the district centres should also be specified to ensure all sectors of the community have easy access to essential facilities.  |         | the option should specify the need for improved accessibility to these centres by sustainable modes for people living outside of these areas. It should also be specified which services and facilities should be provided in each centre.  |
| 10. To promote community health, social care and well-being | -- | An urban containment policy due to a continued loss of population under this option will reduce opportunities to deliver community facilities as planning permission has already been granted for housing development. It is unknown where these permissions are in relation to current facilities. | +  | This option focuses health provision on the main centre of Ebbw Vale, in the form of a hospital. District Centres seek to provide 'local services' although the types are not specified. The required uses for the district centres should also be specified to ensure all sectors of the community have easy access to health facilities. The option should also promote walking and cycling facilities as a mode of transport to improve health through exercise and improved air quality, which can also contribute to a sense of wellbeing. | -<br>/+ | The option seeks that the main towns will be the main service centres and thus may improve facilities and subsequent accessibility to services. However, the option should specify the need for improved accessibility to these centres by sustainable modes for people living outside of these areas. It should also be specified which services and facilities should be provided in each centre, to include health facilities. |
| 11. To reduce crime, social disorder and fear of crime      | -- | As current permissions for the required housing provision under this option have already been granted, it is unlikely that the enforcement of measures such as those provided in 'Secured by Design' guidance and other ways to design out crime will be implemented.                               | ++ | The allocation of new areas for housing and employment give rise to the opportunity for enforcing principles to design out crime. This should be specified in the option.   | +       | The allocation of new areas for housing and employment give rise to the opportunity for enforcing principles to design out crime, although these opportunities will be minimal. This should be specified in the option.   |
| 12. To protect and enhance the Welsh culture                | -  | This option will result in a further loss of population in the plan area. Therefore it is unlikely that there will be sufficient population of local people to enable cultural enhancement facilities, such as more Welsh-speaking schools, in the County Borough.                                  | ++ | The desire to attract an increased population to the area will reinforce the community and strengthen its identity in this valleys location. The provision of cultural facilities may be required through planning agreements as a result of housing developments.  | +       | Maintaining the population in the area helps to maintain a sense of community and may help to maintain the Welsh culture. The provision of cultural facilities may be required through planning agreements as a result of housing developments, although this potential is minimal.   |

| Environmental   |     |   |     |  |         |  |
|---|-----|---|-----|--|---------|--|
| 13. To encourage modal shift from private transport to sustainable transport  | ?   | There is no detail within the option with regards to transportation. The employment and housing sites that are already allocated are not demonstrated in terms of their location, so the feasibility of achieving this objective is uncertain.  | -/+ | The focus of the development of services in Ebbw Vale may lead to an increase in travel from the wider area to reach this destination. The need for this travel to be undertaken by sustainable modes should be specified. The option should ensure that an appropriate range of facilities is provided in the district centres in order to improve accessibility and thus reduce the need to travel by private car. | +       | The need for this travel to be undertaken by sustainable modes should be specified. The option should ensure that an appropriate range of facilities is provided in the district centres are provided in order to improve accessibility and thus reduce the need to travel by private car.                                 |
| 14. To protect and enhance biodiversity across Blaenau Gwent  | -/+ | The option does not detail how biodiversity might be affected. However, the focus on large scale employment projects suggests that large areas of land are likely to be affected, which would be detrimental to biodiversity. However, the loss of population and thus reduction in house building may have a positive effect on biodiversity.  | --  | An increase in development is likely to lead to a loss of habitats, and thus the biodiversity in the area is likely to decrease. The option should seek to ensure that mitigation measures are in place to minimise this impact, such as the provision of green infrastructure and replacement habitats.   | -       | An increase in development is likely to lead to a loss of habitats, and thus the biodiversity in the area is likely to decrease. The option should seek to ensure that mitigation measures are in place to minimise this impact, such as the provision of green infrastructure and replacement habitats.                   |
| 15. To conserve and enhance the heritage assets of Blaenau Gwent and their settings   | -/+ | The option seeks to strengthen the attraction and use of town centres, so is likely to encourage the enhancement of these areas, which are likely to include heritage assets. The development of large scale employment and housing sites may lead to the loss of heritage assets or be detrimental to the landscape which is an asset in itself as the areas' industrial and natural heritage. | -/+ | The diversification of the economy to focus on tourism is likely to capitalise and thus enhance the heritage assets of the area. This, however, should be specified in the option to ensure that potential negative impacts from the development of housing and employment sites do not occur.   | -<br>/+ | Developing tourism roles is likely to capitalise and thus enhance the heritage assets of the area. This, however, should be specified in the option to ensure that potential negative impacts from the development of housing and employment sites do not occur.   |
| 16. To make the best use of previously developed land and existing buildings to minimise pressure for greenfield development, where this will not result in damage or loss to biodiversity. | -/+ | The strategy aims to strengthen the attraction and use of the town centres is likely to lead to some re-use of previously developed land. However, the housing and employment site locations and sizes are not indicated. These may therefore be located in greenfield land, which would be contrary to this sustainability objective.  | -   | The option does not specifically refer to the need to reuse previously developed land as a priority over greenfield land. Business sites are sought to be located 'near' the main towns, which indicates that greenfield development may occur. The use of previously developed land should be prioritised where possible.   | -       | The option does not specifically refer to the need to reuse previously developed land as a priority over greenfield land. Business sites are sought to be located 'near' the main towns, which indicates that greenfield development may occur. The use of previously developed land should be prioritised where possible. |

|   |     |   |     |   |      |   |
|---|-----|---|-----|---|------|---|
| 17. To conserve soil resources and their quality                          | -/+ | The housing and employment site locations and sizes are not indicated. These may therefore be located on greenfield land, which may lead to a detrimental impact on soil resources. However, increased development may also lead to the remediation of previously contaminated land, which would be beneficial for soil quality.  | -/+ | The housing and employment site locations and sizes are not indicated. These may therefore be located on greenfield land, which may lead to a detrimental impact on soil resources. However, increased development may also lead to the remediation of previously contaminated land, which would be beneficial for soil quality.  | - /+ | The housing and employment site locations and sizes are not indicated. These may therefore be located on greenfield land, which may lead to a detrimental impact on soil resources. However, increased development may also lead to the remediation of previously contaminated land, which would be beneficial for soil quality.  |
| 18. To reduce emissions of greenhouse gases, in particular carbon dioxide | -   | An increase in employment development on a large scale would likely lead to an increase in traffic and thus greenhouse gas emissions. However, this development may lead to the use of greenfield land, which may decrease carbon sequestration. Greenhouse gas emissions may be reduced through the predicted reduction in population which may lead to a decrease in traffic levels. However, as the housing allocations already have planning permission, there is little feasibility within the option to encourage house builders to build more sustainably, thus new housing is likely to contribute to greenhouse gas emissions, creating an overall increase. | --  | An increase in development is likely to lead to an increase in greenhouse gas emissions from the buildings themselves, as well as the new traffic generated, and the loss of carbon sink capacity. The option should specify the need to minimise these impacts through reducing the need to travel through appropriate layouts and land uses, provision of green infrastructure, and the use of sustainable building techniques and materials. | -    | An increase in development is likely to lead to an increase in greenhouse gas emissions from the buildings themselves, as well as the new traffic generated, and the loss of carbon sink capacity. The option should specify the need to minimise these impacts through reducing the need to travel through appropriate layouts and land uses, provision of green infrastructure, and the use of sustainable building techniques and materials. |
| 19. To reduce waste generation and maximise reuse and recycling           | -/+ | A reduction in population may lead to a decrease in waste generation. However, the strategy promotes large scale employment sites which may increase waste levels. Additionally, planning obligations, through housing permissions, to ensure waste recycling facilities in dwellings are not possible through this option as all necessary housing   | --  | An increase in development will lead to an increase in the generation of waste. The option should seek to minimise this effect through allocating sites for waste management near to centres of population, as well as within buildings, to move waste up the hierarchy.  | -    | An increase in development will lead to an increase in the generation of waste. The option should seek to minimise this effect through allocating sites for waste management near to centres of population, as well as within buildings, to move waste up the hierarchy.  |

|  |    |   |    |   |   |   |
|--|----|---|----|---|---|---|
|  |    | developments already have permission.   |    |   |   |   |
| 20. To maintain current air quality  | ?  | A decline in population may lead to improved air quality locally, through a reduction in traffic levels. The option does not state, however, where housing allocations will be located in relation to employment uses. Therefore new traffic growth that will contribute to local air quality is unknown. Additionally, if the new employment is to comprise certain types of manufacturing, this may have a negative influence on air quality. | -- | A substantial increase in population as well as increased employment development will lead to an increase in traffic. This could be minimised if alternative modes of transport were promoted, as well as the reduction in the need to travel through the provision of specified facilities in the district hubs to reduce the need to travel hence reduce air emissions. Development of the manufacturing sector may lead to negative implications for air quality. Planting schemes could also provide capacity for the absorption of pollutants. | - | Increasing development could lead to an increase in traffic. This could be minimised if alternative modes of transport were promoted, as well as the reduction in the need to travel through the provision of specified facilities in the district hubs to reduce the need to travel hence reduce air emissions. Planting schemes could also provide capacity for the absorption of pollutants. |
| 21. To maintain current low levels of vulnerability of all development to flooding | -- | New development is likely to lead to an increase in hard surfacing and a subsequent increase in surface water run off, which may increase flood risk. The option should specify the need for SUDs as part of any new built development. No new built development should be permitted in the flood plain.  | -- | The option encourages an increase in development, which is likely to lead to an increase in hard surfacing and a subsequent increase in surface water run off, which may increase flood risk. The option should specify the need for SUDs as part of any new built development. No new built development should be permitted in the flood plain.  | - | The option encourages an increase in development, which is likely to lead to an increase in hard surfacing and a subsequent increase in surface water run off, which may increase flood risk. The option should specify the need for SUDs as part of any new built development. No new built development should be permitted in the flood plain.  |
| 22. To promote the use of sustainably sourced products and resources               | ?  | The option does not mention the potential sourcing of materials for development and should specify that products and resources should have low embodied energy and be sourced sustainably.  | ?  | The option does not mention the potential sourcing of materials for development and should specify that products and resources should have low embodied energy and be sourced sustainably.  | ? | The option does not mention the potential sourcing of materials for development and should specify that products and resources should have low embodied energy and be sourced sustainably.  |
| 23. To increase energy efficiency and generation and use of renewable energy       | -  | The option does not specify that energy efficient measures will be required through built development and thus, as housing permissions have already been granted,   | +  | Although the option doesn't specifically mention the need for energy efficiency and the generation of renewable energy, there is potential for the option to specify that this is   | + | Although the option doesn't specifically mention the need for energy efficiency and the generation of renewable energy,   |

|  |    |   |    |   |    |   |
|--|----|---|----|---|----|---|
| across the County Borough  |    | this is unlikely to be achieved.  |    | the case for all new development in the County Borough.   |    | there is potential for the option to specify that this is the case for all new development in the County Borough.   |
| 24. To conserve and enhance surface and ground water quality                       | -- | New development is likely to lead to an increase in hard surfacing and a subsequent increase in surface water run off. This may lead to an increase in flooding which can lead to exceedences of drain capacity. Pollutants then may enter watercourses leading to a reduction in quality. SUDs should be specified as part of all new development. This could form part of a green infrastructure network. | -- | New development is likely to lead to an increase in hard surfacing and a subsequent increase in surface water run off. This may lead to an increase in flooding which can lead to exceedences of drain capacity. Pollutants then may enter watercourses leading to a reduction in quality. SUDs should be specified as part of all new development. This could form part of a green infrastructure network. | -- | New development is likely to lead to an increase in hard surfacing and a subsequent increase in surface water run off. This may lead to an increase in flooding which can lead to exceedences of drain capacity. Pollutants then may enter watercourses leading to a reduction in quality. SUDs should be specified as part of all new development. This could form part of a green infrastructure network. |
| 25. Protect the quality and character of the landscape and enhance where necessary | -  | An urban containment strategy may help to reduce pressure on the landscape through minimising built development. However, the current allocations for both housing and employment uses are not specified in terms of their location. The large scale nature of the employment allocations is likely to have a negative impact on the landscape. Design controls are not specified to reduce this effect.    | -- | The option does not specify the need for development to be sensitive to the landscape character. Increased built development is likely to be detrimental to the landscape and thus the potential effects should be minimised through sensitive design.  | -  | The option does not specify the need for development to be sensitive to the landscape character. Increased built development is likely to be detrimental to the landscape and thus the potential effects should be minimised through sensitive design.  |

# Appendix F Strategic Policies Assessment

## F.1 Strategic Policy Assessments

The individual detailed strategic policy assessments are included on the following pages. The same key applies to all of the assessments and is set out below.

### Key

| <b>Terms</b> |                      | <b>Effects</b> |             |           |      | <b>Assessment</b> |     |   |
|--------------|----------------------|----------------|-------------|-----------|------|-------------------|-----|---|
| <b>Cond</b>  | Baseline Condition   | ✓✓             | Local       | ST-<br>MT | Temp | Low               | +++ | Strongly positive   |
| <b>Sens</b>  | Baseline Sensitivity | ✓              | Sub-<br>Reg | ST-<br>LT | Perm | Med               | ++  | Moderately positive   |
| <b>Curr</b>  | Future               | -              | Reg/Nat     | MT-<br>LT |      | High              | +   | Slightly positive   |
| <b>Ftre</b>  | Current              | ?              |             | ST        |      |                   | 0   | No effect   |
|              |                      | x              |             | MT        |      |                   | -   | Slightly negative   |
| <b>Mag</b>   | Magnitude            | xx             |             | LT        |      |                   | --  | Moderately negative   |
| <b>Scale</b> | Geographic extent    |                |             |           |      |                   | --- | Strongly negative   |
| <b>T/P</b>   | Temporary/permanent  |                |             |           |      |                   |     | Combination of positive and negative effects / neutral effect |
| <b>Cert</b>  | Certainty            |                |             |           |      |                   | +/- |   |
| <b>ST</b>    | Short term           |                |             |           |      |                   |     |   |
| <b>MT</b>    | Medium term          |                |             |           |      |                   |     |   |
| <b>LT</b>    | Long term            |                |             |           |      |                   |     |   |
| <b>Sm</b>    | Summary assessment   |                |             |           |      |                   |     |   |

Table F.1 – SA Assessment of SP1

## SP1 - Heads of the Valleys Area – Growth and Regeneration

The Heads of the Valleys area will be the focus for the County Borough's spatial development. Ebbw Vale will accommodate the majority of new homes, jobs and services and will be promoted as the main hub for Blaenau Gwent. Tredegar and Brynmawr will be the focus for new development serving the growing needs of their respective communities. New development will be located within these centres or in locations highly accessible to them.

| SA Objective |   | Baseline |      | Trends |        | Effects |         |       |      |      | Assessment |    |     |     | Commentary  | Mitigation/enhancement |
|--------------|---|----------|------|--------|--------|---------|---------|-------|------|------|------------|----|-----|-----|---|------------------------|
|              |   | Cond     | Sens | Curr   | Ftre   | Mag     | Scale   | Dur   | T/P  | Cert | ST         | MT | LT  | Sm  |   |                        |
| 1            | To promote economic growth and strengthen and diversify the local economy                                   | Poor     | Med  | Stable | Stable | ✓✓      | Sub-Reg | MT-LT | Perm | Med  | ++         | ++ | +++ | +++ | The establishment of a strong settlement hierarchy supported by a policy that reinforces the concept of directing mixed use development to the most accessible locations should convey considerable benefits in terms of economic growth and the attraction and retention of the workers needed to drive growth.        |                        |
| 2            | To increase levels of local employment and ensure distribution of opportunities                             | Poor     | Med  | Impr   | Stable | ✓✓      | Sub-Reg | MT-LT | Perm | Med  | ++         | ++ | +++ | +++ | The policy supports a high level of investment in growth and seeks to ensure that employment increases in key accessible settlements, distributed across three main locations. This should convey considerable benefits over time.  |                        |
| 3            | To enable the development of a strong tourism economy in Blaenau Gwent, complementary to the regional offer | Mod      | Med  | Stable | Stable | ✓       | Sub-Reg | MT-LT | Perm | Low  | +          | +  | ++  | ++  | The policy supports the concept of developing a clear settlement hierarchy. This offers the potential to better support tourism development by providing clarity of investment foci - improvement of facilities to support the resident population should also improve the potential offer to people visiting the area. |                        |
| 4            | To enhance the viability and vitality of town centres   | Poor     | Med  | Impr   | Impr   | ✓✓      | Sub-Reg | MT-LT | Perm | Med  | +          | ++ | ++  | ++  | By focusing investment in key centres and siting new development in locations that are accessible to these key centres, the policy offers considerable potential to encourage greater town centre vitality, which underpins viability.  |                        |
| 5            | To meet identified housing needs  | Poor     | Med  | Stable | Stable | -       | Local   | ST-LT | Perm | High | 0          | 0  | 0   | 0   | There is no clear interrelationship between the policy and the objective.   |                        |
| 6            | To improve the quality of Blaenau Gwent's housing stock   | Poor     | Med  | Stable | Stable | -       | Local   | ST-LT | Perm | High | 0          | 0  | 0   | 0   | There is no clear interrelationship between the policy and the objective.   |                        |

|    |   |      |     |        |        |    |         |       |      |      |    |    |     |     |  |
|----|---|------|-----|--------|--------|----|---------|-------|------|------|----|----|-----|-----|--|
| 7  | To secure the delivery and maintenance of quality affordable housing  | Mod  | Med | Stable | Stable | -  | Local   | ST-LT | Perm | High | 0  | 0  | 0   | 0   | There is no clear interrelationship between the policy and the objective.  |
| 8  | To improve educational attainment and increase skills levels  | Poor | Med | Impr   | Impr   | -  | Local   | ST-LT | Perm | High | 0  | 0  | 0   | 0   | There is no clear interrelationship between the policy and the objective.  |
| 9  | To improve accessibility to education, leisure, employment, health, homes and community services for all sectors of the community | Mod  | Med | Stable | Stable | ✓✓ | Sub-Reg | MT-LT | Perm | High | +  | ++ | +++ | ++  | The policy seeks to direct development to the most accessible locations, including the reinforcement and growth of key settlements through directing investment, which includes the co-locating of employment, homes and all associated facilities and services.   |
| 10 | To promote community health, social care and well-being   | Poor | Med | Stable | Stable | ✓  | Sub-Reg | MT-LT | Perm | High | +  | ++ | ++  | ++  | The policy seeks to direct development to a number of key settlements and locations that are accessible to them. This should help to foster a stronger sense of well-being through environmental enhancement and improved access to facilities and services necessary to deliver benefits against the objective.   |
| 11 | To reduce crime, social disorder and fear of crime  | Mod  | Low | Impr   | Impr   | ✓  | Local   | MT-LT | Perm | Med  | +  | +  | ++  | ++  | The locational focus of the policy on the key settlements should help to improve the physical environment, which has been identified as a key factor in respect of crime - by delivering improvements to the physical environment and the accessibility of facilities and services, the policy offers the potential to deliver benefits against the objective. |
| 12 | To protect and enhance the Welsh culture  | Mod  | Low | Stable | Stable | ✓  | Local   | MT-LT | Perm | Low  | +  | +  | +   | +   | In seeking to direct development and investment towards key settlements, the policy offers the potential to strengthen the cohesiveness of the towns' offers, which could potentially deliver benefits in terms of encouraging a greater sense of local culture.   |
| 13 | To encourage modal shift from private transport to sustainable transport  | Mod  | Med | Stable | Stable | ✓✓ | Sub-Reg | MT-LT | Perm | Med  | ++ | ++ | +++ | +++ | By seeking to focus development on key settlements and locations highly accessible to them, the policy should underpin the aims of the objective.  |

|    |   |      |      |        |        |    |         |       |      |      |  |     |     |     |     |   |   |
|----|---|------|------|--------|--------|----|---------|-------|------|------|--|-----|-----|-----|-----|---|---|
| 14 | To protect and enhance biodiversity across Blaenau Gwent  | Mod  | High | Stable | Impr   | ?  | Sub-Reg | ST-LT | Temp | Med  |  | +   | +/- | +/- | +   | By focusing development on key settlements and existing developed areas with good transportation links, the policy should help to safeguard connecting countryside from undue fragmentation; however, urban biodiversity value may be threatened by increased development densities and construction on brownfield sites.                               |   |
| 15 | To conserve and enhance the heritage assets of Blaenau Gwent and their settings   | Poor | High | Decl   | Decl   | ?  | Sub-Reg | ST-LT | Temp | Med  |  | +/- | +/- | +/- | +/- | The majority of the heritage assets in the County Borough are within the existing settlements - there is a risk that increased development pressure may threaten certain sites; however, the policy approach will safeguard rural heritage from intrusive development.  | There will be a need to ensure that urban development is undertaken in accordance with the Heritage Strategy. |
| 16 | To make the best use of previously developed land and existing buildings to minimise pressure for greenfield development, where this will not result in damage or loss to biodiversity. | Mod  | Med  | Stable | Stable | ✓✓ | Sub-Reg | ST-MT | Temp | High |  | +++ | ++  | ++  | +++ | The locational focus of the policy on the key settlements should encourage maximisation of the development potential within the existing urban envelope and safeguard against expansion into greenfield development, at least in the short to medium term and possibly into the longer term, which accords with the objective.                          |   |
| 17 | To conserve soil resources and their quality  | Poor | Med  | Stable | Impr   | ✓✓ | Local   | ST-LT | Temp | Med  |  | ++  | ++  | ++  | ++  | Insofar as the policy seeks to direct development to the existing urban areas, it should be effective in safeguarding the quality of soil resources within the countryside and assist in maximising the development potential of available brownfield land, which may also involve the remediation of contaminated land, resulting in further benefits. |   |

|    |  |      |      |        |        |  |    |         |       |      |     |  |     |    |     |    |  |  |
|----|--|------|------|--------|--------|--|----|---------|-------|------|-----|--|-----|----|-----|----|--|--|
| 18 | To reduce emissions of greenhouse gases, in particular carbon dioxide          | Mod  | High | Stable | Impr   |  | x  | Reg/Nat | MT-LT | Perm | Med |  | +/- | -  | --  | -  | The policy is concerned primarily with the location of development as opposed to the amount. However, insofar as it supports an increase in development, it will also result in an increase in sources of GHG emissions that are unlikely to be completely offset by the potential for a reduction in the need to travel and increased availability of public transport.     |  |
| 19 | To reduce waste generation and maximise reuse and recycling                    | Poor | Med  | Decl   | Decl   |  | x  | Sub-Reg | MT-LT | Perm | Med |  | -   | -  | --  | -  | The policy is concerned primarily with the location of development as opposed to the amount. However, insofar as it supports an increase in development, it will also result in an increase in waste arising from construction activity and, ultimately, operation upon completion. The opportunities for reuse and recycling are not addressed.                             | Construction waste will need to be subject to sustainable management. There is a need to ensure that new development is associated with the establishment of sustainable waste management opportunities. |
| 20 | To maintain current air quality  | Good | Low  | Stable | Stable |  | xx | Local   | MT-LT | Perm | Med |  | -   | -- | --- | -- | The policy is concerned primarily with the location of development as opposed to the amount. However, insofar as it supports an increase in development, it will also result in an increase in density of emissions sources that are unlikely to be completely offset by the potential for a reduction in the need to travel and increased availability of public transport. |  |
| 21 | To maintain current low levels of vulnerability of all development to flooding | Good | High | Stable | Stable |  | x  | Local   | LT    | Perm | Low |  | 0   | -  | -   | -  | The policy should result in an increase in development densities within the key settlements - these are not currently subject to high levels of flood risk; however, there will be an increase in impermeable surfacing that may have the potential to increase risk of localised flooding.  | There will be a need to ensure that development is designed to be both flood resilient and reduce the risk of flooding, particularly arising from increased run off.                                     |

|    |  |     |     |        |      |  |   |         |       |      |     |  |   |   |   |   |   |
|----|--|-----|-----|--------|------|--|---|---------|-------|------|-----|--|---|---|---|---|---|
| 22 | To promote the use of sustainably sourced products and resources                                   | ?   | ?   | ?      | ?    |  | - | Local   | ST-LT | Perm | Med |  | 0 | 0 | 0 | 0 | The policy is concerned primarily with the location of development as opposed to the means of construction. There is therefore no clear interrelationship between the policy and the objective.   |
| 23 | To increase energy efficiency and generation and use of renewable energy across the County Borough | ?   | ?   | ?      | ?    |  | - | Local   | ST-LT | Perm | Med |  | 0 | 0 | 0 | 0 | The policy is concerned primarily with the location of development. There is therefore no clear interrelationship between the policy and the objective.   |
| 24 | To conserve and enhance surface and ground water quality   | Mod | Med | Impr   | Impr |  | x | Sub-Reg | MT-LT | Perm | Low |  | 0 | - | - | - | The policy should result in an increase in development densities within the key settlements - this will increase the potential for pollutants to enter the water system.  |
| 25 | To protect the quality and character of the landscape and enhance where necessary                  | Mod | Med | Stable | Decl |  | ✓ | Sub-Reg | ST-LT | Perm | Med |  | + | + | + | + | There is the potential for a slight benefit in the longer term insofar as the locational focus of development within existing settlements should safeguard against adverse effects on the quality and character of the landscape where openness is considered to be of particular importance. |

Table F.2 – SA Assessment of SP2

## SP2 - South of the Borough – Regeneration

The South of the Borough will see a focus on regeneration with appropriate forms of growth to serve local needs. Abertillery will be the focus of new development serving the needs of its respective communities.

| SA Objective |   | Baseline |      | Trends |        | Effects |       |       |      |      | Assessment |    |    |    | Commentary  | Mitigation/enhancement |
|--------------|---|----------|------|--------|--------|---------|-------|-------|------|------|------------|----|----|----|---|------------------------|
|              |   | Cond     | Sens | Curr   | Ftre   | Mag     | Scale | Dur   | T/P  | Cert | ST         | MT | LT | Sm |   |                        |
| 1            | To promote economic growth and strengthen and diversify the local economy                                   | Poor     | Med  | Stable | Stable | ✓       | Local | MT-LT | Perm | Med  | +          | ++ | ++ | ++ | Regeneration should, over the medium to longer term, be effective in improving local economic conditions and promoting growth within the south of the Borough to complement the focus on the north in other policies.   |                        |
| 2            | To increase levels of local employment and ensure distribution of opportunities                             | Poor     | Med  | Impr   | Stable | ✓✓      | Local | ST-LT | Perm | Med  | +          | ++ | ++ | ++ | In combination with other policies, balancing the focus of growth with a strong regeneration focus in the south of the Borough should help to increase local employment and secure a distribution of opportunities across the Borough.  |                        |
| 3            | To enable the development of a strong tourism economy in Blaenau Gwent, complementary to the regional offer | Mod      | Med  | Stable | Stable | -       | Local | ST-LT | Perm | Med  | 0          | 0  | 0  | 0  | There is no clear interrelationship between the policy and the objective.   |                        |
| 4            | To enhance the viability and vitality of town centres   | Poor     | Med  | Impr   | Impr   | ✓✓      | Local | MT-LT | Perm | High | +          | +  | ++ | ++ | The policy focuses on delivering regeneration within Abertillery - this should have significant localised benefits in terms of boosting the vitality and viability in this town.  |                        |
| 5            | To meet identified housing needs  | Poor     | Med  | Stable | Stable | ✓       | Local | LT    | Perm | Med  | 0          | +  | ++ | +  | The wording of the policy is not specific; however, regeneration is assumed to include an element of residential development and there is an emphasis on meeting local needs - in this respect the policy has the potential to deliver localised benefits in the longer term. |                        |
| 6            | To improve the quality of Blaenau Gwent's housing stock   | Poor     | Med  | Stable | Stable | ✓       | Local | LT    | Perm | Low  | 0          | +  | +  | +  | The policy focuses on delivering regeneration within Abertillery - this is assumed to include an element of improvements to existing built development thus the policy has the potential to deliver limited local benefits.   |                        |

|    |   |      |     |        |        |   |       |       |      |      |   |   |   |   |  |
|----|---|------|-----|--------|--------|---|-------|-------|------|------|---|---|---|---|--|
| 7  | To secure the delivery and maintenance of quality affordable housing  | Mod  | Med | Stable | Stable | - | Local | ST-LT | Perm | High | 0 | 0 | 0 | 0 | There is no clear interrelationship between the policy and the objective.  |
| 8  | To improve educational attainment and increase skills levels  | Poor | Med | Impr   | Impr   | - | Local | ST-LT | Perm | Med  | 0 | 0 | 0 | 0 | There is no specific reference to education as part of regeneration. There is therefore no clear interrelationship between the policy and the objective.   |
| 9  | To improve accessibility to education, leisure, employment, health, homes and community services for all sectors of the community | Mod  | Med | Stable | Stable | ✓ | Local | MT-LT | Perm | Low  | 0 | + | + | + | The policy refers to the regeneration of Abertillery for residents in the south of the Borough - this should deliver benefits to those communities accessible to the settlement; however, these will be localised in nature.   |
| 10 | To promote community health, social care and well-being   | Poor | Med | Stable | Stable | ✓ | Local | MT-LT | Perm | Low  | 0 | 0 | + | + | There is no specific reference to health, social care and environmental enhancement (which contributes to well-being) within the policy; however, it is assumed that regeneration activities have the potential to deliver localised benefits over time.   |
| 11 | To reduce crime, social disorder and fear of crime  | Mod  | Low | Impr   | Impr   | ✓ | Local | LT    | Perm | Low  | 0 | 0 | + | + | There is no specific reference to regeneration incorporating emphasis on tackling crime; however, there is evidence of causality between the physical environment and a heightened incidence and fear of crime thus it is considered that regeneration could deliver some benefits against the objective at the local level. |
| 12 | To protect and enhance the Welsh culture  | Mod  | Low | Stable | Stable | ✓ | Local | MT-LT | Perm | Low  | 0 | + | + | + | Insofar as developing Abertillery as a community focus may strengthen the sense of community identity and pride, there is the potential for some localised benefits to arise against the objective.  |
| 13 | To encourage modal shift from private transport to sustainable transport  | Mod  | Med | Stable | Stable | - | Local | ST-LT | Temp | Med  | 0 | 0 | 0 | 0 | The policy does not make specific reference to transport. Consequently there is no clear interrelationship between the policy and the objective.   |

The policy should make specific reference to the improvement of transportation as part of the regeneration activities linked to Abertillery.

|    |   |      |      |        |        |  |   |         |       |      |     |  |   |    |     |    |  |
|----|---|------|------|--------|--------|--|---|---------|-------|------|-----|--|---|----|-----|----|--|
| 14 | To protect and enhance biodiversity across Blaenau Gwent  | Mod  | High | Stable | Impr   |  | ✓ | Local   | LT    | Temp | Low |  | 0 | 0  | +   | +  | The policy is considered too locationally specific to effect significant changes; however, in principle by focusing regeneration on an existing settlement there is the potential to safeguard rural biodiversity in the surrounding countryside from undue development pressure.  |
| 15 | To conserve and enhance the heritage assets of Blaenau Gwent and their settings   | Poor | High | Decl   | Decl   |  | - | Local   | ST-LT | Temp | Med |  | 0 | 0  | 0   | 0  | The policy is considered too locationally specific to effect significant changes. There is therefore no clear interrelationship between the policy and the objective.  |
| 16 | To make the best use of previously developed land and existing buildings to minimise pressure for greenfield development, where this will not result in damage or loss to biodiversity. | Mod  | Med  | Stable | Stable |  | ✓ | Local   | ST-LT | Perm | Med |  | 0 | +  | +   | +  | The concept of regeneration is assumed to imply that new development will be focused on maximising the potential of previously developed land and restricting growth to the existing urban envelope. The policy is focused exclusively on Abertillery thus any benefits will be localised.   |
| 17 | To conserve soil resources and their quality  | Poor | Med  | Stable | Impr   |  | ✓ | Local   | ST-LT | Perm | Med |  | 0 | +  | +   | +  | Insofar as the policy seeks to direct development to an existing urban area, it should be effective in safeguarding the quality of soil resources within the surrounding countryside and assist in maximising the development potential of available brownfield land, which may also involve remediating contamination, resulting in further benefits. However, the effects will be highly localised.  |
| 18 | To reduce emissions of greenhouse gases, in particular carbon dioxide   | Mod  | High | Stable | Impr   |  | x | Reg/Nat | MT-LT | Perm | Med |  | - | -- | --- | -- | The policy is concerned primarily with the location of development as opposed to the amount. However, insofar as it supports an increase in development, it will also result in an increase in sources of GHG emissions that are unlikely to be completely offset by the potential for a reduction in the need to travel and increased availability of public transport. Effects are likely to be small scale due to the exclusive focus of the policy on Abertillery. |

|    |  |      |      |        |        |  |   |       |       |      |     |  |   |   |   |   |   |  |
|----|--|------|------|--------|--------|--|---|-------|-------|------|-----|--|---|---|---|---|---|--|
| 19 | To reduce waste generation and maximise reuse and recycling                    | Poor | Med  | Decl   | Decl   |  | × | Local | ST-LT | Perm | Med |  | - | - | - | - | The policy is concerned primarily with the location of development as opposed to the amount. However, insofar as it supports an increase in development, it will also result in an increase in waste arising from construction activity and, ultimately, operation upon completion. The opportunities for reuse and recycling are not addressed. Effects are likely to be localised due to the exclusive focus of the policy on Abertillery.                    | Construction waste will need to be subject to sustainable management. There is a need to ensure that new development is associated with the establishment of sustainable waste management opportunities. |
| 20 | To maintain current air quality  | Good | Low  | Stable | Stable |  | × | Local | ST-LT | Perm | Med |  | 0 | - | - | - | The policy is concerned primarily with the location of development as opposed to the amount. However, insofar as it supports an increase in development, it will also result in an increase in density of emissions sources that are unlikely to be completely offset by the potential for a reduction in the need to travel and increased availability of public transport. Effects will be localised due to the exclusive focus of the policy on Abertillery. |  |
| 21 | To maintain current low levels of vulnerability of all development to flooding | Good | High | Stable | Stable |  | × | Local | MT-LT | Perm | Low |  | 0 | 0 | - | - | The policy may result in an increase in impermeable surfacing that may have the potential to increase risk of localised flooding.   | There will be a need to ensure that development is designed to be both flood resilient and reduce the risk of flooding, particularly arising from increased run off.                                     |
| 22 | To promote the use of sustainably sourced products and resources               | ?    | ?    | ?      | ?      |  | - | Local | ST-LT | Perm | Med |  | 0 | 0 | 0 | 0 | The policy is concerned primarily with the location of development as opposed to the means of construction. There is therefore no clear interrelationship between the policy and the objective.   |  |

|    |  |     |     |        |      |   |       |       |      |     |  |   |   |   |   |   |
|----|--|-----|-----|--------|------|---|-------|-------|------|-----|--|---|---|---|---|---|
| 23 | To increase energy efficiency and generation and use of renewable energy across the County Borough | ?   | ?   | ?      | ?    | - | Local | ST-LT | Perm | Med |  | 0 | 0 | 0 | 0 | The policy is concerned primarily with the location of development. There is therefore no clear interrelationship between the policy and the objective.   |
| 24 | To conserve and enhance surface and ground water quality   | Mod | Med | Impr   | Impr | × | Local | LT    | Perm | Low |  | 0 | 0 | - | - | The policy should result in an increase in development densities within Abertillery - this may increase the potential for pollutants to enter the water system, although the effects are considered likely to be highly localised.  |
| 25 | To protect the quality and character of the landscape and enhance where necessary                  | Mod | Med | Stable | Decl | ✓ | Local | ST-LT | Perm | Low |  | 0 | + | + | + | There is the potential for a slight benefit in the longer term insofar as the locational focus of development on an existing settlement should safeguard against adverse effects on the quality and character of the surrounding landscape where openness is considered to be of particular importance. |

Table F.3 – SA Assessment of SP3

**SP3 - Creating a network of sustainable linked communities to spread regeneration benefits**

The development and use of land throughout the County Borough will be determined by the need to ensure that all communities will have good access to Ebbw Vale. This will be achieved by ensuring that there is a network of hubs which have good public transport links with Ebbw Vale.

| SA Objective |   | Baseline |      | Trends |        | Effects |         |       |      |      |    | Assessment |    |    |    | Commentary   | Mitigation/enhancement |
|--------------|---|----------|------|--------|--------|---------|---------|-------|------|------|----|------------|----|----|----|--|------------------------|
|              |   | Cond     | Sens | Curr   | Ftre   | Mag     | Scale   | Dur   | T/P  | Cert | ST | MT         | LT | Sm |    |  |                        |
| 1            | To promote economic growth and strengthen and diversify the local economy                                   | Poor     | Med  | Stable | Stable | ✓       | Sub-Reg | MT-LT | Perm | Med  |    | +          | ++ | ++ | ++ | An effective transport system is critical in supporting economic growth - the development of a connecting hub network centred on Ebbw Vale should support the objective.                                 |                        |
| 2            | To increase levels of local employment and ensure distribution of opportunities                             | Poor     | Med  | Impr   | Stable | ✓       | Sub-Reg | MT-LT | Perm | Low  |    | +          | +  | ++ | ++ | The establishment of connected hubs should assist in facilitating a more even distribution of opportunities across the County Borough.   |                        |
| 3            | To enable the development of a strong tourism economy in Blaenau Gwent, complementary to the regional offer | Mod      | Med  | Stable | Stable | ✓       | Local   | MT-LT | Perm | Low  |    | 0          | +  | +  | +  | The policy is not directly linked to promoting tourism; however, the establishment of effective public transport links between networked communities will provide a good support for any tourism growth. |                        |
| 4            | To enhance the viability and vitality of town centres   | Poor     | Med  | Impr   | Impr   | ✓       | Sub-Reg | MT-LT | Perm | Med  |    | +          | ++ | ++ | ++ | Improved connections via public transport across the County Borough should help to underpin improved vitality in the towns, delivering increased benefits against the objective over time.               |                        |
| 5            | To meet identified housing needs  | Poor     | Med  | Stable | Stable | -       | Local   | ST-LT | Perm | Med  |    | 0          | 0  | 0  | 0  | There is no clear interrelationship between the policy and the objective.  |                        |
| 6            | To improve the quality of Blaenau Gwent's housing stock   | Poor     | Med  | Stable | Stable | -       | Local   | ST-LT | Perm | High |    | 0          | 0  | 0  | 0  | There is no clear interrelationship between the policy and the objective.  |                        |
| 7            | To secure the delivery and maintenance of quality affordable housing  | Mod      | Med  | Stable | Stable | -       | Local   | ST-LT | Perm | High |    | 0          | 0  | 0  | 0  | There is no clear interrelationship between the policy and the objective.  |                        |
| 8            | To improve educational attainment and increase skills levels  | Poor     | Med  | Impr   | Impr   | -       | Local   | ST-LT | Perm | Med  |    | 0          | 0  | 0  | 0  | There is no clear interrelationship between the policy and the objective.  |                        |

|    |   |      |      |        |        |    |         |       |      |     |  |     |     |     |     |  |
|----|---|------|------|--------|--------|----|---------|-------|------|-----|--|-----|-----|-----|-----|--|
| 9  | To improve accessibility to education, leisure, employment, health, homes and community services for all sectors of the community   | Mod  | Med  | Stable | Stable | ✓✓ | Sub-Reg | MT-LT | Perm | Med |  | ++  | +++ | +++ | +++ | The aims of the policy directly align with those of the objective. Effects should be most marked in the medium to longer term as more development comes forward.   |
| 10 | To promote community health, social care and well-being   | Poor | Med  | Stable | Stable | ✓  | Local   | MT-LT | Perm | Low |  | +   | ++  | ++  | ++  | Improved connections via public transport across the County Borough should help to enable a greater proportion of the population to access key services and facilities, as well as providing increased choices.  |
| 11 | To reduce crime, social disorder and fear of crime  | Mod  | Low  | Impr   | Impr   | ✓  | Local   | LT    | Perm | Low |  | 0   | 0   | +   | +   | Insofar as ensuring that all communities have access to Ebbw Vale, which will offer the greatest range of services and facilities, there is the potential for the policy to deliver some indirect benefits against the objective.  |
| 12 | To protect and enhance the Welsh culture  | Mod  | Low  | Stable | Stable | ✓  | Local   | LT    | Perm | Low |  | 0   | 0   | +   | +   | The establishment of connected hubs should assist in fostering a greater sense of community and support cultural activities.   |
| 13 | To encourage modal shift from private transport to sustainable transport  | Mod  | Med  | Stable | Stable | ✓✓ | Sub-Reg | MT-LT | Perm | Med |  | ++  | ++  | +++ | +++ | The aims of the policy directly align with those of the objective. Effects should be most marked in the medium to longer term as more development comes forward.   |
| 14 | To protect and enhance biodiversity across Blaenau Gwent  | Mod  | High | Stable | Impr   | -  | Local   | ST-LT | Perm | Low |  | 0   | 0   | 0   | 0   | There is no clear interrelationship between the policy and the objective.  |
| 15 | To conserve and enhance the heritage assets of Blaenau Gwent and their settings   | Poor | High | Decl   | Decl   | -  | Local   | ST-LT | Perm | Low |  | 0   | 0   | 0   | 0   | There is no clear interrelationship between the policy and the objective.  |
| 16 | To make the best use of previously developed land and existing buildings to minimise pressure for greenfield development, where this will not result in damage or loss to biodiversity. | Mod  | Med  | Stable | Stable | ✓  | Sub-Reg | ST-LT | Perm | Med |  | +   | ++  | ++  | ++  | The policy supports the delivery of a cohesive public transport network across hub settlements and linked to Ebbw Vale - this will be an important element of enabling the maximisation of development potential within the existing urban envelope of settlements across the County Borough, which should deliver benefits against the objective. |
| 17 | To conserve soil resources and their quality  | Poor | Med  | Stable | Impr   | ?  | Sub-Reg | ST-LT | Temp | Low |  | +/- | +/- | +/- | +/- | There is insufficient detail to make an accurate prediction of effects.  |

|    |  |      |      |        |        |  |   |         |       |      |     |  |     |     |     |     |  |   |
|----|--|------|------|--------|--------|--|---|---------|-------|------|-----|--|-----|-----|-----|-----|--|---|
| 18 | To reduce emissions of greenhouse gases, in particular carbon dioxide                              | Mod  | High | Stable | Impr   |  | ✓ | Reg/Nat | LT    | Temp | Low |  | 0   | 0   | +   | +   | The policy has the potential to contribute to a reduction in transport related emissions through the provision of a connected network of public transport.   |   |
| 19 | To reduce waste generation and maximise reuse and recycling  | Poor | Med  | Decl   | Decl   |  | - | Local   | ST-LT | Perm | Med |  | 0   | 0   | 0   | 0   | There is no clear interrelationship between the policy and the objective.  |   |

| 25 | To protect the quality and character of the landscape and enhance where necessary                  | Mod  | Med  | Stable | Decl   |  | ? | Sub-Reg | ST-LT | Temp | Low |  | +/- | +/- | +/- | +/- | There is insufficient detail to make an accurate prediction of effects.  |   |

Table F.4 – SA Assessment of SP4

**SP4 - Retail Hierarchy**

Major retail, administrative and cultural developments will take place in the principal retail centre of Ebbw Vale. The District /Local centres of Tredegar, Brynmawr, Blaina and Abertillery will be protected and enhanced to improve vitality and viability and ensure they meet the needs of their districts. They will also develop new complementary roles based around historical, recreational and tourism potential. Local shopping centres will be protected and enhanced to provide facilities for local communities.

| SA Objective |   | Baseline |      | Trends |        | Effects |         |       |      |      | Assessment |    |     |     | Commentary   | Mitigation/enhancement |
|--------------|---|----------|------|--------|--------|---------|---------|-------|------|------|------------|----|-----|-----|--|------------------------|
|              |   | Cond     | Sens | Curr   | Ftre   | Mag     | Scale   | Dur   | T/P  | Cert | ST         | MT | LT  | Sm  |  |                        |
| 1            | To promote economic growth and strengthen and diversify the local economy                                   | Poor     | Med  | Stable | Stable | ✓✓      | Sub-Reg | MT-LT | Perm | High | ++         | ++ | +++ | +++ | Retail is a critical component of the economy and in seeking to protect and enhance the offer and complementary activities across the County Borough, the policy has considerable potential to deliver beneficial effects.                                       |                        |
| 2            | To increase levels of local employment and ensure distribution of opportunities                             | Poor     | Med  | Impr   | Stable | ✓✓      | Local   | ST-LT | Perm | High | ++         | ++ | +++ | +++ | The provision of increased retail development at centres across the County Borough, supported by complementary forms of development, can be a key source of increased local job opportunities at a range of levels.  |                        |
| 3            | To enable the development of a strong tourism economy in Blaenau Gwent, complementary to the regional offer | Mod      | Med  | Stable | Stable | ✓       | Sub-Reg | MT-LT | Perm | Med  | +          | +  | ++  | ++  | The policy supports the development of retail in conjunction with historical, recreational and tourism related development in key settlements across the County Borough, which should deliver benefits for tourism, particularly over the medium to longer term. |                        |
| 4            | To enhance the viability and vitality of town centres   | Poor     | Med  | Impr   | Impr   | ✓       | Sub-Reg | MT-LT | Perm | High | +          | +  | ++  | ++  | Retail provision and the complementary offer are key to attracting custom in town centres - an improvement to these for local and visitor needs across the County Borough should help to support the objective.  |                        |
| 5            | To meet identified housing needs  | Poor     | Med  | Stable | Stable | -       | Local   | ST-LT | Perm | Med  | 0          | 0  | 0   | 0   | There is no clear interrelationship between the policy and the objective.  |                        |
| 6            | To improve the quality of Blaenau Gwent's housing stock   | Poor     | Med  | Stable | Stable | -       | Local   | ST-LT | Perm | Med  | 0          | 0  | 0   | 0   | There is no clear interrelationship between the policy and the objective.  |                        |
| 7            | To secure the delivery and maintenance of quality affordable housing  | Mod      | Med  | Stable | Stable | -       | Local   | ST-LT | Perm | High | 0          | 0  | 0   | 0   | There is no clear interrelationship between the policy and the objective.  |                        |
| 8            | To improve educational attainment and   | Poor     | Med  | Impr   | Impr   | -       | Local   | ST-LT | Perm | Med  | 0          | 0  | 0   | 0   | There is no clear interrelationship between the policy and the objective.  |                        |

|    |   |      |      |        |        |  |   |         |       |      |     |  |     |     |     |     |  |  |
|----|---|------|------|--------|--------|--|---|---------|-------|------|-----|--|-----|-----|-----|-----|--|--|
|    | increase skills levels  |      |      |        |        |  |   |         |       |      |     |  |     |     |     |     |  |  |
| 9  | To improve accessibility to education, leisure, employment, health, homes and community services for all sectors of the community | Mod  | Med  | Stable | Stable |  | ✓ | Local   | MT-LT | Perm | Low |  | +   | +   | ++  | ++  |  | The policy makes reference to ensuring that complementary recreational and tourism activities are developed in tandem with retail - this has the potential to deliver some localised benefits over time.   |
| 10 | To promote community health, social care and well-being   | Poor | Med  | Stable | Stable |  | ✓ | Local   | LT    | Perm | Med |  | +   | +   | ++  | ++  |  | Insofar as the policy supports an increase in the range of facilities and services provided at the local level and for regional catchments (in the case of Ebbw Vale) there is the potential for some beneficial effects against the objective.  |
| 11 | To reduce crime, social disorder and fear of crime  | Mod  | Low  | Impr   | Impr   |  | ✓ | Local   | MT-LT | Perm | Low |  | +   | +   | +   | +   |  | There is evidence to suggest causality between criminal activity and a 'lack of things to do'. As such, in seeking to broaden the offer of all key centres in the County Borough, the policy offers the potential to deliver some benefits.  |
| 12 | To protect and enhance the Welsh culture  | Mod  | Low  | Stable | Stable |  | ✓ | Sub-Reg | MT-LT | Perm | Med |  | +   | +   | +   | +   |  | In supporting additional retail, cultural and other complementary developments within the key settlements of the County Borough, the policy could work with others to support an enhanced cultural identity.   |
| 13 | To encourage modal shift from private transport to sustainable transport  | Mod  | Med  | Stable | Stable |  | ✓ | Local   | MT-LT | Perm | Low |  | +   | +   | +   | +   |  | The policy seeks to bolster the range of facilities and services in key settlements across the County Borough - this will help to increase the appeal of destinations already served by public transport, which could have some benefits against the objective.                        |
| 14 | To protect and enhance biodiversity across Blaenau Gwent  | Mod  | High | Stable | Impr   |  | ? | Sub-Reg | MT-LT | Temp | Med |  | +   | +/- | +/- | +   |  | By focusing development onto the existing settlements, the policy may assist in safeguarding against physical expansion of settlements, thus protecting against harmful effects to rural biodiversity. This may offset to some degree by demand for brownfield sites for regeneration. |
| 15 | To conserve and enhance the heritage assets of Blaenau Gwent and their settings   | Poor | High | Decl   | Decl   |  | ? | Sub-Reg | MT-LT | Temp | Med |  | +/- | +/- | +/- | +/- |  | Dependent upon the types of development proposed and their form, there is the potential for a range of effects in respect of urban heritage assets.  |
|    |   |      |      |        |        |  |   |         |       |      |     |  |     |     |     |     |  | Policies should include safeguards against adversely affecting the biodiversity resource.  |
|    |   |      |      |        |        |  |   |         |       |      |     |  |     |     |     |     |  | Policies should include safeguards against adversely affecting heritage.   |

|    |   |      |      |        |        |  |   |         |       |      |      |  |    |    |    |    |  |  |
|----|---|------|------|--------|--------|--|---|---------|-------|------|------|--|----|----|----|----|--|--|
| 16 | To make the best use of previously developed land and existing buildings to minimise pressure for greenfield development, where this will not result in damage or loss to biodiversity. | Mod  | Med  | Stable | Stable |  | ✓ | Sub-Reg | MT-LT | Perm | Med  |  | +  | ++ | ++ | ++ | In focusing retail and associated development on existing settlements, the policy should contribute to achieving the objective and delivering maximised development within the existing urban envelope.  | Policies should include safeguards against adversely affecting the biodiversity resource.  |
| 17 | To conserve soil resources and their quality  | Poor | Med  | Stable | Impr   |  | - | Local   | ST-LT | Perm | Med  |  | 0  | 0  | 0  | 0  | There is no clear interrelationship between the policy and the objective.  |  |
| 18 | To reduce emissions of greenhouse gases, in particular carbon dioxide   | Mod  | High | Stable | Impr   |  | × | Reg/Nat | ST-LT | Perm | High |  | -  | -- | -- | -  | The policy encourages increased levels of development, which will increase the sources of emissions of greenhouse gases as well as potentially encouraging an increase in trip generation. It is likely that in combination these will have adverse effects against the objective. |  |
| 19 | To reduce waste generation and maximise reuse and recycling   | Poor | Med  | Decl   | Decl   |  | × | Sub-Reg | ST-LT | Perm | Med  |  | -- | -- | -- | -- | The policy encourages increased levels of development, which is likely to increase waste generation from construction and subsequent operation. The policy does not reference waste management, thus effects are assumed to be potentially adverse.                                |  |
| 20 | To maintain current air quality   | Good | Low  | Stable | Stable |  | × | Local   | ST-LT | Perm | High |  | -- | -- | -- | -- | The policy involves increased levels of development within the existing settlements - this is likely to increase emissions and development densities, both of which may result in localised degradation of air quality.  |  |
| 21 | To maintain current low levels of vulnerability of all development to flooding  | Good | High | Stable | Stable |  | × | Local   | MT-LT | Perm | Med  |  | -  | -  | -  | -  | The policy may result in an increase in impermeable surfacing that may have the potential to increase risk of localised flooding.  | There will be a need to ensure that development is designed to be both flood resilient and reduce the risk of flooding, particularly arising from increased run off. |
| 22 | To promote the use of sustainably sourced products and resources  | ?    | ?    | ?      | ?      |  | - | Local   | ST-LT | Perm | Med  |  | 0  | 0  | 0  | 0  | The policy is concerned primarily with the location and type of development as opposed to the means of construction. There is therefore no clear interrelationship between the policy and  |  |

|    |  |     |     |        |      |  |   |         |       |      |     |  |   |   |    |   |   |  |
|----|--|-----|-----|--------|------|--|---|---------|-------|------|-----|--|---|---|----|---|---|--|
|    |  |     |     |        |      |  |   |         |       |      |     |  |   |   |    |   | the objective.  |  |
| 23 | To increase energy efficiency and generation and use of renewable energy across the County Borough | ?   | ?   | ?      | ?    |  | - | Local   | ST-LT | Perm | Med |  | 0 | 0 | 0  | 0 | The policy is concerned primarily with the location and type of development. There is therefore no clear interrelationship between the policy and the objective.  |  |
| 24 | To conserve and enhance surface and ground water quality   | Mod | Med | Impr   | Impr |  | x | Local   | MT-LT | Perm | Low |  | - | - | -- | - | The policy should result in an increase in development densities within all key settlements - this may increase the potential for pollutants to enter the water system, although the effects are considered likely to be localised.   |  |
| 25 | To protect the quality and character of the landscape and enhance where necessary                  | Mod | Med | Stable | Decl |  | ✓ | Sub-Reg | MT-LT | Perm | Low |  | + | + | +  | + | There is the potential for a slight benefit in the longer term insofar as the locational focus of development on existing settlements should safeguard against adverse effects on the quality and character of the surrounding landscape where openness is considered to be of particular importance. |  |

Table F.5 – SA Assessment of SP5

**SP5 - Employment and Diversification of the Economy**

The employment and economic development needs of Blaenau Gwent will be met by the identification of 50-80 ha of land for employment and business purposes during the plan period. The employment roles of major industrial areas will be identified to assist in the diversification of employment and support the specialisation of manufacturing. Mixed-use sites will be identified close to town centres to enhance town centre based employment in the service sector.

| SA Objective |   | Baseline |      | Trends |        | Effects |         |       |      |      | Assessment |    |     |     | Commentary   | Mitigation/<br>enhancement |
|--------------|---|----------|------|--------|--------|---------|---------|-------|------|------|------------|----|-----|-----|--|----------------------------|
|              |   | Cond     | Sens | Curr   | Ftre   | Mag     | Scale   | Dur   | T/P  | Cert | ST         | MT | LT  | Sm  |  |                            |
| 1            | To promote economic growth and strengthen and diversify the local economy                                   | Poor     | Med  | Stable | Stable | ✓✓      | Sub-Reg | ST-LT | Perm | High | ++         | ++ | +++ | +++ | The policy is directly aligned with the objective and should achieve significant benefits over the duration of the plan period.  |                            |
| 2            | To increase levels of local employment and ensure distribution of opportunities                             | Poor     | Med  | Impr   | Stable | ✓✓      | Sub-Reg | ST-LT | Perm | High | ++         | ++ | +++ | +++ | The policy is directly aligned with the objective and should achieve significant benefits over the duration of the plan period, particularly as the locational focus covers both existing business locations and new sites close to the key settlements. |                            |
| 3            | To enable the development of a strong tourism economy in Blaenau Gwent, complementary to the regional offer | Mod      | Med  | Stable | Stable | -       | Local   | ST-LT | Perm | Med  | 0          | 0  | 0   | 0   | There is no clear interrelationship between the policy and the objective.  |                            |
| 4            | To enhance the viability and vitality of town centres   | Poor     | Med  | Impr   | Impr   | ✓       | Local   | MT-LT | Perm | Med  | +          | +  | ++  | ++  | The development of mixed use sites close to town centres should serve to increase the catchment population for town centre facilities and services with the potential for beneficial effects against the objective over time.                            |                            |
| 5            | To meet identified housing needs  | Poor     | Med  | Stable | Stable | -       | Local   | ST-LT | Perm | Med  | 0          | 0  | 0   | 0   | There is no clear interrelationship between the policy and the objective.  |                            |
| 6            | To improve the quality of Blaenau Gwent's housing stock   | Poor     | Med  | Stable | Stable | -       | Local   | ST-LT | Perm | High | 0          | 0  | 0   | 0   | There is no clear interrelationship between the policy and the objective.  |                            |
| 7            | To secure the delivery and maintenance of quality affordable housing  | Mod      | Med  | Stable | Stable | -       | Local   | ST-LT | Perm | High | 0          | 0  | 0   | 0   | There is no clear interrelationship between the policy and the objective.  |                            |
| 8            | To improve educational attainment and increase skills levels  | Poor     | Med  | Impr   | Impr   | ✓       | Local   | MT-LT | Perm | Med  | +          | +  | ++  | ++  | Diversification of the local employment and business opportunities should serve to increase the range and availability of opportunities for vocational and workplace based training and upskilling.  |                            |

|    |   |      |      |        |        |  |   |         |       |      |     |  |     |     |     |     |   |   |
|----|---|------|------|--------|--------|--|---|---------|-------|------|-----|--|-----|-----|-----|-----|---|---|
| 9  | To improve accessibility to education, leisure, employment, health, homes and community services for all sectors of the community   | Mod  | Med  | Stable | Stable |  | ✓ | Local   | MT-LT | Perm | Med |  | +   | +   | ++  | ++  | The locational approach to employment and business development set out in the policy should assist in increasing the accessibility of employment opportunities, which supports the objective.   |   |
| 10 | To promote community health, social care and well-being   | Poor | Med  | Stable | Stable |  | ✓ | Local   | LT    | Perm | Low |  | +   | +   | +   | +   | There is some evidence to suggest that worklessness and poor health can be linked - by increasing the range and availability of job opportunities locally, the policy offers the potential to deliver some benefits against the objective.                            |   |
| 11 | To reduce crime, social disorder and fear of crime  | Mod  | Low  | Impr   | Impr   |  | ✓ | Local   | MT-LT | Perm | Low |  | +   | +   | +   | +   | There is evidence to suggest causality between criminal activity and a 'lack of things to do'. As such, in seeking to broaden the range and availability of employment opportunities in the County Borough, the policy offers the potential to deliver some benefits. |   |
| 12 | To protect and enhance the Welsh culture  | Mod  | Low  | Stable | Stable |  | - | Local   | ST-LT | Perm | Med |  | 0   | 0   | 0   | 0   | There is no clear interrelationship between the policy and the objective.   |   |
| 13 | To encourage modal shift from private transport to sustainable transport  | Mod  | Med  | Stable | Stable |  | ✓ | Sub-Reg | LT    | Perm | Low |  | 0   | +   | +   | +   | The policy seeks to group employment in existing centres and adjacent to town centres - this increases the viability of utilising public transport and may convey benefits against the objective in the longer term.  |   |
| 14 | To protect and enhance biodiversity across Blaenau Gwent  | Mod  | High | Stable | Impr   |  | ? | Sub-Reg | MT-LT | Perm | Med |  | +/- | +/- | +/- | +/- | Insofar as the policy seeks to deliver development predominantly in or adjacent to existing centres, the policy may help to minimise expansion into the countryside. However, benefits may be offset to some degree by biodiversity loss on brownfield sites.         |   |
| 15 | To conserve and enhance the heritage assets of Blaenau Gwent and their settings   | Poor | High | Decl   | Decl   |  | ? | Local   | ST-LT | Temp | Med |  | +/- | +/- | +/- | +/- | There is unlikely to be a direct relationship between the policy and the objective; however, this will be dependent upon the precise locations of development and as such, effects cannot be accurately predicted.  |   |
| 16 | To make the best use of previously developed land and existing buildings to minimise pressure for greenfield development, where this will not result in damage or loss to biodiversity. | Mod  | Med  | Stable | Stable |  | ✓ | Sub-Reg | MT-LT | Perm | Med |  | +   | ++  | ++  | ++  | The policy seeks to deliver increased employment development in existing locations, which should help to secure the re-use of brownfield sites in advance of greenfield.  | There is a need to ensure that all new employment development is sited taking biodiversity considerations into account. |

|    |  |      |      |        |        |  |    |         |       |      |      |  |     |     |     |     |   |  |
|----|--|------|------|--------|--------|--|----|---------|-------|------|------|--|-----|-----|-----|-----|---|--|
| 17 | To conserve soil resources and their quality   | Poor | Med  | Stable | Impr   |  | ✓  | Local   | MT-LT | Perm | High |  | +   | +   | ++  | ++  | In seeking to increase employment development in established industrial locations, it is considered likely that the policy will result in the remediation of contaminated land, which should convey benefits against the objective. |  |
| 18 | To reduce emissions of greenhouse gases, in particular carbon dioxide                              | Mod  | High | Stable | Impr   |  | xx | Reg/Nat | ST-LT | Perm | High |  | --  | --  | --  | --  | The delivery of the policy will involve substantial new development, which is likely to increase the sources of GHG emissions, both in terms of built development and transport movements.  |  |
| 19 | To reduce waste generation and maximise reuse and recycling  | Poor | Med  | Decl   | Decl   |  | xx | Sub-Reg | MT-LT | Perm | High |  | --  | --  | --  | --  | The development of 50-80 ha. of new employment land will result in considerable construction and potentially demolition wastes, as well as operational wastes. There is no reference to how this will be addressed in the policy.   | New development should be subject to a sustainable waste management system.  |
| 20 | To maintain current air quality  | Good | Low  | Stable | Stable |  | xx | Local   | ST-LT | Perm | High |  | --  | --  | --  | --  | The scale of development supported by the policy has the potential to give rise to increased emissions and localised degradation of air quality arising from a combination of built development, processes and transportation.      |  |
| 21 | To maintain current low levels of vulnerability of all development to flooding                     | Good | High | Stable | Stable |  | x  | Local   | ST-LT | Perm | Low  |  | -   | -   | --  | -   | There is a risk that the level of new development will introduce a sufficient increase in impermeable surfacing to result in an elevated risk of localised flooding arising from run off.   | All new development should be subject to feasibility testing for SuDS and systems incorporated if appropriate; and designed to be flood resilient. |
| 22 | To promote the use of sustainably sourced products and resources                                   | ?    | ?    | ?      | ?      |  | ?  | Local   | ST-LT | Temp | Low  |  | +/- | +/- | +/- | +/- | There is insufficient detail for this to be accurately assessed.  |  |
| 23 | To increase energy efficiency and generation and use of renewable energy across the County Borough | ?    | ?    | ?      | ?      |  | ?  | Sub-Reg | MT-LT | Perm | Low  |  | +/- | +/- | +/- | +/- | There is the potential for the policy to make a contribution to this objective; however, no reference is made in the policy thus an accurate prediction of effects cannot be made.  | Reference should be made to the need to integrate energy efficiency and renewable energy sourcing into proposals.                                  |
| 24 | To conserve and enhance surface and ground water quality   | Mod  | Med  | Impr   | Impr   |  | x  | Local   | MT-LT | Perm | Low  |  | -   | -   | --  | -   | There is the potential for development delivered under this policy to increase the risk of groundwater pollution from run off.  | Drainage systems should incorporate appropriate filtration to minimise the risk  |

Table F.6 – SA Assessment of SP6

**SP6 - Development of the Tourism and Leisure sectors**

Foster sustainable tourism and leisure sectors which re-engage local communities with the natural and historic environment and boost the local economy.

| SA Objective |   | Baseline |      | Trends |        | Effects |         |       |      |      | Assessment |    |     |     | Commentary | Mitigation /enhancement  |  |
|--------------|---|----------|------|--------|--------|---------|---------|-------|------|------|------------|----|-----|-----|------------|--|--|
|              |   | Cond     | Sens | Curr   | Ftre   | Mag     | Scale   | Dur   | T/P  | Cert | ST         | MT | LT  | Sm  |            |  |  |
| 1            | To promote economic growth and strengthen and diversify the local economy                                   | Poor     | Med  | Stable | Stable | ✓       | Sub-Reg | MT-LT | Perm | Med  |            | +  | +   | ++  | ++         | There is the potential for the development of the tourism economy to deliver increased economic growth in a currently under-exploited market sector, delivering benefits against the objective.      |  |
| 2            | To increase levels of local employment and ensure distribution of opportunities                             | Poor     | Med  | Impr   | Stable | ✓       | Local   | MT-LT | Perm | Low  |            | +  | +   | ++  | ++         | The development of the tourism market may offer some localised opportunities for employment, which are likely to be distributed across the County Borough.   |  |
| 3            | To enable the development of a strong tourism economy in Blaenau Gwent, complementary to the regional offer | Mod      | Med  | Stable | Stable | ✓✓      | Sub-Reg | MT-LT | Perm | High |            | ++ | +++ | +++ | +++        | The policy is aligned with the objective and should deliver considerable benefits over the duration of the plan period.  |  |
| 4            | To enhance the viability and vitality of town centres   | Poor     | Med  | Impr   | Impr   | ✓✓      | Local   | MT-LT | Perm | Med  |            | ++ | ++  | +++ | +++        | Focused investment in delivering tourism development across the County Borough should assist in supporting and, to some extent, catalysing investment to improve town centre vitality and viability. |  |
| 5            | To meet identified housing needs  | Poor     | Med  | Stable | Stable | -       | Local   | ST-LT | Perm | High |            | 0  | 0   | 0   | 0          | There is no clear interrelationship between the policy and the objective.  |  |

|    |   |      |     |        |        |   |         |       |      |      |   |   |    |    |   |
|----|---|------|-----|--------|--------|---|---------|-------|------|------|---|---|----|----|---|
| 6  | To improve the quality of Blaenau Gwent's housing stock   | Poor | Med | Stable | Stable | - | Local   | ST-LT | Perm | High | 0 | 0 | 0  | 0  | There is no clear interrelationship between the policy and the objective.   |
| 7  | To secure the delivery and maintenance of quality affordable housing  | Mod  | Med | Stable | Stable | - | Local   | ST-LT | Perm | High | 0 | 0 | 0  | 0  | There is no clear interrelationship between the policy and the objective.   |
| 8  | To improve educational attainment and increase skills levels  | Poor | Med | Impr   | Impr   | ✓ | Local   | MT-LT | Perm | Low  | 0 | + | +  | +  | There is the potential that development of the tourism economy may offer some localised opportunities for upskilling and vocational training.   |
| 9  | To improve accessibility to education, leisure, employment, health, homes and community services for all sectors of the community | Mod  | Med | Stable | Stable | ✓ | Local   | MT-LT | Perm | Low  | 0 | + | +  | +  | Development in the tourism industry should deliver benefits in terms of increased accessibility of leisure provision, which could deliver localised benefits against the objective.   |
| 10 | To promote community health, social care and well-being   | Poor | Med | Stable | Stable | ✓ | Local   | MT-LT | Perm | Med  | + | + | ++ | ++ | There is evidence to suggest causality between health and well-being and the environment - by improving the tourism and leisure opportunities, there is potential for the policy to deliver beneficial effects.                     |
| 11 | To reduce crime, social disorder and fear of crime  | Mod  | Low | Impr   | Impr   | ✓ | Local   | MT-LT | Perm | Low  | 0 | + | +  | +  | Crime levels are sometimes attributed in part to a 'lack of things to do'. The policy, through delivering additional activities and recreational opportunities, may have a positive effect against the objective in some locations. |
| 12 | To protect and enhance the Welsh culture  | Mod  | Low | Stable | Stable | ✓ | Sub-Reg | MT-LT | Perm | Low  | 0 | + | +  | +  | Tourism activities often serve to generate a greater sense of identity and foster increased levels of cultural engagement, which could deliver beneficial effects against the objective.  |
| 13 | To encourage modal shift from private transport to sustainable transport  | Mod  | Med | Stable | Stable | - | Local   | ST-LT | Perm | Med  | 0 | 0 | 0  | 0  | There is unlikely to be an inter-relationship between the policy and the objective.   |

|    |   |      |      |        |        |  |   |         |       |      |      |  |     |     |     |     |  |  |
|----|---|------|------|--------|--------|--|---|---------|-------|------|------|--|-----|-----|-----|-----|--|--|
| 14 | To protect and enhance biodiversity across Blaenau Gwent  | Mod  | High | Stable | Impr   |  | ✓ | Local   | MT-LT | Perm | Low  |  | 0   | +   | +   | +   | In promoting sustainable tourism and leisure, the policy offers opportunities to boost biodiversity, which could have localised benefits against the objective.  |  |
| 15 | To conserve and enhance the heritage assets of Blaenau Gwent and their settings   | Poor | High | Decl   | Decl   |  | ✓ | Local   | MT-LT | Perm | Med  |  | +   | +   | ++  | ++  | The policy seeks to re-engage the local community with the historic environment and draw on heritage assets as a means of developing tourism - this should assist in delivering benefits against the objective.  |  |
| 16 | To make the best use of previously developed land and existing buildings to minimise pressure for greenfield development, where this will not result in damage or loss to biodiversity. | Mod  | Med  | Stable | Stable |  | ? | Local   | MT-LT | Perm | Med  |  | +/- | +/- | +/- | +/- | There is insufficient detail to accurately predict effects against the objective - there is the potential for them to be mixed dependent upon the precise actions supported by the policy.   |  |
| 17 | To conserve soil resources and their quality  | Poor | Med  | Stable | Impr   |  | ? | Local   | MT-LT | Perm | Med  |  | +/- | +/- | +/- | +/- | There is insufficient detail to accurately predict effects against the objective - there is the potential for them to be mixed dependent upon the precise actions supported by the policy.   |  |
| 18 | To reduce emissions of greenhouse gases, in particular carbon dioxide   | Mod  | High | Stable | Impr   |  | × | Reg/Nat | ST-LT | Perm | High |  | -   | -   | --  | -   | Development of the tourism economy is likely to involve some built development and increased trip generation, both of which are likely to result in an increase in the sources of GHG emissions in the County Borough, with potentially adverse effects against the objective. |  |
| 19 | To reduce waste generation and maximise reuse and recycling   | Poor | Med  | Decl   | Decl   |  | × | Local   | MT-LT | Perm | Med  |  | -   | -   | -   | -   | It is likely that the development of the tourism economy will result in an increase in waste generation both during construction and operation.  | Development should be subject to the application of a sustainable waste management system. |

|    |  |      |      |        |        |  |   |         |       |      |     |  |     |     |     |     |   |
|----|--|------|------|--------|--------|--|---|---------|-------|------|-----|--|-----|-----|-----|-----|---|
| 20 | To maintain current air quality  | Good | Low  | Stable | Stable |  | ? | Local   | ST-LT | Perm | Med |  | +/- | +/- | +/- | +/- | There is insufficient detail to accurately predict effects against the objective - there is the potential for them to be mixed dependent upon the precise actions supported by the policy.  |
| 21 | To maintain current low levels of vulnerability of all development to flooding                     | Good | High | Stable | Stable |  | ? | Local   | ST-LT | Perm | Med |  | +/- | +/- | +/- | +/- | There is insufficient detail to accurately predict effects against the objective - there is the potential for them to be mixed dependent upon the precise actions supported by the policy.  |
| 22 | To promote the use of sustainably sourced products and resources                                   | ?    | ?    | ?      | ?      |  | ✓ | Sub-Reg | ST-MT | Temp | Med |  | ++  | ++  | +   | ++  | The policy promotes sustainable tourism development, which is assumed to include an emphasis on delivering sustainability through both design and construction. This has the potential to deliver benefits against the objective, which are likely to be more marked in the short to medium term when construction activities will be more prevalent. |
| 23 | To increase energy efficiency and generation and use of renewable energy across the County Borough | ?    | ?    | ?      | ?      |  | ✓ | Sub-Reg | ST-LT | Perm | Low |  | +   | +   | +   | +   | There is no specific reference made to this in the policy; however, the reference to sustainability suggests that there is the potential for the policy to be beneficial.   |
| 24 | To conserve and enhance surface and ground water quality   | Mod  | Med  | Impr   | Impr   |  | ? | Local   | MT-LT | Perm | Med |  | +/- | +/- | +/- | +/- | There is insufficient detail to accurately predict effects against the objective - there is the potential for them to be mixed dependent upon the precise actions supported by the policy.  |
| 25 | To protect the quality and character of the landscape and enhance where necessary                  | Mod  | Med  | Stable | Decl   |  | ✓ | Sub-Reg | ST-LT | Perm | Med |  | +   | +   | +   | +   | The policy supports the development of sustainable tourism focused on the natural and historic environment, which is likely to convey   |

Table F.7 – SA Assessment of SP7

**SP7 - Housing Provision**

Provision will be made for the development of 3,000 dwellings during the plan period; broken into the following Housing Market Areas

Sirhowy Valley 800

Ebbw Fawr 1,500

Ebbw Fach Upper 400

Ebbw Fach Lower 300

The Delivery of the houses will be back loaded recognising the step change required to reach the higher figures.

2006-2011 500-750

20011-2016 750-1,000

2016-2021 1,000-1,250

| SA Objective | Baseline  |      | Trends |        | Effects |       |         |       |      |     | Assessment |    |    |    | Commentary   | Mitigation/enhancement   |
|--------------|---|------|--------|--------|---------|-------|---------|-------|------|-----|------------|----|----|----|--|--|
|              | Cond  | Sens | Curr   | Ftre   | Mag     | Scale | Dur     | T/P   | Cert | ST  | MT         | LT | Sm |    |  |  |
| 1            | To promote economic growth and strengthen and diversify the local economy                                   | Poor | Med    | Stable | Stable  | -     | Local   | ST-LT | Perm | Med | 0          | 0  | 0  | 0  | There is no clear interrelationship between the policy and the objective.  |  |
| 2            | To increase levels of local employment and ensure distribution of opportunities                             | Poor | Med    | Impr   | Stable  | -     | Local   | ST-LT | Perm | Med | 0          | 0  | 0  | 0  | There is no clear interrelationship between the policy and the objective.  |  |
| 3            | To enable the development of a strong tourism economy in Blaenau Gwent, complementary to the regional offer | Mod  | Med    | Stable | Stable  | -     | Local   | ST-LT | Perm | Med | 0          | 0  | 0  | 0  | There is no clear interrelationship between the policy and the objective.  |  |
| 4            | To enhance the viability and vitality of town centres   | Poor | Med    | Impr   | Impr    | ✓     | Local   | MT-LT | Perm | Med | +          | +  | ++ | ++ | There is the potential for the delivery of additional residential development to support a greater catchment, which in turn could support increased town centre vitality and viability, particularly for Ebbw Vale and Tredegar. Effects likely to increase over time as more development comes forward. |  |
| 5            | To meet identified housing needs  | Poor | Med    | Stable | Stable  | ✓     | Sub-Reg | ST-LT | Temp | Med | +          | ++ | ++ | ++ | The policy will ensure the delivery of additional housing, which should have benefits, although there is no specific reference made to the types of residential development that the policy is seeking to deliver.   | There is a need to provide greater clarity regarding the range and variety of units to be delivered. |

|    |   |      |     |        |        |   |         |       |      |     |  |     |     |     |     |  |

| 6  | To improve the quality of Blaenau Gwent's housing stock   | Poor | Med | Stable | Stable | ? | Sub-Reg | ST-LT | Temp | Med |  | +/- | +/- | +/- | +/- | The policy is concerned solely with increasing the amount of housing and includes no details regarding refurbishment or tenure - there is insufficient detail to make an accurate assessment.                                      |
| 7  | To secure the delivery and maintenance of quality affordable housing  | Mod  | Med | Stable | Stable | ? | Sub-Reg | ST-LT | Temp | Med |  | +/- | +/- | +/- | +/- | The policy is concerned solely with increasing the amount of housing and includes no details regarding refurbishment or tenure - there is insufficient detail to make an accurate assessment.                                      |
| 8  | To improve educational attainment and increase skills levels  | Poor | Med | Impr   | Impr   | - | Local   | ST-LT | Perm | Med |  | 0   | 0   | 0   | 0   | There is no clear direct interrelationship between the policy and the objective.   |
| 9  | To improve accessibility to education, leisure, employment, health, homes and community services for all sectors of the community | Mod  | Med | Stable | Stable | ✓ | Local   | ST-LT | Perm | Low |  | +   | +   | +   | +   | Insofar as the policy seeks to direct new residential development to existing centres, there are likely to be some localised benefits in terms of improved co-locating of residential development and key services and facilities. |
| 10 | To promote community health, social care and well-being   | Poor | Med | Stable | Stable | - | Local   | ST-LT | Perm | Low |  | 0   | 0   | 0   | 0   | There is no clear direct interrelationship between the policy and the objective.   |
| 11 | To reduce crime, social disorder and fear of crime  | Mod  | Low | Impr   | Impr   | - | Local   | ST-LT | Perm | Low |  | 0   | 0   | 0   | 0   | There is no clear direct interrelationship between the policy and the objective.   |
| 12 | To protect and enhance the Welsh culture  | Mod  | Low | Stable | Stable | - | Local   | ST-LT | Perm | Low |  | 0   | 0   | 0   | 0   | There is no clear direct interrelationship between the policy and the objective.   |
| 13 | To encourage modal shift from private transport to sustainable transport  | Mod  | Med | Stable | Stable | ? | Local   | ST-LT | Temp | Med |  | +/- | +/- | +/- | +/- | There is the potential for the location of residential development to assist in encouraging the use of public transport; however, there is insufficient detail to be able to accurately predict effects.                           |

|    |   |      |      |        |        |    |         |       |      |      |     |     |     |     |  |   |
|----|---|------|------|--------|--------|----|---------|-------|------|------|-----|-----|-----|-----|--|---|
| 14 | To protect and enhance biodiversity across Blaenau Gwent  | Mod  | High | Stable | Impr   | ?  | Sub-Reg | ST-LT | Temp | Med  | +/- | +/- | +/- | +/- | There is the potential for residential development to result in a range of biodiversity effects - there is insufficient detail in the policy to accurately predict effects.                              |   |
| 15 | To conserve and enhance the heritage assets of Blaenau Gwent and their settings   | Poor | High | Decl   | Decl   | ?  | Local   | ST-LT | Temp | Med  | +/- | +/- | +/- | +/- | Dependent upon the precise location and form of development proposed, there is the potential for a range of effects to ensue - there is insufficient detail in the policy to accurately predict effects. |   |
| 16 | To make the best use of previously developed land and existing buildings to minimise pressure for greenfield development, where this will not result in damage or loss to biodiversity. | Mod  | Med  | Stable | Stable | ?  | Local   | ST-LT | Temp | Med  | +/- | +/- | +/- | +/- | Dependent upon the precise location and form of development proposed, there is the potential for a range of effects to ensue - there is insufficient detail in the policy to accurately predict effects. |   |
| 17 | To conserve soil resources and their quality  | Poor | Med  | Stable | Impr   | ?  | Local   | ST-LT | Perm | Med  | +/- | +/- | +/- | +/- | Dependent upon the precise location and form of development proposed, there is the potential for a range of effects to ensue - there is insufficient detail in the policy to accurately predict effects. |   |
| 18 | To reduce emissions of greenhouse gases, in particular carbon dioxide   | Mod  | High | Stable | Impr   | xx | Reg/Nat | ST-LT | Perm | High | -   | --  | --- | --  | The policy will result in the delivery of 3000 new dwellings, which will also result in considerable trip generation, all of which will add to the sources of GHG emissions in the County Borough.       |   |
| 19 | To reduce waste generation and maximise reuse and recycling   | Poor | Med  | Decl   | Decl   | x  | Sub-Reg | ST-LT | Perm | High | --  | --  | --  | --  | The construction of new dwellings will result in considerable waste generation during and post-construction. There is no reference made to a sustainable approach to waste management.                   | There is a need to ensure that new development is supported by a requirement to adopt a sustainable approach to waste management. |

|    |  |      |      |        |        |  |    |         |       |      |     |  |     |     |     |     |   |  |
|----|--|------|------|--------|--------|--|----|---------|-------|------|-----|--|-----|-----|-----|-----|---|--|
| 20 | To maintain current air quality  | Good | Low  | Stable | Stable |  | xx | Local   | MT-LT | Perm | Med |  | -   | --  | --  | -   | In areas of considerable increases in residential development densities, there is a risk that local air quality will be degraded considerably.  |  |
| 21 | To maintain current low levels of vulnerability of all development to flooding                     | Good | High | Stable | Stable |  | x  | Local   | ST-LT | Perm | Low |  | -   | --  | --  | -   | In areas of considerable increases in residential development densities, there is the potential for flood risk from run off to be elevated considerably.  |  |
| 22 | To promote the use of sustainably sourced products and resources                                   | ?    | ?    | ?      | ?      |  | ?  | Sub-Reg | ST-LT | Perm | Low |  | +/- | +/- | +/- | +/- | There is the potential for residential development to make use of sustainably sourced products; however, this is not referenced in the policy and therefore it is not possible to accurately predict effects.               |  |
| 23 | To increase energy efficiency and generation and use of renewable energy across the County Borough | ?    | ?    | ?      | ?      |  | ?  | Sub-Reg | ST-LT | Perm | Med |  | +/- | +/- | +/- | +/- | There is the potential for residential development to make a considerable contribution to the objective; however, this is not referenced in the policy and therefore it is not possible to accurately predict effects.      |  |
| 24 | To conserve and enhance surface and ground water quality   | Mod  | Med  | Impr   | Impr   |  | x  | Sub-Reg | ST-LT | Perm | Med |  | -   | -   | -   | -   | The policy involves the delivery of 3000 new homes, which will introduce a substantial increase in impermeable surfacing across the county borough - this presents an increase risk of pollutants entering the watercourse. | There is a need to ensure that new development is supported by drainage systems that incorporate appropriate filtration. |
| 25 | To protect the quality and character of the landscape and enhance where necessary                  | Mod  | Med  | Stable | Decl   |  | ?  | Sub-Reg | ST-LT | Perm | Med |  | +/- | +/- | +/- | +/- | Dependent upon the precise location and form of development proposed, there is the potential for a range of effects to ensue - there is insufficient detail in the policy to accurately predict effects.                    |  |

Table F.8 – SA Assessment of SP8

**SP8 - Affordable Housing**

Between 600 and 800 affordable new homes will be provided between 2006 and 2021.

| SA Objective |   | Baseline |      | Trends |        | Effects |       |       |       |      | Assessment |    |    |    | Commentary | Mitigation/enhancement |   |  |
|--------------|---|----------|------|--------|--------|---------|-------|-------|-------|------|------------|----|----|----|------------|------------------------|---|--|
|              |   | Cond     | Sens | Curr   | Ftre   | Mag     | Scale | Dur   | T/P   | Cert | ST         | MT | LT | Sm |            |                        |   |  |
| 1            | To promote economic growth and strengthen and diversify the local economy                                   | Poor     | Med  | Stable | Stable |         | ?     | Local | MT-LT | Temp | Low        |    | +  | +  | ++         | ++                     | The provision of affordable housing may help to improve economic growth and diversity through attracting a mix of people from different socio-economic groups to live and work in the area.                         |  |
| 2            | To increase levels of local employment and ensure distribution of opportunities                             | Poor     | Med  | Impr   | Stable |         | ✓     | Local | MT-LT | Temp | Low        |    | +  | +  | +          | +                      | The provision of affordable housing may help to improve employment opportunities through attracting a mix of people from different socio-economic groups to live and work in the area, and subsequently, employers. |  |
| 3            | To enable the development of a strong tourism economy in Blaenau Gwent, complementary to the regional offer | Mod      | Med  | Stable | Stable |         | -     | Local | ST-LT | Perm | Low        |    | 0  | 0  | 0          | 0                      | There is no clear interrelationship between the policy and the objective  |  |
| 4            | To enhance the viability and vitality of town centres   | Poor     | Med  | Impr   | Impr   |         | ✓     | Local | MT-LT | Temp | Low        |    | +  | +  | +          | +                      | The provision of affordable housing may contribute to the vitality and viability of town centres, dependent on its location.  | The policy should ensure that a mix of housing, to include a proportion of affordable housing, is provided in the town centres as a wider mix of uses, to improve the vitality and viability of these areas. |
| 5            | To meet identified housing needs  | Poor     | Med  | Stable | Stable |         | ×     | Local | ST-LT | Perm | Low        |    | +  | -- | --         | -                      | The supporting text to the policy suggests that some affordable housing will be provided through sites that are 100% affordable housing. Although this may meet short term housing needs, the sites which are       | Gypsy accommodation is dealt with under policy SP9.  |

|    |   |      |     |        |        |  |    |       |       |      |     |  |    |     |     |     |  |   |  |
|----|---|------|-----|--------|--------|--|----|-------|-------|------|-----|--|----|-----|-----|-----|--|---|--|
|    |   |      |     |        |        |  |    |       |       |      |     |  |    |     |     |     |  | entirely affordable will not lead to the creation of a mixed community, and thus are not considered to be sustainable.  |  |
| 6  | To improve the quality of Blaenau Gwent's housing stock   | Poor | Med | Stable | Stable |  | ?  | Local | ST-LT | Temp | Med |  | ++ | +/- | +/- | +   |  | The policy's supporting text indicates that investment will be made in the Council's housing stock to meet the Welsh Housing Quality Standard. This only applies, however, to council housing stock which may mean that a large proportion of housing remains of a low quality. | Suggest that the improvements to council housing stock are included within the policy wording. The strategy should seek to ensure that refurbishments are undertaken using low carbon technologies. The policy should be widened to include requirements to improve existing non-council stock, especially rental properties and for those on low incomes. |
| 7  | To secure the delivery and maintenance of quality affordable housing  | Mod  | Med | Stable | Stable |  | ✓✓ | Local | ST-LT | Perm | Med |  | ++ | ++  | ++  | ++  |  | The policy will likely lead to the provision of affordable housing. The range is provided in order to provide flexibility in delivery.  |  |
| 8  | To improve educational attainment and increase skills levels  | Poor | Med | Impr   | Impr   |  | -  | Local | ST-LT | Perm | Low |  | 0  | 0   | 0   | 0   |  | There is no clear interrelationship between the policy and the objective  |  |
| 9  | To improve accessibility to education, leisure, employment, health, homes and community services for all sectors of the community | Mod  | Med | Stable | Stable |  | ✓✓ | Local | ST-LT | Perm | Med |  | ++ | ++  | ++  | ++  |  | The policy will likely lead to the improvement in accessibility to homes for more sectors of the community.   | The policy should seek to specify locations in order to ensure that affordable housing is located close to community facilities.   |
| 10 | To promote community health, social care and well-being   | Poor | Med | Stable | Stable |  | ✓  | Local | ST-LT | Perm | Med |  | ++ | +/- | --  | +/- |  | An improvement in the provision of affordable housing will likely improve community well-being. However, in the longer term, sites that are allocated for 100% affordable housing may suffer from social  | The policy should ensure that a mix of housing, to include a proportion of affordable housing, is provided in the town centres as a wider mix of uses, to  |

|    |   |      |      |        |        |  |   |         |       |      |     |  |     |     |     |     |  |  |  |
|----|---|------|------|--------|--------|--|---|---------|-------|------|-----|--|-----|-----|-----|-----|--|--|--|
|    |   |      |      |        |        |  |   |         |       |      |     |  |     |     |     |     |  | problems due to a lack of social mix.  | improve the vitality and viability of these areas.   |
| 11 | To reduce crime, social disorder and fear of crime  | Mod  | Low  | Impr   | Impr   |  | × | Local   | MT-LT | Perm | Med |  | -   | --  | --  | -   |  | In the longer term, sites that are allocated for 100% affordable housing may suffer from social problems due to a lack of social mix.  | The policy should ensure that a mix of housing, to include a proportion of affordable housing, is provided in the town centres as a wider mix of uses, to improve the vitality and viability of these areas. |
| 12 | To protect and enhance the Welsh culture  | Mod  | Low  | Stable | Stable |  | - | Local   | ST-LT | Perm | Low |  | 0   | 0   | 0   | 0   |  | There is no clear interrelationship between the policy and the objective   |  |
| 13 | To encourage modal shift from private transport to sustainable transport  | Mod  | Med  | Stable | Stable |  | ? | Local   | ST-LT | Temp | Med |  | +/- | +/- | +/- | +/- |  | There is the potential for the location of residential development to assist in encouraging the use of public transport; however, there is insufficient detail to be able to accurately predict effects. |  |
| 14 | To protect and enhance biodiversity across Blaenau Gwent  | Mod  | High | Stable | Impr   |  | ? | Sub-Reg | ST-LT | Temp | Med |  | +/- | +/- | +/- | +/- |  | There is the potential for residential development to result in a range of biodiversity effects - there is insufficient detail in the policy to accurately predict effects.                              |  |
| 15 | To conserve and enhance the heritage assets of Blaenau Gwent and their settings   | Poor | High | Decl   | Decl   |  | ? | Local   | ST-LT | Temp | Med |  | +/- | +/- | +/- | +/- |  | Dependent upon the precise location and form of development proposed, there is the potential for a range of effects to ensue - there is insufficient detail in the policy to accurately predict effects. |  |
| 16 | To make the best use of previously developed land and existing buildings to minimise pressure for greenfield development, where this will not result in | Mod  | Med  | Stable | Stable |  | ? | Local   | ST-LT | Perm | Med |  | +/- | +/- | +/- | +/- |  | Dependent upon the precise location and form of development proposed, there is the potential for a range of effects to ensue - there is insufficient detail in the policy to accurately predict effects. |  |

|    |  |      |      |        |        |  |    |         |       |      |      |  |     |     |     |     |   |
|----|--|------|------|--------|--------|--|----|---------|-------|------|------|--|-----|-----|-----|-----|---|
|    | damage or loss to biodiversity.  |      |      |        |        |  |    |         |       |      |      |  |     |     |     |     |   |
| 17 | To conserve soil resources and their quality                                   | Poor | Med  | Stable | Impr   |  | ?  | Local   | ST-LT | Perm | Med  |  | +/- | +/- | +/- | +/- | Dependent upon the precise location and form of development proposed, there is the potential for a range of effects to ensue - there is insufficient detail in the policy to accurately predict effects.      |
| 18 | To reduce emissions of greenhouse gases, in particular carbon dioxide          | Mod  | High | Stable | Impr   |  | xx | Reg/Nat | ST-LT | Perm | High |  | -   | --  | --  | -   | The policy will result in the delivery of new dwellings, which will also result in increased trip generation, all of which will add to the sources of GHG emissions in the County Borough.                    |
| 19 | To reduce waste generation and maximise reuse and recycling                    | Poor | Med  | Decl   | Decl   |  | x  | Sub-Reg | ST-LT | Perm | High |  | --  | --  | --  | --  | The construction of new dwellings will result in considerable waste generation during and post-construction. There is no reference made to a sustainable approach to waste management.                        |
| 20 | To maintain current air quality  | Good | Low  | Stable | Stable |  | xx | Local   | MT-LT | Perm | Med  |  | -   | --  | --  | -   | In areas of considerable increases in residential development densities, there is a risk that local air quality will be degraded.   |
| 21 | To maintain current low levels of vulnerability of all development to flooding | Good | High | Stable | Stable |  | x  | Local   | ST-LT | Perm | Low  |  | -   | --  | --  | -   | In areas of considerable increases in residential development densities, there is the potential for flood risk from run off to be elevated considerably.  |
| 22 | To promote the use of sustainably sourced products and resources               | ?    | ?    | ?      | ?      |  | ?  | Sub-Reg | ST-LT | Perm | Low  |  | +/- | +/- | +/- | +/- | There is the potential for residential development to make use of sustainably sourced products; however, this is not referenced in the policy and therefore it is not possible to accurately predict effects. |

|    |  |     |     |        |      |  |   |         |       |      |     |  |     |     |     |     |  |  |
|----|--|-----|-----|--------|------|--|---|---------|-------|------|-----|--|-----|-----|-----|-----|--|--|
| 23 | To increase energy efficiency and generation and use of renewable energy across the County Borough | ?   | ?   | ?      | ?    |  | ? | Sub-Reg | ST-LT | Perm | Med |  | +/- | +/- | +/- | +/- | There is the potential for residential development to make a considerable contribution to the objective; however, this is not referenced in the policy and therefore it is not possible to accurately predict effects. |  |
| 24 | To conserve and enhance surface and ground water quality   | Mod | Med | Impr   | Impr |  | x | Sub-Reg | ST-LT | Perm | Med |  | -   | -   | -   | -   | The policy involves the delivery of new homes, which will introduce an increase in impermeable surfacing across the county borough - this presents an increased risk of pollutants entering the watercourse.           | There is a need to ensure that new development is supported by drainage systems that incorporate appropriate filtration. |
| 25 | To protect the quality and character of the landscape and enhance where necessary                  | Mod | Med | Stable | Decl |  | ? | Sub-Reg | ST-LT | Perm | Med |  | +/- | +/- | +/- | +/- | Dependent upon the precise location and form of development proposed, there is the potential for a range of effects to ensue - there is insufficient detail in the policy to accurately predict effects.               |  |

Table F.9 – SA Assessment of SP9

**SP9 - Gypsy Accommodation**

6 pitches for unmet gypsy and traveller housing will be provided between 2006-2021

| SA Objective |   | Baseline |      | Trends |        | Effects |       |       |      |      | Assessment |    |    |    | Commentary  | Mitigation/enhancement |

| 15 | To conserve and enhance the heritage assets of Blaenau Gwent and their settings   | Poor | High | Decl   | Decl   | - |       |       |      |     |  | 0 | 0 | 0 | 0 |  | Although there is the potential for unauthorised sites to damage heritage assets dependent upon location, this has not been identified as a key cause of concern in respect of biodiversity. Consequently, effects of formalising site locations are considered likely to be too minor to merit reflection against the objective. |
| 16 | To make the best use of previously developed land and existing buildings to minimise pressure for greenfield development, where this will not result in damage or loss to biodiversity. | Mod  | Med  | Stable | Stable | - |       |       |      |     |  | 0 | 0 | 0 | 0 |  | There is no clear interrelationship between the policy and the objective.   |
| 17 | To conserve soil resources and their quality  | Poor | Med  | Stable | Impr   | - |       |       |      |     |  | 0 | 0 | 0 | 0 |  | Although there is the potential for unauthorised sites to damage soil resources, this has not been identified as a key cause of concern in respect of biodiversity. Consequently, effects of formalising site locations are considered likely to be too minor to merit reflection against the objective.                          |
| 18 | To reduce emissions of greenhouse gases, in particular carbon dioxide   | Mod  | High | Stable | Impr   | - |       |       |      |     |  | 0 | 0 | 0 | 0 |  | There is no clear interrelationship between the policy and the objective.   |
| 19 | To reduce waste generation and maximise reuse and recycling   | Poor | Med  | Decl   | Decl   | ✓ | Local | MT-LT | Perm | Low |  | 0 | + | + | + |  | The provision of a permanent base for travelling communities will afford this sector of the population the opportunity to benefit from established community facilities. There may also be opportunities to ensure that formalised sites are served by mainstream waste management provision.                                     |
| 20 | To maintain current air quality   | Good | Low  | Stable | Stable | - | Local | ST-LT | Perm | Med |  | 0 | 0 | 0 | 0 |  | There is no clear interrelationship between the policy and the objective.   |

|    |  |      |      |        |        |  |   |         |       |      |      |  |   |   |    |    |   |
|----|--|------|------|--------|--------|--|---|---------|-------|------|------|--|---|---|----|----|---|
| 21 | To maintain current low levels of vulnerability of all development to flooding                     | Good | High | Stable | Stable |  | ✓ | Sub-Reg | ST-LT | Perm | High |  | 0 | + | +  | +  | The formalisation of sites offers the opportunity to ensure that flood risk and resilience to flooding form a consideration in determining the location of sites to be allocated for this use.  |
| 22 | To promote the use of sustainably sourced products and resources                                   | ?    | ?    | ?      | ?      |  | - | Local   | ST-LT | Perm | Med  |  | 0 | 0 | 0  | 0  | There is no clear interrelationship between the policy and the objective.   |
| 23 | To increase energy efficiency and generation and use of renewable energy across the County Borough | ?    | ?    | ?      | ?      |  | - |         |       |      |      |  | 0 | 0 | 0  | 0  | There is no clear interrelationship between the policy and the objective.   |
| 24 | To conserve and enhance surface and ground water quality   | Mod  | Med  | Impr   | Impr   |  | ✓ | Sub-Reg | MT-LT | Perm | Med  |  | + | + | ++ | ++ | The formalisation of sites offers the opportunity to ensure that sites are served by appropriate water supply and drainage facilities, which can deliver benefits against this objective.   |
| 25 | To protect the quality and character of the landscape and enhance where necessary                  | Mod  | Med  | Stable | Decl   |  | ✓ | Sub-Reg | MT-LT | Perm | High |  | + | + | ++ | ++ | There is the potential for a slight benefit in the longer term insofar as the identification of permanent sites could help to ensure that unregulated encampments do not adversely affect the quality and character of the landscape where openness is considered to be of particular importance. |

Table F.10 – SA Assessment of SP10

**SP10 - Transport Infrastructure Improvements**

The Council will support improvements to the existing transport infrastructure where they achieve at least one of the following criteria:

- Increase accessibility between the sub-regional and district/local hubs
- Increase accessibility of the strategic transport network
- Increase accessibility of services and facilities
- Reinforce the role and function of the hubs
- Reduce the need to travel by car

| SA Objective |   | Baseline |      | Trends |        | Effects |         |       |      |      |    | Assessment |    |    |  | Commentary | Mitigation/enhancement |
|--------------|---|----------|------|--------|--------|---------|---------|-------|------|------|----|------------|----|----|--|------------|------------------------|
|              |   | Cond     | Sens | Curr   | Ftre   | Mag     | Scale   | Dur   | T/P  | Cert | ST | MT         | LT | Sm |  |            |                        |
| 1            | To promote economic growth and strengthen and diversify the local economy                                   | Poor     | Med  | Stable | Stable | ✓       | Sub-Reg | MT-LT | Perm | Med  | +  | ++         | ++ | ++ | The availability of effective transport links is key to underpinning economic growth - delivery of infrastructure improvements should convey some benefits.                                |            |                        |
| 2            | To increase levels of local employment and ensure distribution of opportunities                             | Poor     | Med  | Impr   | Stable | -       |         |       |      |      | 0  | 0          | 0  | 0  | There is no clear interrelationship between the policy and the objective.  |            |                        |
| 3            | To enable the development of a strong tourism economy in Blaenau Gwent, complementary to the regional offer | Mod      | Med  | Stable | Stable | ✓       | Sub-Reg | MT-LT | Perm | Med  | +  | ++         | ++ | ++ | Tourism development is heavily reliant upon an effective transportation network - improvements arising from the policy implementation should therefore convey some benefits.               |            |                        |
| 4            | To enhance the viability and vitality of town centres   | Poor     | Med  | Impr   | Impr   | ✓       | Sub-Reg | MT-LT | Perm | Med  | +  | +          | ++ | ++ | In order to ensure that towns are vital and viable, there is a need to have good accessibility - improvements to the latter should therefore convey benefits in response of the objective. |            |                        |
| 5            | To meet identified housing needs  | Poor     | Med  | Stable | Stable | -       | Local   | ST-LT | Perm | High | 0  | 0          | 0  | 0  | There is no clear interrelationship between the policy and the objective.  |            |                        |

|    |   |      |      |        |        |    |         |       |      |      |     |     |     |     |  |
|----|---|------|------|--------|--------|----|---------|-------|------|------|-----|-----|-----|-----|--|
| 6  | To improve the quality of Blaenau Gwent's housing stock   | Poor | Med  | Stable | Stable | -  | Local   | ST-LT | Perm | High | 0   | 0   | 0   | 0   | There is no clear interrelationship between the policy and the objective.  |
| 7  | To secure the delivery and maintenance of quality affordable housing  | Mod  | Med  | Stable | Stable | -  | Local   | ST-LT | Perm | High | 0   | 0   | 0   | 0   | There is no clear interrelationship between the policy and the objective.  |
| 8  | To improve educational attainment and increase skills levels  | Poor | Med  | Impr   | Impr   | -  | Local   | ST-LT | Perm | Med  | 0   | 0   | 0   | 0   | There is no clear interrelationship between the policy and the objective.  |
| 9  | To improve accessibility to education, leisure, employment, health, homes and community services for all sectors of the community | Mod  | Med  | Stable | Stable | ✓✓ | Sub-Reg | ST-LT | Perm | High | ++  | +++ | +++ | +++ | The policy seeks to achieve improved accessibility across Blaenau Gwent and is therefore directly aligned with the objective. Benefits should increase over time.  |
| 10 | To promote community health, social care and well-being   | Poor | Med  | Stable | Stable | ✓  | Local   | MT-LT | Perm | Med  | +   | +   | +   | +   | Insofar as the policy may help to deliver improved accessibility to services and facilities, there is the potential for some localised benefits against the objective.   |
| 11 | To reduce crime, social disorder and fear of crime  | Mod  | Low  | Impr   | Impr   | -  | Local   | ST-LT | Perm | Med  | 0   | 0   | 0   | 0   | There is no clear interrelationship between the policy and the objective.  |
| 12 | To protect and enhance the Welsh culture  | Mod  | Low  | Stable | Stable | -  | Local   | ST-LT | Perm | Med  | 0   | 0   | 0   | 0   | There is no clear interrelationship between the policy and the objective.  |
| 13 | To encourage modal shift from private transport to sustainable transport  | Mod  | Med  | Stable | Stable | ?  | Sub-Reg | ST-LT | Perm | Med  | +/- | +/- | +/- | +/- | The policy addresses transport in a general sense and does not make a distinction between public and private transport modes - as such, there is the potential for the policy to support either, with the resultant effects potentially being mixed in respect of the objective. |
| 14 | To protect and enhance biodiversity across Blaenau Gwent  | Mod  | High | Stable | Impr   | x  | Sub-Reg | MT-LT | Perm | Low  | +/- | +/- | -   | +/- | Theoretically the policy in its current form would support significant new infrastructure development, which could have considerable adverse   |

|    |   |      |      |        |        |  |   |         |       |      |      |  |     |     |     |     |  |  |
|----|---|------|------|--------|--------|--|---|---------|-------|------|------|--|-----|-----|-----|-----|--|--|
|    |   |      |      |        |        |  |   |         |       |      |      |  |     |     |     |     |  | effects against the objective. However, there is insufficient detail to be accurate in such a prediction.  |
| 15 | To conserve and enhance the heritage assets of Blaenau Gwent and their settings   | Poor | High | Decl   | Decl   |  | ? | Sub-Reg | ST-LT | Temp | Low  |  | +/- | +/- | +/- | +/- |  | Dependent upon the precise location and form of development supported by the policy, there is the potential for a range of effects to ensue - there is insufficient detail in the policy to accurately predict effects.  |
| 16 | To make the best use of previously developed land and existing buildings to minimise pressure for greenfield development, where this will not result in damage or loss to biodiversity. | Mod  | Med  | Stable | Stable |  | ? | Sub-Reg | ST-LT | Temp | Low  |  | +/- | +/- | +/- | +/- |  | Insofar as improvements to transport infrastructure may assist in unlocking the development potential of sites, the policy has the potential to deliver a range of positive and negative effects, dependent upon location. There is insufficient detail in the policy to accurately predict effects. |
| 17 | To conserve soil resources and their quality  | Poor | Med  | Stable | Impr   |  | ? | Local   | ST-LT | Perm | Med  |  | +/- | +/- | +/- | +/- |  | The policy in its current form could support considerable new infrastructure development projects and, as such, could have considerable adverse effects against the objective; however, there is insufficient detail in the policy to accurately predict such effects.                               |
| 18 | To reduce emissions of greenhouse gases, in particular carbon dioxide   | Mod  | High | Stable | Impr   |  | x | Reg/Nat | ST-LT | Perm | High |  | -   | --  | --  | -   |  | The policy supports all types of transportation infrastructure development, which is likely to support increased transport movements and therefore, GHG emissions.   |

|    |  |      |      |        |        |  |   |         |       |      |     |  |     |     |     |     |  |  |
|----|--|------|------|--------|--------|--|---|---------|-------|------|-----|--|-----|-----|-----|-----|--|--|
| 19 | To reduce waste generation and maximise reuse and recycling  | Poor | Med  | Decl   | Decl   |  | x | Sub-Reg | MT-LT | Perm | Med |  | -   | --  | --  | -   | The policy is considered likely to support sizeable new infrastructure projects, which will result in considerable waste generation. No reference is made to how such wastes might be treated.   | There is a need for policies involving substantial construction works to be supported by sustainable waste management systems. |
| 20 | To maintain current air quality  | Good | Low  | Stable | Stable |  | x | Local   | ST-LT | Perm | Med |  | +/- | +/- | +/- | +/- | The policy addresses transport in a general sense and does not make a distinction between public and private transport modes - as such, there is the potential for the policy to support either, with the resultant effects potentially being mixed in respect of the objective. |  |
| 21 | To maintain current low levels of vulnerability of all development to flooding                     | Good | High | Stable | Stable |  | ? | Sub-Reg | ST-LT | Perm | Low |  | +/- | +/- | +/- | +/- | The policy in its current form could support considerable new infrastructure development projects and, as such, could have considerable adverse effects against the objective; however, there is insufficient detail in the policy to accurately predict such effects.           |  |
| 22 | To promote the use of sustainably sourced products and resources                                   | ?    | ?    | ?      | ?      |  | - | Local   | ST-LT | Perm | Med |  | 0   | 0   | 0   | 0   | There is no clear interrelationship between the policy and the objective.  |  |
| 23 | To increase energy efficiency and generation and use of renewable energy across the County Borough | ?    | ?    | ?      | ?      |  | - | Local   | ST-LT | Perm | Med |  | 0   | 0   | 0   | 0   | There is no clear interrelationship between the policy and the objective.  |  |
| 24 | To conserve and enhance surface and ground water quality   | Mod  | Med  | Impr   | Impr   |  | ? | Local   | ST-LT | Perm | Low |  | +/- | +/- | +/- | +/- | The policy in its current form could support considerable new infrastructure development projects and, as such, could have considerable adverse effects against the objective; however, there is insufficient detail in the policy to accurately predict such effects.           |  |

|    |   |     |     |        |      |  |   |         |       |      |     |  |     |     |     |     |  |  |
|----|---|-----|-----|--------|------|--|---|---------|-------|------|-----|--|-----|-----|-----|-----|--|--|
| 25 | To protect the quality and character of the landscape and enhance where necessary | Mod | Med | Stable | Decl |  | ? | Sub-Reg | MT-LT | Perm | Med |  | +/- | +/- | +/- | +/- | The policy in its current form could support considerable new infrastructure development projects and, as such, could have considerable adverse effects against the objective; however, there is insufficient detail in the policy to accurately predict such effects. |  |
|----|---|-----|-----|--------|------|--|---|---------|-------|------|-----|--|-----|-----|-----|-----|--|--|

Table F.11 – SA Assessment of SP11

**SP11 - Transport Requirements for new Development**

Development proposals will be assessed in relation to:

- Car parking standards set out in the Council's Car Parking Strategy
- Promotion of public transport, walking and cycling
- Protection of the safety of the highway network
- Accessibility to all users
- Pedestrian safety

| SA Objective |   | Baseline |      | Trends |        | Effects |         |       |      |      |    | Assessment |    |    |    | Commentary   | Mitigation/<br>enhancement |
|--------------|---|----------|------|--------|--------|---------|---------|-------|------|------|----|------------|----|----|----|--|----------------------------|
|              |   | Cond     | Sens | Curr   | Ftre   | Mag     | Scale   | Dur   | T/P  | Cert | ST | MT         | LT | Sm |    |  |                            |
| 1            | To promote economic growth and strengthen and diversify the local economy                                   | Poor     | Med  | Stable | Stable | ✓       | Local   | MT-LT | Perm | Med  |    | ++         | ++ | ++ | ++ | Locating development in areas accessible by a range of transport modes is likely to attract more investors, services and visitors, thus helping to stimulate economic activity.  |                            |
| 2            | To increase levels of local employment and ensure distribution of opportunities                             | Poor     | Med  | Impr   | Stable | ✓       | Local   | MT-LT | Perm | Med  |    | +          | +  | +  | +  | Some indirect positive effects on employment levels are likely, insofar as the policy aims to enhance accessibility for all.   |                            |
| 3            | To enable the development of a strong tourism economy in Blaenau Gwent, complementary to the regional offer | Mod      | Med  | Stable | Stable | ✓✓      | Sub-Reg | MT-LT | Perm | Med  |    | +          | +  | +  | +  | Tourism development may benefit from the improved accessibility by sustainable transport modes.  |                            |
| 4            | To enhance the viability and vitality of town centres   | Poor     | Med  | Impr   | Impr   | ✓✓      | Sub-Reg | MT-LT | Perm | Med  |    | ++         | ++ | ++ | ++ | In order to enhance town centres' vitality and viability, it is important to ensure good accessibility for all users and pedestrian safety. Therefore, this policy should deliver significant benefits against this objective. |                            |
| 5            | To meet identified housing needs  | Poor     | Med  | Stable | Stable | -       |         |       |      |      |    | 0          | 0  | 0  | 0  | There is no clear interrelationship between the policy and the objective.  |                            |
| 6            | To improve the quality of Blaenau Gwent's housing stock   | Poor     | Med  | Stable | Stable | -       |         |       |      |      |    | 0          | 0  | 0  | 0  | There is no clear interrelationship between the policy and the objective.  |                            |

|    |   |      |      |        |        |    |         |       |      |      |  |    |     |     |     |   |
|----|---|------|------|--------|--------|----|---------|-------|------|------|--|----|-----|-----|-----|---|
| 7  | To secure the delivery and maintenance of quality affordable housing  | Mod  | Med  | Stable | Stable | -  |         |       |      |      |  | 0  | 0   | 0   | 0   | There is no clear interrelationship between the policy and the objective.   |
| 8  | To improve educational attainment and increase skills levels  | Poor | Med  | Impr   | Impr   | -  |         |       |      |      |  | 0  | 0   | 0   | 0   | There is no clear interrelationship between the policy and the objective.   |
| 9  | To improve accessibility to education, leisure, employment, health, homes and community services for all sectors of the community | Mod  | Med  | Stable | Stable | ✓✓ | Sub-Reg | ST-LT | Perm | High |  | ++ | +++ | +++ | +++ | The policy is directly concerned with improving accessibility for all users as part of new development. Benefits should increase over time.   |
| 10 | To promote community health, social care and well-being   | Poor | Med  | Stable | Stable | ✓  | Local   | ST-LT | Perm | Med  |  | ++ | ++  | ++  | ++  | Insofar as the policy aims to protect the safety of the highway network, improve accessibility for all users and pedestrian safety, it should have positive effects on community health and social well-being and encourage social integration. |
| 11 | To reduce crime, social disorder and fear of crime  | Mod  | Low  | Impr   | Impr   | -  |         |       |      |      |  | 0  | 0   | 0   | 0   | There is no clear interrelationship between the policy and the objective.   |
| 12 | To protect and enhance the Welsh culture  | Mod  | Low  | Stable | Stable | -  |         |       |      |      |  | 0  | 0   | 0   | 0   | There is no clear interrelationship between the policy and the objective.   |
| 13 | To encourage modal shift from private transport to sustainable transport  | Mod  | Med  | Stable | Stable | ✓✓ | Sub-Reg | ST-LT | Perm | High |  | ++ | ++  | +++ | +++ | The policy is directly concerned with promoting public transport, walking and cycling as part of new development. Benefits should increase over time.   |
| 14 | To protect and enhance biodiversity across Blaenau Gwent  | Mod  | High | Stable | Impr   | -  |         |       |      |      |  | 0  | 0   | 0   | 0   | There is no clear interrelationship between the policy and the objective.   |
| 15 | To conserve and enhance the heritage assets of Blaenau Gwent and their settings   | Poor | High | Decl   | Decl   | -  |         |       |      |      |  | 0  | 0   | 0   | 0   | There is no clear interrelationship between the policy and the objective.   |

|    |   |      |      |        |        |  |    |         |       |      |     |  |   |    |    |    |  |
|----|---|------|------|--------|--------|--|----|---------|-------|------|-----|--|---|----|----|----|--|
| 16 | To make the best use of previously developed land and existing buildings to minimise pressure for greenfield development, where this will not result in damage or loss to biodiversity. | Mod  | Med  | Stable | Stable |  | -  |         |       |      |     |  | 0 | 0  | 0  | 0  | There is no clear interrelationship between the policy and the objective.  |
| 17 | To conserve soil resources and their quality  | Poor | Med  | Stable | Impr   |  | ✓  | Local   | MT-LT | Perm | Med |  | 0 | +  | +  | +  | The policy should help in decoupling transport growth from economic growth and reduce the levels of road transport, which may lead to some reduction in a polluted run off in the longer term. Therefore, there is the potential for some indirect positive effects. |
| 18 | To reduce emissions of greenhouse gases, in particular carbon dioxide   | Mod  | High | Stable | Impr   |  | ✓✓ | Reg/Nat | ST-LT | Perm | Med |  | + | ++ | ++ | ++ | The policy supports more sustainable transport modes, including public transport and non-motorised modes, which should help reduce transport related emissions, including GHG emissions.   |
| 19 | To reduce waste generation and maximise reuse and recycling   | Poor | Med  | Decl   | Decl   |  | -  | Local   | ST-LT | Perm | Med |  | 0 | 0  | 0  | 0  | There is no clear interrelationship between the policy and the objective.  |
| 20 | To maintain current air quality   | Good | Low  | Stable | Stable |  | ✓✓ | Reg/Nat | ST-LT | Perm | Med |  | + | ++ | ++ | ++ | The policy supports more sustainable transport modes, including public transport and non-motorised modes, which should help reduce transport related emissions with benefits for local air quality.  |
| 21 | To maintain current low levels of vulnerability of all development to flooding  | Good | High | Stable | Stable |  | ✓  | Local   | ST-LT | Perm | Low |  | + | +  | +  | +  | The policy promotes more sustainable transport modes, which is not likely to require large-scale new infrastructure development projects and, as such, may have some positive effects against this objective.  |
| 22 | To promote the use of sustainably sourced products and resources  | ?    | ?    | ?      | ?      |  | -  | Local   | ST-LT | Perm | Med |  | 0 | 0  | 0  | 0  | There is no clear interrelationship between the policy and the objective.  |

|    |  |     |     |        |      |    |         |       |      |     |  |   |    |    |    |   |
|----|--|-----|-----|--------|------|----|---------|-------|------|-----|--|---|----|----|----|---|
| 23 | To increase energy efficiency and generation and use of renewable energy across the County Borough | ?   | ?   | ?      | ?    | ✓✓ | Reg/Nat | ST-LT | Perm | Med |  | + | ++ | ++ | ++ | Insofar as the policy promotes the use of sustainable transport modes, this will improve transport energy efficiency in the area and thus will deliver positive effects against this objective.   |
| 24 | To conserve and enhance surface and ground water quality   | Mod | Med | Impr   | Impr | ✓  | Local   | MT-LT | Perm | Med |  | 0 | +  | +  | +  | The policy should help in decoupling transport growth from economic growth and reduce the levels of road transport, which may lead to some reduction in a polluted run off in the longer term. Therefore, there is the potential for some indirect positive effects against this objective. |
| 25 | To protect the quality and character of the landscape and enhance where necessary                  | Mod | Med | Stable | Decl | ✓  | Local   | ST-LT | Perm | Low |  | + | +  | +  | +  | The policy promotes more sustainable transport modes, which is not likely to require large-scale new infrastructure development projects and, as such, may have some positive effects against this objective.   |

Table F.12 – SA Assessment of SP12

**SP12 - Planning Obligations**

The Council will negotiate planning obligations where appropriate to secure improvements in infrastructure, facilities and services appropriate to the scale, type and location of the proposed development. These obligations may include the provision or improvement of the following:

- Affordable Housing
- Traffic, Transport and Highway Initiatives
- Education Facilities
- Community Development and Recreational Facilities
- Public Open Space
- Biodiversity and Geodiversity
- Skills and Labour Market
- Community Safety
- Public Art

| SA Objective |   | Baseline |      | Trends |        | Effects |       |       |      |      |    | Assessment |    |    |   | Commentary | Mitigation/enhancement |
|--------------|---|----------|------|--------|--------|---------|-------|-------|------|------|----|------------|----|----|---|------------|------------------------|
|              |   | Cond     | Sens | Curr   | Ftre   | Mag     | Scale | Dur   | T/P  | Cert | ST | MT         | LT | Sm |   |            |                        |
| 1            | To promote economic growth and strengthen and diversify the local economy                                   | Poor     | Med  | Stable | Stable | ✓✓      | Local | ST-LT | Perm | Med  | +  | ++         | ++ | ++ | Inclusion of provisions for skills and labour market in planning obligations for new developments should strengthen local economy by securing employment and training and developing new infrastructure to support new developments.                                |            |                        |
| 2            | To increase levels of local employment and ensure distribution of opportunities                             | Poor     | Med  | Impr   | Stable | ✓       | Local | ST-LT | Perm | Med  | +  | ++         | ++ | ++ | Insofar as planning obligations may include, where appropriate, provisions for skills and labour market, this may create local businesses opportunities and improve local employment levels.  |            |                        |
| 3            | To enable the development of a strong tourism economy in Blaenau Gwent, complementary to the regional offer | Mod      | Med  | Stable | Stable | ✓       | Local | ST-LT | Perm | Med  | +  | ++         | ++ | ++ | Although this policy is not directly linked with tourism economy, the area's prospects of developing a strong tourism sector will depend on the quality of its environment and infrastructure provision, which should be enhanced by the provisions of this policy. |            |                        |
| 4            | To enhance the viability and vitality of town centres   | Poor     | Med  | Impr   | Impr   | ✓✓      | Local | ST-LT | Perm | Med  | ++ | ++         | ++ | ++ | Provision of supplementary facilities should make new developments more attractive, increasing their as well as town centres' viability and vitality.   |            |                        |
| 5            | To meet identified housing needs  | Poor     | Med  | Stable | Stable | -       | Local | ST-LT | Perm | Med  | 0  | 0          | 0  | 0  | There is no clear interrelationship between the policy and the objective.   |            |                        |
| 6            | To improve the quality of Blaenau   | Poor     | Med  | Stable | Stable | -       | Local | ST-LT | Perm | Med  | 0  | 0          | 0  | 0  | There is no clear interrelationship between the policy and the  |            |                        |

|    |   |      |     |        |        |    |         |       |      |     |  |    |    |    |    |  |   |
|----|---|------|-----|--------|--------|----|---------|-------|------|-----|--|----|----|----|----|--|---|
|    | Gwent's housing stock   |      |     |        |        |    |         |       |      |     |  |    |    |    |    |  | objective.  |
| 7  | To secure the delivery and maintenance of quality affordable housing  | Mod  | Med | Stable | Stable | ✓✓ | Local   | ST-MT | Perm | Med |  | ++ | ++ | +  | ++ |  | As the policy will require the provision of affordable housing for appropriate size and type of the development, this will deliver positive effects against this objective.   |
| 8  | To improve educational attainment and increase skills levels  | Poor | Med | Impr   | Impr   | ✓✓ | Local   | ST-LT | Perm | Med |  | ++ | ++ | ++ | ++ |  | As the policy will require the provision of education facilities and public art for appropriate size, location and type of the development, this should have positive effects on education and skills levels.   |
| 9  | To improve accessibility to education, leisure, employment, health, homes and community services for all sectors of the community | Mod  | Med | Stable | Stable | ✓  | Local   | ST-LT | Perm | Med |  | ++ | ++ | +  | ++ |  | As the policy requires the provision of education, recreation and other community facilities to be part of appropriate new developments it should help improve accessibility to the key services.   |
| 10 | To promote community health, social care and well-being   | Poor | Med | Stable | Stable | ✓✓ | Local   | ST-LT | Perm | Med |  | ++ | ++ | ++ | ++ |  | As the policy will require the provision of community development and recreation facilities and public open space for appropriate size, location and type of the development, this should have positive effects on community health and well-being and encouraging cohesion and a sense of belonging.               |
| 11 | To reduce crime, social disorder and fear of crime  | Mod  | Low | Impr   | Impr   | ✓  | Local   | MT-LT | Perm | Low |  | +  | +  | +  | +  |  | Insofar as the policy involves improvements of community safety, it should help promote interaction between residential and community cohesion by stipulating the provision for various facilities for different age groups. This should have positive effects on social behaviour, crime levels and fear of crime. |
| 12 | To protect and enhance the Welsh culture  | Mod  | Low | Stable | Stable | ✓  | Sub-Reg | MT-LT | Perm | Med |  | +  | +  | +  | +  |  | As the policy stipulates the provision for educational and other facilities, this could complement other policies to support and enhance cultural identity.   |

|    |   |      |      |        |        |  |   |         |       |      |     |  |     |     |     |     |   |  |
|----|---|------|------|--------|--------|--|---|---------|-------|------|-----|--|-----|-----|-----|-----|---|--|
| 13 | To encourage modal shift from private transport to sustainable transport  | Mod  | Med  | Stable | Stable |  | ? | Sub-Reg | ST-LT | Perm | Med |  | +/- | +/- | +/- | +/- | The policy includes the provision for transport initiatives in a general sense but it does not make a distinction between public and private transport modes - as such, there is the potential for the policy to support either. This may lead to a range of both positive and negative effects.  | The policy wording could be strengthened by putting a stronger emphasis on the provision of sustainable transport infrastructure and services. |
| 14 | To protect and enhance biodiversity across Blaenau Gwent  | Mod  | High | Stable | Impr   |  | ✓ | Sub-Reg | MT-LT | Perm | Med |  | +   | +   | +   | +   | As the policy will require biodiversity and geodiversity improvement schemes to be part of an appropriate development, this should have positive effects against this objective.  |  |
| 15 | To conserve and enhance the heritage assets of Blaenau Gwent and their settings   | Poor | High | Decl   | Decl   |  | ✓ | Local   | ST-LT | Perm | Med |  | +   | ++  | ++  | ++  | Provision of public art as part of new development schemes has the potential to enhance the character and visual qualities of the area and improve the settings of heritage assets.   |  |
| 16 | To make the best use of previously developed land and existing buildings to minimise pressure for greenfield development, where this will not result in damage or loss to biodiversity. | Mod  | Med  | Stable | Stable |  | ✓ | Sub-Reg | MT-LT | Perm | Med |  | +   | +   | +   | +   | As the policy will require biodiversity improvement schemes and the provision of public open space to be part of an appropriate development, this should ensure the efficient use of land and have positive effects against this objective.   |  |
| 17 | To conserve soil resources and their quality  | Poor | Med  | Stable | Impr   |  | ✓ | Sub-Reg | MT-LT | Perm | Med |  | +   | +   | +   | +   | As the policy will require biodiversity improvement schemes and the provision of public open space to be part of an appropriate development, this should ensure the efficient use of land and have positive effects against this objective.   |  |
| 18 | To reduce emissions of greenhouse gases, in particular carbon dioxide   | Mod  | High | Stable | Impr   |  | ? | Sub-Reg | ST-LT | Perm | Med |  | +/- | +/- | +/- | +/- | The policy includes the provision for transport initiatives in a general sense but it does not make a distinction between public and private transport modes - as such, there is the potential for the policy to support either. This may result in both increases and relative decreases in transport related emissions, and in particular GHG | The policy wording could be strengthened by putting a stronger emphasis on the provision of sustainable transport infrastructure               |

|    |  |      |      |        |        |   |         |       |      |     |  |     |     |     |     |  |  |  |  |
|----|--|------|------|--------|--------|---|---------|-------|------|-----|--|-----|-----|-----|-----|--|--|--|--|
|    |  |      |      |        |        |   |         |       |      |     |  |     |     |     |     |  |  | emissions, from different developments.  | and services.  |
| 19 | To reduce waste generation and maximise reuse and recycling  | Poor | Med  | Decl   | Decl   | - | Local   | ST-LT | Perm | Med |  | 0   | 0   | 0   | 0   |  |  | There is no clear interrelationship between the policy and the objective, as planning obligations do not include the provision for recycling infrastructure.   |  |
| 20 | To maintain current air quality  | Good | Low  | Stable | Stable | ? | Sub-Reg | ST-LT | Perm | Med |  | +/- | +/- | +/- | +/- |  |  | The policy includes the provision for transport initiatives in a general sense but it does not make a distinction between public and private transport modes - as such, there is the potential for the policy to support either. This may result in both increases and relative decreases in transport related emissions, affecting local air quality. | The policy wording could be strengthened by putting a stronger emphasis on the provision of sustainable transport infrastructure and services. |
| 21 | To maintain current low levels of vulnerability of all development to flooding                     | Good | High | Stable | Stable | - | Local   | ST-LT | Perm | Med |  | 0   | 0   | 0   | 0   |  |  | There is no clear interrelationship between the policy and the objective.  |  |
| 22 | To promote the use of sustainably sourced products and resources                                   | ?    | ?    | ?      | ?      | - | Local   | ST-LT | Perm | Med |  | 0   | 0   | 0   | 0   |  |  | There is no clear interrelationship between the policy and the objective.  |  |
| 23 | To increase energy efficiency and generation and use of renewable energy across the County Borough | ?    | ?    | ?      | ?      | ? | Sub-Reg | ST-LT | Perm | Med |  | +/- | +/- | +/- | +/- |  |  | It is not possible to accurately predict the policy effects on transport efficiency, as the support may be given to both public and private transport. Therefore, the potential effects are mixed in respect of the objective.   |  |
| 24 | To conserve and enhance surface and ground water quality   | Mod  | Med  | Impr   | Impr   | - | Local   | ST-LT | Perm | Med |  | 0   | 0   | 0   | 0   |  |  | There is no clear interrelationship between the policy and the objective.  |  |
| 25 | To protect the quality and character of the landscape and enhance where necessary                  | Mod  | Med  | Stable | Decl   | ✓ | Sub-Reg | MT-LT | Perm | Med |  | +   | ++  | +   | ++  |  |  | Positive effects on the quality of the local landscape and townscape are likely due to the requirements of biodiversity improvement schemes and the provision for public open space as well as public art to be part of appropriate new developments.  |  |

Table F.13 – SA Assessment of SP13

**SP13 - Built and Natural Environment**

The distinctive natural environment of the County Borough will be protected and enhanced. Appropriate development proposals should promote:

- High quality design that reinforces local character, enhances landscape settings, and respects the cultural and historic qualities of individual buildings, landscapes or Conservation Areas;
- Opportunities for the creation, conservation or restoration of designated sites of national and local nature conservation interests.

| SA Objective |   | Baseline |      | Trends |        | Effects |       |       |      |      | Assessment |    |    |    | Commentary | Mitigation/enhancement   |  |
|--------------|---|----------|------|--------|--------|---------|-------|-------|------|------|------------|----|----|----|------------|--|--|
|              |   | Cond     | Sens | Curr   | Ftre   | Mag     | Scale | Dur   | T/P  | Cert | ST         | MT | LT | Sm |            |  |  |
| 1            | To promote economic growth and strengthen and diversify the local economy                                   | Poor     | Med  | Stable | Stable | ✓       | Local | ST-LT | Perm | Med  |            | +  | +  | +  | +          | The enhancement of the natural and built environment is likely to improve the attractiveness of the area, thus potentially attracting inward investment.   |  |
| 2            | To increase levels of local employment and ensure distribution of opportunities                             | Poor     | Med  | Impr   | Stable | ✓       | Local | ST-LT | Perm | Med  |            | +  | +  | +  | +          | The enhancement of the natural and built environment is likely to improve the attractiveness of the area, thus potentially attracting inward investment and subsequent employment opportunities.   |  |
| 3            | To enable the development of a strong tourism economy in Blaenau Gwent, complementary to the regional offer | Mod      | Med  | Stable | Stable | ✓       | Local | ST-LT | Perm | Med  |            | ++ | ++ | ++ | ++         | High quality built design and the protection of the natural environment may help to improve the attractiveness of the area, thus increasing the potential for visitors to the area.  |  |
| 4            | To enhance the viability and vitality of town centres   | Poor     | Med  | Impr   | Impr   | ✓       | Local | ST-LT | Perm | Med  |            | ++ | ++ | ++ | ++         | High quality built design and the protection of the natural environment may help to improve the attractiveness of the area, thus increasing the potential for visitors to the area as well as potential inward investment, which may enhance the vitality and viability of the town centres. |  |
| 5            | To meet identified housing needs  | Poor     | Med  | Stable | Stable | -       |       |       |      |      |            | 0  | 0  | 0  | 0          | There is no clear interrelationship between the policy and the objective.  |  |

|    |   |      |     |        |        |  |   |         |       |      |     |  |   |   |   |   |  |  |
|----|---|------|-----|--------|--------|--|---|---------|-------|------|-----|--|---|---|---|---|--|--|
| 6  | To improve the quality of Blaenau Gwent's housing stock   | Poor | Med | Stable | Stable |  | ✓ | Local   | ST-LT | Perm | Med |  | + | + | + | + | The policy may lead to an improvement in the housing stock of the County Borough.  | The policy should specify what it considers to be 'appropriate' development proposals, including new development as well as changes to existing buildings, especially housing. |
| 7  | To secure the delivery and maintenance of quality affordable housing  | Mod  | Med | Stable | Stable |  | - |         |       |      |     |  | 0 | 0 | 0 | 0 | There is no clear interrelationship between the policy and the objective.  |  |
| 8  | To improve educational attainment and increase skills levels  | Poor | Med | Impr   | Impr   |  | - |         |       |      |     |  | 0 | 0 | 0 | 0 | There is no clear interrelationship between the policy and the objective.  |  |
| 9  | To improve accessibility to education, leisure, employment, health, homes and community services for all sectors of the community | Mod  | Med | Stable | Stable |  | - |         |       |      |     |  | 0 | 0 | 0 | 0 | There is no clear interrelationship between the policy and the objective.  |  |
| 10 | To promote community health, social care and well-being   | Poor | Med | Stable | Stable |  | ✓ | Sub-Reg | MT-LT | Perm | Med |  | + | + | + | + | Indirect positive effects on public health and well being insofar as the policy should help enhance the quality of the environment and engender a greater sense of local identity.   |  |
| 11 | To reduce crime, social disorder and fear of crime  | Mod  | Low | Impr   | Impr   |  | ✓ | Local   | MT-LT | Perm | Low |  | + | + | + | + | Indirect positive effects on crime levels and fear of crime are likely as application of high quality design principles may include designing out crime measures. Engendering a greater sense of local identity and belonging to the local community associated with this policy should also help deliver positive effects against this objective. | The policy should include the need to incorporate methods to design out crime, for example using Secured by Design principles.   |
| 12 | To protect and enhance the Welsh culture  | Mod  | Low | Stable | Stable |  | ✓ | Sub-Reg | MT-LT | Perm | Low |  | + | + | + | + | Design that reinforces local character and respects cultural and historic qualities of individual buildings and Conservation Areas has the   |  |

Table F.14 – SA Assessment of SP14

## SP14- Minerals

The Council will contribute to the regional demand for a continuous supply of minerals by:

- Safeguarding known reserves of coal, sand and gravel, limestone, high quality hard rock taking into account relevant environmental, planning and transportation considerations; and
- Maintaining a 10-year land-bank of permitted aggregate reserves in line with national guidance.

| SA Objective | Baseline  |      | Trends |        | Effects |       |         |       |      |      | Assessment |    |    |   | Commentary  | Mitigation/enhancement |

Table F.15 – SA Assessment of SP15

**SP15 - Waste**

The Council will implement a sustainable, integrated approach to waste management, which minimises the production of waste and its impact on the environment, and maximises the use of unavoidable waste as a resource. To assist this aim the following land-use commitments are made:

- All allocated and protected class B2 industrial sites and existing waste management sites are designated as potentially suitable locations for new waste management facilities, which provides substantial choice in meeting the estimated land requirement of between 1.4 and 4 ha.

| SA Objective |   | Baseline |      | Trends |        | Effects |       |     |     |      | Assessment |    |    |    | Commentary | Mitigation/enhancement  |  |
|--------------|---|----------|------|--------|--------|---------|-------|-----|-----|------|------------|----|----|----|------------|---|--|
|              |   | Cond     | Sens | Curr   | Ftre   | Mag     | Scale | Dur | T/P | Cert | ST         | MT | LT | Sm |            |   |  |

| 14 | To protect and enhance biodiversity across Blaenau Gwent  | Mod  | High | Stable | Impr   |  | ✓ | Local | ST-LT | Perm | Low |  | +/- | +/- | +/- | +/- | Securing of allocations for new waste management facilities at B2 industrial sites and existing waste management sites should help avoid additional land take and negative effects on the local biodiversity in some cases. However, brownfield sites may provide valuable biodiversity habitat, and should be surveyed before use, with mitigation implemented |  |

|    |   |      |      |        |        |  |   |         |       |      |     |  |     |     |     |     |  |  |
|----|---|------|------|--------|--------|--|---|---------|-------|------|-----|--|-----|-----|-----|-----|--|--|
|    |   |      |      |        |        |  |   |         |       |      |     |  |     |     |     |     | where necessary.   |  |
| 15 | To conserve and enhance the heritage assets of Blaenau Gwent and their settings   | Poor | High | Decl   | Decl   |  | ✓ | Local   | ST-LT | Perm | Low |  | +   | +   | +   | +   | Securing of allocations for new waste management facilities at B2 industrial sites and existing waste management sites should help avoid additional land take and potential negative effects on the settings of the local heritage assets.   |  |
| 16 | To make the best use of previously developed land and existing buildings to minimise pressure for greenfield development, where this will not result in damage or loss to biodiversity. | Mod  | Med  | Stable | Stable |  | ✓ | Sub-Reg | ST-LT | Perm | Med |  | +/- | +/- | +/- | +/- | Securing of allocations for new waste management facilities at protected B2 industrial sites and existing waste management sites will ensure the best use of previously developed land and will help avoid additional land take. Brownfield sites may provide valuable biodiversity habitat, and should be surveyed before use, with mitigation implemented where necessary. |  |
| 17 | To conserve soil resources and their quality  | Poor | Med  | Stable | Impr   |  | ✓ | Local   | ST-LT | Perm | Med |  | +   | +   | +   | +   | Securing of allocations for new waste management facilities at protected B2 industrial sites and existing waste management sites may ensure the best use of brownfield sites and protection of land of high agricultural value.  |  |

|    |  |      |      |        |        |  |    |         |       |      |     |  |     |     |     |     |  |  |
|----|--|------|------|--------|--------|--|----|---------|-------|------|-----|--|-----|-----|-----|-----|--|--|
| 18 | To reduce emissions of greenhouse gases, in particular carbon dioxide          | Mod  | High | Stable | Impr   |  | ✓  | Sub-Reg | ST-LT | Perm | Med |  | +   | +   | +   | +   | Adequate provision of sustainable waste management facilities may help to rationalise waste transportation and reduce associated transport emissions. Minimisation of waste production should also help minimise landfill GHGs, i.e. emissions of methane, which have high global warming potential. |  |
| 19 | To reduce waste generation and maximise reuse and recycling                    | Poor | Med  | Decl   | Decl   |  | ✓✓ | Sub-Reg | ST-LT | Perm | Med |  | ++  | ++  | +   | ++  | The policy may further the implementation of waste hierarchy principles through adequate provision of sustainable waste management facilities. However, the success of the policy may depend on the location of the waste management facilities as well as their nature.                             | The policy should specify the types and locations of waste management facilities to be provided. The policy should also specify that all new development should implement measures to ensure that the waste management hierarchy is implemented. |
| 20 | To maintain current air quality  | Good | Low  | Stable | Stable |  | ✓  | Local   | ST-LT | Perm | Med |  | +/- | +/- | +/- | +/- | Expected rationalisation of waste transportation should have positive effects on the local air quality. Incineration facilities may have negative effects on the local air quality but these are not likely to be significant due to the existing strict regulations.                                | The policy should ensure that potential effects of facilities that may generate harmful emissions are carefully assessed and mitigated.  |
| 21 | To maintain current low levels of vulnerability of all development to flooding | Good | High | Stable | Stable |  | ✓  | Local   | ST-LT | Perm | Med |  | -   | -   | -   | -   | An increase in the development of land may lead to an increase in hard surfacing and thus increase the risk of flooding.   |  |
| 22 | To promote the use of sustainably sourced products and resources               | ?    | ?    | ?      | ?      |  | ✓✓ | Sub-Reg | ST-LT | Perm | Med |  | ++  | ++  | ++  | ++  | The policy promotes the use of unavoidable waste as a secondary resource which should deliver benefits against this objective.   |  |

|    |  |     |     |        |      |  |   |         |       |      |     |  |   |   |   |   |   |  |
|----|--|-----|-----|--------|------|--|---|---------|-------|------|-----|--|---|---|---|---|---|--|
| 23 | To increase energy efficiency and generation and use of renewable energy across the County Borough | ?   | ?   | ?      | ?    |  | - |         |       |      |     |  | 0 | 0 | 0 | 0 | There is no clear interrelationship between the policy and the objective.   |  |
| 24 | To conserve and enhance surface and ground water quality   | Mod | Med | Impr   | Impr |  | x | Sub-Reg | ST-MT | Temp | Med |  | - | - | - | - | Increase in numbers of waste management facilities may have potential for ground water pollution.   | The policy should ensure that potential effects of facilities on ground water quality are carefully assessed and mitigated and that there is a provision for monitoring of soil and groundwater quality at waste management sites. |
| 25 | To protect the quality and character of the landscape and enhance where necessary                  | Mod | Med | Stable | Decl |  | x | Local   | ST-MT | Perm | Med |  | - | - | - | - | Landscape effects are likely to be minimal, as new waste management facilities will be located at B2 industrial sites and existing waste management facilities. | The policy should ensure that potential effects of landscape quality are carefully assessed and mitigated.   |
